## Superline Swim Bait Head

Until now, you simply couldn't find a premium, swim bait jig head with a premium Gamakatsu hook. The new Superline Swim Bait Head changes all that. The head profile is streamlined for a natural action. Choose premium painted heads or unpainted for anglers that prefer a do-it-yourself custom look. A heavy wire, 60-degree Superline hook performs optimally with braided line and heavy monofilament. Completing the package, The Spring Lock keeper holds all soft plastic swim baits secure and tight.

Sizes 4/0-1/8, 4/0-3/16, 4/0-1/4, 5/0-3/8, 5/0-1/2.

## Gamakatsu Micro Gap hooks

Offering sport fisherman the ultimate in design, the finest quality forged steel and unparalleled workmanship. Originally designed for finesse presentations for ice fishing, the Micro Gap selections are perfectly suited to many fly tying techniques as well. The fine wire design penetrated with less pressure, lessening tissue damage allowing for easier catch and release.

The **Micro Perfect Gap** hook has an up-eye design for easy snelling and optimal gap for minnows or small plastics.

The **Micro Wide Gap** features a straight hook eye in sizes 10 to 6.

The **Micro V Gap** also features a straight hook eye, but adds a deep V bend to improve retention.

All Micro Gap hooks are finished in NS black.

## Gamakatsu G-Carp Hooks

We've dialed in our carp hook selection to make it the best selling line of hooks in many European countries. There's two simple points that are critical for carp – hide the hook and hold the bait. That's why we've carefully shaped all the new G Carp hooks to hide perfectly concealed within every type of bait. Furthermore, we've included unique micro barbs to grab onto soft dough balls and putty baits and hold them in place.

The new G Carp hook selection includes: **Hump Back** in sizes 10 to 2, the **Specialist R** in sizes 12 to 2, the **Specialist RX** in sizes 12 to 2, and **A-1 Super** in sizes 8 to 1.

All G Carp hooks are forged for strength and feature the innovative Nano Smooth Coat for fast penetration.

## Jig Nymph

This new Gamakatsu Jig Nymph is the only hook you'll need for tying your favorite micro streamers and jig nymphs. In countless tests, the 60-degree eye bend delivers the most natural presentation, but it's also available with a vertical eye. The black matte finish hides well beneath the hackle and hairs, and both barbed and barbless styles are available. The wide bend allows beads and slotted beads to fit right, even tungsten beads.

Available in sizes 10 through 16, Matte Black finish.

**G Finesse...A Ground-Breaking Achievement In Hook Design**  
 Gamakatsu entered the market on the promise of the sharpest hooks produced. It was Gamakatsu that created the "super sharp" hook category and continues to add new application-specific hooks to its offering every year.

"Over my entire career fishing Gamakatsu I envisioned making the best finesse hook in the world. **Gamakatsu's New G Finesse Series combine Ultra Sharp Tournament Grade Wire with Nano Smooth Technology** for the ultimate in hook penetration. This new technology will take my finesse fishing to a whole new level". ~ Aaron Martens

### G Finesse Heavy Cover Worm

The new Aaron Martens Signature G Finesse Heavy Cover Worm hook does what others can't. Extreme versatility. Martens says it best, "This hook let's me do so much, easily the most versatile soft plastics hook on the market".

Featuring Aaron's custom designed keeper that holds plastics tight for endless casts without rips or tears. The rock solid keeper is made of non-corrosive tin, not plastic or lead, so it won't wear out or add unwanted weight. Like all G Finesse hooks, tournament grade wire and Nano Smooth Coat finish perfect the design. Available in sizes 2, 1, 1/0, 2/0, 3/0, 4/0.

### G Finesse Treble Hook MH Hook

G Finesse for big, tough fish that live in the heaviest cover. Aaron Martens frequently chases them and he asked us for medium heavy G Finesse treble to meet those needs. We answered. The new G Finesse Treble MH features a tougher medium heavy, tournament grade wire for additional strength. The same Nano Smooth Coat finish and short shank promote instant hook penetration. Available in Sizes 6, 5, 4, 3, 2, 1, 1/0.

### G Finesse Treble Hook ... Thinner, Stronger, Sharper, Better.

Gamakatsu continues to expand its ground-breaking G Finesse series hooks with the G Finesse Treble Hook. Designed by Bassmaster Elite pro, Aaron Martens, the G Finesse Treble redefines "sharp" and "effective".

Gamakatsu's G Finesse Treble Hook is patterned after traditional O'Shaughnessy style hooks. Aaron has long been a proponent of the O'Shaughnessy hook style with its distinctive acute angle at the bottom of the hook. Martens believes the addition of the O'Shaughnessy bend, hooks and holds fish better than round bend designs. He should know, a past B.A.S.S. Angler of the Year, had three second place finishes in Bassmaster's Classics and is always in the hunt on the Bassmaster Elite Tour. When you fish as much as Aaron does, small details make a big difference. The G Finesse Treble Hooks is available in sizes 6,5,4,3 and 2. Nano Smooth Coat finish.

### Aaron Martens Inspired G Finesse Drop Shot Hook

"I've increased my hook-up percentage by 40% ... I rarely miss a fish with this new drop shot hook. These are the sharpest, strongest, most advanced hooks of their kind on the market."

Martens has been instrumental in the development of Gamakatsu's new G Finesse Drop Shot Hook. Completely "pro-designed", Gamakatsu's new G Finesse series is a giant leap forward in fishing hook technology.

"The new G Finesse Drop Shot Hook is like Gamakatsu's standard Drop Shot Hook except that I had them pull the point more towards the eye to open up the gap. Also, the hook wire, called TGW (Tournament Grade Wire) is a smaller diameter, 20% thinner, but just as strong as their other hooks."

Gamakatsu's G Finesse Drop Shot Hooks are available in sizes, 2, 1, 1/0 and 2/0. Nano Smooth Coat finish.

The Gamakatsu  
Tournament Snap and  
Swivel Shot are Designed  
and endorsed by FLW  
Pro Shinichi Fukae

### G Finesse Worm Light with Tin Keeper

When conditions require finesse, the pros use new G Finesse Worm Light hooks. The light wire allows for threading of extremely small diameter worms with ease. Even the most fragile plastics are less likely to tear, saving on baits and increasing fishing time. The non-corrosive tin keeper doesn't add weight. Like all G Finesse hooks, the Worm Light hook penetrates with significantly less force making them substantially more effective.

Available in sizes 1, 1/0, and 2/0, all with Nano Smooth Coat Finish.

### G Finesse Swivel Shot Drop Shot

The original G Finesse Swivel Shot changed the game and professional anglers were eager to play. Some, like Shin Fukae, recognized the G Finesse advantage but didn't want to break from tradition entirely. The G Finesse Swivel Shot Drop Shot features our top of the line Tournament Grade Wire Drop Shot hook. Both the hook and swivel system feature the benefits of a Nano Smooth Coat finish. Available in sizes 2, 1, 1/0 and 2/0.

