CONFIDENCE, PASSION AND OPTIMISM AROUND TRABUCCO BRAND

Trabucco is a renown brand in the fishing tackle industry for over 30 years, both for match fishing and for amateur fishing. A so long and strong success, always raising since the beginning, comes from the constant wish to face new fishing techniques and from the continuous research of the best materials to build the products that then will be marketed. Thanks to this spirit of innovation and research the company extended its interests, from top level match fishing in fresh water to the most challenging salt water techniques. Every effort the Trabucco company did in these long years had always two goals: to always offer the best products in the market, equipped with most innovative solutions, and marketing it to the best price possible. Because if Trabucco has become one of the leader brands in Italy and in Europe, the merit goes to its customers, that always trusted whom, like them, has only one big passion in mind: fishing.

ANDREA CARUSO Feeder fishing testimonial. Feeder fishing World individual bronze.

GORAN GICA RADOVIC 2014 INDIVIDUAL WORLD CHAMPION

Fish after fish, he draws the interest of a growing attendance, which crowds in behind him. Goran seems to be extremely cool, as he had already fished the same match so many times, as the emotion was a totally unknown sensation to him. The easiness is the trade mark of all great champions; his tackle is Trabucco, not only because he is our long-term testimonial, but because the World Championship can only be fished with trusted material. So Goran confirms that, when a journalist asks him to reveal the used rigs: even hooks, which nobody could ever had the chance to see, are our XPS. He gets the well deserved gold medal, we bring home the immense satisfaction to see enthusiasm growing around Trabucco brand for a result which rewards the efforts of many people and amplifies the optimism for the future.

LONG POLES

Every year, the date with new match season brings a lot of work at Trabucco team, with thousands of ideas coming on the drawing board and so much excitement about expected performances. On production side, Reglass grants full quality with advanced materials and his own technology to convert them into fantastic poles, while all practical solution and package building come from the

daily use and from the endless research of Trabucco company.

There is a huge distance between the most sophisticated carbon blank and a real pole to fish with, and the gap can be filled only through technical knowledge, direct experiences and a lot of brainpower to convert such assets into something to crave.

NEW 955 MATCH 1 ONE GNT

TRABUCCO

955 MATCH 1 ONE GNT

The new top of the range GNT 955 is the melting point between the highest technology and the strong wish to amaze the most demanding user with thousands of options.

The new top of the range GNT 955 is the melting point between the highest technology and the strong wish to amaze the most demanding user with thousands of options. In fact, the chances to adapt the pole to personal needs aren't limited to the initial step, but go further, up to each single match, because the match angler doesn't just have one need, but as many as the matches in which he takes part. In other words, the pole is prepared to change according to the venue, to the match strategy and to the personal approach to fishing. A really multiform pole, a real dream now available to everybody. Compared to former 915, sharpness and handling have been improved, thanks to two parallel butts which keep the handle slimmer. Therefore, the section n. 9 (13 m butt) also fits into section nr. 7 to fish at one section less with a stronger butt. Sticking to Trabucco mentality, also this new model is far away from those "silver fish poles" in term of reliability, as there is nothing worst than fishing a match fearing that a sudden breakage could stop it. All this could have been enough to talk about "state-of-the-art safety", but, at such level, safety is never enough! So the pole holds a wild card, to be played when conditions require it: a special kit, made of two super strong sections

(Safety Section Kit), destined to replace sections n. 6 and 7 to raise the whole rod's strength because the area above butt normally bears most of the stress. Further options to face tough conditions can be obtained by Match and Strong combinations of Multi-Tip System, offering reliable blanks and 2,7 or 4,7 mm top bore. Four Match kits are supplied with the pole: two made of four sections

and two of five, all fitting the traditional top section (Ø 1,9 mm), exactly same as the one included in the pole. Two mini extensions fitting sections nr. 6-7-8-9 plus cupping kit, made of three sections with a long top to get same length of a four section's match kit. The pole gets 4 and 5 section's kits belonging to former GNT models.

- 1x Cupping Kit 3 Sect. (4.40 m)
- Short Extension for Butt
- Short Extension for Sections 6-7-8
- Protective Tubes & Gnt Rod Holdall

RED/ASS CARATTERISTICHE TECNICHE:

The Anti-Friction System is a particular process that during the production "prints" on the section a microscopic rough mat layer. This layer offers several improvements to the pole, such as easier shipping and unshipping, lighter section and improves the long-lasting.

Nanolith is a special resin with a nanometric particles, who can easily insert themselves into carbon filaments and epoxy resin assuring this way an improvement of the mechanical characteristics. This to obtain an even more prompt action which results more stable and lighter pole.

Fusion is two high modulus carbons fused together as one whilst wrapped on the mandrel. The end result being ultra rigid top kits with no tip bounce, allowing the angler to hit lightning fast bites with ease.

The Teflon Joints consists in a Teflon coating resin applied onto the male joint. This coating prevent a longer lasting on the section and a perfect precision of the fittings. It also avoid the joints to get stuck when wet or dirty. This concept is applied both on the original sections of the poles and the spare kits.

GT TRABUCCO EXTRA PERFORMANCE SERIES

13m Long Pole with 2 Parallel Butt Sections

Safety Sections to Replace Sections 6 & 7

2 x 5 Sections Match Top Kit

2 x 4 Sections Match Top Kit

3 sections Competition Cup Kit (total length 4.40m equal to a match top 4)

Reversible Short Extension fitting into 6°, 7° and 8°

Short Extension fitting into butt section.

Present in the 2 and 1 sections, this new technology is an industry first providing the angler with a silky smooth elastic system. A series of teflon coated inner steps prevents the elastic from making contact with the inner wall of the pole sections, substantially reducing elastic stick, allowing the elastic to gather quickly.

The Clean Caps are made of medium density foam, and have a double utility: every time the male section is fitted, the lips of the Clean Caps clean the inner part of the joint, avoiding dangerous scratches by the sand or dust. In addition to that, once fitted in the male joint, they seal the section avoiding them to sink.

A carbon and resin treatment providing an anti-friction finish that enables the pole to be shipped with incredible ease during wet or dry conditions. This revolutionary surface not only adds strength, but also protects the overall fishing action during hot and cold temperatures

NEW 755 MATCH CARP GNT

Produced in Italy by Reglass, this new pole is perfectly integrated with GNT 955, as it accepts same kits and the exchange of all sections.

Thanks to commercial lakes, now match fishing involves more exciting action than in the past, so the specific pole development is an important segment of Trabucco team's activity. After all, the Serbian ace Goran Radovic won the individual gold at 2014 World Championship fishing with a Trabucco pole of this quality class. His own show, based on barbel in fast running water with rigs in the range of 40-50 grams, will be remembered for the nonchalance of both angler and pole, which stood off the many other breaking under tremendous load. Produced in Italy by Reglass, this new pole is perfectly integrated with GNT 955, as it accepts same kits and the exchange of all sections. Beyond the wall's strength, the only difference between the two models is the long top (with 3,2 mm top bore), which in the 755 replaces the traditional tip and second section, fitting directly on third section. This says why the pole is made of 8 sections instead of 9, also having the two parallel butts as done on the

955. The full package is quite interesting, with three Strong top four kits, whose length of 5,85m is more than enough for most match venues. Cupping kit is included, as well as the two mini extensions to be used not only at full length, but also at shorter

ones. Match and Strong combinations of Multi Tip System can actually widen the already good options offered by this pole, which also accepts 4 and 5 sections kits belonging to former GNT models.

GNT PULLER KIT & XPS JOINT CLEANER

THE GNT PULLER KIT is a two sections kit, performing like a traditional match kit but provided with a reinforced part in woven carbon at the base of the second section, in which there can be pierced an hole and insert a PTFE bush. This solution allows the angler to adjust the tension of the elastic while playing a bonus fish, remaining in full control, even employing small diameter elastic. It will be, in fact, sufficient to pull the elastic through the hole to increase the tension and consequently the pressure applied to the fish. In case of a run it will be sufficient to gently release the elastic. Furthermore it will be no longer necessary to bring the fish to the landing net using a kit of 5 or 6 sections, thereby considerably reducing the fighting time and the possibility of accidental breakage of your pole.

XPS JOINT CLEANER is the best solution to maintain your pole's joint in excellent condition, keeping them clean, reducing carbon wear and preventing accidental damages. Xps Joint Cleaner also avoid water entering, while preserving the action of the pole in all conditions.

Stefano Bost

NEW **GNT 845 XTR MATCH**

With this new pole, many goals have been hit at the same time: technical and economical inputs got together to form a tough target, but, at the end of the development process, all those who field tested it agreed that the job has been greatly done.

Trabucco team was looking for a tailor made solution for the club match angler, wishing to buy a quality pole without spending a fortune. Employing high modulus carbon and advanced nano resins, the result can shock also the most demanding user: the pole really deserves the "allround" nickname, offering the right sensitivity to fish ultralight rigs, but also the strength to handle size 10 elastics without top section. His balance is actually surprising, meaning no

stress and easy use for the user. All details have been cared very much, as proved by joints reinforced by woven carbon, a material which provides abrasion resistance and durability. The Trabucco A.S.E.F. slide finish helps the rods running smoothly between hands. All sections are interchangeable with those of GNT 745, and is supplied with a complete package.

Find out more on page 277

NEW GNT 745 XTR CARP

It's the "bad sister" of GNT845, structured to bear any sort of load and stress, but, at the same time, balanced and easy to use thanks to the employment of high modulus carbon and nano resins which evenly disperse between carbon layers, even if used in a very limited amount.

The resulting action is quite sharp, with excellent shock absorbing capacity due to the cooperation between carbon sheets. In front of such power, carp, barbel, clarius and mullet rapidly understand that it's not the case to waste any energy during the fight. Elastic rating starts from size 10 to go up hollow models and double ones, practically the whole world of strength. As well as the 845, also this pole fits the traditional top section (60 cm long), linked by

telescopic joint to second section; in case it is removed, any big elastic works even better through 4 mm top bore of the second section, also because it's obviously stiffer than the standard top. All sections are interchangeable with those of GNT 845, are slide finished for a smooth use and display woven carbon reinforced joints to last forever.

