.....

The creation of K-Karp products starts from the ideas of the K-Karp team. Our testers spend most of their time on the banks of rivers and lakes in a constant search for new techniques and innovative solutions, which are then transformed into the new products we offer our public. There are no better experts in the world to develop fishing equipment.

K-Karp also has a special department that takes the idea behind every product and develops it using the best materials and the latest design technologies. Just after months of work and testing to eliminate the smallest defects, our products are ready to be marketed. K-Karp's way of work extends this process to all its main products, reels, rods, pods, luggage and accessories.

Only those products that pass the tests carried out in the field and quality controls on materials are put into production. In these pages you will find the result of our labour at your disposal for the greatest sport in the world...Carpfishing. Visit our website and read the leading specialist journals to keep you up to date on news and the launch of new products.

.....

**LIFE TIME WARRANTY.** K-Karp products are marketed only after strict quality controls to certify the strength characteristics established by our experts have been carried out. For this reason all K-Karp rods carry a LIFE TIME WARRANTY - that is to say they have an unlimited warranty. Part substitution or repairs are at the discretion of K-Karp International. Damage such as: scratches, deliberate breaking, total or partial loss of sections or of the entire rod are not covered in the Warranty. TRABUCCO FISHING DIFFUSION is the exclusive distributor of all K-Karp products. To avoid any possible misunderstanding, the warranty can only be applied if: • A defect caused by a bad assembly or by a wrong assemblage of the rod. This type of defect must be pointed out at the rod purchase time. • A defect in the carbon fabric due to defects in the carbon blank. Obviously, even within a LIFE TIME WARRANTY, the use of the rod over an extended period defines the progressive lowering of the warranty until its end. If the rod was been purchased many years ago, but is in a quite new/good condition, the warranty is valid. It is almost impossible that a rod can break because of a manufacturing defect if it has been used a lot of times and for many years. This is because obviously the fault or defect would have come to light earlier. In this case the break might be caused by crushing or by impact or by improper use of the rod. In this case so the warranty will not be valid.

It must be clear that TRABUCCO F.D. and K-Karp international will not replace rods that have been accidentally broken. All breakages, with or without warranty, will be evaluated by TRABUCCO F.D. The complete rod, even if broken, must be totally returned. The broken part will be substituted with a new one at a charge of 40% of the price of the rod if the damaged part is the top, and 60% if the damaged part is the handle. For three section rods, broken parts will be substituted at a charge of 40% of the price of the rod. Prices calculated by referral to the official price list. In a case of recognized breaking, a charge of 10% of the total price of the rod will be made in addition to a 25 handling charge. In this case the complete rod must be sent to Trabucco Fishing Diffusion by mail together with: the original receipt, and proof of payment of the 25 handling charge. Transport or freight costs will be paid by the purchaser. K-Karp will provide (in about 10 working days) to repair or substitute the rod and return it. All transport charges to be paid by the customer. All charges referred to here are to be paid in advance by credit card or postal order.

# RODS

## Reaction

We cannot hide we are studying this rod since years and now we are proud to offer it to our followers as a K-Karp top rod . It is made in HM Reinforced Carbon , the only material that allows fast casting and striking performance, but still staying soft and funny during every fish fight, having a typically parabolic and progressive action. Prerogative of this rod is having a power reserve almost "endless", ideal feature for fights to the limit or when fishing light tackle. In these situations a stiffer rod could produce a very negative effect to the fight. It can be defined as "the ultimate rod", suitable to the carpers who needs a rod proportioned to the vast majority of fishing spots, maintaining sobriety and style in a

burgundy translucent finish matched with small handmade with maniacal precision details. The super slim blank is equipped with genuine Fuji screw reel seat and double leg SIC guides, that can be used with braided lines. The 12' model displays as a first guide a diameter 40mm guide, while the 13' a 50mm, more suitable for long casting action. High density EVA handle ensures a perfect grip in every condition.

158-85-360	Reaction 12'0"	2	3.00 lb
158-85-390	Reaction 13'0"	2	3.50 lb

## Enigma

Born and built with materials of last generation as the Radial Fused Carbon combined in some parts of the blank, handle and plug, with the precious Nano Carbon: this particular and unique combination has allowed us to obtain very thin rods, fast and lightweight. As usual for K-Karp all the components are selected from the best available in the market. Double leg SIC guides, Fuji reel seat and Carbon line clip. The four different sizes available can cover all the different situation of the European carp fishing,

from small lakes to big river. The handle is made in HDE, the best material available for comfort and grip. Steel cap on the but with K-Karp logo.

# CARP RODS

Real carp fishing enthusiasts with the most cutting edge equipment know that the tool that makes the difference is the rod. This is why so many of them already own K-Karp rods.

All models, irrespective of their cost, have been designed and stringently tested to give the very best performance possible. Distance, precision and strength, these rods have all the characteristics that can be desired. Every model has new features, such as the new epoxy varnishes used for the bindings, the latest K-Karp anatomic reel-seat to provide maximum comfort and perfect grip during casting and fighting, the quality of Fuji guides and the new tying system that stays clean and unaltered over time.

If you are an expert carp fisherman who wants to excel, or just an average enthusiast who wants to improve performance, these rods are the right choice for you.

NEW

# CARP RODS

## Trinis

New Gold Series designed for those who are not satisfied with just average performance. This series is constructed in Mesh Carbon to guarantee extraordinary casting performance and an effective progressive action during fighting. Characterized by an elegant look, they are fitted with oversized guides and top guide suitable for long range, ergonomic Fuji reel seat, EVA handle to ensure optimal grip during casting and recovery. Distance, precision and strength, these rods have everything you could wish for.

158-66-390	Trinis 13'0"	2	3.00 lb

## Attraction

K-Karp now offers its clients a new rod that combines the most rigid dictates of the British manufacturer and the modern technical innovations on materials. Using these standards we have developed a rod with parabolic action that has the simple minimalist look that is the trend of today identified at first glance by its green colour and translucent ultra slim sections. The materials used are first class: the blank is built entirely in carbon SHM while the guides and reel seats are Fuji originals, the brand that represents the very best in terms of quality. The overall look is enhanced by the handle which uses a special shrink tube, and a classy laser-engraved metal cap.

158-70-390	Attraction 13'0"	2	3.00lbs

## Enemy

This new model features an incredibly slim and fast blank, as a matter of fact the diameter is only 13mm ! While testing we stressed this rod to the limit, both while casting and fighting fish. The fast parabolic action help to secure rod hold even when playing big fish under the rod tip. Very "fresh" and attractive graphics, SIC low frame guides, these rods are available in 12" in 3.00lbs and 3.50lbs, 13" version only in 3.00lbs test curve.

## NEW Violence LD

Rod series dedicated to challenging fishing conditions. It follows the same criteria of previous models but showing significant improvements especially appreciated by extreme fishing conditions lovers. We actually produced the blank using Reverse Radial Carbon, increasing rod rapidity and resistance but maintaining a distinctly parabolic progressive action. It is therefore the ideal rod for casting and long range fishing, being possible to manage the long ranged fight at best. In order to have better casting performance we equipped this rod with double leg SiC guides, starting from a diameter 50mm. The dark blue cosmetic and the countless accurate details give to the Violence D a simple but endearing look.

# CARP RODS

## Adamant XTC

NEW

This rod has been made specifically for the carp anglers who love to fish in the wider continental waters, river or lakes. The XTC acronym stands for Extreme cast, a forced name given after the extended testing we made with this rod. The tip action hides a great adaptability of the blank mainly during combat, which makes it look like a classic parabolic progressive while maintaining long casting capability. Our tester achieved surprising great casting distances right with this blank, thanks solely to the Radial Reverse Carbon construction, a peculiar carbon with unique reactivity property. The first guide is a 50mm SiC guides, and it could

not be other than this since we are speaking about a long casting rod, allowing the line to exit the spool of the reel without being strangled by a too small guide. We used handmade wrappings and protection rings to complete and make it even more nice the finish of Adamant XTC. Butt section is equipped with the exclusive protection knob laser engraved with K-Karp logo.

Code	Description	Sections	Test Curve
158-82-360	Adamant XTC 12'0"	2	3.00lb
158-82-390	Adamant XTC 13'0"	2	3.50lb

## Fusion Spod

The original name for this rod comes from the special carbon used: the Radial Fused Carbon, which is known for its qualities of strength and speed. The SiC Ultralight guides ensure lightness and offer extreme casting power, drastically decreasing the resistance on the line. The 5lb version is designed to cast big spod or bait rocket, while the 4lb, in addition to doing the same job, can be used with large marker during the delicate phases of plumbing. On both versions a visual signal has been applied (at one meter from the base) to facilitate measuring the depth of the bottom. The blank has been

specially designed to shape the style launch of the Carper, by enabling outstanding distances to be reached. Extra qualities that will be appreciated when fishing are - the reinforced joints and the fast action. These features have defined The Fusion as exceptional - can even be used for catching big cat fish.

Code	Description	Sections	Test Curve
158-69-360	Fusion Spod 12'0"	2	4.00lb
158-69-365	Fusion Spod 12'0"	2	5.00lb

## Phoenix BSK

Following the incredible success of the Amnesia 11" here at K-Karp we decided to start the study and design of a new short carp fishing rod. The new Phoenix BSK is the result of more than one year of studies and tests. The size is the best choice possible for fishing in tight swims or from the boat, a technique that is becoming more and more popular. The powerful parabolic action enables the handling of record carp at very short distance, and to keep control of the fish in snaggy areas. Sic Sea Guides.

Code	Description	Sections	Test Curve
158-71-300	Phoenix BSK 10'0"	2	3.00lb

**NEW** » **Phoenix Elite**

Full Radial Carbon blank rod designed for those anglers who desire a very good product without spending too much. Remarkable are both the colour, very appealing under direct sunlight, and the parabolic progressive action obtained through an accurate computer planning and a wise distribution of the guides. Due to this and to a wide range of models we got a versatile rod suitable for every situation. To support a very wide range of use, 40mm SiC rings were mounted obtaining a perfect mix between stoutness and versatility. Phoenix Elite rods are at home with nylon monofilaments as well with braided lines, during marginal or long range situations. These rods has been made to offer the expert carper

high level performance tool in every condition. Precision details like the allignment spine lines printed at the 2 pieces join and the protection butt knob, laser engraved with K-Karp logo are the right way to complete cosmetic of such a value for money series of rods.

158-83-395	Phoenix Elite 13'0"	2	3.50lbs

## Antidote

These rods are made using S.H.M. Carbon blank which makes these rods totally reliable even in the most extreme conditions. The action of these rods is very powerful and thanks to the power in the tip is also capable of reaching extreme casting distance. The slim diameter of the blank and the progressive action of the tip are just perfect during combat. With a such high performance blank we decided to combine top quality

components like HDE wrapping on the handle, SiC guides and new generation steel reel seat. Antidote is available in two lengths, both with a test curve of 3.00lb and 3.50lb.

Code	Description	Sections	Test Curve

## NEW Amnesia XF

Amnesia is a new rod, with a progressive parabolic action, fitted with SiC Ultra Light guides, that combines lightness and low friction. K-Karp product lovers, welcomed the Amnesia 11ft, created for use from boats or for fresh water bottom fishing, where the angler wanted to have fun with small carp. However, the Amnesia is also a serious choice thanks to the infinite power reserve typical of the progressive action it is easily capable of tackling the biggest carp. The 12ft model keeps the same action, making canals and quarries its ideal habitat.

# CARP RODS

## NEW > Gladio X3

Family of rods designed for those who like to have a full battery of quality rods but with reduced encumbrance, thanks to the 3 pieces construction. The special S.H.M. Carbon made blank allows performance very similar if not identical to a classic 2 pieces rod, having the same specs of accuracy, long range cast and reliability. The attention we used to produce this rod is extreme: 50mm SIC guides, longer reinforced guide wrappings, preserving bushes in the joi: all this highlight a really one of a kind product.

Last but not least the reel seat has been designed with computerized techniques and it has been combined with a high density EVA handle that allows a firm grip in all conditions.

Code	Description	Sections	Test Curve
158-38-360	Gladio X3 12'0"	3	3.00lb
158-38-390	Gladio X3 13'0"	3	3.50lb

## Imperial

Series designed in three pieces and constructed in High Modulus carbon. The rod has a great reserve of power and an enjoyable action comparable to that of a two piece. High quality components are used to finish the blank: high density EVA covering on the handle, aluminium ring reinforcements around joints, double foot SIC Titanium guides.

Code	Description	Sections	Test Curve
158-52-360	Imperial 12'0"	3	3.00lbs
158-52-390	Imperial 13'0"	3	3.00lbs

## ARATON

All the features you would want to find in a modern carpfishing rod are present here in our new ARATON. Reliable, powerful and with a superb progressive action. HM Carbon blanks, double leg titanium SIC guides, high density EVA handle make these rods absolutely unbeatable at this price level.

Code	Description	Sections	Test Curve
158-41-360	Araton 12'0"	3	3.00lb
158-41-390	Araton 13'0"	3	3.50lb

## K-KARP REELS

K-KARP reels have quickly become successful among carpers. We can say that our reels have become a benchmark in terms of quality and technical innovation. K-KARP uses the best materials and world-class technology in their construction. Our aim is to offer high quality reels and to this end we use only components such as: self-lubricating ball bearings for great fluidity in recovery and new design gears,

spools in cold-cast duraluminium for perfect spooling and very long casts; single piece Power Fighting handles, Runner System clutch with extra-large PTFE disks for perfect progression and fluidity in any condition. The utmost attention has been paid to the mechanics by K-KARP's staff who are always ready to take on the challenges imposed by the market.

# ENDLESS

## Endless

Dedicated from K-Karp to all his faithful, this reel Big "Free Runner" presents a new system for drag insert located on the spool. In this new device, setting of the principal drag and of the extra drag are independent. The result is a truly micrometric adjustment system that allows you to switch from free to the default modality turning the switch about half lap. During the fight drag adjustment of one notch, making the difference. When playing a fish the angler will really appreciate the quick-FPD system, which ensures perfect fish control. In addition to this the new Endless incorporates a host of new technical features - among them being the Power Fight handle (turned from solid), the Anti Tangle system, the hollow aluminium bail arm that offers light weight and strength, and a worm shaft cross winder. Very important is the drag system which has been tested with a particular process called "Water Proof Dust" that ensures infinite life of the disks even in the presence of water. 7 Long Life Bearing and 1 Roller Bearing complete this reel of concentrated technology.