### G Finesse Swivel Shot

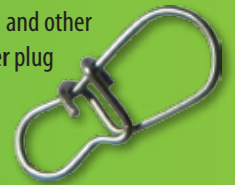

Drop-shot fishing for bass is nothing new but Gamakatsu's approach to it is. Our all-new Swivel Shot eliminates line twist that's commonly associated with drop shotting and vastly improves rigging efficiency. Gamakatsu's produced a revolutionary new "Twist Free" design using a premium swivel above the hook. The hook, a super-sharp Gamakatsu offset point Octopus hook, is strong enough to winch big bass out of slop --- another unique attribute of their Swivel Shot system. The Easy-Change weight system below the hook improves rigging efficiency and easy leader length adjustments without retying your rig. FLW Pro Sinnichi Fukae was instrumental in the development and testing of Gamakatsu's Swivel Shot and shared that it has been an essential element in his tournament success. Without a doubt, the Swivel Shot is an enormous leap forward in drop shot fishing that's sure to maximize angler's efficiency, increase hook-ups and land trophy-sized bass without the worry posed by conventional drop shot hooks and rigging. Available in NS Black. Sizes: 2 - 3/0

### G Finesse Gamakatsu Tournament Snap

Gamakatsu's Tournament Snap is better by design. Primarily used on plugs for bass, walleye, salmon, stripers, steelhead, trout, panfish and other species, Gamakatsu's Tournament Snap is stainless steel and enables a full range of movement, enhancing the effectiveness of whatever plug is used. Better yet, and unlike other plug snaps, Gamakatsu's Tournament Snap will not accidentally open. The clever design of the Tournament Snap stays closed at all times as the plug eye is threaded onto the snap. It's easy and effective! Tested extensively and used under rigorous tournament conditions.

Gamakatsu's Tournament Snaps are available in two sizes, (M) Medium and (L) Large.

### G Finesse Jig Head Wacky

Gamakatsu's Jig Head Wacky is a vast improvement over other wacky jigs. The nickel/titanium weed guard is the first indication that Gamakatsu's raised the bass fishing bar. This weed guard is small but mighty as it effectively clears hazards yet maintains its shape and rigidity under the most demanding use. The jig head is an improvement as well. Better designed to resist snags the hook eye is recessed to prevent getting hung-up in structure. Even the hook is different, a custom addition that's based on a shiner hook but modified for the Jig Head Wacky. The result is a much higher ratio of hook-ups and landed fish than any other comparable brand.

Available in Black and Green Pumpkin. Sizes: 1/0-1/16, 1/0-3/32, 1/0-1/8, 1/0-3/16

# History of Gamakatsu

Gamakatsu started producing fish hooks in 1955. At that time, they were the smallest hook manufacturer in Japan and all of their hooks were made by hand. In 1963 they introduced a new automated heating facility which catapulted them to the forefront of the Japanese market. In 1974, they introduced fully automated hook making machines and found it necessary to build a second factory in order to meet the demand they had created.

In 1976, being well established as the leading Japanese hook manufacturer, Gamakatsu started building a new factory to produce high quality fishing rods for the Japanese market.

After upgrading the hook manufacturing machines in 1986, they expanded their product line. As a result, Gamakatsu Co. Ltd became a major manufacturer with a full line of high quality fishing rods, hooks, apparel, and fishing related items by 1987.

In 1988, after upgrading the automated tempering facilities and expanding the hook factory, Gamakatsu Co. Ltd opened Gamakatsu International Co., Ltd. in Thailand and Gamakatsu Shantou Co. Ltd. in China in 1989.

When anglers purchase Gamakatsu hooks, they are buying an original product made by GAMAKATSU. Many hook suppliers are using fabricated Japanese sounding names bought from several different manufacturers.

## Market Leader GAMAKATSU

Gamakatsu is the leading fish hook manufacturer in Japan. They are constantly testing new materials, trying to improve their product which already sets the standard for the rest of the industry.

In 1992 Gamakatsu USA Inc. was established to provide Gamakatsu brand hooks to the U.S. market. Obviously, Gamakatsu is well on it's way of achieving their goal of becoming the market leader in the USA and the world!

## Environment has our attention

Since 1955, Gamakatsu has strictly stuck to the theme of "Nature and Technology". We work hard to develop new, hi-tech products that benefit the outdoorsman without adversely effecting the environment.

---

*Gamakatsu's policy of technical development has always been "the best of quality". We are always searching for new ways to make our existing products better in addition to constantly looking for unique products which are not yet available. We believe that only this attitude can give our customers the best they deserve!*

## All over the world

Gamakatsu products are used worldwide. With offices located around the world, Gamakatsu is able to research its markets and develop unique products that meet the needs of even the most demanding anglers.

# History of Gamakatsu

## Invention of hooks

20,000 years ago, the invention of the fish hook marked the beginning of sport fishing. The first hooks were made of wood or bones. As technology improved, so did the hooks. Records show that copper hooks were made in Banchen 7,000 years ago and artificial flies were used in Egypt 4,000 years ago. Fishing was also a popular form of entertainment in ancient China.

Today, modern materials and manufacturing techniques have resulted in hundreds of styles of extremely high quality hooks, designed for specific types of fish and fishing methods.

## Quality of hooks

Gamakatsu hooks are the corner stone of the Gamakatsu company, and are famous worldwide. Material and technology are what makes these hooks superior to all other brands. The Gamakatsu company, in conjunction with a material manufacturer, developed a material known as High Carbon steel specifically for the manufacture of fish hooks. This material not only contains a higher percentage of carbon, but also has very few impurities. As a result, GAMAKATSU has earned Anglers' trust throughout the world. The life of a fish hook is measured by the sharpness, hardness, and viscosity of the point. Using low quality materials results in points that are weak and not truly sharp. In order to use High Carbon steel, Gamakatsu developed a unique electronic tempering process which enables hooks to be tempered in a stable condition. As a result, Gamakatsu is able to manufacture consistently high quality, extremely sharp hooks in large quantities.

## Hook producing

The methods used in creating Gamakatsu hooks is what makes it so superior to all other brands. First, only the most premium grade of high carbon steel is used. This insures against any blemishes in the metal which can weaken the hook.

Secondly, Gamakatsu has the most advanced tempering system in the world. Every hook is heated to the exact temperature that is perfect for that particular style and size then cooled in oil. This process produces hooks which are super strong, but not brittle. It is extremely difficult to achieve a balance between strength and flexibility, and it took many years for Gamakatsu to perfect this process.

Finally, and perhaps most importantly, our sharpening process is the most modern in the world, and results in a perfectly conical point that is unequaled in sharpness.

## Simply the best

Gamakatsu's dedication to producing the highest quality fish hook made, as well as the innovation they bring to the industry has kept the company at the forefront of the premium hook market. Among the innovative ideas that Gamakatsu has introduced are:

- Durability - A unique tempering process allowing us to make a hook of superior strength and durability.
- Strength - Hooks made of high carbon steel for superior strength.
- Sharpness - Conically needle honed points that are sharp from the package and stay sharp.
- Color Variation - Colored hooks in red, blue, green, gold, nickel, bronze, black, shrimp and fluorescent colors F-red, F-chartreuse, F-pink, F-orange, F-glow, F-green, F-purple to match the color of your lure or bait.
- Style Variation - Innovative hook designs like the extra wide gap (EWG) that hook and hold fish better.

Gamakatsu makes a hook for any and every fishing situation. So go ahead, tie on a Gamakatsu because it is "Simply the best!"

## Worm Light with Tin Keeper NEW

SIZES		1	1/0	2/0
Nano Smooth Coat	LS	358210	358211	358212

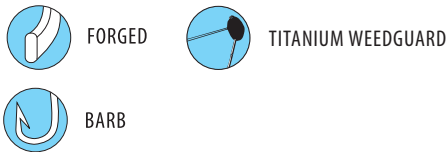

NANO SMOOTH COAT

When conditions require finesse, the pros use new G Finesse Worm Light hooks. The light wire allows for threading of extremely small diameter worms with ease. Even the most fragile plastics are less likely to tear, saving on baits and increasing fishing time. The non-corrosive tin keeper doesn't add weight. Like all G Finesse hooks, the Worm Light hook penetrates with significantly less force making them substantially more effective.