GNT 625 ALLROUNDER

Designed for all types of competition allows match anglers, to use all the features of lightness and balance, and carp lover to exploit the robustness and reliability. As the GNT 625 COMPETITION reaches the actual length of 13.00m with a tip of 35cm and therefore does not require Mini Extension. We would like to specify that the Mini Extension comes in Full Pack for those who want to remove the tip. We suggest, when using elastic in the order of 1.8mm - 2.0mm the angler removes the tip section to further strengthen the pole. GNT 625 is provided in the Full Pack with a complete set of three KIT of 5 sections.

DEMON CARP GNT485

Demon Carp has been equipped with all the features, quality and technology that are needed to compete in venues such as carpdromo or extreme rivers where the equipment is subjected to very strong stress fighting with big and strong fish.

In these cases you need tough and reliable materials which does not suffer wear as those used to build the Gnt 485 Demon Carp. In fact, the high modulus carbon is coated with NTF, which makes it harder preventing crushing, really wear-resistant and waterproof. The top kit 4pcs. and 5pcs. are exchangeable with GNT 715 and

915 giving you the chance to have a specific rod for carp and at the same time increase the number of kits available for your GNT top range rods. A product made in Italy by Reglass synonymous with quality and ongoing assistance in time, offered at a very attractive price.

DREAM TEAM

XPS NT SUPER SLIM

Maurizio Fedeli

Poles with very low slim diameters, light, and with great qualities of reliability and versatility. Made in 9m length with the possibility to increase through an extension to 10.50m. Entirely built in high modulus carbon and high resistance carbon in the correct areas, it results in an excellently balanced pole with notable rigidity despite its great power. It is the perfect pole for commercial fishery use and in all the competitions where need a very manageable and powerful pole is needed.

DREAM TEAM XPS

M1 CARP

This pole is offered at 10,00 mt. only, and it is made entirely of Carbon High Module combined with Carbon High Resistance. This particular production process allow to get a very light and well balanced product. It is also very strong and reliable, and can be used both for silver fishing and commercial fisheries. It can be fitted with an elastic rating 20, and if necessary, it can be a very powerful tool able to land big carps. The action is crisp and the tip has been already produced with a large hole in which you can easily fit a hollow elastic of big size without any cut. The pole has 3 graphics sections.

POLE PACK

- 1x Dream Team XPS 10 m
- 1x Power Kit

DREAM TEAM XPS TX SLIM MATCH

Extremely thin and light pole, from the great dowries of reliability in a different use.

Extremely thin and light pole, from the great dowries of reliability in a different use. Made in the length of 9,50 mt. with the possibility of lengthen through an extension to 11,00 mt. Entirely built in HM and high resistance carbon used in the parts more solicited, it results to excellently be balanced and with a notable rigidity despite the great power of catch. Is' a perfect pole for fishing in commercial fishery and in all the competitions where need a very manageable and powerful pole.

POLE PACK

- 1x Dream Team XPS TX Slim Match 9.50 m

DREAM TEAM XPS SC SPECIAL CARP

This log pole is realized in carbon HM and HR to be able to get the good compromise among lightness and reliability, essential for the fishing in the carp fishery in which it is had to fight with big fish. The action results to be very stiff, thanks to the big hole can be use with big traditional elastic and with the allow one. Available in the measure of Mt. 10 are equipped of mini extension, and it is purchasable separately the Kit besides to 4 sections.

DREAM TEAM XTR MARGIN

Specially developed for commercial close-in fishing, which of course meets his peak during summer months when carp patrol the bank to look for food. The High Resistance carbon blank can face the toughest battle, even though the chance to drive the elastic through the dedicated door (XTR Strippa on section nr. 2) reduces the stress on the pole because most of the fight is run with rod tip in line with the rig. Nothing to do with those standard commercial "speedy" poles, which aren't speedy at all because the pressure on fish is so high to cause panic, with longer fight time and growing chances to miss a few fish. Easy to clean, the rod's surface has been slide finished (Trabucco A.S.E.F.) to smoothly run forth and back by hundreds of times. The XTR Margin Pro

has all sections put-over, including top with 4 mm bore, and is supplied with an extra 2 section's kit (2,65 m), exactly same as the top two sections of the pole. Further kits can be bought separately.

LRC CX2
LOW RESIN
CONTENT CARBON
NANO-TEK

It's the most sophisticated material employed in the production of Trabucco rods: a super high modulus carbon, whose layers are carefully assembled with exclusive nano-technological resins to obtain extremely light, compact, resistant sheets which are able to provide a sharp reaction in front of any sort of strain. Its proven strength enables our engineers to even use it in the most advanced surf casting rods.

CX2
CARBON
NANO-TEK

High modulus carbon material, located very close to the fantastic LRC-CX2 in the list of high grade materials. Since the resin distribution is less dramatic, it's possible to combine it with lower modulus materials, to generate light and strong rods with size by size programmed action to face the most various fishing conditions.

CX0
CARBON
MICRO-PITCH

Before getting through the curing process, the carbon blanks are wound by a special tape, which is free from any elasticity to contrast the expansion of the metallic mandrel. In such way, the resins are well distributed within carbon layers. The narrower the tape's pitch, the lower the resin content, and consequently the rod's blank will be lighter and reactive, thus perfect to create high grade fishing rods.

CX-1
CARBON

The super sharp actioned rods aren't needed in all fishing styles: for example, bolognese or telescopic poles differ from carp fishing or boat rods, where reaction times are slower and the stress is heavier and longer. That's why CX1 is so important, with its special balance between strength and lightness which, compared to Micro Pitch version, gives the rod a lower reactivity both during cast and strike.

**S.H.M.R.
CARBON**

It is the most widely used material for medium range rods, because it's perfect to solve at the same time all problems linked to costs and performances. The final products are nice to handle and quite durable, even if called to face hard life on the water.

HRC
HIGH RESISTANCE COMPOSITE

The high end technology is not purely concentrated on top of the range products, but also gives the best in case of intermediate ones, where price counts. Made from a blend of carbon and fiberglass, it finds place in all branches of sport fishing.

**POWER
FIBRE**

A special fiberglass material, able to develop outstanding strength in front of extreme stress, but also to bear the inevitable abuse due to inexperienced handling. This is the perfect material for rods destined to occasional or novice anglers.

HVE
HIGH VOLUME EPOXY-FIBER

Based on fiberglass, this material shows layers linked by an advanced system of epoxy resins. As a consequence, its structure is extremely compact, and generate tubular blanks which are particularly strong and durable.

The advanced high modulus carbon sheet, which gives enormous power to the rod's blank, sweetly blends into softer materials to provide the right sensitivity to detect fish bites. But the conversion is gradual, within the tubular top section, and this requires high class technology to avoid weak points and curve imperfections, which would cause poor looking but also a bad power transfer, with some risks of sudden breakage for the structure. All over the world, this concept is well known as "multi-action tip", but it's not equally common the process of layer's overlapping and fusion which bring to a perfect result, inch by inch. The technology which leads to the perfection of final product can give the best only in case the engineering and design process are assisted by computer, which can evaluate the stress point by point and realistically simulate the reaction of the material according to the fixed specifications.

The concept behind the Hybrid Tip arises from the need to obtain a good tip action on all models in our surf casting range, in order to compare the performance between the lower and the higher level rods. We then managed to get the unsurpassed sensitivity of a solid carbon tip design matching perfectly with the power of a tubular carbon blank, whatever the modulus of the carbon used to build the rod itself. With this hybrid solution, the blank takes care of the part inherent to the casting action, charging power before releasing it during the lash, while the tip takes care of directionality, of the accuracy and, obviously, of the identification of even the lightest fish bites at very long range. The crucial part is obviously the transition between the tubular carbon blank and the solid tip, subject where we have applied all our famous design capabilities.

In recent times, all over the world the sport of fishing has seen a dramatic specialization, with so many different new techniques which have satisfied the most advanced anglers, but have scared the newcomers. At first, rods have been changing more than the rest of tackle, and so have done the technologies needed to get the best from materials. In such scenario, we must be clear, and that's why we use some logos and icons, which are here explained.

SS SUPER SLIM BLANK

In some segments of sport fishing, the super slim profiled rods are very much appreciated for their natural lightness and for easy handling. In order to give these rods the required level of strength, Trabucco employs the most advanced production's technologies.

ULTRA CONIC BLANK

The taper of the blank provides balance and the right power to cast and drive the fighting fish to the landing net. Some special Trabucco rods show faster taper than the average, in order to develop a certain behaviour while in action.

SUPER PROGRESSIVE JOINT

In all sort of fishing rods, both telescopic and put over, joints are the most critical areas. Our own joints sweetly follow the rod's action, avoiding those "flat spots" which cause bend imperfections and seriously prejudice rod's strength.

X Power Joint

This technology gives strength to the rod's joints, but without exceeding in weight. This is possible because it takes advantage from high modulus carbon used to create crossed reinforcements, which bear the stress peaks in those areas.

CW CROSS WINDING

The rod's blank is carefully wound by a carbon yarn braiding, which contrasts the ovalization under stress. As a consequence, the tubular is far stronger and, at the same time, the whole rod is definitely sharper. Both results are achieved without any sensible weight increase.

CROSSED REINFORCED

When a rod is designed to face extreme stress and maybe some shocks, its joints need to be adequately protected to last long time. We solve this problem with High Resistance carbon bands, applied orthogonally to longitudinal fibers

high precision control

Within any telescopic rods, the joint's precision is quite important to grant absence of play, not only to avoid noise, but mainly for a complete power transfer. For this reason, Trabucco rods are produced under the computer assistance.

Zero Friction Blank

A special finish of blank's surface repels water droplets which inevitably wet the rod, both during rainy or sunny days. This prevents line from sticking to the blank, an inconvenience which heavily affects casting distances, specially with light rigs.

MULTI LENGTH SYSTEM

In the river trout telescopic rods, as well as in some sea boat rods, the length is adjustable thanks to special rubber collars, which are fixed on top of sections to lock them to the below one. This is a careful job, done with hand craft precision.

2 FLEX TIP 3 FLEX TIP

The great sensitivity and the resistance to traction of the interchangeable fiberglass tips are important assets to influence boat rod's performance. The small single leg guides are well aligned and then carefully wrapped.

TIP

In the segment of sea boat rods, this icon marks the models which aren't supplied with interchangeable tips, but only have a solid fiberglass telescopic tip. No difference regarding sensitivity and durability.

SENSI TOUCH

A fantastic sensation of smoothness and a greater control of the rod comes from the special finish of carbon rod handles. Apart from improving the fishing pleasure, this finish helps rod's cleaning after each fishing session.