Code	Description	Weight	Gear Ratio	Capacity	Ball Bearings

### FAST PLAY DRAG

Advanced Pre-Setting Dual System

- 7 Long Life Ball Bearings
- 1 Long Life Roller Bearing
- Worm Shaft + SOS System
- Infinite antireverse "One way"
- Dual-Presettings Fast Play Drag
- PTFE Drag Washers
- Water & Dust Proof drag
- Duralumin Power Fighting handle
- AS Line Roller (antitwist system)
- Archetto Hollow Bail
- Graphite Spare Spool
- Duraluminum Spare Spool solded separately

### Fast Play Drag

Brand new drag system featuring a dual-pre-setting mode that incorporates in one single device all the free runner drag facilities. It acts directly into the spool, allowing to have a more direct, progressive and fine tuning drag system. The free spool setting is regulated by the inner knob, while to switch to the combat drag is enough to half turning the main drag knob.

## Excellence

This Big of Free Runners is exceptional for big fish in both freshwaters and the sea. Fitted with four sealed anti-corrosion ball bearings and an unlimited anti-reverse Roller Bearing, aluminium spare spool, anti-tangle system, flow concept bail, worm shaft cross winder, one-piece forged fishing handle with oversize ergonomic grip, light aluminium alloy body. Exceptional lightness and extraordinary power are the hallmarks that make this item outstanding on the market.

### ADVANCED CARP RUNNER SYSTEM

- 7 Long Life Ball Bearings
- 1 Long Life Roller Bearing
- Worm Shaft + SOS System
- Infinite antireverse "One way"
- Dual-Presettings Carp Runner Drag
- Long Cast Duraluminium Spool
- PTFE Drag Washers
- Salt & Dust Proof Drag
- Line Guard Protectors
- AS Line Roller (antitwist system)
- Aluminium Power Fighting Handle
- Hollow Bail
- Graphite Spare Spool (8000 & 10000)

carp runner drag system  
during the  
**CARPITALY 2011**

## Enigma XTR 6500

Since the first time we did our step into this project we decided that the new ENIGMA XTR would had been a perfect fishing machine, and after long testing and improvement we achieved our target. Half turn of the handle is enough to close the free runner system and to strike the fish, the smoothness of this reel on this will surprise you! The line spooling system is perfect thanks to the Worm Shaft + SOS, all working on a 9 ball bearing reinforced and oversized gear. Duralluminium spool and spare spool, Anti Twist line roller with ball bearing are two more important features of this perfect fishing machine, perfect for medium-long range fishing.

### ADVANCED CARP RUNNER SYSTEM

- 9 SS Long Life Ball Bearings
- 1 Long Life Roller Bearing
- Infinite antireverse "One way"
- Worm Shaft + SOS System
- Aluminium Bail Arms
- Super Strong SS Main Shaft
- Advanced Micro-adjusting Sensor drag
- PTFE Drag Washers
- Cold forged Long Cast Aluminium Spool
- High Impact Line Clip
- Duraluminium Power Fighting handle
- Anti Twist line roller
- Hollow Bail
- Duraluminium Spare Spool

## Enigma STC 6500

For the ENIGMA STC we have used the same gear and technical solution of the XTR version, but using different solution to keep the price more competitive. As a matter of fact you can find reinforced and oversized gear, Worm Shaft + SOS system, first spool made in duralluminium and 4 ball bearing. The perfect choice for the people who want to fish with top quality reels but with a good compromise on price.

### ADVANCED CARP RUNNER SYSTEM

- 4 SS Long Life Ball Bearings
- 1 Long Life Roller Bearing
- Infinite antireverse "One way"
- Worm Shaft + SOS System
- Aluminium Bail Arms
- Advanced Micro-adjusting Sensor drag
- PTFE Drag Washers
- Cold forged Long Cast Aluminium Spool
- High Impact Line Clip
- Hollow Bail
- Duraluminium Power Fighting handle
- Anti Twist line roller

Code	Description	Weight	Gear Ratio	Capacity	Ball Bearings
037-78-650	Enigma STC	530	4.8:1 (85cm)	Ø 0.30-360m	4+1

Code	Description	Weight	Gear Ratio	Capacity	Ball Bearings
037-79-650	Enigma XTR	515	4.8:1 (85cm)	Ø 0.30-360m	9+1

## Traxion

The new TRAXION is made to meet the requirements of the latest carpfishing techniques like stalking and boat fishing, where total reliability and easy handling are very important features. However the solid main gear with four long life roller bearing and the capacity of the spool allows this reel to face many situations also for medium-long range fishing. We used a brand new duralluminium double handle for maximum control of the fish during the fight and oversized PTFE washers on the drag.

**CARP RUNNER SYSTEM**

- 4 SS Long Life Ball Bearings
- 1 Long Life Roller Bearing
- One Way Clutch System
- Worm Shaft + SOS System
- Micro-adjust freeline drag
- PTFE Drag Washers
- Cold forged Long Cast Aluminium Spool
- Graphite Spare spool
- Double Balance handle
- Anti Twist line roller

Code	Description	Weight	Gear Ratio	Capacity	Ball Bearings
037-86-600	6000	452	4.9:1 (77cm)	Ø 0.40-240m	4+1

## Eternity XC

This reel designed for all situations has an ultra compact body, and exceptional quality and innovative technical features. The 10 LLB ball bearings and 1 roller bearing for infinite anti reverse increase the smoothness and fluidity even under stress, while the bail arm increases the strength and lightness of a reel that will have the approval of many modern Carper.

**NEW**

### CARP RUNNER SYSTEM

- 9 Long Life Ball Bearings
- 1 Long Life Roller Bearing
- Infinite antireverse "One way"
- Dual-Presettings Carp Runner Drag
- Hollow Bail
- Long Cast Duraluminium Spool

Code	Description	Weight	Gear Ratio	Capacity	Ball Bearings
037-91-600	XC 6000	497	5.2:1(90cm)	Ø 0.30-340m	2+1

## TECHNICAL FEATURES

### Carp Runner Drag

This device allows to switch from the free spool system to the pre-setting fish playing drag by just turning the handle. The drags used on K-Karp reels feature oversized washers, and all our reel have been deeply tested by our staff before the release, for these reasons we can say that K-Karp reels are probably the more reliable reels on the market nowadays.

### Slow Oscillation System

With this revolutionary system, the rotor turns at a very high speed while the spool makes its turn up and down at a slower speed. This action delivers perfect parallel winding, thereby avoiding the line tension from normal spooling movements and therefore making longer casting easily possible.

### Antitwist Line Roller

The conventional line rollers, every turns of the handle, force the line to twist on itself causing annoying tangles. The Anti-Twist Line Roller dramatically reduces the line twist problem and reducing the wearing of your line.

### Hollow Bail

In several models, we introduced a aluminum tubular bail that is larger than traditional ones. Although larger, these new bails are lighter and more durable than traditional.

### X-Cross System

The spooling is very tidy with Cross Winder, providing good casting distance and reducing the possibility of tangles. The "X" spooling in fact compacts the line and allows a best spooling. This system can be employed for both monofilaments and braided lines.

### Super Balance System

### Super Balance System

This new technology is obtained just using the latest computers 3D softwares, which allows the designing and later the construction of perfectly balanced rotors without the addition of external weights.

**Gladio 3 Rods Holdall**  
Sizes: 20,5x38cm

**Attraction Combi 3 Rods Holdall**  
Sizes: 21,5x38cm

## Gladio 3 RODS HOLDALL

Rod bag designed to guarantee lightness and ease access, while ensuring maximum protection of the equipment. Entirely made using K-Karp 1800 denier Cordura, the inside is covered with waterproof fabric, so it can be easily washed without worry, therefore allowing the possible transportation when conditions are wet or damp. Holds up to 3 set-up rods of 13" and as many with no reel fitted, the hard pocket at the top provides extra protection for the guides and can easily accommodate large diameter guides. Capacity is increased with 2 outer pockets that can hold bank sticks, landing net, umbrella, etc..

Code	Description
193-00-070	Gladio 3 Rods Holdall

## Attraction COMBI 3 RODS HOLDALL

Attraction Combi is an adaptable rods holdall, provides the maximum protection for the equipment. It can accommodate up to 3 individual cases perfect for 12 'and 13' rods, attached to the structure, through practical carabineers, three large pockets for landing nets, bank sticks, umbrellas and more. Double padded, straps, zippers and reinforced seams with waterproof bottom, safety latches and handles with non-slip padding. The 1800D cordura used for construction, have been extensively tested over time to ensure durability and resistance.

### Intrepid UNIT RODS BAG

The Intrepid rod bag developed from the need for a modular unit that could be adapted to the requirements of the catch and at the same time provide maximum protection for rods and reels. It can carry up to 4 12' or 13' single rod sleeves, supplied separately, attached to the outside of the bag, which also has three pockets for carrying the landing net, various banksticks, umbrella and more. The materials used have been thoroughly tested to be hard-wearing and above all, strong. For this purpose, we opted for a tear-proof, waterproof 1800D cordura fabric with PVC. We also added double padding, reinforced straps, zips and seams, protected, waterproof bottom, safety catches and a padded, antislip handle.

Code	Description
193-00-040	Intrepid Unit Rods Bag

### Intrepid ROD SLEEVES

Rod Sleeves can be used with the Intrepid Unit or separately to hold rods safely, or for short fishing sessions where we need to reduce equipment to the minimum. Made entirely in tear-proof, waterproof 1800D cordura, the inside is completely padded to ensure optimal protection to both rods and reels. The large zip on the side makes it easy to use. Available in two lengths for 12' and 13' rods.

Code	Description
193-00-050	Intrepid Sleeve 12'
193-00-060	Intrepid Sleeve 13'

### Pioneer 3 ROD HOLDALL

**NEW**

The Pioneer rod holdall has been developed from the need to accommodate your three sections rods, both the 12" and 13". The materials used have been thoroughly tested to be hard-wearing and above all, strong. For this purpose, we opted for a tear-proof, waterproof 1200D cordura fabric with PVC. We also added double padding, reinforced straps, zips and seams, protected, waterproof bottom, safety catches and a padded and antislip handle.

**NEW** >>

### Gladio BAG

Very practical bag that can be carried as a backpack or shoulder bag, designed for the stalkers who love to travel frequently in search of their prey. The middle section opens like a book and it is divided into three modular parts, where you can arrange the material as you prefer. The shoulder straps when not in use can be stored in a dedicated pocket, while the bottom base is made of waterproof PVC. Made with no tear material and double stitching.

Code	Description	Sizes
193-30-330	Gladio Bag	46x15x40

# LUGGAGE

## Supra TECH BOX

This carrying case is ideal for sorting all the small items of tackle and the generous size ensures the total neat storage of each article, thanks to the well-designed spaces. At the top there is a large hook link, and a handy LED lamp, which allows each operation in the dark. In the main compartment there is two retractable drawers, and six bait pots on the bottom. The entire Supra Tech Box is supported by four adjustable feet, which helps to keep it clean and holds it up off the ground.

Code	Description	Sizes
193-30-275	Supra Tech Box	40x30x34/41cm

## Tech Box LARGE

This is the basis for the orderly placement of all types of hardware. It is designed for the angler who always wants to have to hand any type of gear, at any time and in any situation. On the upper part there is an outside pocket, and on the inside there is a hook link and several PVC bags to hold rigs.

The lower part, rests on a classic removable bivvy table and has adjustable feet to adapt to any terrain. Inside there is a roomy bag for small items, a PVA Mesh Tube holder and a tray with four tubs for rigs. Two velcro tabs allow the possibility of keeping the lid open, facilitating each activity.

Code	Description	Sizes
193-30-290	Tech Box Large	50x32x20cm

## Desk Bag

Multi purpose rigid bag. This can be used to store a big quantity of accessory and hookbait boilies or particles. The inside room can be used to store many other different stuff. Two bags on the side with four pot each protect your hookbaits.

The main compartment have rigid aluminium frames which allow to use the bag as a rig table.

Code	Description	Sizes
193-30-300	Desk Bag	53x30x34cm

**Stalk PRO ORGANIZER**

The Stalk Pro Organizer has been designed for carp stalkers or lovers of short sessions, anglers who need to have everything at hand in a practical, multifunctional and spacious bag. The bag contains a table with adjustable legs for rig construction, a large central pocket where to store the Unit Boxes and other bulky equipment. In the front pocket there are 3 Accessory Boxes and a Rig Box SL. The padded back

and shoulder straps provide extra comfort. Shoulder straps, if not used, can be stored in a dedicated pocket.

Code	Description	Sizes
193-20-070	Stalk Pro Organizer	43x37x25cm

**Attraction HARD CARRYALL**

Exceptionally rigid bag to carry any equipment, it is designed for those who enjoy long walks in all weather conditions, always protecting the contents of the Attraction Hard Carryall. The top and bottom are waterproof and made of a rigid shock-absorbent shell made in EVA and PVC, ensuring an exceptional compact. The cover is completely removable through a virtually indestructible large perimeter zip. Two convenient side pockets and two front complete this bag. Ideal for those not satisfied with common backpacks.

Code	Description	Sizes

## Wander Eva 110LT CARRYALL

The Wander 110 litres is the most capacious of the K-Karp bags. As well as ample inside space, it has four outside pockets and a pocket on the top of the bag. Side and front pockets also have a mesh compartment to hold odds and ends. The ergonomic design shoulder strap is well-padded. A fabric covered divider inside the bag helps keep its shape even when it is not full. The bottom of the Wander 110 L is in high density EVA to protect against damage from stones and gravel, and can be easily cleaned as it does not absorb water. The bottom compartment can be zipped open to provide extra storage for accessory boxes.

Code	Description	Sizes
193-10-030	Wander EVA 110lt Carryall	46x71x34

## Ovation Eva 100LT CARRYALL

Bag with very capacious main compartment plus two side and one front pocket. The fabric is anti-tear polyester and all seams are double to make it strong and hard-wearing over time. The bottom is in high density EVA with a strong zip to give access to more storage space. Ideal for carrying bulky equipment or accessory boxes, which can be comfortably arranged inside for transport. Loading equipment is made easy by the wide access to the main compartment. Straps are well-padded for maximum carrying comfort. Mud and dirt are easily washed off the EVA bottom.

Code	Description	Sizes
193-20-020	Ovation EVA 100lt Carryall	44x67x33

## Evasion 90LT CARRYALL

Made in anti-tear fabric with double seams, the Evasion 90 Lt is a very versatile bag that can also be used for carrying photographic equipment. Top opening with double zip and four roomy outside pockets, two on the sides and two on the front. All outside pockets also have a mesh compartment for odds and ends. The bottom of the bag is in artificial leather with anti-slip feet. The well-padded shoulder strap is designed to stay in the centre of the shoulder during transport.