Gold	LS 273201(4)	273202(4)	273203(4)

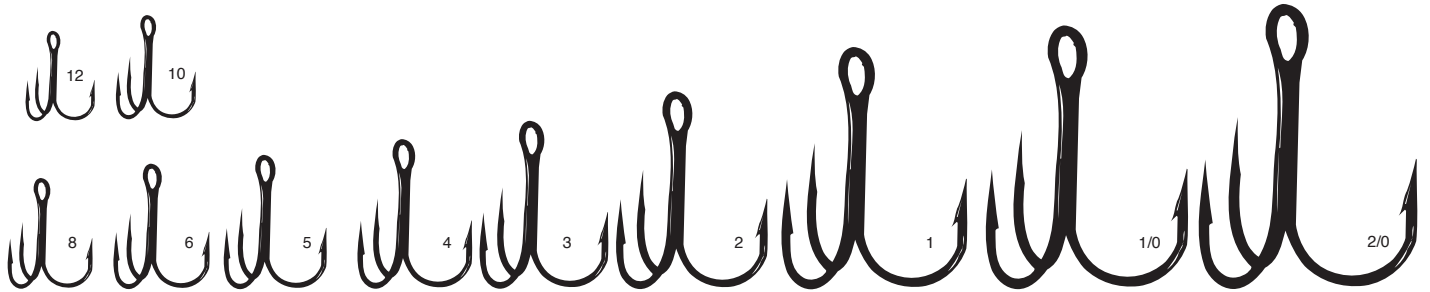

Developed for that discerning trout fishermen in mind. With the advances and popularity of artificial dough and paste type baits, it was only a matter of time that an added extra edge was needed. These high quality, sticky sharp trebles fit the bill. The light wire design will allow your bait to float higher and keep it more in the strike zone. Also, the fine wire design will allow for quick and deeper hook penetration.

EWG - EXTRA WIDE GAP

For crankbaits of all types --- there's nothing better --- it's the perfect replacement hook. First, we opened the points of this treble up slightly for even better hooking performance. The Short Shank EWG Treble converts those fish that slash at your bait into sure hook-ups. The shorter shank and wide gap design provides less room for fish to throw the hook. In fact, this attribute actually wedges the fish between the hook and the crankbait...it's the ultimate in fish holding, which means fish landing performance. That's not all. It also features Gamakatsu's exclusive "Magic Eye" that makes changing hooks a breeze. The hook's inline points run parallel to the bait creating a perfect balance point so your crankbaits run perfectly.

### Octopus Hooks, Light

Gamakatsu answered the call for a fine wire Octopus hook, the Octopus Light for use in drop shot and trout fishing.

Gamakatsu's Octopus Light features an offset beak point for optimal penetration with bait or plastics. The smaller diameter hook wire enhances hook penetration and is a certain advantage when fishing timid or light-biting fish.

The reception to our Big River Bait Hook has been so strong that anglers immediately began asking for a siwash-style hook they could use on their spinners, spoons and plugs for salmon. The answer...this fast penetrating hook holds better than conventional hook designs. When fished barbless (which requires pinching the barb down) it's the best barbless hook you'll find. The unique Big River hook design locks fish in place when hooked. Forged for exceptional strength and built Gamakatsu sharp the Big River Open Eye is sure to make great lures even better.

The advantage of the Big River Open Eye over conventional siwash hooks, is the unique hook design that features an additional bend at the bottom of the hook. This innovative design feature hooks and holds fish tight.

The "Open Eye" feature allows this hook to be easily attached to a split ring, barrel swivel, welded ring or hook hanger simply by closing the eye with a pair of pliers.

Designed to deal with a dough or paste type bait that doesn't want to stay on the hook. The Mesh Baitholder will take care of that problem. A Red Single Egg Hook that has a small piece of Pink nylon mesh material attached near the eye. Simply mold the bait around the shank of the hook and then press the mesh material around the bait. The barb and nylon mesh combined will hold the bait firm and won't allow it to fly off the hook when casting or get nibbled off by pesky bait stealers.

*SuperLine*

An EWG on steroids. This high carbon heavy wire hook was designed to fish braided line in heavy cover. For serious flipping in the tulle's, overhead mats, or pads. The EWG Superline will increase your strike to hook ratio when you need to get nasty.

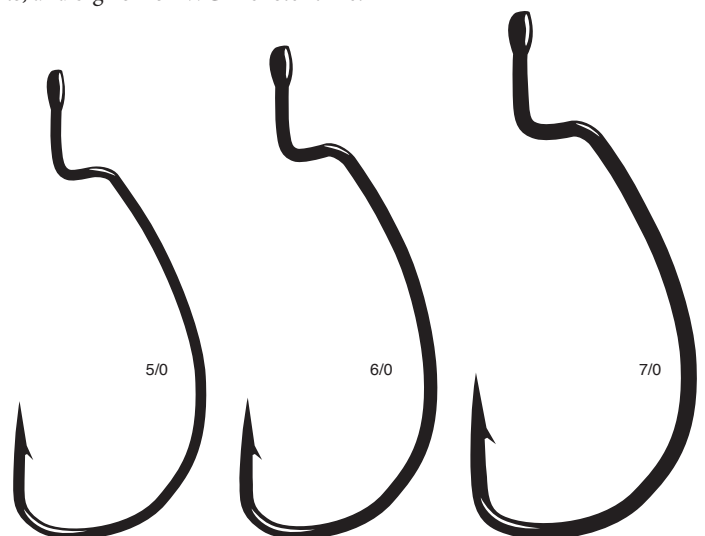

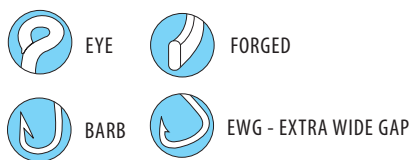

Perfect when you require a quicker descent rate without increasing size or adding weights. Want to turn up the heat with a Senko? Go with a Superline for that deadly quick descent!

## Extra Wide Gap (EWG) Monster

SIZES	5/0	6/0	7/0
<b>NS Black</b>	LS 283415(5)	283416(4)	283417(4)

When only a high carbon heavy wire hook will do your choice should be the EWG Monster. Hard core doesn't even begin to describe the Monster. Slinging a Mission Fish back in the cover? We now have the perfect hook. Loading for bear with a giant Gitzit, Double Wide Beaver, or oversized Slug-O? The Monster has you covered. Headed to El Salto, Clear Lake, or the California Delta for double digit behemoths? Gamakatsu Monster is the choice when you are taking no prisoners. Heavy line, heavy rods, big baits, and big fish is EWG Monster time!

EWG - EXTRA WIDE GAP

There are times when calling up fish requires a little something extra. For this purpose we designed the EWG Ringed Superline. Need to fish a Horny Toad in the slop and want it to walk? Our solid piece ring allows the bait to swing freely. Fishing a Fluke for schooling smallmouth or big spots and want that super erratic action? This is your hook. Handles braided line and heavy monofilament with ease.

<b>Ns Black</b>	LS 306411(3)	306412(3)	306413(3)	306414(3)	306415(3)

The new standard in wacky hook designs. Built on Gamakatsu proven Shiner hook, the Wicked Wacky features a durable hand tied weed guard that provides anglers the confidence to throw their wacky rig in and around heavy cover. In addition the Wicked Wacky takes the power drop shot to a new level. Gamakatsu designed an innovative hollow tube, hand tied on the shank. Simply run the tag end of your line through the tube, tie on your weight, and pitch into the heaviest cover for a whole new power drop shot presentation.