TELESCOPIC WHIPS

At the beginning there is always a whip. You start to fish with this rod, then move to Bolognese, then Match rod, then to the long pole and at the end of this journey that lasts for years ... everyone realizes that the fishing which gives greatest satisfaction is without rings, without reel, without elastic ... with only a thin terminal that will make you feel your prey. Trabucco offers a wide range of technologically advanced and specialized products to meet the beginner and expert needs ... and here we are able to offer you the best rods on the market.

Gianluigi Sorti

ASTORE TX POLE

In the design stage we identified the target to be pursued: the best competition pole rod. Every single element, every detail has been studied and revised only in order to get what for us is perfection: the Astore TX Pole. The blank has been built with the purest super high modulus carbon, light, reliable, essential in its dynamic elasticity. The fibers were then distributed on the mandrels according to a radial pattern so that the rod could respond safely to any type of torsion and bending. Butt section is long, a prerequisite for having an absolutely perfect balance. The tip has been built in combination with a solid carbon final part to allow maximum strike speed and to better manage the smallest monofilaments, resulting in a fast tip action and the best possible bending curve. Designed by agonists for agonists, it can not avoid to let every angler open-mouthed.

Code	Length	C. Length	Weight	Sections

134-21-900	9.00	130	490	9

ENERGHIA 2K EXTREME

SENSI TOUCH
CX2 CARBON NANO-TEK

Brand new series of telepole rods built in CX-2 super high modulus carbon, designed for high level competition. The blank of these rods is incredibly slim (we mean REALLY slim: 22.7 mm for the 8 meters model) and highly performing, while the tip section is tubular and not spliced. The blank is perfectly balanced, and it is possible to fish for hours without any problem. We do believe to have achieved the best production possible with the technology available nowadays.

Code	Length	C. Length	Weight	Sections
134-31-800	8.00	128	275	8
134-31-900	9.00	128	350	9
134-31-990	10.00	128	420	10

Marco De Biase

ASTORE TX ALBORELLA

The Trabucco rods specific for bleak fishing are renowned worldwide, thanks to the high quality of the Super High Modulus Carbon blanks and the perfection of their action. The Astore TX Alborella have been built designing a super conical blank, totally different from any other whip in the world. We choose to design these rods in this peculiar way because we needed to get a super fast reactive and light weight blank. The tip is made of solid carbon to increase speed of action, sensitivity and fish management. Italians are famous super good bleak anglers and Trabucco rods are the best choice for them.

Code	Length
134-12-000	Set 2.50m-3.00m-3.50m-4.00m-4.50m

Code	Length	C. Length	Weight	Sections

134-12-400	4.00	120	135	5
134-12-450	4.50	120	165	5

Astore Alborella can be also purchased in a 5 rods set supplied in a padded handy bag which is easy to carry and protects the rods from shocks.

ASTORE NRG POLE

SENSI TOUCH
CY2
CARBON
NANO-TEK

Three model series, from 7 to 9 meters, very well balanced and stiff. They have been developed to be used in a number of fishing situations, including competition, and are built in S.H.M. carbon to enhance resistance and lightness, never enough when you come fishing with 8 or 9 meters pole. The slim blank allow a superior handling and better fishing experience, both in fresh and salt water.

Code	Length	C. Length	Weight	Sections
134-23-700	7.00	140	320	7
134-23-800	8.00	140	400	8
134-23-900	9.00	140	500	9

ATOMIC

WELL BALANCED AND POWERFUL, THEY GRANT YOU LOADS OF SATISFACTION!

Atomic is the name of a new series of telescopic whips, which feature an extraordinary lifting power and an outstanding reliability.

If you are strong enough, and your line is equally good, you can rely on these rods, and they will reward you with plenty of adrenaline and a lot of fish in your net!

NEW ATOMIC XS POLE

CW CROSS WINDING SENSi TOUCH CX-1 CARBON

It's the natural sister of Atomic bolos: nice but aggressive, very aggressive when it's time to show the muscles. And it's dressed in line with them, with a young cosmetic which should recall that Trabucco's know-how can repro-

duce the same reliability and strength of bolo also in a telescopic pole. As a matter of fact, these Atomic XS poles are suitable for mullet fishing, like declared on the butt section, a mission which is possible only when the best technology is employed, as done here with CX1 carbon and Cross Winding carbon yarn reinforcement. Those who have experienced the rod being pulled from hands, maybe in a fast running river, know that strength is vital in this sort of poles, and that the freedom to use thicker line than usual - being sure that the rod will cooperate - is worth because brings more fish to the landing net.

Code	Length	C. Length	Weight	Sections
134-24-700	7.00	140	320	6
134-24-800	8.00	140	400	7
134-24-900	9.00	140	500	8

ATOMIC STX

SENSi TOUCH CX-1 CARBON

Series of powerful poles suitable for the toughest fish techniques and conditions in which it is impossible to leave too much room for prey fighting. Strong, tough but well balanced and pleasant to use. It can lift up to 2 kg without the slightest problem. The blank is made of Carbon CX-1.

Code	Length	C. Length	Weight	Sections
122-54-960	6.00	120	293	6
122-54-970	7.00	120	385	7

Gianluigi Sorti

TITAN TLS POWER

A very nice pole rod series, extraordinarily balanced and not heavy at all, even considering the fact that they are able to lift preys up to 1.5 Kilos. The CX-1 Carbon blank is reinforced with a spiral of high resistance carbon.

Code	Length	C. Length	Weight	Sections
134-26-500	5.00	128	210	5
134-26-600	6.00	128	298	6
134-26-700	7.00	128	394	7
134-26-800	8.00	128	510	8
134-26-900	9.00	128	595	9

NEW SELEKTOR TLS POWER

Marco De Biase

Among the Trabucco telescopic poles, this is the most powerful one, with the high resistance SHMR carbon providing the power needed to stop the first run of any big fish, plus the crossed carbon bands protecting joints. The long, tubular top section displays a nice action, which is well followed by second section to care for the hooklink when the rod is almost vertical to let landing net come into play. But the Selektor TLS stands also for the short closed length, a good specification for a rod which could be permanently stored in the car's boot, along with a couple of rigs to be ready in case of fish. All inner sections are nicely painted in satin black, just because even the rods destined to tough life should carry a touch of Italian taste.

Code	Length	C. Length	Weight	Sections
134-29-600	6.00	120	280	6
134-29-700	7.00	120	400	7
134-29-800	8.00	120	480	8

NEW ACTIVA STX POLE

CROSS reinforced
SENSI TOUCH
CROSSED reinforced
high precision control
S.H.M.R. CARBON

Goran Radovic

Stiff enough to show powerful fish who is the leader, but also light to be used till sunset without stress. On the river, at lake or seaside, Activa STX is a reliable partner, reactive and enjoyable to extend the fishing pleasure. Everything lives in its blank: built from CX1 high modulus carbon, then wrapped by a carbon yarn reinforcement which contrast its deformations, not only to prevent breakages, but also to improve its sharpness. In fact, such braiding is missing on top and second section, so that those sections are free to display their perfect action curve. The exclusive Sensi Touch handle finish is a really nice feature, practically a signature which identifies many good Trabucco rods.

Code	Length	C. Length	Weight	Sections
134-34-500	5.00	135	215	5
134-34-600	6.00	135	275	6
134-34-700	7.00	135	370	7
134-34-800	8.00	135	485	8
134-34-900	9.00	135	570	9

ACTIVA POLE

SENSI TOUCH
CROSSED reinforced
high precision control
S.H.M.R. CARBON

Series of whips particularly easy to transport because are compact and when closed they are really short. The low diameter blank together with a perfect balance make these rods extremely good and similar to more expensive ones, and they are offered at a nice price.

Code	Length	C. Length	Weight	Sections
134-33-500	5.00	113	209	5
134-33-600	6.00	113	272	6
134-33-700	7.00	113	366	7

XPS HOOKS

NEW

When the hook is fixed at the end of a telescopic pole rig, it's certainly destined to hard life, because it cannot get protection from the elastic – as it happens in case of pole fishing – and doesn't benefit from reel's drag assistance, as normally occur in all the other fishing styles.

The striking power arrives directly and, when line gets to maximum tension, the hook receives 100% of load. That's why the steel quality is so important, because the property to absorb the stress, always recovering the original shape, it's a vital condition to provide efficiency and durability.

All XPS series are particularly brilliant in this sense, due to the high quality of materials used in their production process.

Find out more on page 218

NEW ERION X-LIGHT POLE

SS SUPER SLIM BLANK SENSi TOUCH

The former Erion TLS, built from High Modulus carbon material, now grows and gets specialized in two different versions: X-Light and X-Power, answering from one side the demand of lightness coming by the finest anglers, and from the other side the need of power in front of big river and sea fish. Thanks to the particularly fine handles (Super Slim Blank), this X-Light series is quite handy yet well balanced. Its tubular top is designed to also deal with light floats and fine hooklinks. Sensi Touch handle is obtained from a satin coating which doubles the fishing pleasure.

Code	Length	C. Length	Weight	Sections
134-15-400	4.00	130	110	4
134-15-500	5.00	130	180	5
134-15-600	6.00	130	250	6
134-15-700	7.00	130	315	7

SYNTIUM POLE

SENSi TOUCH CROSSED REINFORCED

This telescopic rods is available in 4.00m to 8.00 m lengths. Constructed entirely in High Modulus carbon with special reinforcement at the base of every section. The S.H.M.R carbon has been used for these rods, giving them great balance, reliability and rigidity, combined with very slim sections to give an extremely manageable and versatile rod. Thanks to these features, these rods can be used for both freshwater and salt water fishing with excellent results. The progressive tip action delivers a superb fish playing action.

Code	Length	C. Length	Weight	Sections
134-16-400	4.00	123	152	4
134-16-500	5.00	123	233	5
134-16-600	6.00	123	317	6
134-16-700	7.00	123	390	7
134-16-800	8.00	123	510	8

NEW ERION X-PWR POLE

It's the bad sister of Erion X-Light, able to drive the most powerful fish to landing net, thanks to its blank's construction, designed with fast tapered profile. The high level of reliability also comes from the High Resistance carbon joint's reinforcements, which has been applied to contrast dangerous deformations thus grant them a longer life. The tubular top section is a must on rods, like this, which are destined to tough life due to big and restless river fish, as well as to the speed of sea fish like mullet and sea bream. The handle grip is coated with a special satin finish (Sensi Touch).