Code	Description	Sizes
193-10-010	Evasion 90lt Carryall	42x38x60

## Frontiers Eva 60LT CARRYALL

Frontier 60lt EVA is a medium size bag that can hold a lot in its top-opening spacious inside compartment. Equipped with three big outside pockets designed to hold all the accessories and odds and ends normally stored in accessory boxes. The bottom in high density EVA protects the bag from damage and wear by stones and gravel, and opens completely to form a handy compartment for more accessory boxes. The top of the inside compartment is equipped with elastic cords to hold other equipment or accessories. With its space optimizing design, this is a bag that will amaze you for its capacity and practicality.

Code	Description	Sizes
193-10-000	Frontiers EVA 60lt Carryall	36x52x33

**Intrepid 75LT CARRYALL**

Made in well-tested K-Karp 1200 denier cordura, this bag is extremely tough and wear-resistant. Equipped with six big outside pockets and a spacious interior, it comfortably holds all the equipment needed for a long fishing session.

Code	Description	Sizes

Stylish and made of 1800D Cordura, enables secure protection and easy transport.

Code	Description	Sizes
193-30-340	Cayenne Organizer Plus	30x24x15cm

## Bait Bags

8 Cans Bait Bag

Bag for carrying Boilies and other bait sensitive to direct sunlight. In the 8 tub model, the two separate compartments hold 4 acrylic tubs each and are totally knock-proof. A description of the contents of each tub can be written on the plastic lid with special pens that can be cleaned off quickly with a damp cloth. The bottom is in artificial leather with anti-slip inserts.

6 Cans Bait Bag

In the 6 tub model, the tubs are arranged in a single layer and separated by removable dividers.

Code	Description	Sizes
193-30-010	8 Cans Bait Bag	44x33x33cm
193-30-000	6 Cans Bait Bag	28x15x8cm

## Thermic Bag

Thermic bag for carrying and storing perishable bait. The interior, divided into four adjustable compartments, is in a special isothermal material that maintains the desired temperature for a long time, even when there is a considerable difference with the outside temperature. It is very important not only to keep the bait at the right temperature, but also out of direct sunlight, especially boilies, which makes the Thermic Bag an essential accessory in every carper's equipment.

Code	Description	Sizes
193-30-060	Thermic Bag	28x13x11cm

## Method & Boilies BAG

Bag designed for storing boilies or mixing and storing method ground-bait. The thermic padding ensures proper preservation both during winter and summer sessions. It is also equipped with a rigid bottom and washable interior. It can be squeezed closed with the zips to take up very little space. The cover zips shut to protect the contents from rain and sun. Once shut it takes up just 8cm.

Code	Description	Sizes
193-30-170	Method & Boilies Bag	27x30cm

NEW

## Boilies & Dip CONTAINERS

Especially for long sessions large containers for boilies are needed. For this K-Karp, has created new containers with airtight screw caps, to keep on hand a good amounts of bait. Boilies Containers ensure the intact preservation of the boilies, also ensuring lasting freshness.

Code	Description
190-74-050	Boilies Container * 4pz
190-74-055	Dip Containers * 4pz

## Air-Dry BOILIES BAG

Mesh cases essential for the maintenance of the anglers baits. They are ideal for storing ready made boilies especially if they are "non preserve-baits", the preservative ingredient can often lessen the effectiveness of any type of bait. For this, we studied these mesh cases to maintain adequate ventilation and avoid harmful mould. They are available in two sizes.

Code	Description	Sizes
193-30-165	Air-Dry Boilies Bag Small	26x26x9cm
193-30-166	Air-Dry Boilies Bag Large	36x36x11cm

## BAIT BAGS

# DOMES

## K-KARP DOMES

The whole K-Karp bivvy production has been designed and tested to offer to the traditional carp angler as well for the outdoor life enthusiastic the best they can find on the market. The new bivvies are equipped with the most advanced mounting systems and configurations that make them more versatile for carp fishing activity in any environmental situation. All this is offered, as usual, at the convenient K-Karp price.

This is the choice of the best European Carp anglers.

**FEATURES**

- Frame Cover with inner tent
- Heavy Duty Waterproof groundsheet
- Seams in 120G/SQM PE all heat welded
- Aluminium rings and tent pegs
- Adjustable Tension Poles
- 2nd door with mosquito net
- Aeration back window
- Central lantern hook
- Carrying bag

**INNER TENT**

**Enigma Dome**

This is the choice of the best Italian and foreign Carp anglers. The Enigma Dome is a bivvy that has a strong structure in light alloy and allows for quick installation even in adverse conditions. The breathable fabric reduces condensation and can support a water column of 5000 mm ensuring the most total impermeability. The inner tent increases the comfort during the winter sessions, while the back window helps the aeration in the hottest days. The external poles, in addition to their speed of assembly, extend the interior space, giving comfortable accommodation even during

long sessions. The veranda enhances the comfort, while the three windows with mosquito nets ensure an adequate circulation of air even under intense heat. Supplied with screw pegs and a handy removable floor tear.

Code	Description
191-30-150	Enigma Dome

- Material:** Waterproof PVC 5000 mm hydrostatic head
- Frame:** Connected aluminium poles
- Capacity:** 2 man plus equipment
- Closed Size:** 120x25x25cm
- Weight:** 13.2kg

Designed from our team and tested in the harshest field testing in order to offer an unmatched product.

## FEATURES

- Frame Cover with inner tent
- Heavy Duty Waterproof ground-sheet
- Seams in 120G/SQM PE all heat welded
- Aluminium rings and tent pegs
- Adjustable Tension Poles
- 2nd door with mosquito net
- Central lantern hook
- Carrying bag

## INNER TENT

## Reaction Dome

Designed from our team and tested in the harshest field testing to define the actual quality in order to offer an unmatched product. Its wide structure designed to accommodate 2 XL anglers can stand the strongest winds thanks to its aerodynamics profile with no "sail effect". The external cover is supported by reinforced resistant alloy pre-assembled poles that ensures quick assembly and disassembly; the inner chambre is removable and black coloured. it is made of a specific insulating fiber that avoids any moisture and increases comfort in cold and wet weather. Frontal veranda is very large and can offer shelter to different kinds of

equipment or big sacks or buckets of baits. Three big foldable windows gives a very good sight of exterior. This rugged dome is supplied with reinforced zips to increase durability, Heavy Duty floor that can be used with no problem even on the roughest ground, carry bag and screw pegs.

- Material:** Waterproof PVC 5000 mm hydrostatic head
- Frame:** Connected aluminium poles
- Capacity:** 2 man plus equipment
- Closed Size:** 164x20x20cm
- Weight:** 11.9kg

**Innovative four season two-person bivy.**

**NEW** > **Enemy Dome**

Innovative four season two-person bivy. Preassembled frame made of 10 mm diameter aluminium poles ensures great stability even in extreme windy conditions. Despite the big size it is very easy to set up thanks to the "delta" side junctions; actually it is sufficient to peg the rear part and then pull forward the whole structure and you are done. Enemy dome is wide enough to accommodate two anglers and all the equipment they need, ensuring an exceptional insulation even in very challenging conditions. The outer sheet is made of HT tissue and can withstand a water column of 5000mm: even the most violent storm cannot produce such a quantity of water!

Supplied with a frontal transparent window that can be obscured or substitute with a mosquito net in the warm season. Removable PVC floor. Supplied with pegs and carry bag.

**FEATURES**

- Frame Cover
- Removable Heavy Duty PVC Waterproof groundsheet
- Seams in 120G/SQM PE all heat welded
- Aluminium rings and tent pegs
- Adjustable Tension Poles

- Closed Size:** 110x22x22cm
- Weight:** 12.3kg

Excellence Brolly is able to withstand any weather situation.

## Excellence Brolly

In addition to greatly expanded landscape tents range, K-Karp, decided to also introduce a brolly, able to withstand any weather situation. The Excellence, is dedicated to all Carpanglers, lovers of short sessions and mobile fishing, where a shelter for quick assembly, no doubt helps with the move. It has three windows with mosquito net, two on the sides and one on the main entrance, which also includes a transparent layer of PVC, ensuring excellent visibility. If necessary, all the windows can be covered to prevent excessive morning light. In summer, the front can be removed, transforming the Excellence in a convenient umbrella oval. The structure is remarkably robust and can withstand extreme conditions of wind and rain, thanks to four aluminium poles in that can be screwed directly on the ribs of the umbrella. Excellence has pegs with screw anchorage and includes the bottom tear-washable. The best solution for short fishing sessions.

### FEATURES

- Frame Cover
- Heavy Duty Waterproof groundsheet
- Seams in 120G/SQM PE all heat welded
- 4 telescopic poles
- Zip-in removable front panel with doors
- Heavy Duty tent rings

Fast opening bivy, we grant it will be ready in less than 10 seconds!

**FEATURES**

- Frame Cover
- Removable Heavy Duty Waterproof groundsheet
- Removable front panel plus mosquito net
- Seams in 120G/SQM PE all heat welded
- Aluminium rings and tent pegs
- Tension Poles
- Carrying bag

**NEW** >> **Electa Quick Dome**

Fast opening bivy, we grant it will be ready in less than 10 seconds! The ideal choice for those who loves fast sessions and still requires the same comfort of bigger bivies. Ideal choice too for those who loves wondering fishing and still requires efficient shelter. External sheet can withstand a water column of 5000 mm of water. Reinforced fiberglass poles are supported by the Quick System, the true heart of this bivy that allows one of the faster mounting actions on the carp scene. Floor made of thick PVC is

a true barrier to external moisture giving extra comfort in cold weather. It is actually a four seasons bivy for fast sessions and can easily host an angler with all the equipment he needs. It can eventually used by two anglers as well. Supplied with pegs and carry bag.

Code	Description

- Removable Heavy Duty Waterproof groundsheet
- Removable front panel plus mosquito net
- Seams in 120G/SQM PE all heat welded
- Aluminium rings and tent pegs
- Tension Poles
- Carrying bag

## Cayenne Pro

Cayenne Pro Dome was designed by our team especially to confront the warm periods of the year, times when everywhere we go, we seem to find the extremes of alternating swarms of annoying insects to violent storms. In fact, this bivvy, has a strong structure in light alloy with a front portion that can be replaced by a large mosquito net, the only true shield between the angler and any

insect. In case of cold or rain the Carp angler, can replace the front screen door with the towel in less than thirty seconds, forming a veritable unassailable bivvy. Includes floor and pegs screw anchorage.

Code	Description
191-30-190	Cayenne Pro Dome

- Closed Size:** 94x16x16cm
- Weight:** 5.8kg

### Wind Shield

K-Karp umbrella tents resulted from the need to have the most versatile accessories in our equipment. The two Wind Shield versions presented here can be used for short outings when it looks like rain, for shade on hot summer days, to protect from damp during night fishing sessions or simply combined with a tent as a shelter for equipment. The brolly is at its best when everything has to be put up or taken down as quickly as possible.

#### FEATURES

- Frame cover
- Waterproof groundsheet
- Heat welded seams in 120G/SQM PE
- 7 rings and 7 tent pegs
- Carry bag

Code	Description

After developing various bedchair models over the years, we designed the Reaction, which is bigger, stronger and more comfortable than any other chairbed presently on the market. The aluminium frame ensures lightness and is equipped with no less than 3 pairs of telescopic legs with mudfeet. The well-padded and breathable upholstery is attached to the frame

with a new system. In terms of stability, size and finish, Reaction is second to none.

Code	Description
191-10-280	Reaction Bedchair

## Firefox Sleeping Bag

Sizes: 225x93x8cm

This sleeping bag is a real protective shell against the cold and damp. The Fire Fox Sleeping Bag is a sleeping bag for "Five Season" use - ideal for addressing the most critical situations of the winter, where the body is subjected to a severe trial. It has a reinforced zip and increased padding in the most sensitive areas of the body. The neck is protected by a padded flap and in the area of the hands, there are openings, closed with a zip, that enable operations such as reading a book, while still keeping the body warm. Two large pockets allow you to anchor the headboard and

footboard of the bed, while an adjustable strap preserves a perfect set-up, eliminating the annoying problem of the involvement of the sleeping bag during the night. To define the quality, one of our staff told us: If you are not comfortable in a Fire Fox, it must mean that are two of you in the same sleeping bag! Sometimes just a few words can describe everything!

Code	Description
191-15-005	Firefox Sleeping Bag

We used a new fabric for the outer shell which is breathable and extremely easy to wash, adding a new shape pillow to give the best head support possible. Telescopic legs with mudfeet and heavy duty elastics used to guarantee perfect seat tension and comfort. This bedchair can be used

without any problem even from XXL sized carp angler.

Code	Description
191-10-220	Enemy Bedchair

### Enemy Sleeping Bag

New sleeping bag that ensures complete protection from cold and damp.

Sizes: 220x90cm

New sleeping bag that ensures complete protection from cold and damp. The sizes are really generous for use with larger bedchair and have a new comfortable pillow that can be removed if necessary. It features reinforced zippers that prevent the escape of heat and extra padding in the most sensitive areas of the body. Two large pockets allow you to place it firmly on both sides of the bed, while an adjustable strap it preserves a perfect set-up, elimi-

nating the annoying problem of the windings during the night. The interior is completely made comfortable and warm micro fleece, while the exterior is tear resistant and completely washable.

Code	Description
191-15-110	Enemy Sleeping Bag

### Enemy Cover Blanket

Sleeping bag dedicated to mid-season and the summer with internal fabric in soft and warm micro fleece.

Sizes: 230x90cm

Sleeping bag dedicated to mid-season and the summer with internal fabric in soft, warm micro fleece. The outer shell, breathable, prevents condensation, leaving the body dry. Despite the large size (230X90cm), attaches easily to the bed through the pockets and adjustable belt. Comes with handy carrying case in

which, when folded, occupies a minimum size. The measures are in fact held 45x25x25cm.

Code	Description
191-15-120	Enemy Cover Blanket

## Enigma Bedchair

A new concept bed, designed to satisfy all carp anglers who spend lots of time on the banks of their favorite water and demand the maximum comfort without compromise.

**NEW** >>

◀ Sizes: 208x89x52cm

Hand Wheel

Aluminium Frame

Mud Feet

A new concept bed, designed to satisfy all carp anglers who spend lots of time on the banks of their favorite water and demand the maximum comfort without compromise. The design carries the highest comfort level, furthermore, the central padding, allows proper relaxation of the back, avoiding discomfort and thanks to its breathability it ensures well-being even in summer. The perimeter portion is occupied by a special tear-proof fabric, which sim-

plifies all types of washing. Each leg is adjustable and anti-mud, and can be adjusted in extension thanks to Fast Lock System. Finally a bed that doesn't fear any comparison!