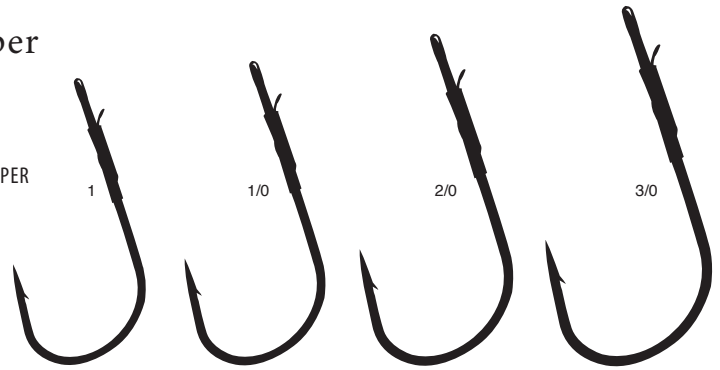

### Finesse Heavy Cover Worm with Wire Keeper

SIZES	1	1/0	2/0	3/0
NS Black	LS 311410(4)	311411(4)	311412(4)	311413(4)

The **Finesse Heavy Cover Worm Hook** is a light wire, finesse hook that features the first wide gap straight shank hook for finesse worm fishing. Just like all the Heavy Cover Hooks the **Finesse** features a welded eye and wire keeper that assures your worm doesn't slide down the hook.

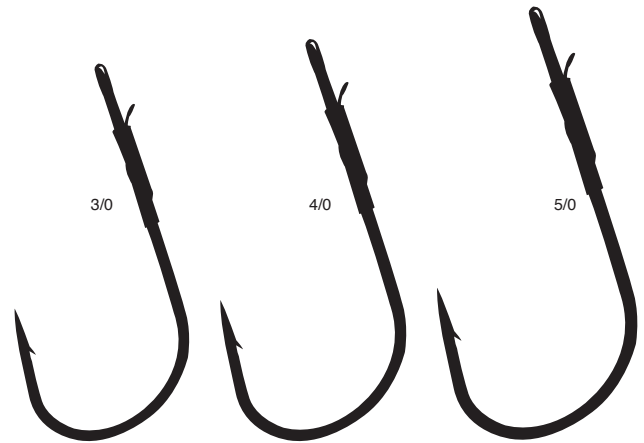

### Heavy Cover Worm with Wire Keeper

SIZES	3/0	4/0	5/0
NS Black	LS 304413(4)	304414(4)	304415(4)

The new standard in Flip hooks has arrived. The new Heavy Cover Worm hook has been built to the highest standards to fight the biggest fish in the heaviest cover. The Heavy Cover Worm features our rock solid welded eye, perfect for tying a Snell knot with braid. Gamakatsu has worked with our top pros to design an improved keeper. Instead of a bulky heat shrink barb, the Heavy Cover Worm features a small wire keeper. The keeper has a small compact profile and is strategically placed for superior holding power.

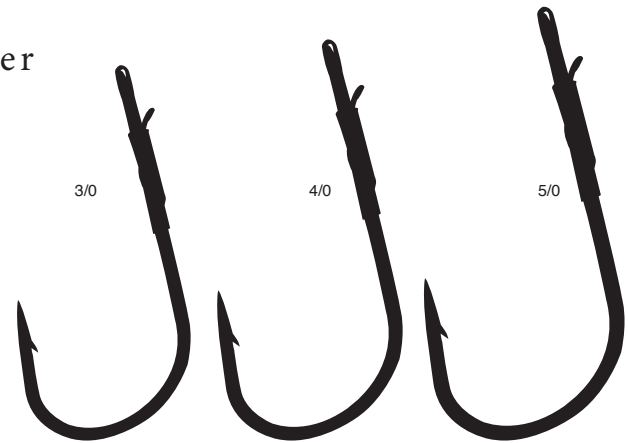

### Super Heavy Cover Worm with Wire Keeper

SIZES	3/0	4/0	5/0
NS Black	LS 310413(4)	310414(4)	310415(4)

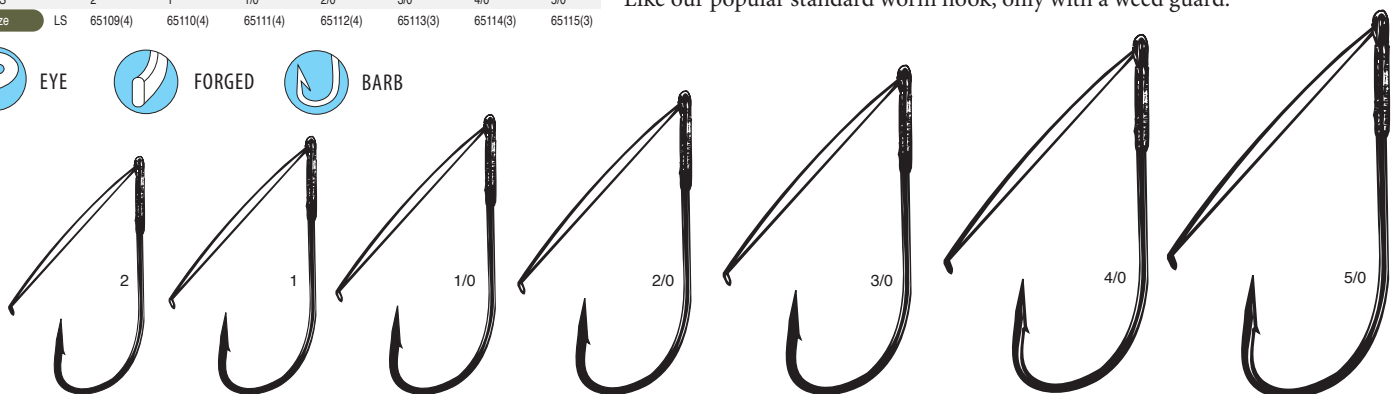

The **Super Heavy Cover Worm Hook** is indestructible with a welded eye and extra heavy duty cold-forged hook wire that will not flex. It's perfect for flipping into heavy cover or punching through thick overhead cover. The addition of an oversized barb holds hooked fish solid and the punch wire/keeper firmly secures worms so they stay rigged cast-after-cast.

### Worm Hooks, Wire Guard

SIZES	2	1	1/0	2/0	3/0	4/0	5/0
Bronze	LS 65109(4)	65110(4)	65111(4)	65112(4)	65113(3)	65114(3)	65115(3)

Like our popular standard worm hook, only with a weed guard.

Offering sport fisherman the ultimate in design, the finest quality forged steel and unparalleled workmanship. Originally designed for finesse presentations for ice fishing, the Micro Gap selections are perfectly suited to many fly tying techniques as well. The fine wire design penetrated with less pressure, lessening tissue damage allowing for easier catch and release fisheries. All Micro Gap hooks are finished in NS black.

The **Micro Perfect Gap** hook has an up-eye design for easy snelling and optimal gap for minnows or small plastics.

The **Micro Wide Gap** features a straight hook eye for minnow and soft plastics.

The **Micro V Gap** also features a straight hook eye, but adds a deep V bend to improve retention.

### Gamakatsu G-Carp Hooks

We've dialed in our carp hook selection to make it the best selling line of hooks in many European countries.