Code	Length	C. Length	Weight	Sections
134-28-500	5.00	130	230	5
134-28-600	6.00	130	340	6
134-28-700	7.00	130	450	7

Maurizio Fedeli

TRABUCCO ENGINEERED

XLIGHT

TRABUCCO ENGINEERED

XPWR

XPS POWER PLUS & XPS MATCH PRO

In spite of the apparent simplicity, the rigs destined to telescopic poles have their own problems. Talking about main line, an high abrasion resistant line is always recommended, as it should survive the compression caused by lead shots and the excess heat due to their movement along the line. No problem for XPS Match Pro,

whose polymer include ceramic components which harden the surface and keep low temperature. The hooklink's worst enemies are knots, both on hook's spade and connection to mainline. Therefore, the right solution is called XPS Power Plus, as its balanced elasticity avoids knot's coils damaging each other.

TRABUCCO ENGINEERED

Find out more on page 197

BOLO RODS

Over 40 years of experience on competitions, 25 of which passed to design and develop the best bolognese in the world. This is the best guarantee that we can give to a product, a guarantee that only a World Champion like Roberto Trabucco can offer to fans of this unique fishing technique, unequivocally Made in Italy! A fishing technique, that changes and evolves over time, where only those who can anticipate new trends, can really provide the innovation and technology necessary to define an "edge" product. What about ... even if they continue to imitate us, we will continue to be a step ahead!

NEW ENERGHIA 2KS COMPETITION

The most glorious range of Trabucco bolognese grows again, thanks to the technological evolution but also thanks to endless progression of the most traditional Italian fishing style. So the Competition is here to shock everybody, with its amazing CX2 carbon material which has proven to be breakage free, thanks to the even dispersion of the nano-technological resin, deputed to seal the carbon layers. This project has taken into consideration the need to more and more use fine lines and small hooks, which require the right sweetness in the rod, without missing the reactivity. The series fits hi-leg SiC guides to avoid wet line sticking to the blank.

Fantastic details are the satin finish of whole butt section and woven carbon reinforcement applied on to reel seat area.

SS SUPER SLIM BLANK SENSi TOUCH CX2 CARBON NANO-TEK

Code	Length	C. Length	Weight	Sections	Guides
120-96-600	6.00	150	215	5	SiC
120-96-700	7.00	150	265	6	SiC
120-96-800	8.00	150	340	7	SiC

NEW ENERGHIA 2KS ALLROUND

Developed along with Competition series, this one took Allround nickname to remark that it can escape from the perfect world of match fishing and spend a day on a fast river or at exciting sea side. Its body is stiffer than Competition's one, and also a big fish can quickly detect the difference, as it turns the head back to the bank where we are waiting with the camera. The sliding guide on second section plays an important role, because it can distribute the load and straighten the line during cast, adding metres to the reachable distance, specially during those rainy days. Also the Allround is fitted with long leg SiC

guides to protect the line, specially when the terrible combination of tension and friction would inevitably push the temperature to a dangerous level.

SS SUPER SLIM BLANK SENSi TOUCH CX2 CARBON NANO-TEK

120-95-600	6.00	145	180	6	SiC
120-95-700	7.00	149	220	6	SiC

SPECIFICATIONS:

Ultralight long leg guides with SiC ring, designed to avoid any contact between line and rod's blank.

Woven Carbon reinforcement in the handle area.

Size 6 plate reel seat, made from steel and featuring rubber foot to disperse pressure on the rod's handle.

ENERGHIA TXL

ENERGHIA TXL PRO LIGHT

SENSI TOUCH **CX2** CARBON NANO-TEK

The best super high modulus carbon CX-2, elaborated by distributing its fibers in a radial way, can only result in the most sophisticated compromise between lightness and power. The fibers of nano-carbon CX-2 are omni-directionally arranged, making the entire blank extremely resistant to compression and torsion. The blank is so fast action and extremely well balanced and handy while fighting the fish, seconding prey runs to minimize the risk of hook link breaking. The rod is equipped with long leg frame SiC in order to allow a perfect sliding of the line even in rainy conditions.

Code	Length	C. Length	Weight	Sections	Guides
120-92-600	6.00	136	305	6	SiC

120-92-800	8.00	146	460	7	SiC

ENERGHIA TXL ALLROUND

SENSI TOUCH **CX2** CARBON NANO-TEK

An intense design effort in combination with the use of super high modulus radial CX-2 carbon have created a very special rod with unique and inimitable features. A slim blank, lightweight and balanced but at the same time capable of the more amazing performance. The action, distinctly tip action, enables to successfully fight big fish, both in fresh water in large and fast running rivers and at sea, where the power is never enough. The rod is equipped with long leg frame SiC in order to allow a perfect sliding of the line even in rainy conditions; all sliding guides are wrapped on to carbon pipes fitting each other. No chance to find another rod which can stand up to Energhia TXL Allround!

Code	Length	C. Length	Weight	Sections	Guides

120-93-600	6.00	131	275	6	SiC
120-93-700	7.00	131	340	7	SiC

SPECIFICATIONS:

Long leg SiC guides.

Woven Carbon reinforcement in the handle area.

Aluminium butt cap with rubber insert.

Gianluigi Sorti

ENERGHIA TXL POWER

SENSI TOUCH **CX2** CARBON NANO-TEK

Who said that strong action rods must necessarily be heavy, imbalanced or have too big butt sections? The TXL Energhia Power is the proof that a careful study of each element as a function of the whole tool and the research of the best materials available can overcome all these compromises that are usually accepted. The blank of this mighty rod is so slim and yet incredibly robust and ready to respond to stress. The super high modulus CX-2 carbon used for its construction was in fact worked in a way that individual fibers are disposed in a radial position, so that they can withstand the strains even the most

extreme, coming from any direction. The feeling of power that a rod like Energhia TXL Power transmit you is just sublime.

T-FORCE XPS SOFT FEEL

The latest generation of high resistance monofilaments issued by the T-Force technology the World's leading producer of hi-tech fishing monofilaments. With its strength exceeding even extreme limits this line also features a total memory absence. XPS Soft Feel is an ultra-supple monofilament specifically developed for all styles of reel fishing. It's a floating line so it's particularly suited to Bolognese both for fresh and saltwater uses. Its smoothness helps line flowing from the reel spool during casts, without any kind of torsion and increasing casting distances.

ATOMIC

EXPERIENCE, POWER,
CONTROL

NEW ATOMIC XS COMPETITION

In Italy, as well as in the rest of Europe, Atomic has become synonymous of tremendous power and strength, thanks to outstanding rod performances, not thanks to advertising! Within the new range, this Competition series is the access door to the Atomic world, a sort of link to the most powerful ones, which are identified by growing numbers like 2, 4

and 6. Its structure is fast tapered, with a compact closed length and a reasonably fine top area, which allow a certain casting precision and tolerate the use of relatively fine hooklinks (not less than 0,14 mm). The medium leg SIC guides have a vibration-free "Y" shape frame, while the plate reel seat is wide enough to accept big size reels (size 7).

ATOMIC STX

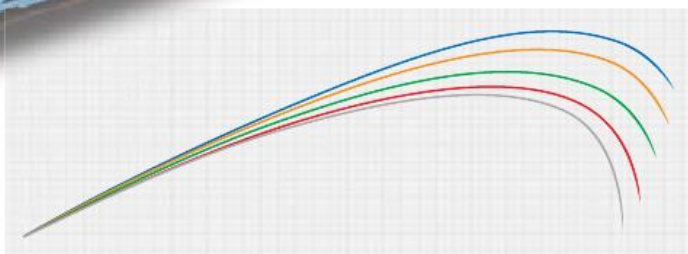

Series of very powerful Bolognese rods adapted to the heaviest styles of fishing. CX-1 reinforced carbon blank with SIC guides. These rods are so powerful and strong they

can lift preys up to 2 kilos weight, a very useful specification in fast running rivers and in the seaports, between docked boats.

- X6
- X4
- X2
- XS

122-54-600	6.00	130	318	6	SiC
122-54-700	7.00	132	427	7	SiC

Since ever, Atomic by Trabucco means power for long range casting and strength to successfully drive big fish to the landing net. But such tremendous power is not without control, as each single action has been engineered with accurate target, according to Trabucco's experience. Select your own Atomic and bring it to the water: fish will immediately realize who is the leader!

SPECIFICATIONS:

"Y" frame SiC guides. All guides feature SiC ring to provide maximum protection to the line and dissipate heat developed during fish fight. The frame arms join together before form the guide's foot, thus offering extreme stiffness and stop vibrations.

Pacific Bay reel seat. The plate reel seat is made from stainless steel, featuring protections for reel's foot and rubber base. Size 7 to accept big sized reels.

Aluminium butt cap and EVA tower. The nice cap, including a protective rubber insert, is made from aluminium to provide lightness and strength. In order to correctly space the guides when the rod is closed, an ultralight EVA tower has been added in the rod's butt.

Anti-grip joint's finish. The male side of all joints has been finely sanded with computer aided machine to obtain maximum precision. This prevents sticking when joints are wet, while at the same time it grants complete contact, avoiding any vibration.

Cross Winding carbon braiding. The whole blank of Atomic bolos, except top section, is wound by an high modulus carbon yarn protects it from accidental shocks. In addition, it contrasts the blank's deformation under heavy load, actually stiffening it.

Goran Radovic

NEW **ATOMIC X2 ALLROUND**

CW CROSS WINDING **SENSI TOUCH** **CX-1 CARBON**

Through the X2 you get into contact with the stunning power which gained the Atomic concept a leading position in the segment of powerful bolos. Capable to cast up to 60 grams rig and lift up to 2 kilos weight, these rods can shock all those who like the strong tractions and consequently check the tackle very well before buying any. The safety is ensured by the carbon cross winding, which binds the blank up to second section, just to leave the top some freedom to develop its action curve. A true

braiding - not to be confused with cosmetic finish - which contrasts the deformations when the rod is heavily loaded and disperse the stress along the blank. Quality components are certainly worth the addition, like Pac Bay plate reel seat (size 7) and SiC medium leg guides with "Y" shaped frame to avoid vibrations during retrieve.