Code	Description
191-10-290	Enigma Bedchair

## Cayenne Bedchair

The exclusive design of the structure in light alloy makes it extremely light without compromising on strength.

◀ Sizes: 200x75x38cm

New bedchair with innovative ergonomic design for maximum comfort. Upholstery has been designed to support the body, prevent incorrect posture of the spine and help keep the neck at the right angle. The fabric used is breathable and waterproof. The very strong frame is supported by Fast-Lock system telescopic legs and the latest mud feet. These outside feet prevent the bed from sinking into soft

ground and help improve overall stability. The exclusive design of the structure in light alloy makes it extremely light without compromising on strength.

Code	Description
191-10-060	Cayenne Bedchair

### All Season Sleeping Bag

The All Seasons sleeping bag is made in a high quality water-resistant, breathable fabric that maintains warmth inside the bag while preventing the formation of condenses.

Sizes: 230x95cm

The All Seasons sleeping bag is made in a high quality water-resistant, breathable fabric that maintains warmth inside the bag while preventing the formation of condensation. The lining is in the best quality flannel. Padding comprises a special porous material that helps maintain both the inside temperature and the output of moisture produced by condensation. This sleeping bag offers excellent protection whether in autumn or the middle of winter. The specially designed pillow provides a comfortable support for the head and the neck, keeping the head/body perfectly

aligned to ensure restful sleep. The zip runs almost the whole length of the bag, making it easy to get into. 2.30m long and 96cm wide, it is very roomy even if used wearing overalls or other winter clothes. Sold with a practical fabric carrying bag.

Code	Description

Large, extremely light folding chair. Frame built entirely in aluminium coupled to an acrylic resin and nylon central joint. Ideal for those who already have a lot of equipment and want to reduce weight, or those making a first approach to this sport. The waterproof PVC coated polyester fabric moulds to accommodate the body. The enveloping shape has been designed to give the best support to the back. A handy bottle or glass holder is included on the right armrest. Sold with a practical waterproof carry bag.

Code	Description
191-10-050	Easy Fold Chair

## Max Plus Barrow

This new barrow will surprise you for the important new features you can find. The frame is made using tubular bars extremely strong and lightweight. Front and side bars are totally adjustable and allows you to have an important maximum loading area (100cm length, 95cm wide, 50cm high). Both rear legs have mud feet. This barrow can be easily disassembled to easy transport and storage. Thanks to the two wheels is possible to load an incredible quantity of tackle without compromising manoeuvrability.

Code	Description
192-30-170	Max Plus Barrow

## Reaction Barrow

Innovative trolley which allows you to keep up the load in any situation of rough terrain or slope. Reaction Barrow is robust, quick to assemble and adjustable in both length and width so it can be adapted to transport every kind of equipment. Supplied with

tubeless wheels, locking points for elastic ropes and low profile chassis. Cordura covered side banks for better load protection. In a nutshell the best all grounds trolley you can buy.

Code	Description
192-30-180	Reaction Barrow

### Hummer Flat Barrow

This travel Trolley is the favourite of most of the European carp anglers. Its innovative design allows the angler to load a big quantities of tackle. The wide distance between the wheels reduce the effort required to push it and can easily deal with any kind of ground. The tubeless wheels helps to don't get stocked in mud. The back legs that support the Hummer Trolley when it is loaded, are telescopic and adjustable and they can be folded back during transport.

Code	Description
192-30-110	Hummer Flat Trolley

### Cayenne Trolley

This trolley can easily transport tackle for long fishing sessions. Functional, compact and completely disassemblable. Loading platform dimensions are adjustable. The transport handle height can get up to 105 cm for an easy travel in any trek. Dimensions: length 60 cm, width 35 cm.

Code	Description
192-30-150	Cayenne Trolley

### Euro Plus Trolley

Euro PlusTrolley is designed for the carp angler who prefer sessions, and does not carry large amounts of tackle. The steel frame can be completely disassembled, making it easier to transport. The solid rubber wheels are totally reliable, and the large diameter allows easy transport even over rough ground. The length of over a metre makes transporting rod bags easy, and the width of 54cm, allows safe and stable housing of various bags and luggage.

Code	Description
192-30-160	Euro Plus Trolley

### Loading Elastic Cords

Elastics to fix the tackle on the trolley. The cord is equipped with strong plastic hooks on the ends. The elastic has a diameter of 8 mm and is 120 cm long. The Spider Cord is made up of six 8mm elastics 57 cm long linked to a steel central ring. The extremely strong nylon hooks at the end of each elastic, safely hold all the tackle. Both products come in a blister pack.

Code	Description
191-20-020	Spider Cord
191-20-010	Hook Cord

Sizes: 131x80x10.5cm

## Cayenne Evo Mat

The new Cayenne mat measures 130x80cm and when opened is large enough to safely protect your bigger and vivacious carp. The raised outer edges help the fish to stay in the center of the mat. It is filled with a thick and highly protective foam padding. Construction is really lightweight and waterproof material pre-

vents absorption of water. Special PU coating is extremely comfortable for the carp and it is easy to wash. Thanks to the many zips every part of the padding is removable.

Code	Description
193-40-140	Cayenne Evo Mat

Sizes: 105x55x21cm

## Attraction Evo Mat

Excellent mat ideal for unhooking and release the fish back to the water. The side walls and bottom are generously padded for ultimate protection. The floating stuffing help to introduce the carp in the water with great ease. The PVC coating prevents dangerous damage to carp mucus and can be easily washed. Velcro reclosable tops prevent the fish damage when shaking. The mat also can contain several liters of water to avoid dehydration of the carp. Thanks to the sturdy straps that pass under the mat can be used, once made the tare, as weighing bag.

Code	Description
193-40-110	Attraction Evo Mat

## Evolution Pro Mat

The new unhooking mat Evolution Pro Mat have generous measures 128cm x 80cm and when open, it can safely house and protect the biggest and most lively carp. Is built with the outer edges in relief to help the fish to remain in the center of the mat, making it easy taking of big and lively fish. The padding system with micro "polyball" makes it extremely light, while the special PU coating is extremely comfortable against fish and easily washable. It can be fixed to the ground in windy conditions through 6 clips attached to the corners and is easily transportable when folded, with comfortable handles.

Sizes: 128x80cm

Code	Description
193-40-035	Evolution Pro Mat

## Super Mat

Exceptional mat for unhooking, weighing and returning the fish to the water. This mat has been developed to comfortably hold the fish during the unhooking, weighing and return into the water. The mat is fitted with a velcro closure system that avoids the carp falling dangerously in the case of sudden movements. The closure mesh also enables the angler to always have the fish under control when inside. The sides are generously padded to offer the maximum protection. The inside is PVC dressed - this avoids dangerous damage to the carps mucus, and can be easily washed. Super Mat is able to keep and to protect the biggest carps, a record even!

Sizes: 104x50cm

Code	Description
193-40-020	Super Mat

Sizes: 120x55cm

Code	Description
193-40-150	Cayenne Evo Sling

**NEW**

## Cayenne Evo Sling

The new K-Karp weighing bag has 4 floats that support the bag when into the water. Two side zippers facilitate the carp access, while the mesh maximizes the exchange of water for carp safety and to facilitate weighing operations and release. Measures are 120cm long, 84 wide and 55cm deep. Made only with "carp friendly" materials and designed to accommodate and give full support to the carp during weighing. Double handles at the ends to safely lift and carry the fish. Reinforced stitching on all pressure points.

## Evolution Pro Sling

Weighing sling apt to check the weight of extra large carp. Is convenient to carry thanks to the support ribs can be folded into two parts. The "D" shape, with the opening hinged shorter sides is absolutely appropriate to the shape of fish can be weighed and avoid dangerous turn. The sling is made with reinforced seams and sides immune to problems of deterioration. The handles are attached to support ribs with double stitched to ensure robust and safe weighing points. The special material that makes up the bottom prevents the loss of protective mucus of fish, while drainage holes ensure a proper weighing.

Sizes: 118x58cm

Code	Description
193-40-120	Evolution Pro Sling

Sizes: 120x40cm

Code	Description
193-40-010	Long Net Weighsling

## Long Net Weighsling

Weighing sling produced from the same material as the Easy Net, but in rectangular shape, for the carp angler that prefers to hold the fish in a more contained space during the weighing process. Two strong side zippers close the sack once the fish has settled inside. The sack is supplied with a Nylon waterproof bag.

## Total Air Sack

Big sized carp sack with waterproof PVC bag. For this product we used the best materials available, slime friendly and extremely soft. Oversized zip closure with clip, ventilated corners. The K-Karp team is always working to keep maximum attention to carp safety and care, that's why we pay much attention to details and we recommend to keep not more than one carp on the same carp sack. We used a bright red foam floats on the rope, to immediately detect where the carp sack is located.

Sizes: 120x100cm

Code	Description
193-40-130	Total Air Sack

## Advanced Weighsling Set

Practical set for the carp care once the fish has been landed. Includes three truly indispensable tools - the large well-padded mattress, the weigh scales up to 25Kg and a convenient bag (110x65cm) for weighing in light perforated material. A perfect trio to protect each capture!

Code	Description
193-40-090	Advanced Weighsling Set

Sizes: 110x65cm

## Ovation Sack

Perforated weighing bag designed for anglers who demand precision, even for small and medium-sized catches. The construction of the fabric allows rapid draining of excess water, thereby ensuring accurate weight readings.

Sizes: 85x55cm

Code	Description
193-40-070	Ovation Sack

## Intrepid Weighsling

Weighing bag, constructed in lightweight, durable and suitable materials perfect for protecting the condition of the fish. The generously sized and sturdy straps make it easy to weigh even oversize carp.

Sizes: 100x65cm

Code	Description
193-40-080	Intrepid Weighsling

## Easy Pro Mat

This compact size unhooking mat is designed specifically for anglers who love short sessions and insist on safeguarding the care of every fish caught. The padding is not excessive and provides convenient transportation without unnecessary bulk. K-Karp recommends Easy Pro Mat in any situation also for barbel fishing.

Sizes: 100x60cm

Code	Description
193-40-060	Easy Pro Mat

Code	Description
190-50-300	Specimen Scale 50kg
190-50-350	Specimen Scale 25kg

### Catcher Landing Net

The Team K-KARP has not accepted any compromise in terms of quality in the production of this landing net. The best available materials have been chosen, combined with processes of workmanship checked in every least detail. The handle entirely manufactured from carbon, introduces a lamination composed by different degrees of woven carbon among them to combine the rigidity and strength to the correct lightness. The lifting pressure points have been enhanced with Hde to guarantee the optimal lifting. Fitted with a clip that allows the net to be kept adjacent to the handle during the phase of approach and subsequently to release when the fish enters the net. The arms are made in solid carbon, with the same construction technique employed for the handle and the spreader block is made from anodized aluminium and both are virtually indestructible. The very capacious net, has been designed to not damage the fish. This product is undoubtedly an object of high prestige, that will fully satisfy even the most demanding anglers.

Code	Description
084-42-180	Catcher W/net * 180cm

### Gladio L/Net & Weighsling

The landing net-weighing sling Gladio is characterized by a number of innovative features to help your fishing and offer the ultimate in care of the fish. One piece Carbon handle 180cm long, ultra-resistant carbon arms, with a hexagonal mesh built with a specific yarn that is not entangled and does not harm the fish, steel block with quick release system. But the real peculiarity is that the mesh, when detached, it becomes a real weighing sling with handles and sides with double-stitched immune to the deterioration, zipper closure on top, while reducing the diameter of the mesh near the background prevents the loss of protective mucus of fish.

Code	Description
084-40-700	Gladio L/Net & Weighsling *1.80cm

### Specimen Digital Scale

It is no secret that every carp angler always wants to know precisely the weight of their biggest catches. This requirement is not always just to boast in front of friends, but for pure personal satisfaction. This ethical motive, has led K-Karp, when thinking of lovers of precision, to introduce an electronic balance up to 40kg, with an accuracy of 20 grams. This is a tool that ensures accurate recording of each fish caught, setting the weight with absolute precision.

Code	Description
190-50-380	Specimen Digital Scale

### Weigh Bar

For effortless easy weighing this is an essential accessory for the accurate weighing of big carp. Double handle.

Code	Description
190-50-370	Weigh Bar

## Eternity Landing Net

This landing net, has a stiff, low diameter Powerfibre handle, and is finished at the points of handling, with non-slip grip. Precision threading, was obtained from a full block of resistant alloy, and is firmly secured to the handle. The head has carbon arms of 100cm and a gape of 105cm. The steel block features a unique quick release system which is highly secure and reliable, and closes the arms quickly once the carp is netted. The net is made with a hexagonal mesh using a yarn that will not cause fish damage and also avoids snagging.

Code	Description
084-40-500	Eternity Landing Net * 180/1

## Cayenne Landing Net

Practical very short length landing net, perfect for short fishing sessions for the anglers that have less time or transport room. The telescopic handle is made from composite fibre, and reaches, once opened the length of 1,80 mt. Along the handle we put a particular rubber inserts for assuring a correct and sure grip and handling. The included head, is mounted with solid fibre arms and the capacious net has a particular hexagonal pattern that prevents the carp getting tangled. The spigot block is made with a special resin, which is very resistant, and doesn't suffer variations from low and high temperatures.

Code	Description
084-40-200	Cayenne Landing Net * 180cm

## Landing Net Float

The Landing Net Float is designed to simplify the job of netting the carp while playing the fish. The net float allows the entire landing net to float just on the surface and ready to action. The Net Float will prevent also the mesh snagging on the lake bed, that's the last thing you want to happen when playing a record carp.

Code	Description
193-30-190	Landing Net Float

## Drake Landing Net

Super-strong design features a deep, soft net mesh, reinforced arms that locate into the high-quality polished block and a 6' one-piece handle. A real work-horse of a landing net. Don't let the price deceive you. The Drake landing net is favoured by many top carp anglers.

Code	Description
084-40-300	Drake Landing Net

## Pioneer Net Handle

High level net handle, made in full H.M. Carbon. Unrivalled for stiffness and thin diameter, feature HDE (High Density Eva) non slip handle which is also extremely comfortable to use. High precision solid metallic screw fixed to the handle with an innovative system for the maximum reliability even on the extreme situations.

Code	Description
084-40-650	Pioneer Handel * 180cm

## Intrepid Net Handle

The Intrepid Landing Net is quite simply stunning. Featuring slim, lightweight 6' handle with a fitted net float and a clip to retain your landing net mesh to prevent snagging when netting carp. The machined, polished, aluminium spreader block is the latest design on the market.