There's two simple points that are critical for carp – hide the hook and hold the bait. That's why we've carefully shaped all the new G Carp hooks to hide perfectly concealed within every type of bait. Furthermore, we've included unique micro barbs to grab onto soft dough balls and putty baits and hold them in place. All G Carp hooks are forged for strength and feature the innovative **Nano Smooth Coat** for fast penetration.

The new G Carp hook selection includes: **Hump Back** in sizes 10 to 2  
**Specialist R** in sizes 12 to 2  
**Specialist RX** in sizes 12 to 2  
**A-1 Super** in sizes 8 to 1

Same design as the Live Bait Heavy Duty, but with a non-offset circle hook point. The perfect hook for giant fish on big chunk baits.

## Nautilus Light

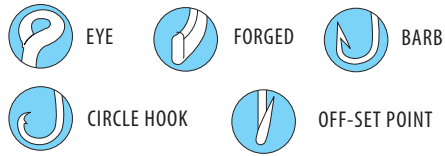

Sizes	2	1	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0
Ns Black	332409(8)	332410(8)	332411(7)	332412(6)	332413(5)	332414(5)	332415(4)	332416(3)	332417(3)	332418(3)

A light wire hook that was developed for fishing fragile live baits. Produced from forged high carbon steel, it features a straight eye and offset point for superior hooking performance. The unique circle hook shape is designed to hook and hold which is precisely why more saltwater anglers make Gamakatsu their hook-of-choice. Superior strength, sharpness and design add-up to make a sure bet for live bait and chunk bait anglers from coast-to-coast.

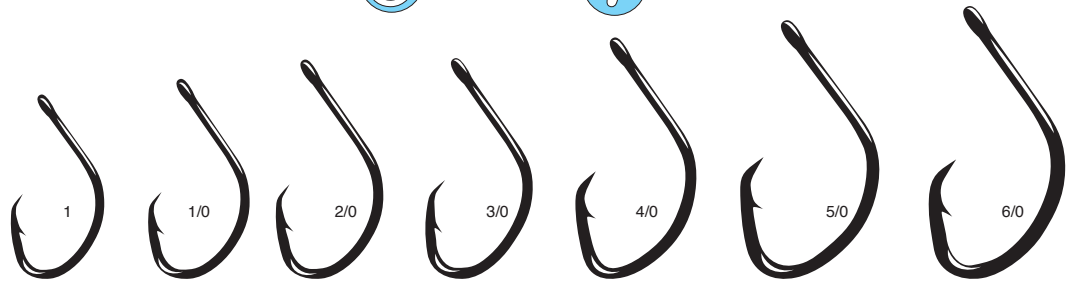

### Nautilus Circle Hooks

SIZES	1	1/0	2/0	3/0	4/0	5/0	6/0

Ns Black	LS 272414(6)	272415(6)	272416(6)	272417(5)	272418(4)	272419(4)	272420(3)	272421(2)

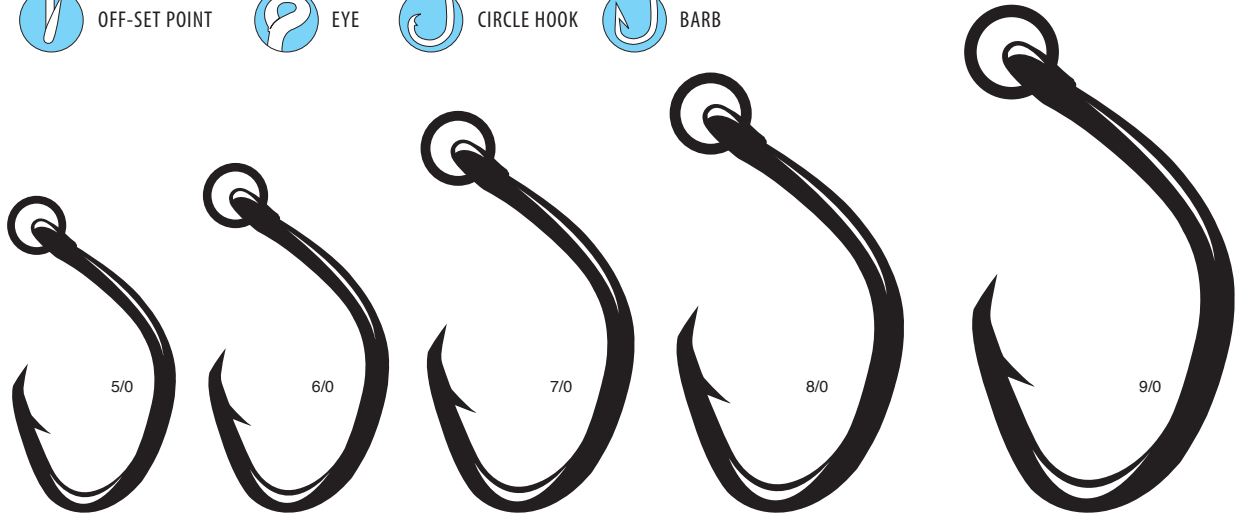

Made of high carbon steel, it's a heavier wire hook than our standard "Nautilus" and forged for quality and added strength. This hook has become a favorite amongst demanding saltwater fishermen.

## Super Nautilus Circle Hooks with Ring

SIZES	5/0	6/0	7/0	8/0	9/0
NS Black	LS 272415R(6)	272416R(6)	272417R(5)	272418R(4)	272419R(4)

Our newest addition to the Nautilus series of saltwater hooks. Based on the proven Nautilus circle design, the ringed version will only add to its reliable reputation. The welded stainless steel ring allows the live bait to swim in a more natural presentation and the circle hook design will hook up in the corner of the mouth to avoid deep hook sets and avoid line abrasion from toothy fish.

## Octopus Hooks, Circle 4x Strong, Straight Eye

SIZES	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0
NS Black	LS 209411(6)	209412(6)	209413(6)	209414(6)	209415(6)	209416(6)	209417(6)	209418(6)
NS Black	25				209415-25	209416-25	209417-25	209418-25

This hook is designed for heavier lines and bigger fish. The offset point makes it a good choice for many chunk bait situations.

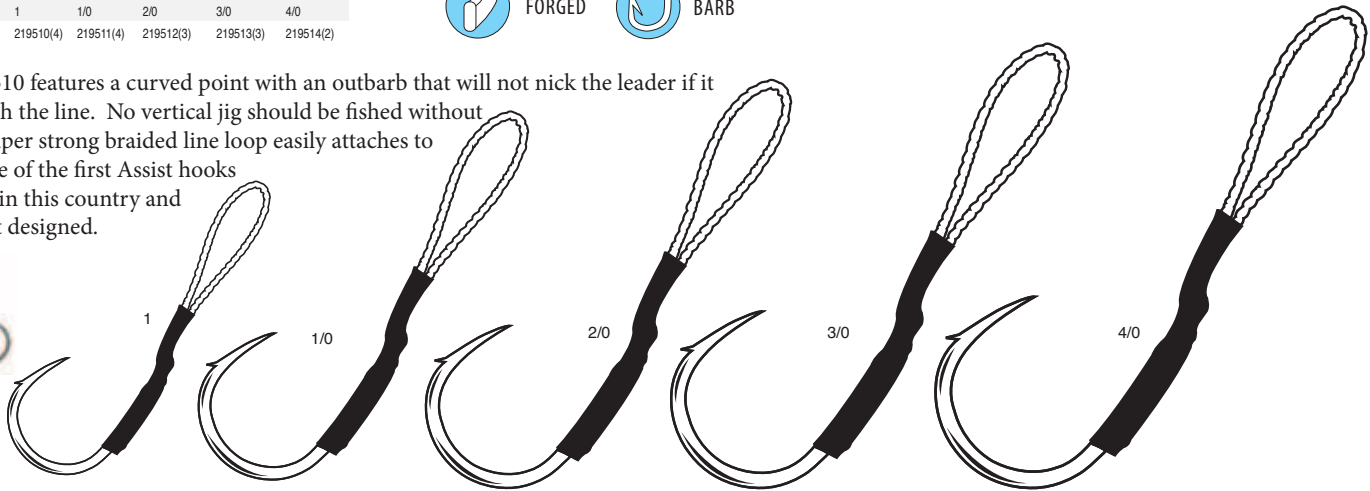

### Assist Hook 510

SIZES	1	1/0	2/0	3/0	4/0
Tin	LS 219510(4)	219511(4)	219512(3)	219513(3)	219514(2)