NEW **ATOMIC X4 FORMULA**

CW CROSS WINDING **SENSI TOUCH** **CX-1 CARBON**

A nice blend of strength and balance gives a certain appeal to these new rods, which are sitting in the middle of Atomic range. As a matter of fact, too many Bolognese belonging to "super power" class are perfect on casting ability, but actually show poor balance or difficult handling. With casting weight up to 80 grams and able to lift up to 3 kilos, X4 rods can face the toughest conditions on the river, lake or at sea side without fear, thanks to the CX1 carbon construction, protected by cross carbon braiding. With hooklinks in the range of 0,20-0,25 mm diameter, these rods can really stop those endless runs and lift the fish from

water in case landing net could not be used. Guides are "Y" frame medium leg with SiC ring. Pac Bay reel seat of size 7 to accept big size reels.

Code	Length	C. Length	Weight	Sections	Guides
122-58-500	5.00	140	290	5	SiC
122-58-600	6.00	142	415	6	SiC
122-58-700	7.00	144	520	7	SiC

NEW **ATOMIC X6 FORMULA**

CW CROSS WINDING **SENSI TOUCH** **CX-1 CARBON**

If your favourite fishing condition is not suitable for the most powerful bolo available in the market, you certainly need an Atomic X6! Realistically, these rods can cast up to 100 grams rig and actually lift up to 6 kilos weight, but how many anglers could do so? For this reason, the series is made of 5 and 6 metres length only, as longer ones would have resulted out of control by the user. The rod can deal with sturdy hooklinks around 0,25-0,30 mm in diameter and, exactly like the other X2 and X4, it can be used for light drifting because CX1 carbon wall is assisted by carbon yarn braiding from butt to second section.

Code	Length	C. Length	Weight	Sections	Guides

122-57-700	7.00	133	410	7	SIC

SPECIFICATIONS:

Guides fitted on top and second section are slightly oversized, to enable silicone stoppers pass through during sliding float's fishing.

Carbon yarn reinforcement wrapping (Cross Winding).

Reinforced top guides.

NEW TITAN BLS EXTREME

The nice side of Bolognese rods is versatility, as a single one can solve thousands of fishing situations. With rods like these Titan Extreme, it's possible to move from classic float fishing in lake or river to trout fishing with just a lead sinker, or fish at sea with paste bait. The secret of this series is the fantastic balance, which makes every size – including the always tough 7 metres – easily usable with a single hand. This is due to the accurate project, based on CX1 carbon reinforced by Cross Winding, which enable to cast up to a 20 grams float without problems and with no

oscillations. Guides are quite good, with medium leg "Y" frame and SiC ring, as well as the size 6 wrapped plate reel seat.

Code	Length	C. Length	Weight	Sections	Guides
122-61-500	5.00	130	235	5	SiC

ATTRACTIVE BOLO POWER

Bolognese rod of great balance and equilibrium that allow a safe combat through a rigid action very well distributed along the blank. Powerful, Cross-reinforced Winder, but very precise, able to offer its best where other rods raise the white flag. Excellent fishing for barbel in fresh-water and sea fishing from natural cliffs and harbors. The special coating of the

grip, called Sensi Touch, allows a perfect grip in every situation and a feeling of true comfort. Such a nice product and a such great performances have never been seen before, specially at such a competitive price. Super High Modulus carbon fiber CX-1 blank.

NEW EPICA BSR BOLO

Even though the industry is continuously looking for new solutions to produce pleasant and performing rods, it's not so common to meet something really new and interesting. Once again, Trabucco gives us this opportunity, with this new series of good bolos, featuring an innovative reel seat. It's called Super Light Integrated Reel Seat, and it works like a normal size 6 plate reel seat, but it's not fixed by standard wrappings. In fact, it's integrated in a graphite support, which is glued directly to rod's handle, resulting less bulky and much more stable than a wrapped, plate reel seat. The rod is a strong bolo made from SHMR carbon, nicely wrapped with SiC long leg guides. The whole blank is finished by a

black satin coat, which is actually waterproof, so that it helps casting longer because wet line doesn't stick to the rod's surface.

CW CROSS WINDING

SENSI TOUCH

CROSSED REINFORCED

High precision control

S.H.M.R. CARBON

The continuously evolving technology should not take care of high grade tackle only, but also bring the best possible performances to lower layers of the range and make them affordable to everybody. This nice Activa STX proves that Trabucco engineering team knows the job quite well, because the rods show pretty good balance and power, as well as extremely fine details: specifications which are normally confined to top of the range bolos. Compared to existing Activa Bolo, these new rods have been designed with faster taper and reinforced with a carbon spiral up to third section. As a

result, the body is remarkably stiff, and this has allowed the engineers to also include a good seven metres in the series.

Medium leg guides with "Y" shape frame.

ERION

NEW ERION X-LIGHT BOLO

SS SUPER SLIM BLANK

SENSI TOUCH

CROSSED REINFORCED

high precision control

S.H.M.R. CARBON

It's the light sister of Erion XS Allround, capable to handle finer hooklinks with his balanced softness; with these rods, the most classic Bolognese style – fishing for chub and barbel in the clean, running waters of medium sized rivers – becomes a pleasant job offering exciting experiences. The medium leg guides, with "Y" shaped frame, can actually absorb vibrations during retrieve, limiting abrasion and heating which are the worst enemies for the line. A line which lasts longer is definitely more reliable, and also helps reducing costs. The

special satin finish of the handle is easy to clean and gives a special feeling during fishing.

NEW ERION XS BOLO ALLROUND

SENSI TOUCH

CROSSED REINFORCED

high precision control

S.H.M.R. CARBON

These new rods are particularly nice in every detail, as they have been finished with same care normally reserved to high grade models. Consequently, Erion XS impress for the interesting quality/price ratio, a specification which counts a lot in these days, as the general approach is to "enjoy without spending a fortune". A target which has nicely been hit by Trabucco's development team with this high grade carbon blanks, designed under Super Slim concept to offer balanced rods, reliable from structure's point of view and performing in

action. The sliding guide in the middle of second section is quite worth, as it helps distributing load and stress, as well as easing long casts with his specific ability to help line's flow.

NEW ERION X POWER BOLO

SENSI TOUCH

CROSSED REINFORCED

high precision control

S.H.M.R. CARBON

A very stiff body and a medium soft top area are the main specifications of the Erion Bolo Power action. The first one provides power to cast the float rig at distance and safely drive the big fish to the waiting landing net. The second one takes care of casting accuracy and strike's efficiency. Well programmed roles in a modern bolo, destined to face the lakes and river streams, where it can also easily catch trout, but even the sea rocks. The handle is tapered as much as needed to grant power and strength, without excess in diameters, and is brilliantly dressed by Sensi Touch finish: a fantastic sensation of smoothness and the chance to easily clean

it at the end of a fishing session. Guides are medium-long framed with "Y" shape to avoid vibrations.

Internal screw butt cap.

NEW REVENTON MASTER BOLO

Placca portamulinello ammortizzata

Entering the world of fishing can actually scare any newcomer, but the role of leading companies like Trabucco is also to ease the tackle choice, showing the smoothest way to get the first emotions with reliable and handy rods, having a balanced quality/price ratio. With Reventon bolos, for example, fishing with float in canals and streams, but also facing commercial lakes or sea ports is a real pleasure. The High Resistance carbon structure can bear any strong cast and pulls, because it's assembled under computer control and well reinforced at joint areas. Guides and reel seat quality have been selected to provide total reliability.

120-31-500	5.00	125	250	5	S-SiC

SYNTIUM BOLO

Rigid action rod with high speed hook setting. Constructed by a "Radial Carbon Technology" and the latest technologically innovative materials to guarantee satisfaction for the most demanding angler. Particularly suited for big fish with medium heavy line both in fresh water and the sea. This rod is not easy at the beginning, especially if you are fishing in deep waters and turbulent flows, but as soon as you take the hand becomes an invaluable ally to fish on that unreachable line... for others!

Code	Length	C. Length	Weight	Sections	Guides
120-18-500	5.00	126	229	5	SiC

ORBITRON vx BOLO POWER

This rod is characterized by limited weight and section diameter. The use of new N.F.T. carbon materials make it well-balanced and light while maintaining a progressive action and reliability. Excellent manageability in all fishing conditions both in the sea or in fresh water. Reliability is guaranteed by the top quality materials used in its construction. Supplied with Super S-SiC High frame ultra-light guides and the new cushion plate reel seat.

Code	Length	C. Length	Weight	Sections	Guides
122-08-500	5.00	130	245	5	S-SiC

Maurizio Fedeli

ERION XS MINI BOLO

SENSI TOUCH CX-1 CARBON

Let's face it: a handy and compact rod, you can leave in the car and that is not only easy to use but first of all reliable, it is a rod that is interesting for everybody. So this is not a rod for specialists but a rod which finds its use in the stream as in the pond, river or at sea. The high resistance carbon is a guarantee of total reliability, forgiving the mistakes of beginners, but also guarantees lightness and precision. The ringing S-SiC quickly disperses the heat, and allows the safe use of even very thin monofilaments.

TELEMATCH

Telescopic Match rods are notorious because they are easy to use. Actually you cannot find any other rods as powerful, reliable, handy and amusing than a 3 pieces match rod but... thanks to some new technology innovations and careful design that we need have no qualms about telling you that our telescopic match rods feature almost the same specs of 3 pieces ones. In the next pages you will see rods with super casting specs, super powerful actions and super sensitive ones, with a wide range of casting powers, developed

both for fresh and salt water fishing. All of these rods will satisfy your needs and increase your fishing experience. Compare Trabucco rods with our competitors rods and you will see the Trabucco ones are always the best at a given price. You are looking at the best of our 2015 production, so judge by yourself and remember: before to buy a telescopic match rod, ask your favourite shop to show you a Trabucco telescopic match for the same price. You will prefer it for sure.

NEW VANADIA XT-MATCH

Among the vast population of telematch lovers, many are those who prefer the carbon handle instead of traditional cork one. That's why Trabucco also offers rods like Vanadia XT, which show an impressive Super Slim butt considering the tremendous power it can deliver. The concept seems to push these rods into Bolognese fashion, but once in your hands, it's clear that the slightly upper reel seat is there to help you push as much as you like. In line with such need, the body of these rods is engineered to be heavily loaded, thus boost heavy wagglers to the horizon. The job is done by CX-1 Micro Pitch carbon, whose structure is so tight that the blank's answer is strong and neat, without oscillations. The blank is further powered and protected by a cross winding carbon yarn, which is purposely missing on top section to generate a perfect action curve. A great feeling comes from Sensi Touch finish of

handle area, proving the Trabucco's attention to details. Guides are short leg HD model, able to quickly disperse heat caused by the endless line flow, an essential part of waggler fishing.