Code	Description
084-41-180	Intrepid Net Handle * 180cm

## Hurricane Net Handle

New net handle with 1K Woven Carbon printing, extremely lightweight and totally reliable can easily handle the bigger carp to the unhooking mat. The special carbon used allows to drastically reduce the diameter and to keep good stiffness. Anti slip wrapping and solid metallic screw.

Code	Description
084-40-600	Hurricane Handel * 180cm

## Spirit Handle

These new net and handle are superb value for money. Featuring fiberglass handles and very strong landing net block.

Code	Description
084-40-400	Spirit Handel * 180cm

## K-Karp Spirit Head

The original "superlight free flow mesh" as featured on the market Landing Nets Heads. Extra deep to safely retain your capture whilst arranging weighing scales and unhooking mat.

Code	Description
084-40-350	Spirit Head

The K-Karp range of PODS has been extended this year with 1 new model to meet different carpfishing needs. Like all products designed and marketed by K-Karp, also in this case our staff and testers carried out the development and testing of every single product to assess their stability, duration and ease of adjustment. The strict tests our pods undergo before being put on the market mean we can supply you with products of the highest quality standards. We have also opted for a variety of shapes to satisfy individual needs and to ensure ease of use and exceptional stability on all kinds of ground. Every pod is highly adjustable, especially in height, to overcome the various obstacles that can be met in European waters.

We have tried to eliminate unnecessary adjusting screws, repositioning those remaining in an intelligent way, to make them more practical to use and as far as possible prevent the chance of line becoming hooked during fishing.

All pods are supplied with carry-bags designed individually to perfectly contain all the parts. The materials used for the bags (up to 1200 denier) are extremely hard-wearing and the extra-strong zips are matched by strong comfortable grip handles.

**Cayenne Giant Pod**

This is an evolution of the Cayenne. Some changes have been made concerning the structure, and the central hub, increasing the strength of the terminals, and the ability to clamp securely. These characteristics make it one of the most versatile pods on the market. Additionally the look of the buzzer bars has been improved and are now more ergonomic and more appealing. The legs, keep the practical and robust locking system Fast Lock, perfect to suit any terrain. The central hook, allows for a weight to be added to increase stability. The Cayenne Giant Pod is equipped with a very durable Cordura carry bag.

Code	Description
192-00-135	Cayenne Giant Pod

# ROD POD

**Sniper Pod**

Probably the most versatile of all the Pods produced by the K-Karp Team. Packs very small for transport, but once open its size and stability are surprising. Constructed in stainless steel, it adapts to any kind of placement, even the most improbable, thanks to the adjustable central bar that turns on a floating pivot and can be locked at practically any angle, either frontally or laterally. Inclination of the telescopic feet is self-locking by means of aluminium hooks fixed to a central steel pivot. Speed of assembly and positioning are the main features of this ex-

ceptional pod, ideal for short or medium range use. The Sniper pod comes with a practical carry-bag. The price does not include buzzer bars.

Code	Description
192-00-000	Sniper Pod

\* Buzzer Bars not included

## Excellence Pod

This is one of most versatile, functional, most highly adjustable pods. Impressive also for its size and stability, given by the use of a tripod mounted on telescopic legs which can be adjusted individually to suit the ground or increase the area of rest surface in case of strong winds. In addition, there are holes at the end of the legs to insert an anchoring stake. Aluminium is the main material used for this pod, making it easy to position and reducing the weight, which can be a problem with many pods, all without compromising its strength and reliability. The central base is equipped with a new system with a central pivot which can be turned to any angle, either frontally or laterally, within a 360° radius. The central arm can also be made longer to correctly position the rods. Buzzer bars are not included in the price.

Code	Description
192-00-100	Excellence Pod

\* Buzzer Bars not included

NEW

## Reaction Pod

Very stable and easy to use. Reaction Pod evolves from Pioneer Pod and it has been designed to match the most various fishing situations. The most evident evolution is the great stability, obtained thanks to the new locking system in the main frame, with 2 parallel aluminium tubes adjustable in height until 1280mm. Supplied with a couple of buzz bars for 4 rods. Telescopic legs that allow to reach a 1000m height. Quick assembling thanks to

the telescopic legs, the Fast Lock system and the specific central frame design. A reliable mate for challenging sessions.

Code	Description
192-00-230	Reaction Pod

## Imperial Pod

The Imperial Pod, is destined to become the faithful companion of many Italian and foreign carp anglers, thanks to its exceptional strength, accompanied by a massive aspect. Though extremely compact it offers excellent stability on any terrain and its four telescopic legs, united in one central steel hub means it can be placed anywhere. The facility to rotate the main body, provides infinite combinations, for the inclination of the rods, to cover any fishing situation from “the lake behind the

house” to the infinite expanse of water without borders. Fast Lock locking systems, make this item exceptionally robust, versatile and practical. Equipped with Buzzer Bar and Cordura carrying bag.

Code	Description
192-00-170	Imperial Pod

### Enduro Pod

One of the best Pods designed and made by the K-Karp team. Constructed in a perfect combination of stainless steel and aluminium for unique stability and incomparable ease of transport. Completely articulated and positionable on any ground by means of pressure locks. The steel central bar is completely adjustable to the best angle depending on the ground and adaptable to the rod sections. The aluminium Buzzer Bars, which are included, are fixed to the structure with a double bar that prevents any rotation or movement during use. The adjustable legs have steel ferrules to penetrate deep into the ground. Supplied with carry bag.

Code	Description
192-00-010	Enduro Pod

### Avenger Pod

Very practical and functional with a truly reduced size during transport. The legs are fixed to the central frame and lock on the special clips that have been designed with an oblique cut that makes them already perfectly angled for use. Made entirely in steel to be long-lasting and eternally reliable. Supplied with Buzzer Bars with the front "candelabra" fixed on two different arms to prevent any undesired movement during fishing, especially during hooking. Ideal for fishing in lakes with regular banks or where there are rods or other obstacles in the fishing path, as the front legs can be angled at over 20 degrees, allowing the rod to be positioned above the obstacle. Supplied with carry bag which has a special pocket for the spare candelabra which is also available.

Code	Description
192-00-020	Avenger Pod

### Buller Pod

New pod for use with 3 rods, light and stable. Double aluminium tube central frame with maximum length of 1290mm. This design is currently one of the most reliable and stable. The special aluminium frame grants a complete absence of ascillations and a perfect alignment between the pod itself and bite indicators. Sup-

plied with 2 telescopic legs of 1000mm that can significantly raise the pod when needed. Easy to pack releasing legs and buzz bars.

Code	Description
192-00-220	Buller Pod

**NEW**

## Drake Pod

New pod designed for carpers that prefer a double pole configuration, more stable and versatile. It is supplied with a couple of buzz bars for 3 rods use and has a central telescopic 1240mm long frame. Easy to pack releasing legs and buzz bars. The special aluminium tubes are light and stable granting a perfect al-

ignment between pod and bite detectors. Supplied also with 2 460mm extensions for legs extension.

Code	Description
192-00-240	Drake Pod

## Gladio Pod

Newly designed rod pod, extremely compact and lightweight. It uses a built around a central core that houses all four legs held in place by a block closure. Stable, manageable, robust and reliable, is likely to be transferred from one location to another mounted, without tipping over as with other types of pods and can be disassembled in few seconds. Fully adjustable, is presented with 3 rods buzzer bars and four adjustable legs, which allow you to level the pod in the right position even in the most uncomfortable swims.

Code	Description
192-00-210	Gladio Pod

## Intrepid Pod

A value for money four rod pod with excellent stability. The double rest prevents the buzzer bars from turning if subjected to pressure. Length can be quickly and easily adjusted to suit rods of different lengths. Entirely constructed in aluminium, it can be quickly positioned on all types of ground. Perfect for rivers or private fisheries.

Code	Description
192-00-120	Intrepid Pod

### Bizon Maxi Pod

This is the evolution of the Bizon Pod, which has emerged as one of the most popular pods, for its excellent technical characteristics. The size of the stabilizing legs have been increased, while maintaining a very low weight. For the construction a lightweight aluminum profile is used, for both the body and the buzzer bar. The Bizon Maxi therefore, while retaining all the adjustments that characterize the Bizon, is perfect to use, even in harsh swims where it is difficult to correctly position the rods. Available in "three rods" version, with carry bag.

Code	Description
192-00-160	Bizon Maxi Pod

### Catcher Pod

The main feature of Catcher is its speedy assembly, which makes it unique in the rod pod market. It is constructed entirely of aluminum, including buzzer bars, and is dedicated to those who are close to Carp Fishing, who carry out fast, short fishing sessions and all those who wish to move often. Despite the weight, which is only 1.5kg, it is very stable on all types of terrain. The central bar is adjustable in length as well as the 4 telescopic feet. The last great feature is the really unbeatable price.

Code	Description
192-00-200	Catcher Pod

### Bizon Pod

It's hard to find products of this quality at this price. Very light construction in aluminium profile; front and back buzzer bars can be easily positioned on the pod; the length of the body can be adjusted to suit the length of the rods. The aluminium profile makes the entire structure very stable, the double support prevents the buzzer bars rotating if subjected to pressure. Available in three rod version with carry-bag.

Code	Description
192-00-150	Bizon Pod

## Buzzer Bars

Buzzer Bar models are in stainless steel or in aluminium. Most of them are telescopic so they can be extended. A little plaque in each Buzzer Bar shows that they have been tested with the maximum care.

Code	Description
190-20-000	Stainless Steel Inox 4 Rods Tel.
190-20-010	Stainless Steel Inox 3 Rods Tel.
190-20-020	Aluminium 3 Rods telesc.

## Bank Stick

K-Karp has a wide range of bank sticks, in steel or aluminium. All models are telescopic and available in three different sizes; reinforced point for good penetration into the ground.

Code	Description
190-10-030	Bank Stick S.S. Inox 30cm
190-10-050	Bank Stick S.S. Inox 50cm
190-10-075	Bank Stick S.S. Inox 75cm
190-15-030	Bank Stick Aluminium 30cm
190-15-050	Bank Stick Aluminium 50cm
190-15-075	Bank Stick Aluminium 75cm

## Anti Draw Back Rest

Anti Draw Back rest is designed to grip the rod tightly eliminating the danger of slippage during the run of the carp. The innovative spring lock system works in just one direction and releases the rod only when the angler picks it up. Suitable for almost every rod from 10 mm up to 35 mm, it's fitted with a stainless steel thread with adjusting nut.

Code	Description
192-25-250	Anti Draw Back Rest

## Quick Adaptor

This Connector is for the quick attachment and release of bite alarm devices, without having to screw and unscrew every time which can sometimes mean it is difficult to align properly. Ideal for long journeys or short sessions.

Code	Description
190-50-220	Quick Adaptor

## Screw & Bankstick

Bank stick with steel drill point to penetrate the toughest grounds - they can be used to build a simple rod pod in every situation. They are fitted with a steel bar to help screw into the hard ground.

Code	Description
192-07-000	Screw End Bankstick L
192-07-100	Screw End Bankstick XL

## Hanger

Drop indicator of great stability even on windy days. The head can be adjusted in intensity to allow the correct line release. Two 28 gr weights to increase the weight are included.

Code	Description
190-40-060	Stiff Hanger Blue
190-40-070	Stiff Hanger Red

### Carbon Buzzer Bars

A new buzzer bar series manufactured with Woven Carbon. They are all telescopic and made for 3 rods. The models vary for the indicator connection needed and have the possibility to insert a stabilizing peg. Each of them are tested with the maximum care to ensure that they work perfectly.

Code	Description
192-20-060	Carbon 3 Canne Telescopico
192-20-070	Carbon Plus 3 Canne Telescopico
192-20-080	Carbon Premium 3 Canne Telescopico

Series of bank stick manufactured using Woven Carbon. Refined look and strength are their principal features along with reinforced points for good ground penetration. The bushes on the top allow the correct placement of the attachment. Each of them are tested with the maximum care to ensure they work correctly.

Code	Description
192-05-030	Carbon Bankstick *30cm
192-05-050	Carbon Bankstick *50cm
192-05-075	Carbon Bankstick *70cm

### Carbon Bankstick

### Bizon & Imperial Buzzer Bar

Three/Four rod Buzzer Bar in aluminium that can be used with a pod or held by bank sticks. They are really useful when rods must be close to the ground. Fitted with brass inserts.

Code	Description
192-20-090	Bizon Buzzer Bar 3 Rod
192-20-100	Bizon Buzzer Bar 3 Rod XL
192-20-110	Imperial Buzz Bar * 4 Rods XL

### Rod Clips

K-Karp clips are in a non slip "Soft Touch" rubber that allows them to fix to the rods safely and to easily release on the strike. The Luminous Rest are made in a phosphorescent material, which allows the rapid location of fishing rods even on the darkest nights. When the brightness fades, simply recharge it with a light beam, to make it highly visible again for several hours.

K-KARP BITE INDICATION SYSTEM

## FEATURES

- Multicolour Led Selection System with 7 cool colours to choose (Blue, Red, Green, UV-Blue, Pink, Yellow and White), just by pressing "C" button key
- Ultra Bright and Long Life high quality Leds which are easily visible during the day
- Automatic Detection System to easily sync your alarms with the receiver or extend the set into a 4+1 system
- Long Range Signal (150/200m depending on conditions) with Auto Range-Test Function
- Integrated Automatic Night Light to help you position your rod centrally onto alarm during nighttime by using a long life and low consumption diode
- Ultra Low Battery Consumption with Low Level Battery Warning both on the receiver and the alarm. Constantly monitors battery condition ensures you know when your battery is due for replacement
- Run'N Drop Bite Detection differentiation both on alarms and receiver
- Vibro & Mute Mode Selection to help you position your rods correctly without having to turn-off your alarms
- Micro Adjustable Sensitivity & Tone
- Manual Switch ON/OFF to reduce power consumption when switch off
- Memory Function both on the Alarms and the Receiver retains all personal settings when changing batteries or turning the alarm off
- Power Out Socket fully integrated with Drake Hangers System
- Compact and Weather-Proof body made by high impact ABS with Soft Touch treatment
- Weather-Proof cone speakers
- Non-Slip Rubber Rod Seat designed with a deep U to hold securely your rods and prevent rod slide
- Stainless Steel 3/8" screw with Lock Rin

**PULSAR NTX 3+1 Bite Indicators Set**

**NEW**

Pulsar NTX is a ultra-reliable, compact, high quality, bite indicator set packed with the latest generations technology and with a great modern appearance. By keeping a compact case we succeeded to offer all the functions required by a modern carp angler. It fits perfectly in the latest “less is more” trend in carp fishing, where all the gear needs to be as compact and subtle as possible. This great set shows again that the K-Karp team is putting many efforts in making excellent quality products for a fair price. This great wireless 3+1 set is very easy to be extend to a 4+1 by the also available loose alarm Pulsar NTX (019-26-110).