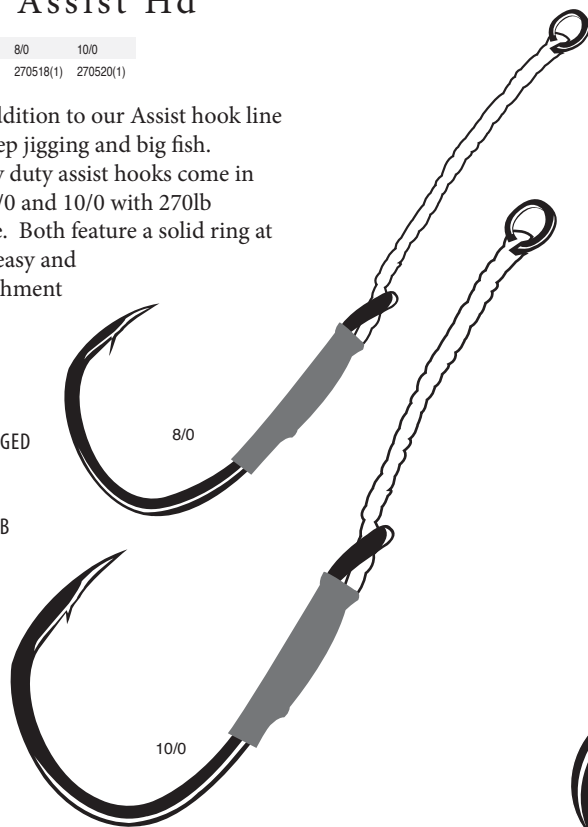

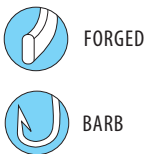

The Assist 510 features a curved point with an outbarb that will not nick the leader if it were to catch the line. No vertical jig should be fished without one. The super strong braided line loop easily attaches to any jig. One of the first Assist hooks introduced in this country and still the best designed.

### Tuned Assist Hd

SIZES	8/0	10/0
Tin	LS 270518(1)	270520(1)

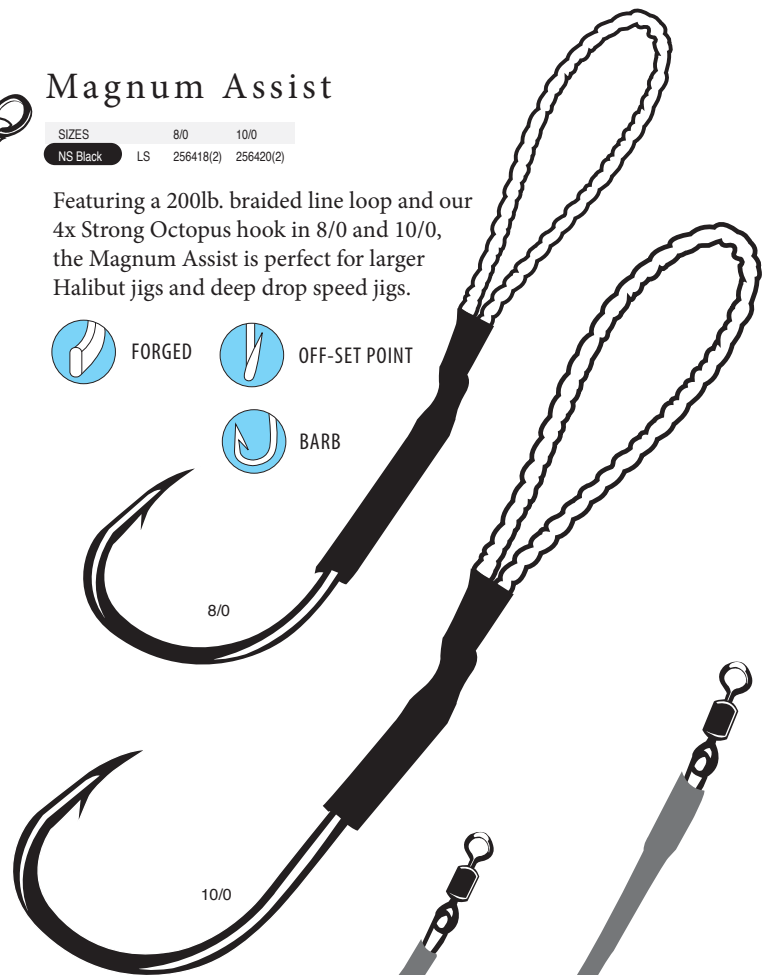

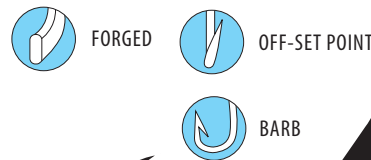

This new addition to our Assist hook line up is for deep jigging and big fish. These heavy duty assist hooks come in two sizes, 8/0 and 10/0 with 270lb braided line. Both feature a solid ring at the top for easy and secure attachment to the jig.

### Magnum Assist

SIZES	8/0	10/0
NS Black	LS 256418(2)	256420(2)

Featuring a 200lb. braided line loop and our 4x Strong Octopus hook in 8/0 and 10/0, the Magnum Assist is perfect for larger Halibut jigs and deep drop speed jigs.

### Steel Assist With Magic Eye Swivel

SIZES	3/0	5/0
NS Black	LS 269413(2)	269415(2)

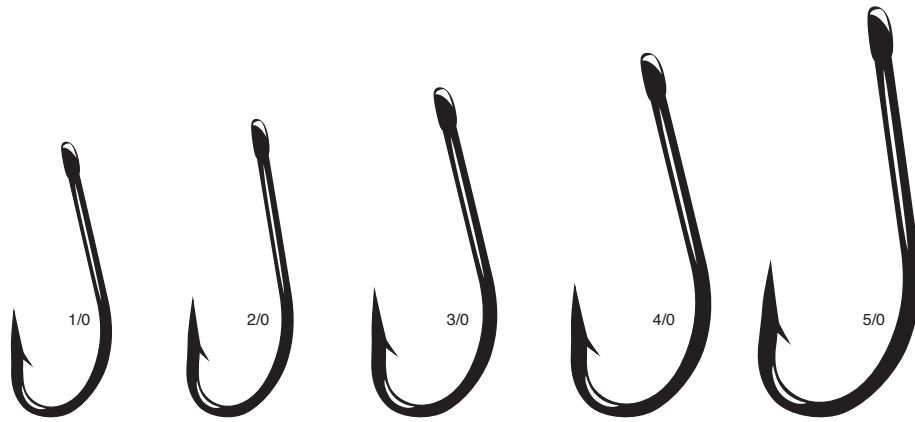

Don't sacrifice your favorite jig to toothy fish like Wahoo and Mackerel. This Assist Hook features our Magic Eye Swivel for fast and easy attachment to the split ring on any jig. No pliers needed. 90lb. wire and a 4x Strong Straight Eye Octopus hook make this the ultimate big game, toothy fish Assist hook. Comes in a 3/0 short version and 5/0 long version for bigger jigs.