Blanks made from Micro Pitch Carbon CX-1 (Super Slim).

Medium leg HD guides (quick heat dissipation).

Code	Length	C. Length	Weight	Sections	C.W.	Guide

150-30-300	4.50	130	210	7	HH	30-80	SiC

NEW TITAN TELEMATCH

In a segment often dominated by boring design, with rods often looking all similar, only Trabucco's know-how could have changed things and stand up above the rest. Now his R&D team does it with new Titan, the most sensitive telematch rods around. Everybody knows that the rod's power comes from the body, while casting accuracy and hook setting are provided by top and second section, specially when top tip is remarkably fine, as on Titan Telematch. When the rod is employed on lake trout fishing or with bombarda at seaside, this is even more evident, because fish's bite is made evident by the rod's tip. Then, control and sensitivity become vital ingredients of success, so an important role is played by the wonderful Sensi Touch reel seat, which fits into the user's hand like a tailor made glove. Both thumb and fore finger get into direct contact with rod's blank, sending to brain an intense feeling of superior efficiency and perception.

with very good components, such as SiC guides, natural cork handle with EVA inserts and ergonomic reel seat.

ORBITRON NRG MATCH

Blank made of SHMR carbon further reinforced with the use of Cross Winder technology that uses a winding of carbon wire distributed throughout the whole length of the rod. This is a so versatile rod, with excellent technical features exploited by those who likes match fishing for trout in the lake, fishing from the rocks on the sea and even by those who fish from the boat. The series consists of three actions distributed in two lengths 4.20m and 4.00m. Rods equipped with S-SiC guides, shock absorber reel seat and non slip paint on butt section.

REVENTON T-MATCH

Powerful telescopic match series with fast action, very effective when striking. The strong blank is able to cast big floats and bombards up to 50 grams. Power and reliability have been got using the carbon fibres in a wise way, so they can stand every bending, both vertically than horizontally. The Reventon T-Match are the ideal rods to be used all the times there is

the possibility to hook very big fish and the need to cast further.

ERION XS MATCH ALLROUND

Most probably, the telematch rod is the emblem of versatility in the Italian fishing scenery, and that's why it has deserved a pretty good reputation in most European countries as well. Beyond the natural waggler fishing, it can solve thousands of problems both in fresh and saltwater fishing. It can catch lake trout as well as river trout with lead sinker and earthworms. It can cast floating bombardas for surface fishing at sea side, but it's also powerful enough to serve paste bait to grass carp and drive them to the landing net. We have seen it light drifting from the boat for mackerel, and even used as heavy feeder for barb, as the tubular top is equally at home in fast running rivers. Therefore... the "allround" nickname is welcome and appropriate, as used by Trabucco engineers for their new Erion XS, which they designed to be strong and powerful to resist everything, including the injuries coming from the newcomer's rough hands!

SYNTIUM TELEMATCH

**S.H.M.R.
CARBON**

Cast, cast and still cast. This is the test that has undergone this product at the design stage. The purpose of this rod was long casting and consequently the design efforts were focused in that direction. We have used SHMR Carbon with a special reinforcement named W-

Power. This allow a newbie too to cast a waggler as far as 90 meters! These rods are so powerful and resistant you can even lift big fishes with no problem when fishing in salt water, from rocks or piers. The range covers all the different actions and

enables fishing with many different weights and size of waggler floats. Before buying an match rod of any competing brand, ask your dealer to let you try one of our rods of the same price range. At that point you will have no more doubts.

MATCH RODS

When an Italian Company sells match rods to the UK Market, it means that these rods has been designed really well: this is the result obtained by Trabucco. Our UK consultants provided all the essential elements to create a product that respects tradition and technique, then the team of Italian champions have managed to combine these features with all the needs

for fishing in continental waters, and finally gave Trabucco the latest manufacturing technologies on the market. Finally the results is an unrivaled range of match rods able to provide highly specialized and appropriate rods. Does not exist a company with such a vast range of match rods.

ENERGHIA 2K MATCH POWER

The 2K Match Power complete the wide Energhia range, without any presumptions, the most beautiful and famous match rod series in the world. The blank, made from High Modulus Radial Carbon, can develop the power to shoot 30 grams wagglers up to 100 meters away. In this model we have applied the latest technology, research and design available. Superb components and finishes: Fuji guides, Fuji reel seat and AAA cork handle. This rod is dedicated to all those who want to complete their series of Energhia match rods.

ENERGHIA 2K

ENERGHIA 2K MATCH PLUS

We do believe to have built the best match rod in the world: no gimmicks and no compromises. And we also decided to ignore the price! Yes, it costs but it is worth every single cent you spend for it! Countless testing hours, the best materials on the market, the best technology, all of this is included in the two models. For sure it is not a rod for everybody, unexperienced anglers won't get even the 50% of these rods potential.

But serious and experienced anglers will have in their hands rods able to cast very very far and very accurately. Super slim High Modulus Radial Carbon blanks, light as a feather, equipped with genuine Fuji guides and reel seat, AAA cork handles. The most impressive qualities are the incredible tip action and a progressive blank that no other brand can match. If you try them you will fall in love. We give you our word!

ENERGHIA 2K MATCH

The 2K Plus serie was missing of a 4,20 meters model and so we decided to build it. The blank has been built in Super High Modulus Radial Carbon and equipped with genuine Fuji Alconite guides and cork with EVA inserts handle. When you start using this rod with a 10-15 grams waggler you can really understand the essential quality of this

project. Even if it is the shorter of the 2K Plus, it can cast as far as the others and with the very same accuracy. And when fighting the fish this rod is even more amusing. If you want to push your limit, take this rod and you will discover a new world in match fishing.

SYGNUM MRX-V

SYGNUM XS PROLITE

Prestige rods series with slim diameters and lightweight blanks, made using the Carbon Nano Technology. This model has a progressive action and is able to cast a wide range of weights at long distances. Well suited for fishing with thin monofilament even if bigger diameters are well supported. Fitted with new T-Sic Ultra-Light guides and a new concept reel seat and cork handle.

Code	Length	C. Length	Weight	Sections	C.W.	Guide
157-69-420	4.20	145	172	3	5-20	SiC
157-69-450	4.50	155	195	3	5-20	SiC

SYGNUM MRX-V

The new SYGNUM MRX-V is a really complete series of rods designed to cover all the demands of modern fishing methods. From small lakes to river fishing for chub, barbel and bream or in commercial fisheries that require long distance casting with heavy wagglers. We used Super High Modulus Carbon perfectly to get the necessary stiffness for long and precise casting and the essential flexibility for catching big fish with low diameter lines and light tackle. Manufactured with the very highest quality materials and finishing such as the high grade cork handle, genuine Fuji reel seat and S-Sic guides.

Stefano Bosi

SYGNUM TLD

This rod has been designed for waggler fishing. Fully made of High Modulus Carbon and equipped with Super S-SIC Light Frame Guides and a new design ergonomic natural cork handle for better grip. The new concept new reel seat is also used. Featuring an extremely small diameter blank, the casting weight varies according to length and ranges from 5 to 30 g. Typical progressive tip action gives power for casting long distances with the required accuracy. The 4,50 H action is just perfect for super long casting and big fish, while the 4,50 MH is a true allround rod.

SYGNUM XT

SYGNUM XT WAGGLER

Designed for waggler fishing and available in 13' length this rod is constructed with the new SUN SCREEN FINISH and uses Super High Modulus Carbon with High Resistance Carbon reinforcement in the stress points to increase overall reliability. Equipped with long leg SiC Light Frame guides, ergonomic reel seat mounted on natural cork and high density EVA handle. Perfect action - progressive and very powerful. Extremely manageable and light, ideal for up to 12 g wagglers and for either low diameter line or heavier duty line for a large fish.

Code	Length	C. Length	Weight	Sections	C.W.	Guide
151-22-390	3.90	138	148	3	3-12	SiC

SYGNUM XT POWER

This 13' Sygnum XTPower Waggler is assembled with SiC Light Frame guides, ergonomic reel seat mounted on natural cork and high density EVA handle. It features a progressive action for long, precise casting with medium-heavy weight. It is the perfect rod for carp and bream over medium to long distances. Its slim diameter blank increases the lightness and manageability of the product without compromising reliability. High quality finishing and components.

Code	Length	C. Length	Weight	Sections	C.W.	Guide
151-23-390	3.90	138	145	3	5-15	SiC

SYGNUM XT POWER PLUS

A step up from the Power version the Power Plus Waggler rod comes in 13' and 14' lengths. Assembled with SiC Light Frame guides, ergonomic reel seat mounted on natural cork and high density EVA handle. Progressive action for long, precision casting with medium-heavy weight up to 20 gr. Designed for speed fishing, that is when there is a great quantity of fish and you need a very good casting accuracy and a good power to reel in preys very fast. The action is also good to face bigger fish.

Alessandro Bruni

ERION XT CARP PRO

Match fishing rods built with great accuracy, created for fishing big fish also at long distance. The reliability of the blank has been obtained by using super high modulus carbon Durawall, which is not only super strong but it is also remarkably light weight and sensitive. EVA and cork handle is particularly comfortable. Equipped with SIC guides for better heat dissipation.

Code	Length	C. Length	Weight	Sections	C.W.	Guide
151-47-390	13' - 3.90	137	204	3	8-25	SIC
151-47-420	14' - 4.20	145	232	3	8-25	SIC

ERION XT MATCH PRO

Made from super high modulus Durawall carbon and fitted with Sic. The blank is slender, while the action is progressive, providing long cast performance and being always ready to fight the fish. These rods are equipped with ergonomic reel seat and cork with EVA inserts butt section. Two actions designed for easy fishing for fish carp, bream and crucian carp.