**Bite Detection Sensor**

Our magnetic sensor guarantees precise and true bite detection, while the deep soft rubber rod seat held securely your rod.

**Stainless Steel Thread**

Pulsar features stainless steel thread and plastic r-ring to give the alarms a secure connection and perfect alignment.

Drake Plus Bite Alarm

# DRAKE XTR

## Drake XTR Stiff Hanger

Drake XTR Illuminated Stiff Hanger is designed to face any situations, from long range fishing as well as to short and medium range. It's fitted with a sliding weights to allow the angler to regulate the line tension. Drake XTR features a fully integrated, self-tensioning line system entirely made by stainless steel and it's suitable for both mono or braided lines. The smooth rounded heads ensures tangle-free operations. The fluorescent head features a led illuminating system, with 20" latching time. It plugs into all Drake Bite Indicator.

Code	Description
190-40-510	Drake XTR Stiff Hanger *Blue
190-40-520	Drake XTR Stiff Hanger *Red
190-40-530	Drake XTR Stiff Hanger *Green
190-40-540	Drake XTR Stiff Hanger *Yellow

## Drake XTR Drop Hanger

The new Drake XTR Drop Hanger is the best bite indicator you can have actually in the market for medium and short range fishing. The line tensioning system doesn't need to be regulated and can be used both with braided lines or monofilaments. The smooth rounded heads ensures tangle-free operations. The fluorescent head features a led illuminating system, with 20" latching time. It plugs into all Drake Bite Indicator.

Code	Description

190-40-340	Drake Drop Hanger *Yellow

# BLACK QUEEN

## Black Queen Bait Boat

NEW 2012

Black Queen has been revealed in these two years, one of the most popular and reliable bait boat. The new boats released nowadays feature a brand new micro-processor to regulate the speed. This ensures the user very fine control on the engine power, thus ensuring fast and accurate responses. This is the ultimate proof that K-Karp Staff is introducing new technologies combined to strict quality controls, together with constant testing by experienced designers and engineers, to continue improving performances. For these reasons we are sure it will be the best baitboat on the market for many years. The trimaran design feature allows for perfect steadiness and a better flow. The upper deck and the underwater part are silicon linked to guarantee easy maintenance and a perfect water tightness. The main safety system always keeps the boat under control - when the signal between the remote control and the boat becomes weak because of excessive distance or for flat batteries the safety device determines the immediate return of the boat. Obviously the main functions are to contain and carry boilies, seeds or pellets inside its big tanks, and also deliver the baited rigs to every place and area in the swim that the angler wants. To complete this fantastic baitboat, we have added a new sonar. This fantastic accessory is called Fish Finder. It can be easily attached to the boat changing the main opening cover lid. With this accurate Fish Finder the angler will always be able to find the right area to place the baited rig and to know that it is always in exactly the right place.

### Solar Panels Recharger

The solar panels recharger allow to be completely independent during the long fishing sessions. It is enough a good illumination to allow the complete recharge of the batteries. For the maximum performance of the panels we advise to put them perpendicularly to the solar rays.

# TORMENTA

Remote Control

NEW 2012

## Tormenta Bait Boat

After the huge success of Black Queen, K-Karp presented another boat smaller than its predecessor. The success of the Black Queen has enabled K-Karp to present another smaller trimaran baitboat - The Tormenta is equipped with a 1,5 kg tank for bait and one independent hopper to deliver the baited hook into the feeding zone. Designed and built to the same standards as the Black Queen the Tormenta is suitable for canals, lakes, and carp fisheries pond. The Tormenta baitboat can be equipped by a fantastic accessory - a new sonar called Fish Finder. This can be easily applied to the boat changing the main opening cover lid. With this accurate Fish Finder the angler will be able to always find the right place to put his baited rigs and will always know where his baited hooks are.

### Solar Panels Recharger

The solar panels recharger allow to be completely independent during the long fishing sessions. It is enough a good illumination to allow the complete recharge of the batteries. For the maximum performance of the panels we advise to put them perpendicularly to the solar rays.

**NEW** >> **K-Boat 270**

V-shaped bow inflatable boat, built with the best quality materials reinforced with thermally sealed seams, antislip hard aluminium bottom and rigid keel. Thanks to its stoutness, stability and load capacity this boat is dedicated to the toughest tasks. Made with 3 +1 independent air chambers provide maximum

safety under all conditions. Supplied with oars, foot pump, repair kit and carry bag.

Code	Sizes	No.Of Chamber	Max H.P.	Maxload
100-01-000	270x152	3+1	10	484Kg / 3.5men

**FEATURES:**

- Non Slippery Aluminium floor
- Hard keel
- Heavy duty engine mount
- 2 aluminium paddles
- Pump
- Repair kit
- Carry Bag

**NEW** >> **Aquapower Trolling Motor**

Range of high quality and reliable electric motors. Very comfortable thanks to the tilting head with extensible tiller and extremely stout thanks to stainless steel stem plate and strong aluminum bracke. Very practical thanks to the minimum pack volume when removed for storage. Available in 3 thrusts for best fitting to all bodies of water normally faced by different fishing methods for which can be used. They come with a spare propeller and have a two-year warranty against manufacturing defects.

Code	Lbs Thrust	Voltage	Rec. AH	Max. Curr.	Speeds	Weight Kgs

100-02-020	54	12v	120AH	50	5F / 2R	12.25

**FEATURES:**

- Durable and strong Aluminum bracket
- Stainless steel shaft
- Corrosion resistant
- Adjustable shaft height
- Integrated battery meter
- Tilting Head with Extendable Tiller
- Advanced Rotating Head
- 5 forward/2 reverse speeds
- Weedless 3-blade propeller
- Spare propeller
- Input DC 12V
- Packable to small size
- With 34 lbs,44 lbs, 54 lbs thrust
- Two year warranty

### K-Box Unit Pro

The new K-Box Unit Pro is able to store an incredible quantity of small accessories. In this unit is possible to fit two Rig Storage SL, eight Accessory Box, and many other rigs materials. Like the other Unit (medium and large) this box have meters and inches scale printed on the top.

Unit Pro Sizes  
364x286x61mm

Code	Description
190-74-125	Unit Pro

\*Accessory Boxes not included

### K-Boxes Units

Unit large and medium are the best to contain all carp fishing accessories. The divisors are removable to personalize each box. You can fill them with hooks, rockets, leads, and so on, but also small tools thanks to the accessory boxes. K Boxes are equipped of strong tops, shock resistant, on which you can find a meters and inches meter, very useful for rigs. The spring lock zips are reinforced.

Unit Large Sizes  
346x236x61mm

Code	Description
190-74-120	Unit Medium
190-74-110	Unit Large

### Accessory Box

These boxes allow you to put in all your small tools, in a orderly way far from water and dust. They are perfect for swivels, clips, sleeves and others small accessories. All the Units perfectly fit with all the accessory Boxes.

Code	Description

# XTREME

## CAMOU LINE & FLUOROCARBON

All The Xtreme lines are sold within a tin to guarantee the line extra protection and enable the line to be kept in a permanent darkness and out of direct sunlight as well as to provide the line with a constant level of humidity. Always remember to return the unused line to the tin and store away from heat and direct sunlight. To maintain the line in pinpoint conditions please always remember to wipe your line with a damp cloth at the end of every session, this will remove any debris and increase the lifetime.

- Please take extra care when loading your XTREME line onto your reel's spool, always allow the spool to spin freely when loading into the reel, applying a good level of resistance by gently trapping the line between your fingers or loading the line from a warm bucket of water thus to reset any memory coils, giving you a perfectly filled reel's spool.
- Suggested Knots: Double Grinner / Albright Special / Grinner / Half Blood / Palomar

Each spool is labelled every 200m for the maximum accuracy when loading your monofilament into the reel. This will allow you greater flexibility when partially loading your spools and give you the indication of how much line you've left.

**NEW**

### Fluorocarbon Coated Line

The XTREME Fluorocarbon is the ultimate choice for the allround carpers, offering an ultra low visibility and the ultimate camouflage. By using the latest line extrusion technology, XTREME exhibits outstanding suppleness with the stiff wiry feel often found on super tough reel lines. The fluorocarbon coating adds weight to the line for a superb sinking action, high knot strength and increased the abrasion resistance for fishing in heavy weed or snaggy swims, all combined with a low stretch and memory free. Whilst the super smooth surface aids casting distance and accuracy.

- High Abrasion Resistance
- Low Stretch Monofilament
- Superior Knot Strength
- Molecular Treatment

### Advanced Camouflaged Line

The XTREME CAMO lines as the name itself suggests, has been specially designed to withstand extreme fishing conditions as gravel bars and snaggy swims. Produced by innovative technologically copolymers, Xtreme features a tremendous abrasion resistance, high knot strength, a low stretch and totally memory free, thus combined to a great suppleness and a slow sinking rate. The Camo Green Colour is designed to fish in heavy weed, while the Camo Brown is perfect on high abrasive gravel bars and snaggy swims.

# MAINLINES & LEADERS

K-Karp line represents the first choice for expert carp anglers. This is because our lines deliver excellent quality and high performance that places them at the very top of the market. They are all developed following studies on polymers and their molecular union, creating new mixes

with higher and more specific characteristics. The absence of memory, the low stretch and the abrasion resistance are some of the features that are found in these lines. During the manufacture and the spooling, K-Karp lines are tested with maximum care, this mean, metre by

## DYNA-TEX Power Braid

This is an excellent braided line wholly yarned by Dyna-Tex. This special fibre has been invented and developed by our Karp K-Team. Dyna Tex is characterized by an extraordinary compactness associated with a very small diameter compared to the tensile strength and it present "zero" elongation. This combination makes it ideal for fishing at long range and even extreme range. Moreover, the strong resistance to abrasion and knot strength provide a virtually unlimited use over time and in any fishing situation. Especially good when used in swims containing snags, weed and gravel where wear resistance is essential. The green colour gives camouflage on most lake bottoms.

## DYNA-TEX Sinking Braid

The Dyna-Tex Sinking braid is the choice of many members of the K-Karp Team for its exceptional sinking ability under all conditions. To produce this feature a very small percentage of Sinking Fiber has been added. This is a polymer with a high specific gravity that ensures sinking even in swims where algae and mud are present. Its ultra compact special structure makes it ideal for fishing on any type of bottom including weed, sand, and gravel - while the dark green colour gives camouflage in every situation.

## Sinking Plus

Sinking Plus line uses advanced dyeing technology to create a camouflage with five different tonal colours that alternate every 30 cms. This unquestionably breaks up the shape and appearance of the line, helping it to blend in and disappear whatever its surroundings. It is without any doubt, one of the most technological lines on the market nowadays, enabling maintenance of sinking quality and an incredible abrasion resistance. Despite all these qualities, it maintains its softness along with low stretch and it doesn't suffer the torsion effect. Ideal in clear waters when camouflage is necessary.

## Mono Plus

Carp-Fishing specific line with excellent knot strength, very good abrasion resistance, complete absence of memory and super soft. It is exceptional for its extra low stretch characteristic. The best line for wary fish in difficult swims with sunken and hidden obstacles. Its light brown colour, nearly neutral, makes a perfect camouflage on every type of bottom.

# MAINLINES & LEADERS

## Camou

Carp-Fishing specific line made by a special process that gives it 6 different tonal colours, which is therefore, the best camouflage now available on the market. Excellent abrasion resistance, very good knot strength and softness are the most important features. Ideal for mixed bottoms with weed/silt/ gravel etc as it blends perfectly.

## Hi-Flow

HI-FLOW is manufactured and spooled observing all the strict rules of K-Karp standards. However it has a very competitive price. This line is particularly strong, abrasion resistant and it has a good knot strength. We suggest to use Palomar, double Palomar or Grinner knots. Its dark colour is perfect for all lake beds.

### Mimetic Mono

At the request of a wide array of Carp anglers, K-Karp has designed the new monofilament Mimetic which is dedicated to those who love to fish rivers or in waters where many obstacles are present. Its camou color ensures a perfect camouflage on the bottom and, in clear water conditions it helps to break the visibility of the line thanks to alternation of shades of green and brown. Resistance to abrasion,

good knot strength and the low elasticity of Mimetic make a really tough line suitable for the most challenging waters. The price is highly competitive and it is available up to 0.50mm diameter.

### Shock Leader Impact

This Monofilament has been introduced exclusively for the creation of Shock Leaders. Effectively having "Zero Memory" thanks to its unique rigid structure, it has been tested to resist the most aggressive and powerful casting. Moreover, the special treatment Super Cast allows extreme casting distances, speeding the flow of the line through the guides and by its increased natural resistance to abrasion. It is also ideal when using a shock leader as anti abrasion piece, enabling fishing in areas where there are many sharp and rough obstacles. The brown colour ensures a unique camouflage on any bottom.

### Fluorocarbon

This brand new fluorocarbon is made with a high density copolymer which gives great resistance to abrasion, outstanding sinking feature and unrivaled knot strength. This fluorocarbon is 100% waterproof ensuring the preservation of its qualities that remain unchanged even after days of constant use. Invisibility is also guaranteed in clear water, so it is ideal for making innovative stiff rigs, D-rigs or rigs of the very latest generation. In the larger diameters it also lends itself to replace lead core with invisible snag leaders, to catch even the most difficult carp.

# DYNA TEX

LEAD CORE  
ELUSIVE  
X-TRA TOUGH  
EAZY STRIP

## Lead Core

DT Lead Core is set up using Dyna Tex in two different main colors: Weed and Camo. It is notable for its extraordinary resistance to abrasion and the larger diameter of the internal lead, thanks to which the line rests perfectly on any type of bottom - remaining invisible to even most wary carp. The creation of eyes or loops for swivel or main reel line attachment is provided by a special lubricant treatment called Fast Knot, which compacts the fibres and increases durability.

Code	Color	Mtrs

198-76-045	CAMO	5	45
198-76-060	CAMO	5	60

## Elusive

This is an exceptional ultra soft braided line. It present two sinking types, Fast and Slow, and two different camouflage colors. The particular design of its Dyna Tex fibres, has resulted in a softness that makes it almost completely undetectable to the carp when it eat the bait. The addition of a small percentage of Sinking Fiber with a greater specific weight, provides a quick sinking making it perfect for hard bottoms and for very wary carp.