Two red hooks snelled about 1 inch apart to 6 ft piece of premium monofilament. Perfect for fishing salmon egg clusters.

As barbless hook regulations expand, Gamakatsu has met the challenge with a better designed, sharper and stronger Barbless Octopus hook. Designed expressly for the application, Gamakatsu's Barbless Octopus hooks feature a slightly wider gap that provides better fish-holding benefits than traditional barbed Octopus hooks. These hooks comply with state regulations requiring "barbless hooks". Proven effective for a variety of species, Gamakatsu's Barbless hooks are now available in pre-tied mooching rigs. Tied on premium monofilament line with 6 foot leaders, Gamakatsu Barbless Mooching Rigs are packaged individually.

Live Bait Hook or Treble

#### How to use the nose ring

This rig will adjust to any size bait, holds the bait firm and allows for a natural presentation.

Gently slide the nose ring through the nasal cavity of the baitfish

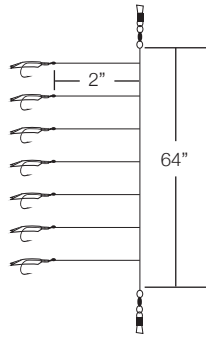

Place the hook near the tail of the baitfish leaving some slack between the tubing and the hook.

Push the peg into the tubing to hold the line in place. A toothpick can also be used.

Gamakatsu is known for its innovative and functional designs, the "Wacky Head" jig is no exception. With its unique flat shape, the "Wacky Head" will entice the finickiest of biters with its side to side rolling type action. Also to add to its attraction is the red epoxy head, and a short shank wide gap designed hook.

## Skip Gap Head

SIZES	3/0-1/8	3/0-3/16	4/0-3/16	4/0-1/4
Brown	293413-BR-1/8(4)	293413-BR-3/16(4)	293414-BR-3/16(4)	293414-BR-1/4(4)
Green Pumpkin	293413-GP-1/8(4)	293413-GP-3/16(4)	293414-GP-3/16(4)	293414-GP-1/4(4)

Gamakatsu has developed it's own jig head based on the Skip Gap worm hook. It has the same innovative bend that holds your bait secure on the hook. There are no barbs or pegs that can tear apart a small finesse worm. The unique bend lends itself to simplicity and will change the way you shaky fish.

## Stand Up Alien Head

SIZES	3/0-1/8	3/0-3/16	3/0-1/4	3/0-5/16
NS Black	309413-BK-1/8(4)	309413-BK-3/16(4)	309413-BK-1/4(4)	309413-BK-5/16(4)
Green Pumpkin	309413-GP-1/8(4)	309413-GP-3/16(4)	309413-GP-1/4(4)	309413-GP-5/16(4)

Looking for the quintessential stand-up jig head? Gamakatsu's developed the answer with its all-new Stand-Up Alien Head. Perfect for rock or hard bottom fishing, The innovative keeper pin holds plastics without tearing. The benefit is a better presentation, more casts and more mileage out of your plastics. Features a NS Black finesse hook and is available in Green Pumpkin and Black jig heads.

## Superline Swim Bait Head

**NEW**

**SuperLine**

Until now, you simply couldn't find a premium, swim bait jig head with a premium Gamakatsu hook. The new Superline Swim Bait Head changes all that. The head profile is streamlined for a natural action. Choose premium painted heads or unpainted for anglers that prefer a do-it-yourself custom look. A heavy wire, 60-degree Superline hook performs optimally with braided line and heavy monofilament. Completing the package, The Spring Lock keeper holds all soft plastic swim baits secure and tight.

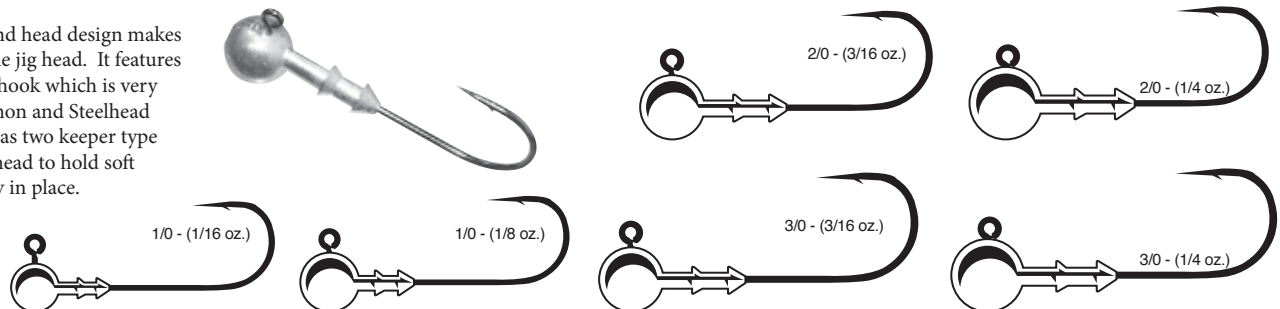

## Round 26

SIZES	1/0	1/0	2/0	2/0	3/0	3/0
WEIGHT	LS 1/16	1/8	3/16	1/4	3/16	1/4
	500411-1/6(5)	500411-1/8(5)	500412-3/16(5)	500412-1/4(5)	500413-3/16(5)	500413-1/4(5)

The standard round head design makes this a very versatile jig head. It features our 604 series jig hook which is very popular with Salmon and Steelhead anglers and also has two keeper type rings behind the head to hold soft plastic baits firmly in place.

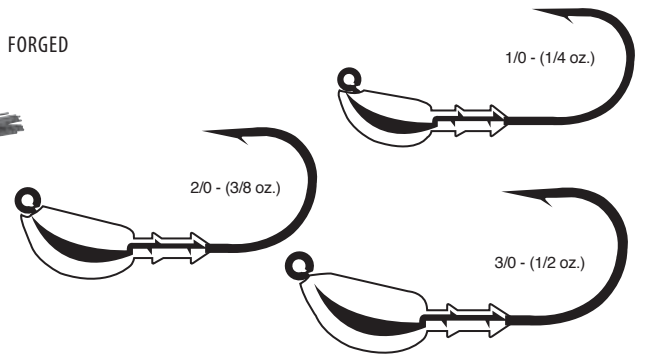

### Cobra 27

SIZES	1/0	2/0	3/0
WEIGHT LS	1/4	3/8	1/2
	504411-1/4(5)	504412-3/8(5)	504413-1/2(5)

5 Nylon Brush Guards Included

Named for its unique head design, the Cobra 27 comes with optional nylon brush guards for weedless presentations. It features a very stout 60 degree jig hook and is great for building your own Bass jigs or for fishing plastic baits in saltwater for inshore fish like Redfish and Speckled Trout.