Code	Length	C. Length	Weight	Sections	C.W.	Guide

157-58-390	3.90	135	190	3	5-20	SIC

SYNTIUM MATCH PLUS

The great commercial success of these all-round rods, usable in all situations, has imposed a widening of the range with the introduction of a 4.50m with 30 grams casting power. The blanks are sturdy, made of SHM Durawall carbon with Reinforced Crossed technology. The action, shared by the two sizes, is tip action with large reserve of power. Perfect choiche to fish for carp, bream, crucian carp and even chub, with extremely small

SYNTIUM MATCH CARP

These two rods are born for carp fishing. Two different lengths having the same casting power: 5-20 grams. Made using Super High Modulus Durawall Carbon with Crossed Reinforced technology. Equipped with Power Joint system to avoid blocking sections, Super S-Sic Light guides, natural cork and EVA antislip handle and ergonomic reel seat. Recommended for top water

SYNTIUM CARP PLUS

Super powerful rods developed in two sections with two different lengths (3.00 and 3.30). As for the whole series Syntium all the blanks are very thin because they are made in Super High Modulus Durawall Carbon but at the same time very powerful and reactive. Crossed Reinforced and Power joint to avoid blocking sections. Assembled with SiC Light frame guides, natural cork and EVA anti-slip handle. These two pieces rods are very funny and very pleasant to use. Two rods born to catch a lots of fish in a short time!

XD MATCH FLOATS SERIES

The Trabucco XD match floats, where XD stand for perfection and are individually hand made with maniacal accuracy. They equipped with a carbon tube to increase stability and sensitivity, having a lower diameter if compared to a traditional peacock quill. They are the ideal choice for long distance fishing in canals and lakes for difficult fishes like crucian and breme. The HD floats are sol with two interchangeable tips of different diameter.

Goran Radovic

XPS MATCH SINKING

Japanese production monofilament made especially for waggler or feeder fishing. The main feature of this innovative monofilament is its high specific weight which allows it to sink extremely easily. Special surface treatment ensures high abrasion resistance and total absence of memory, both fundamental for this type of fishing where the line is subject to great stress.

Find out more on page 199

PRECISION XT MATCH PLUS

Series of two powerful rods made of Super High Resistance Carbon. The rods are very well finished, using ergonomic reel seats, ultra light S-SiC guides and natural cork with EVA inserts handles. The action is powerful but can be easily calibrated, being effective even when using light rigs. The casting power is very good (30g)

Maurizio Fedeli

for 4.20m model), and very good is the sensitivity as well. We designed a peculiar very thin tip section and a conical blank to get the sensitivity we needed. It an easy to use match rod suitable for fishing at medium and long distance targeting breme, carp and crucian.

Code	Length	C. Length	Weight	Sections	C.W.	Guide
152-30-390	3.90	137	186	3	8-25	S-SiC

152-31-420	4.20	145	235	3	5-20	S-SiC

PRECISION XT ALLROUNDER

These are true allround rods, being able to cast very far and to fight huge fish. Precision Allround and made also for speed fishing, very useful when you need to land your fish in the shorter time possible. Coming back to its casting skills, when we state it is able to cast very far, we really mean very far: as far as over 100 m with 40 or 60 g wagglers (depending on the model you are using). This exceptional results can be obtained only using very good materials such as the Super High Resistance Carbon Durawall, the stronger, tougher, more reliable Carbon on

the market, in combination with reinforced joints between sections. The rod uses wider S-SiC guides and a natural cork handle.

Maurizio Biolcati

offering a so high number of specific rods, equipped with the higher grade components. Trabucco worked really hard to develop such products and we are proud of our products. Check Trabucco feeder rods in the shops and you will understand what we mean.

NEW SYGNUM XPS COMPETITION

Feeder fishing is booming all over Europe as well as in Italy, and anglers grow both in number and skills. Consequently, also the demand is changing, with rods getting more and more specialized to handle a certain type of feeder, to face a definite sort of water or even to expressly suit a particular match venue. This is possible at Trabucco team, because the technicians can easily transfer their individual experiences into performing rods as soon as they feel it's time to create a new one. Top of the range Sygnum now expands

with two special XPS Competition models featuring an impressive compromise between casting power and blank's lightness. A 12' with 90 grams casting weight and a 13' able to handle 125 g heavy feeder, both supplied with 4 quiver tips to allow accurate sensitivity according to conditions, because even the beefiest set-up can sometimes require a fine sensitivity. The wonderful SiC guides can handle braided lines without fear, while the classic cork handle with reliable screw reel seat offers plenty of control.

Rods supplied with four quiver tips. One fiberglass (Ultralight) and three carbon (Light, Medium, Heavy).

Double leg MN SiC guides (single leg on top section).

Spiral wrapping on joints. Screw reel seat made from steel and rubber. Cork handle with EVA fore grip and hybrid cork butt cap.

Code	Length	C. Length	Sections	Actions	C.W.	Guide
151-02-360	3.60	125	3+4	MP	90	SiC
151-02-390	3.90	134	3+4	MP	125	SiC

SYGNUM XPS FEEDER

These excellent feeder rods really stand up from the crowd due to their incredible strength and power, perfectly distributed all over the blank. It is hard to give you a suggestion about where to use them, cause they can match so many situations: you can fish big breme in canal, powerful barb in the river and huge carp in the lake. Sy-

gnum XPS Power Feeder comes with 3 solid carbon tips, sensitive and powerful. These rods are equipped with braid resistant SiC guides, integrated reel seat and natural cork handle.

Comes with 3 solid carbon tips of 2 oz., 3 oz. and 4 oz.

Code	Length	C. Length	Sections	Actions	C.W.	Guide
151-11-390	3.90	137	3+3	XP	150	SiC
151-11-420	4.20	146	3+3	XP	150	SiC

NEW SYGNUM TXL SUPREME FEEDER

Among competition rods, the feeder ones are those who must face the toughest life, because they must bear tremendous loads while casting and strong pulls while fighting big fish such as carp, barbel and even catfish. All of us like those exciting catches, but also like light and slim rods, apparently not compatible with those fast running beasts. But it's Trabucco know-how and technology which comes into play to let both worlds live together. Advanced CX-1 Micro Pitch carbon provides lightness and sharpness, while a carbon yarn braiding protects the blank from risky deformations and odd shocks. Such cooperation is so effective that pushes blank's responsiveness beyond any limit: when it's time to put our bait out there to reach those shy fish, it's just a matter of loading the blank and look at the feeder fish. Magic!

Code	Length	C. Length	Sections	Actions	C.W.	Guide

150-90-365	3.60	125	3+4	MH	90	SiC
150-90-390	3.90	134	3+4	MH	90	SiC

Natural cork handle with EVA handle grip. Screw reel seat made from steel and rubber. Blanks reinforced by carbon braiding.

SYGNUM TXL ADVANCED RIVER

Feeder fishing in big rivers always require longer rods, to take away your line from water pressure as much as possible. In this way you avoid also the line dragging too much and avoid the risk of friction against the rough bottom. We designed these rods specifically for big rivers and decide to go for 3.90, 4.20 and 4.50m length. Each rods is equipped with 3 tips (light, me-

dium and heavy action), each of them very well calibrated for casting heavy feeders. The whole blank has been made of the brand new Cx-1 Micro Pitch Carbon, reinforced in every joint for added reliability. The rod is finished with ergonomic EVA handle and braided friendly SiC guides, double leg guides for second and third section, single leg for tips and first section.

Raffaele Mapelli

NEW SELEKTOR
XS MASTER FEEDER

Power Joint CX-1
MICRO-PITCH

This new series has been developed to give a professional answer to demanding match anglers, who mostly fish for bream. As known, the species has a delicate mouth, which require soft action rods to avoid those hook pulls which can scare the shoal and cause dangerous highs and lows in catching rate. The cooperation from rod's blank is also important when fishing at range with braided lines, specially in case of bonus fish fight. All these characteristics are easily detected as soon as the rod is in your hands: the high modulus CX1 Micro Pitch carbon - assembled with minimum amount of resin - gives the blank a magic blend of lightness and sharpness, while it bends smoothly if you try to pull the tip. The three quiver tips are made from solid carbon to provide precision and neat hook setting, even if the size is down to 20 or 22. The cork handle is nicely shaped at bottom end to offer grip and control during accurate casts: a typical competition feature which is well appreciated also by pleasure anglers.

Power Joint CX-1
CARBON

The blank of this series has been designed to redistribute in a progressive way along the whole blank way all the power coming from the run of a big carp. When fighting these powerful fishes it is very important that the rod can absorb the shock with a perfect bend to avoid to break the line or hurt the fish mouth. The best combination is with a medium-heavy feeder for canal and lake fishing. The blank is made of Super High Modulus Carbon Durawall. Three tips complete the equipment, with three different actions but with the same high visible red colour and wrapping of last guide of different colours for quick identification. SiC guides, ergonomic reels seat and natural cork with EVA inserts handle.

NEW SELEKTOR XS MULTI FEEDER

MULTI LENGTH SYSTEM

Power Joint

CX1 CARBON MICRO-PITCH

An interesting solution allows to expand rod length by one foot, just in case you opt for a longer rig, or you must deal with water flow getting progressively faster through the match or during a pleasant fishing session. Just add the 1' extension and the rod will be immediately adapted to changing conditions, allowing to stay in contact with feeding fish. Therefore, two rods performing like four actually open a new world to the careful angler, allowing him to face canals, lakes and rivers with same nonchalance. Apart from this outstanding versatility, the Selektor XS Multi Feeder has brilliant blanks made from high modulus CX1 carbon, and

is supplied with three carbon quiver tips, all made from carbon. Light, Medium, Heavy.

Natural cork handle with hybrid cork butt grip. Screw reel seat made from steel and rubber. Spiral wrapping on joints. Double leg SiC guides.

Rods equipped with 3 quiver tips, all made from carbon. Light, Medium, Heavy.

Mini extension (30 cm) to convert the rod into 1 foot longer.

VARIABLE LENGTH

152-57-390	3.60 - 3.90	138	3+1+3	MH	90	SiC

SELEKTOR XS ACTIVE FEEDER

Power Joint CX-1 CARBON

The Selektor family include rods that are perfect with feeders up to 130 g. The blank has been built in Super High Modulus Cx-1 Carbon and has a progressive action distributing the load along the whole length. The rod is so really well balanced and powerful enough to cast a mile with method or open end feeder. The equipment includes SiC guides, that can be used in combination with braided lines, double legged in the lower two sections, a natural cork and EVA handle and 3 tips. All the tips, light, medium and heavy action, share the same top red colour, while identification can be easily done checking the wrapping colour of the last guide.

SPECIFICATIONS:

Three tips complete the equipment, with three different actions but with the same high visible red colour and wrapping of different colours for quick identification.