## X-Tra Tough

The Dyna-Tex X-Tra Tough is a braided line completely constructed with Dyna-Tex and an added High Resistance fibre. It has been introduced specifically for the toughest of fights in very inaccessible areas. Its exceptional resistance to abrasion, wear, and its perfect sinking action ensures tenacity and resistance in all settings. Its unique fibre compactness allows the creation of semi-rigid terminals which enhance the round effect of the hook in the mouth of fish. The colours of green and brown give excellent camouflage on all types of bottom.

198-66-045	Camo Brown	20	45

## Eazy Strip

Braided line covered with an easily removable sheath of PVC has exceptional resistance to abrasion and the perfect sinking action. This combination represents the best way to create the modern combi rigs, terminals formed by a rigid portion accompanied by a softer section that ensures high mobility rigs making rigs that increase the anti-ejection effect. The interior braid is the new Dyna-Tex compound with micro filaments giving high abrasion resistance. There are two colours: Camou Brown and Camou Green, both camouflaged and very dark in tone. These are ideal for camouflage on both muddy and sandy bottoms and also on those covered with weed. To verify the true color "camou effect", we recommend to wet the braid that will totally change the color acquiring absolutely a camouflage color.

**Non Reflective System**

The anti-glare surface treatment guarantees the maximum camouflage and offers additional protection to the hook, preserving the integrity of the point for a longer time.

**Chemically sharpened point**

Reinforced and chemically sharpened point last longer and have a better penetration, dramatically decreasing the chances to un-hook the carp.

**Full Closed Eye**

K-Karp hooks are subjected to a special process insuring the hook eye is perfectly closed, for maximum security and reliability of your rigs.

## D-Rig

The shape of this hook make it perfect for D-Rig presentation, thanks to the long shank the bait can slide perfectly and the rotation is guarantee from the turned eye. Forged and PTFE coated, is perfect for particles or pop-ups.

197-34-040	04	10
197-34-060	06	10

## Series 8210

The unique shape of this hook is perfect when the target are suspicious and wild carp. Long and sharp point with medium sized barb and the turned ring allows to set the hook easily in any conditions, thanks to the perfect rotation this hook can have in the carp's mouth. European K-Karp team have tested this hook in really extreme conditions, and we can definitely say that this is one of the strongest hook in the market. Hi-Carbon steel, turned point, short shank, perfect to be used also with oversized boilies.

197-10-020	02	5
197-10-040	04	5
197-10-060	06	5

## Series 8353

This straight, long shank hook with an turned eye, constitutes the most effective solution to very wary carp, when the long run, type D-rig is required. It seems to have a knack of producing more bites and positive hooking in these situations. The hook shape is modelled to bring an instant penetration. K-Karp hooks utilise the latest cutting system, low friction coating technology. In our opinion they are the best for strength, sharpness and durability.

197-00-020	02	5
197-00-040	04	5
197-00-060	06	5

## Series 8354

"The most used hook by carp anglers, thanks to its versatility of use. The 8354 is the hook to use if you are looking for an edge when using subtle rigs, in particular with short hooklinks, and short hair-rig presentations. The extra wide gape, short shank, with a straight eye and in turned point pattern sets the hook every time. In our opinion they are

the best for strength, sharpness and durability.

197-05-020	02	5
197-05-040	04	5
197-05-060	06	5

## Series 8355

Straight eyed hooks are used in many fishing situations. If you superglue the shank of these hooks to floating baits and have the point directed away from the bait then the line will come straight off the eye and away from the surface. The hooking ability of the straight eye hooks can be improved dramatically by creating a line-aligner using shrink tubing. In our opinion they are the best for strength, sharpness and durability.

## XTR Safety Clip W/Pins

The brand new Xtr Safety Clip W/Pins creates an extremely safe and effective bolt rig system, ideal for weedy and snaggy venues. Can be used also for fishing in big river thanks to the locking system of the swivel.

Code	Pcs
190-00-480	6 Sets

## Lead Clip

Lead safety clips suitable for making Bolt rigs. The package includes practical Nail Blocks, and pins that have a firm attachment of the swivel inside the clip. They are suitable for the use of swivel Speed Links number 9.

Code	Pcs
190-00-410	10 Clips + Nails

## Lead Clip Set

Practice pack of five camouflage lead clips each of which is accompanied by a anti-reflective swivel, a Cone Rubber and a Nail Block. These ultra-resistant Lead Clips are tested for casting weights more than 5 ounces.

Code	Pcs
190-00-430	5 Sets

## Safety Sleeves

Particular camouflaged soft rubber cones. These are ideal to build traditional bolt lines of the last generation. If necessary they can be used as a sliding assembly.

Code	Pcs
190-00-400	5 Sets

**NEW**

## XTR Gated Clip

XTR Gated Clip is the most versatile and safe lead clip, offering a unique bolt rig system. The strong wire lock the hooklinks and the lead securely.

Code	Pcs
190-00-490	6 Sets

## Rubber Cones

These new soft rubber cones are now even more durable, ensuring greater grip and resistance against impact with obstacles. The dark green colour makes a perfect camouflage against any type of bottom.

Code	Pcs
190-00-420	10

## Metal Bolt Clip Set

This Bolt assembly is strengthened by a metal structure that holds the lead during stronger casting. It allows the loss only in case of becoming snagged up, thereby protecting the carp. The pack includes five clips accompanied by Metal Bolts on anti reflection swivels and Rubber Cones.

Code	Pcs
190-00-440	5 Sets

**NEW**

## Anti Tangle Sleeves

XTR Anti Tangle Sleeves are designed to fit swivel eyes and create anti-tangle set ups pushing the rig away from the lead and mainline when casting as well as protecting your swivel knot, improving the effectiveness of your rigs.

Code	Pcs
190-00-140	Regular / 20

NEW

### Running Rig Bead

The Running Rig Bead is specially designed for use with running rigs incorporating leadcore or other tubing systems. The soft rubber compound acts as a shock bead, while the innovative angled profile is designed to hold in place the lead sitting a much better angle to eliminate tangles and help to get those extra distance when fishing at long range.

Code	Pcs
190-00-290	5

### Run Rings

Perfect for the sliding rig construction offering the solution to the wary instinct of the carp. The large diameter of the ring reduces the wear, making a very soft rig.

Code	Pcs
190-00-120	20

NEW

### Chod Bead

Chod set ups are one of the most popular presentations nowadays. The unique design of our bead allows to tie this set-up on leadcore, tubing or directly on the main line with ease. It's safe and very inconspicuous on the lakebed.

Code	Pcs
190-00-270	10

NEW

### Tulip Bead

The Tulip Bead is specially designed to be used as a front stopper on the helicopter, chod or any running rig set up. The innovative design features a tapered head that eliminates tangles because the bead has no edge to catch on, While the groove is designed to fit securely any pva bags or string.

Code	Pcs
190-00-285	10

### Multi Beads

Soft rubber beads with internal tapered profile to protect the knots. Blister pack of 20 pcs.

Code	Size	Pcs
190-00-150	6X12mm	20
190-00-160	6X25mm	20

### Heli Beads

Soft rubber beads with tapered internal profile, suitable for helicopter rig or to protect knots in situations extreme. Blister pack of 20 pcs.

Code	Size	Pcs
190-00-170	6X30mm	20

NEW

### Knot Protector Beads

K-Karp shock bead has been designed to slide over the swivel to protect knots and prevent tangles. Ideal for marker float, running lead, helicopter rig or any set up that requires a buffer type bead.

Code	Pcs
190-00-280	10

### Pro Rubber Beads

Soft rubber beads in 6mm and 8mm with different diameter holes in the two parts to be used as outdistance. Blister pack of 30 pcs.

Code	Size	Pcs
190-00-260	6mm	30
190-00-265	8mm	30

## Lead Safety Clips

Green color lead safety clips, extremely resistant.

Code	Pcs
190-00-020	10

## Safety Cone Clips

Very resistant lead clip can be used with 4 ounce leads or more. Designed for releasing the lead in case of snagging on obstacles. Blister pack of 5 clips and 5 cones.

Code	Pcs
190-00-000	5 Sets

## Ruond Rubber Beads

Round rubber beads, available in 3 different diameters. Blister pack of 30 pcs.

Code	Size	Pcs
190-00-200	4mm	30
190-00-210	6mm	30
190-00-220	8mm	30

## Soft Rubber Cones

Soft rubber cones, to use with Lead Safety Clips and antitangle tube. Blister pack of 10pcs.

Code	Pcs
190-00-030	10

## Extra Lead Safety Clips

High quality Safety Clips, made by a special plastic mix that makes it both elastic and resistant at the same time. Studied for releasing the lead in case of snagging. Blister pack of 10

Code	Pcs
190-00-040	10

## Rig Sleeves

Rig Sleeves for the construction of the anglers hand made rigs. Available in 3 different diameters. Blister pack of 10 pcs.

Code	Size	Pcs
190-00-300	S	10
190-00-310	M	10
190-00-320	L	10

## Beads Dispenser

Round rubber Beads dispenser filled with different diameters from 4mm to 12 mm.

Code	Size
190-00-180	da 4mm a 12mm

## Shrink Tubes

A black colour shrink tube, with 1:3 reducing factor. The quality materials used guarantee high resistance, which is an essential characteristic for the realization of advanced rigs. Pack in 1 mt. Blister.

Code	Size
190-30-300	1m *1.60mm
190-30-310	1m *2.40mm
190-30-320	1m *3.00mm

## Shrink Tubes TRASPARENT

A transparent shrink tube, with 1:3 reducing factor. The quality materials used guarantee high resistance, which is an essential characteristic for the realization of advanced rigs. Pack in 1 mt. Blister.

Code	Size
190-30-400	1m *1.00mm
190-30-410	1m *1.50mm
190-30-420	1m *2.00mm
190-30-430	1m *2.50mm
190-30-440	1m *3.00mm

### Lead Clip Kit

Clips generated from mixtures with a high percentage of resins that provides flexible sealing under all circumstances. Their structure is more discreet than usual ones, ensuring a successful presentation in difficult situations when the carp are suspicious.

Code	Pcs
190-00-460	5 Sets

### Run Rig Kit

Kit for the construction of extraordinary Run Rigs with the terminal junction of Hawaiian Snap carabiners gives the very best performance for sealing and practicality. The new compounds of components ensure a long life and durability even when encountering sharp obstacles. The kit includes a long anti abrasion PVC tube, ready to cut to the desired length.

Code	Pcs
190-00-470	5 Sets

### Slide Heli Rigs

Set for the construction of low resistance helicopter sliding rigs. Each set is composed of 3 Shock Rubber Beads, 3 soft rubber cones, 3 UniLink swivels and 3 rubbers beads. Blister pack.

Code	Pcs
190-00-055	3 Sets

### Metal Bolt Rigs

Set for the construction of 3 Metal Bolt rigs. Each set is composed of 3 rubber cones, 3 metallic clips, 3 plastics bases and antitangle tube. Blister pack.

Code	Pcs
190-00-060	3 Sets

### Lead Run Rigs

Set for the construction of 3 low resistance sliding rigs, known as the Run Rig. Each rig uses of 1 rubber cone, 1 rubber shock bead, 1 swivel, 1 sliding ringlet and the tube for safety when fixing the lead. Blister pack.

Code	Pcs
190-00-050	3 Sets

### Heli Rigs

Set composed of 3 ready assembled helicopter rigs, including anti-tangle tube. Simply attach to the main line or to the hook length.

Code	Pcs
190-00-065	3 Sets

### PVC Tubes

Green colour camou PVC tube. The particular colour allows the tube to be perfectly camouflaged on every type of bottom. Excellent for the construction of the anglers anti-tangle rigs. 2,00 mt. Blister pack.

190-10-390	Big Bait Stopper	Yellow	128
190-10-400	Big Bait Stopper	Red	128
190-10-410	Big Bait Stopper	Brown	128

## Extend Bait Stopper

These stoppers enable you to extend the hair without having to tie a new leader/rig! This will allow you to easily change the bait size in a while or just lengthen your hair, making more profitable even the hardest days. Moreover it keeps the bait better fixed on a hair. Each rack has 3 different sizes.

Code	Color	Pcs
190-10-500	Clear	126

## Boilie Stop

Soft rubber boilie stop, ideal for every type of bait. The concave form has been designed for correct positioning of the hair loop into the bait. Available in two colours, transparent and orange. Blister pack.

Code	Color	Pcs
190-20-090	Table Clear	3
190-20-095	Table Orange	3

## XTR Ring Stop

**NEW**

The unique profile our stops is designed to fit into the hook shank acting as a buffer for oval or round ring. Allowing to create the ultimate anti-eject set ups.

Code	Pcs
190-10-530	30

## Pro Bait Bands

Elastic rings for the creation of various rigs. The small ones can be used to band small pellets while the medium and large are used as boilie or other bait stops or to adjust the length of a double bait or snow man.

Code	Size	Pcs
190-10-450	Small	50
190-10-460	Medium	50
190-10-470	Large	50

### Bait Discs

**NEW**

The Bait Disc have been designed to hold your hook bait on the hair safely and securely, improving the presentation of pop-up or other soft baits. Just insert the bait disc between the bait and stopper for better support when casting at long range, or even between the bait and the hook shank to space pop-up set-ups. As the shape of the Bait Discs it makes it very difficult for Crayfish to pull them off.

Code	Size	Pcs
190-10-540	5mm	100
190-10-550	8mm	100

### XTR Fast Change Pop-Up Weights

The Xtr Fast Change is a brilliant pop-up weight system that allows the counter weight to be altered in seconds. The unique low profile will blend in with any lake bed and prevents damage to line whilst elastic locks weight firmly in place. The weight is attached simply by stretching a piece of the elastic and placing into the slot, once located it can be moved by moistening the line and gently sliding. Designed for balancing pop-ups, pinning down the last few feet of mainline as an alternative to leadcore and for keeping hook links tight to the bottom. Finished in non-reflective black and non-toxic material.

Code	Size	Pcs
195-68-200	0.6g	10
195-68-210	1.0g	10
195-68-220	1.4g	10

**NEW**

### Foam Squares

Floating foam tablets, available in three different colours, for the construction of floating or balanced rigs.

Code	Color
190-10-200	Yellow
190-10-210	Orange
190-10-220	Red

### Boilies Shield

Transparent shrink tube applied to protect the bait from small fish and shrimps, without limiting its effectiveness. To use it, simply cut a piece of shrink tube a little less wide than a boilie and pass it through vapour to tighten. Tightened to the bait, the tube can be reduced and trimmed with scissors.