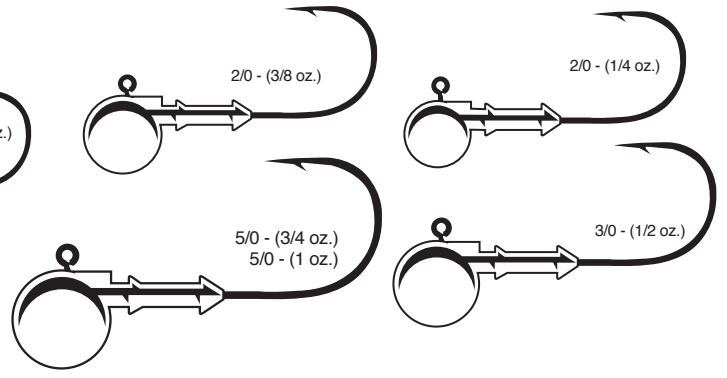

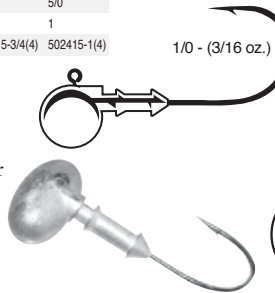

### Football 24

SIZES	1/0	2/0	2/0	3/0	5/0	5/0
WEIGHT LS	3/16	1/4	3/8	1/2	3/4	1
	502411-3/16(5)	502412-1/4(5)	502412-3/8(5)	502413-1/2(5)	502415-3/4(4)	502415-1(4)

The Football 24 is the choice when fishing around rock or ledges. It is designed to be very snag resistant.

The 24 is the way to go when dragging a Hula Grub or Beaver on deep structure. The 24 features a fine wire hook for fast penetration.

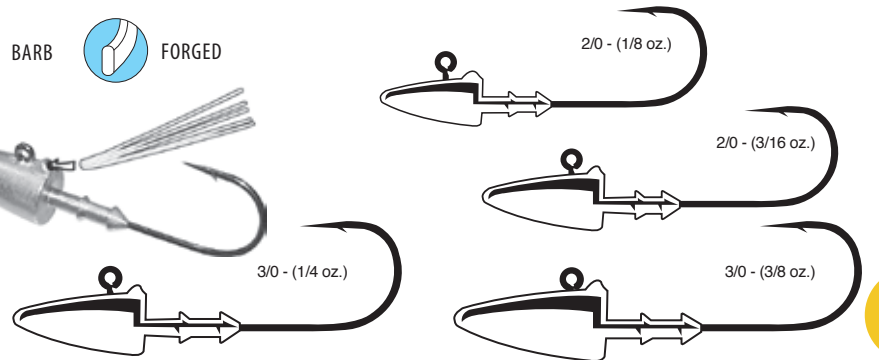

### Darter 26

SIZES	2/0	2/0	3/0	3/0
WEIGHT LS	1/8	3/16	1/4	3/8
	505412-1/8(5)	505412-3/16(5)	505413-1/4(5)	505413-3/8(5)

5 Nylon Brush Guards Included

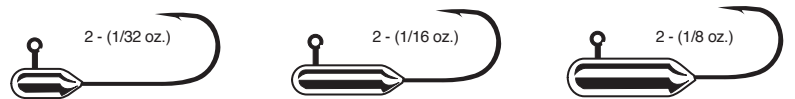

This jig comes with optional nylon brush guards and features a heavy duty 90 degree jig hook. The streamlined head design makes it ideal in both fresh and saltwater applications.

### Tube Head

SIZES	2	2	2
WEIGHT LS	1/32	1/16	1/8
	503409-1/32(5)	503409-1/16(5)	503409-1/8(5)

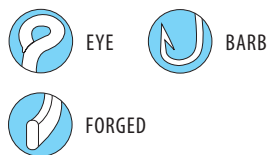

The ultimate finesse tube head design for precise presentations and smaller baits. Comes on a strong, sticky sharp NS black hook that ensures solid hook ups.

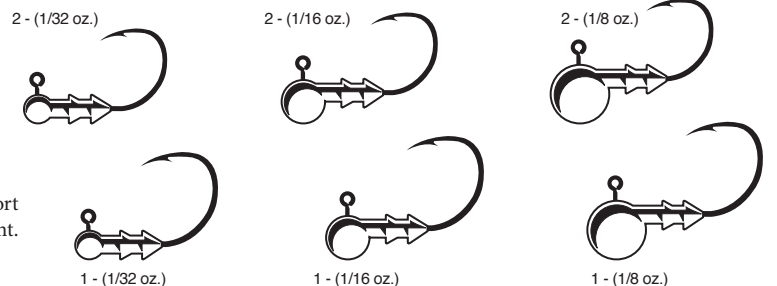

### Round 211

SIZES	2	2	2
WEIGHT LS	1/32	1/16	1/8
	501409-1/32(5)	501409-1/16(5)	501409-1/8(5)

WEIGHT LS	1/32	1/16	1/8
	501410-1/32(5)	501410-1/16(5)	501410-1/8(5)

A totally unique design with a short shank and a matte black beak point. Great for live and finesse baits.

# Float, Finger Protector and Packaging

Easily the most unique lighted float on the market. The soft rubber tip makes it extremely durable and the visual range of over 100 yards makes it the most visible at night. One little Gamakatsu pin battery can light this float for well over 24 hours of continuous use.

**Gamakatsu** has been making premium quality hooks since 1955. Every hook is made using Gamakatsu's own high quality, high carbon steel and is meticulously crafted to the highest of standards. Unlike other hook manufacturers, Gamakatsu hooks are made in their own facility which is one of the most technologically advanced in the world and their consistency is unmatched. What you'll find in this catalog are 46 styles of super sharp, super strong fly hooks made for the serious fly tyer and fly angler who will settle for nothing but the best. While an investment in a good fly rod, fly reel, fly line and the knowledge on how to properly use them can enhance the fly fishing experience, the hook is the one piece of equipment at the end of it all that has to hang on to the object of pursuit. Don't settle for anything less than Gamakatsu quality.

**The Executive Series**

Executive Series fly hooks offer some very unique designs like the R10B Retainer Bend and the C13U Keel Balance. Hooks like the S10 series of hooks have beak points that allow for effortless penetration, especially with light tippets and a slightly wider gap. They also have a shank length just a little longer than standard dry fly hooks. While the R10B and C13U are matte black, the B10S Stinger hooks and the rest of the Executive series have a beautiful NS Black finish that not only looks good, but is also very corrosion resistant. There's no other hook series like it.

**Traditional Series**

The Traditional Series hooks are mostly all bronze finished, have needle points, and are designed to match up in style and size with other popular hook brands. The key difference being the quality of the steel used in them and the sharpness of the hook. The Traditional Series hooks also feature the traditional Salmon/Steelhead tapered loop up eye hooks, but in non-traditional finishes like Blue, Red, and Green in addition to the traditional NS Black finish. The styles all match, but the quality is unmatched.

**Saltwater Series**

By far and away the finest selection of Saltwater fly hooks available. 9 styles featuring our most popular SC15 and other hooks ranging in sizes from 18 to 10/0. The SC15 is used for many different patterns but is also a great hook for tube flies. The SP11-3L3H makes a great popper hook. There's a hook style for every saltwater application imaginable. Every Saltwater Series fly hook is made from the highest quality high carbon steel and has a durable tin plating or NS black finish for corrosion resistance. Because of the steel used, even the 3x strong hooks are surprisingly light for their size and their strength is unparalleled. These hooks will hold a point much better than stainless steel hooks and are sticky sharp right out of the bag. No sharpening is ever needed before fishing with a Gamakatsu hook and because they're not stainless, they will eventually corrode out of a fish's mouth if the hook is taken deep and cannot be removed. From the flats to blue water, there's no hook selection better than this.