Code	Size
190-20-180	1m / 2.2mm
190-20-190	1m / 2.5mm

### Xtr Bait Bands

Code	Size
190-20-045	Standard
190-20-047	X-Large

## XTR Back Lead System

XTR Back Leads has been designed to “pin” down your line to the bottom, whilst the line gate releases just on the strike, simply ideal if you want to use a back lead system but do not want any extra weight on the line whilst playing a fish. The cord and the winder are designed to attach to the pod and aid the recovery. Just set clip tension by twisting the barrel, clip to the line and allow the XTR Back Lead to slide down the mainline until the lead reaches the bottom at required distance. The XTR Back Leads enables tight lines to be fished from the margins to rig, it can even be fished off the bottom to avoid weed and detach instantly when you receive a bite.

**NEW**

Code	Description	Weight
195-68-000	XTR Back Lead System	2oz / 56g

## Flying Back Lead

The XTr Flying Back Lead allows to pin down and concealing your mainline on the bottom, reducing the chance of the line spooking fish. Our Flying Back Lead includes a plastic inner which protects the mainline and feature a concave nose to ensure it slides effortlessly up your line during the casts. Designed to be easily added or removed from your mainline without the need to break down your tackle, finished in non-reflective black and non-toxic material.

**NEW**

Code	Weight	Pcs
195-68-100	6g	5
195-68-110	9g	5
195-68-120	15g	5

## Back Lead Rings

Practical rings for the connection of the Back Leads to the main line. Every blister contains 3 rings and 3 soft rubber sleeves. Blister pack.

Code	Description	Pcs
190-00-070	Extra Back Lead Ring	3

## Back Leads

Sinkers to sink the line and keep it on the lake bed; used on windy days or in case of dirty surface film.

Code	Weight	Pcs
195-66-015	15g	3
195-66-025	25g	3
195-66-040	40g	3

## Carp Accessories SET

Set containing all the necessary tools to tie all the principal rigs used in carp fishing. The sets include: Hair Stops, Hair Stops Comb., Ledger Booms (10cm), Nut drill, Stringer needle, Boilie stops, Hair rigs, Helicopter set, Rubber beads, Swivel beads, Antitangle flexi and stiff, Deluxe helicopter and Soft ledger stops.

## Braid Scissor

Specially bladed scissors for cleanly cutting braided line.

Code	Description
190-20-210	Braid Scissor

## Black Handle Scissor

These stainless steel scissors are able to easily cut every type of braid, the tapered points guarantee the maximum precision.

Code	Description
190-20-220	Black Handle Scissor

**D-Pear**

One of the most popular profiles used by anglers from all over Europe. Its shape is the best possible compromise between casting performance and stablehold in every type of lakebed. We recommend their use in still water.

Code	Weight
195-70-025	2.5oz
195-70-030	3.0oz
195-70-035	3.5oz
195-70-040	4.0oz
195-70-050	5.0oz

**Inline Disk**

Probably one of the best lead available to fish with blocked rigs. Even though the round shape is not the best for long cast, with our disk is possible to reach long distance, thanks to the decentralized weight on the front, this feature improve also the stability of the lead on the bottom of lakes or rivers.

Code	Weight
195-71-030	3.0oz
195-71-040	4.0oz
195-71-050	5.0oz

**Swivel Disk**

One of the best lead available to fish with blocked rigs. Even though the round shape is not the best for long cast, with our disk is possible to reach long distance, thanks to the decentralized weight on the front, this feature improve also the stability of the lead on the bottom of lakes or rivers.

Code	Weight
195-72-030	3.0oz
195-72-040	4.0oz
195-72-050	5.0oz
195-72-060	6.0oz

**Inline Pyramid**

The best solution for all the angler who need to reach important casting distance using in-line leads. The special decentralized shape of this lead give good stability on cast. We recommend this lead on rocky or hard bottoms.

Code	Weight
195-73-030	3.0oz
195-73-040	4.0oz
195-73-050	5.0oz

**Drop**

Our new Drop lead is perfect to be used in connection with semi-blocked rigs. The wide surface allows to set the hooks easily, ideal solution for soft bottoms.

Code	Weight
195-74-030	3.0oz
195-74-040	4.0oz
195-74-050	5.0oz
195-74-060	6.0oz

**Flat Pear**

One of the most well known shape from the European carp angler. The smaller sizes are suitable for marginal fishing, while the heavier sizes can be used in river fishing. Optimal self-hooking performance.

Code	Weight
195-75-025	2.5oz
195-75-030	3.0oz
195-75-035	3.5oz
195-75-040	4.0oz
195-75-050	5.0oz

**Total Grip**

This lead is made to be used in medium and long range fishing. The shape of the Total Grip give maximum stability in slippery bottoms or when fishing in river with strong current. Thanks to the small hole can be used also with small quantity of method.

Code	Weight
195-76-090	90g
195-76-120	120g
195-76-140	140g
195-76-170	170g

**Distance Grip**

If you are looking for stability on the bottom and casting performance, this lead suit perfectly your requirement. The shape allow this lead to fly like a bullet, while the small studs on the sides give maximum stability on the bottom.

Code	Weight
195-77-110	110g
195-77-130	130g
195-77-150	150g

Code	Size	Mtrs
190-71-310	37mm	5
190-71-320	44mm	5

**XTR Bait Crusher**

The Bait Crusher has been developed to crush the hardest baits. It's the perfect tool for blending PVA Bag Mixes, Spod Mix ingredients or handfuls of boilies, the Bait Crusher does the job quickly and efficiently thanks to the stainless steel studs. Simple to use, you just fill to the level with pellets or particles of your choice and grind away until you get them to

the size you want them down to, more you grind, more the bait becomes smaller.

Code	Description
190-71-200	XTR Bait Crusher

**XTR Dynamic Spod**

**NEW**

XTR Dynamic Spod features large profile holes making it just as quick to empty, and as easy to retrieve, suitable for pellet, larger particle and small or crushed boilies. The reverse taper, weight forward design with large fins makes spodding easy even at great distance and ensures stable flight and accurate casting in every conditions. The solid base to the body retains liquids, adding weight and improving casting performances.

Code	Size
190-70-240	Dynamic Spod XL

**XTR Spod**

**NEW**

A high capacity, aerodynamic long distance spod for fast, heavy baiting with mixes of pellet, particle and small boilies. The reverse taper, weight forward design with large fins makes spodding easy even at great distance and ensures stable flight and accurate casting in every conditions. The solid base to the body retains liquids, adding weight and improving casting performances. With heavy spod rods and shock leaders the K-Karp XTR Spod can be cast well in excess of 100m.

Code	Size
190-70-250	XTR Spod Medium
190-70-260	XTR Spod Large

## Spod Rockets

A 4 cable Rocket usable with your rod for launching your bait onto exactly the right spot - for accurate baiting with any bait type. The floating head helps you to deliver the bait perfectly.

Code	Size
190-70-200	Small
190-70-210	Medium
190-70-220	Large

## XTR Method Feeder

The lead at the back end allows you to have long cast, more accurate and avoids the main line injuries. Its shape makes the bait stay always on top for a perfect presentation. Plastic parts perfectly preserve the groundbait and it can't be lost during the casting. This new Method is perfectly suited to the full range of rigs accessories K-Karp.

Code	Size
190-70-850	40g
190-70-860	60g

## Method Blaster

The XTR Method Blaster have been designed to convert your spod rod into a catapult, baiting up with big balls of method or groundbait at distance with ease. Simply tie the the Method Blaster to your line and cast, if you clip your line-up 20 yds from the rod tip you dont have to retrieve the whole cast as you would spodding, making it a very fast way too!

Code	Description
190-70-030	Method Blaster XL

## Dip Stick

Stick for ensuring the correct immersion of the boilies inside a dip. This simple operation will radically increase the attracting power of the bait.

Code	Description
190-20-160	Dip Stick

## Dip Box

A boilie maintenance box. It guarantees the maintenance of the original aroma, therefore we advise adding some dip to the inside.

Code	Description
190-10-000	Boilies Dip Box

## Marker Feature Finder

Excellent hollow transparent PVC marker with 3 highly visible coloured tops even at a great distance - three different colors: yellow, red and luminous. Simple to use with a wide spectrum of useages. Can be used to survey the swims for normal depth plumbing or to find fish that are cruising off the bottom - also to identify weed, gravel or sandy bottom areas.

Code	Description	Pcs
190-10-060	Weedy Marker Set	3
190-10-070	Sensitive Marker Set	3

## Marker Float

Marker float made entirely by plastic, virtually unbreakable. The aerodynamic shape allows long and smooth casts, keeping a perfect asset during the flights. The set includes the Marker Float and 3 fluorescent fletching.

Code	Description
190-10-050	Marker Float

## XTR Marker Float

These two new marker float offer unrivalled durability, buoyancy and performance. Made using high impact and ultra-buoyant material, that helps to get an accurate reading of the depth and underwater features. The ultra-large fletching is easy to spot at great distances and improve the stability during the flight, to get longer and more accurate casts all the way.

Code	Description
190-10-080	Marker Float MD
190-10-090	Marker Float LR

## Explorer Leads

Explorer leads have been purposely designed to be used in conjunction with our marker floats, getting as much information as possible about your swim. The particular shape will help you to precisely locate any bottom configuration, and to detect any weed, snags or gravel bars. The rigid wire stem helps the float to rise to the surface as the marker is held above the weed and cannot become snarled, it prevents damage on the marker float and prevents tangles during the cast as well. The extra large eye allows the line to slide through it easily.

Code	Peso
195-78-085	85g
195-78-110	110g

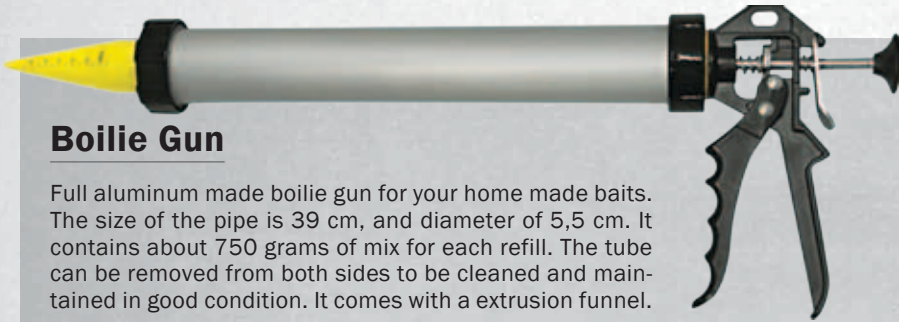

## Groundbait Catapult

Catapult designed to allow easy and smooth feeding at medium and long range with a large selection of baits. The handle is shaped to deliver the maximum grip in all conditions, while the frame is made by strong aluminum for accuracy. Fitted with 5mm elastics.

Code	Description
190-70-300	Groundbait Catapult
190-70-400	Spare elastics * 2pz

# BAIT & FEEDING ACCESSORIES

## Boilie Gun

Full aluminum made boilie gun for your home made baits. The size of the pipe is 39 cm, and diameter of 5,5 cm. It contains about 750 grams of mix for each refill. The tube can be removed from both sides to be cleaned and maintained in good condition. It comes with a extrusion funnel.

Code	Description
190-70-900	Boilie Gun

## Boilie Gun Nozzle

Boilie Gun spare nozzle with graduated scale to cut the point at the required diameter.

Code	Description
190-70-910	Boilie Gum Nozzle

## Boilie Rolling Table

Boilies and Pop-Ups rolling tables available in five different diameters. They are dedicated to those who like to build their own bait with precision. Tables are extremely robust, easy to clean, user friendly, and above all show no signs of pipe extruders construction that cause annoying imperfections in boilies and problems while rolling. Can be fixed using the holes on the side to the table.

Code	Description
190-70-930	Boilie Rolling Table * 16mm
190-70-940	Boilie Rolling Table * 18mm
190-70-950	Boilie Rolling Table * 20mm
190-70-960	Boilie Rolling Table * 24mm
190-70-970	Boilie Rolling Table * 28mm

## Aero Cup

Aero Cups are designed for feeding with boilies, pellets or particles at short or medium distances. The shape and the holes allow the maximum accuracy. Available in two different sizes.

Code	Description
190-70-010	Large
190-70-020	X-Large

## Groundbaiter Spoon

This strong resin spoon is developed for long distance bait throwing. The shape has been designed to contain a large quantity of baits, such as boilies, pellets, grains, and to give the maximum throwing distance. The brass made screw is unassailable from rust.

Code	Description
190-70-000	Groundbaiter Spoon

## Aero Cup Handle

Throwing handle to be used in conjunction with Aero Cups, but it can be well employed with other groundbaiter spoon. Aero Cup Handle features an ergonomic and non slip handle, allowing a perfect grip in cold and wet conditions.

Code	Description
190-70-060	Aero Cup Handle * 25cm

Code	Description
190-70-050	Throwing Stick 90cm
190-70-100	Throwing Stick 180cm

## Throwing Stick

Composite throwing stick handle designed to be used with the groundbaiter spoons for feeding at medium and long distances. The handle feature an ergonomic grip made by from high density EVA to guarantee the maximum performance in all conditions. The 180cm size can also be used as a sturdy landing net handle.

### XTR Throwing Stick

They are currently among the highest performing metal throwing sticks on the market with their innovative features. The excellent bending, the holes distributed along the length to reduce air friction and weight, and loading zone on the bottom allow you to achieve incredible casting distances with minimal effort. Fitted with a comfortable non-slip handle for a secure

grip. They are available in two sizes able to cast boilies up to 22mm or 28mm, depending on your choice.

Code	Description
190-71-150	XTR Throwing Stick * 22mm
190-71-160	XTR Throwing Stick * 28mm

### Drake Bait Caster

The conical shape of the Drake Bait Caster imparts a large acceleration to the boilies allowing you to reach long distances with ease. The carbon fibre model is extremely lightweight allowing prolonged baiting without excessive effort. For maximum results, we recommend drying boilies for 48 hours with

the appropriate K-Karp Dry Boilies before making throws.

Code	Description
190-69-020	Drake Bait Caster FS

### Boilie Shooter

With this tube boilies can be launched exceptional distances thanks to this particular curve which gives the boilies a high exit speed. The lightness ensures simplicity of use and the ergonomic handle ensures a firm grip in all circumstances. They are available in two sizes of different diameters.

Code	Description
190-71-100	Large - Inner 23mm
190-71-110	X-Large - Inner 28mm

**NEW** >>

## XTR Soft Sheel Jacket

The K-KARP XTR Jacket is a three layered soft sheel jacket.