The spiral wrapping reinforces both joints and provides grip to help dismantling rod's sections.

152-53-420	14' - 4.20	146	3+3	H	130	SiC

SELEKTOR PW FEEDER

Power. Control and Precision. these are the qualities requested for a quality feeder rod. Selektor PW Feeder has been designed with top quality, tapered blanks and equipped with 3 carbon tip for a perfect balance. This series is made of 5 models to cover all the needs of medium and heavy fishing. The 3 tips have different sensitivity grade. Cork with EVA inserts handle, ergonomic reel seat and SiC guides.

Code	Length	C. Length	Sections	Actions	C.W.	Guide
152-50-360	3.60	126	3+3	100	MH	SiC

152-50-420	4.20	146	3+3	140	H	SiC

SELEKTOR PELLET FEEDER

This new rod is for sure amongst the top rods in the pellet and method feeder rods market. Built in Super High Moduus Carbon Durawall for the best casting action. Both models have been designed for fighting big fish as carp or barbel. This rods are equipped with 2 tips with different sensitivity, cork with EVA inserts handle, ergonomic reel seat and SiC guides.

Code	Length	C. Length	Sections	Actions	Guide
152-51-360	3.60	126	3+2	MH	SiC
152-51-390	3.90	137	3+2	H	SiC

SYNTIUM PELLET FEEDER

The equipment includes braided friendly SiC guides double legs.

The Syntium family offers two models, dedicated to the more recent branch of feeder fishing, the pellet feeder in open waters and carp fisheries. A 12' medium heavy model for slow flowing rivers and lakes, and a 13' heavy model, dedicated to anglers that are looking for strong emotions with big fish. The Syntium Pellet Feeder are really enjoyable for their power and fast action and are equipped with 2 carbon tips of different sensitivity. The blank is made of Super High

Modulus Durawall Carbon, SiC guides and combines cork and EVA handle.

Syntium Pellet Feeder rods are supplied with two interchangeable tips.

Code	Length	C. Length	Sections	Actions	Guide
152-97-360	3.60	126	3+2	MH	SiC
152-97-390	3.90	137	3+2	H	SiC

AIRTEK SPECIALIST

MICRO PELLET FEEDER

Here how it appears the Micro Pellet Feeder as soon as it lands on the bottom. The pellets start to come out and the bait is already uncovered.

After a short time the pellets start to come out in a sort of small cascade, taking the bait with them. The bait is always perfectly presented.

The Micro Pellet Feeder can be used as well in combination with ground bait instead of pellets. The final result will be the same.

SPECIFICATIONS:

The rod is supplied with 3 interchangeable carbon quiver tips: Light, Medium, Heavy action.

The spiral wrapping reinforces both joints.

The equipment includes braided friendly SIC guides double legs.

Marco Busani

MICRO PELLET FEEDER SET

It is designed to hold micro pellets or groundbaits securely on the cast and with the addition of a matching quick releasing mould with every pack.

AIRTEK SPECIALIST

FLATBED METHOD FEEDER & FLEXY MOULD

Available in the Inline or Elasticated version. The Inline is equipped with a swivel for self strike rigging or for sliding rigging, used in combination with a Fast Change Bead. The Elasticated version allows you to use much thinner hook lengths. For both the versions the flat bed grants a strong grip on the bottom, while the peculiar ribbed design keeps the groundbait right in position.

ELASTICATED

INLINE

FLEXY MOULD

This Method feeder is part of a complete program and perform at its best in combinations with the Method Feeder flexy Mould.

Put some pre-damped ground bait into the mould and position the hook with the bait in the centre.

Fill the mould with the rest of the ground bait, taking care to cover the hook with the bait.

Carefully position the Method Feeder in centre of the mould and press firmly.

Press the bottom part of the mould to come out the Method feeder with the perfectly shaped ground bait.

When the feeder will lay on the bottom the bait will be positioned over the ground bait, that will start its attractive action.

When the ground bait will dissolve it will cover the whole feeder, while the bait will be ready to be swallowed by the fish.

Engineering — SYGNUM — BARBEL — 360

SYGNUM XS BARBEL

This rod, designed for a demanding, growing market, is a perfect rod for barbel fishing in all European waters. Supplied with 1.75 and 2.25lb tip sections, it adapts to different fishing situations. The special High Modulus Carbon used for every section grants both superior stiffness and lightness, and a beautiful look. Progressive action gives a reserve of power to make it suitable even for very large prey. Equipped with Super S-SiC Light Frame guides, the latest design reel seat and natural cork handle.

ERION XT SPECIMEN TWIN TIP

This Powerful rods has been designed for fishing big-sized fish without difficulty in either retrieval or landing. It is a perfect rod for barbell fishing in all European waters. The ERION TWIN TIP is not only a powerful rod but a Specimen rod too. This 12' rod is entirely built in Super High Modulus Durawall Carbon for both superior stiffness and lightness. The progressive action still leave a reserve of power to make it suitable even for very large prey. It comes with two tips 1.75 lb and 2.25 lb to satisfy all casting conditions and for fighting with different fish size. as often comes when fishing for carp, barbel or tench.

SiC guides double legs. The rod comes with two tips 1,75 lb and 2,25 lb.

ERION XS POWER FEEDER

Special rod designed for barbel fishing. Barbel is one of the most powerful and widespread species in Europe and that's why so many anglers are focused on this fish. What the anglers ask is a super strong and reliable rod that is well balanced and not heavy. The Erion XS is exactly what they ask! The family includes three 3.90 models and this length is sufficient to keep your line out of the stream and avoiding your feeder to drift on the bottom. The Super High Modulus CX-1 Carbon blanks are strong but progressive.

allowing to fight over 4 kilos big barbels with great amusement. The rod is finished with ergonomic cork and EVA handle. DPS reel seat able to host big pit reels and 3 tips. 1 solid glass and 2 solid carbon.

Rods equipped with 3 tips, 1 fiberglass and 2 carbon.

NEW HISASHI FEEDER HOOKS

P1039 MATCH A classic hook for modern feeder fishing, offering a nice balance between strength and lightness. The out-turned eye helps knotless knot to be used to form hair rigs and present sweetcorn, pellets and mini boilies. The fantastic beak point is designed with a fine top edge in order to provide the first prick when the fish bolts and is strong enough to hold firmly during the fight with big fish.

P1003 POWER Nowadays, the gap between heavy feeder and carp fishing is narrow as never before, specially thanks to method fishing and thanks to the wide offer of dedicated baits such as pellets and mini boilies. This means that hooks are subject to higher pressure than in the past, so Trabucco team decided to also develop special hooks like this. Every detail has been carefully studied: from wire thickness to turned eye, from super sharp beak point to nice bronzed finish, a must for this sort of hooks.

PRECISION

THE PRECISION PERFORMANCE

We built the Precision series to offer a complete and very differentiated assortment of feeder rods, with performance similar to the top rods on the market, at a very reasonable price. Then we worked hard to design at least one rod for each technique or fishing situation and finally we took care to finish each model with great accuracy, using cork, SiC guides and a special non slip handle.

PRECISION XT PRO PICKER

A really enjoyable feeder rod that we suggest for short or medium fishing of carp, bream or chub. The light and reliable blank is made of Super High Resistance Carbon. This rod is equipped with SiC guides, so you can use any braided line without any problem, and a comfortable natural cork with EVA inserts handle.

Code	Length	C. Length	Sections	Actions	C.W.	Guide
152-40-270	2.70	142	2+2	M	35	SiC

Precision XT Pro Picker are equipped with 2 tips, each of them very well calibrated for casting heavy feeders.

PRECISION XT PRO BOMB

If you are searching for a reliable and enjoyable rod for fisheries, or small and medium ponds, stop here and take advantage of the performance offered by the Precision Pro Bomb. This 3 meters rod will impress you with its incredible ability and elegance to stop the big fish. The blank bends progressively to fatigue the fish little by little but not tiring the angler's arm. The rods displays 3 tips, 2 in fibreglass and one in solid carbon. The whole rod is equipped with braided lines friendly SiC guides and natural cork/EVA handle.

Precision XT Pro are equipped with 3 tips, 2 fibreglass and one solid carbon.

Code	Length	C. Length	Sections	Actions	C.W.	Guide
152-40-300	3.00	105	3+3	M	70	SiC

PRECISION XT PRO QUIVER

SiC guides double legs.

We designed this model with a progressive Super High Modulus Radial Carbon and we think it is just perfect for small to medium feeders. It can be used at its best in still water for fishes like chub and roach. It has been equipped with three tips, two in fibreglass and one in solid carbon. It also features integrated reel seat, natural cork with EVA inserts handle and SiC guides.

152-40-330	3.30	105	3+3	M	70	SiC

CASTFORCE FEEDER

5000 0.300mm/180m 0.350mm/130m 0.400mm/100m

Model specially designed for feeder fishing in rivers and large bodies of water. It is a light weight graphite body reel equipped with a long cast machine cut aluminium spool

- New design oversized spool
- Line Guard Protector
- Ergonomic handle with T-Rubber Knob

Find out more on page 166

PRECISION XT PRO FEEDER

S.H.M.R. CARBON

This series is made of progressive action blanks still having a very good power reserve in the butt section. Very sensitive but powerful and reliable: these three qualities make these rods very good for medium-heavy feeders for fishing in big lakes, rivers, fast flowing canals and even salt water, where they are commonly used in the Mediterranean to fish the distrustful gilt-head bream. Such rods cannot be built if not using the best materials such as the Super High Modulus Radial Carbon. They are equipped with SiC guides and natural cork and EVA handle.

Code	Length	C. Length	Sections	Actions	C.W.	Guide
152-40-360	3.60	125	3+3	MH	90	SiC
152-40-365	3.60	125	3+3	H	110	SiC
152-40-390	3.90	137	3+3	MH	90	SiC
152-40-395	3.90	137	3+3	H	110	SiC

PRECISION XT CARP FEEDER

If you consider feeder fishing to catch many big carps your technique, then the Precision carp Feeder is definitely your rod and you cannot stay without it! It has been specifically designed to fish carpodromo, carp fisheries and big rivers, where carp are not only big but really great fighters. The Super High Resistance Carbon allows a casting power up to 120 g and a total reliability to face the big ones. The Precision Carp Feeder features two fibreglass tips and double leg SiC guides to magnify its fighting qualities. Natural cork handle.

Code	Length	C. Length	Sections	Actions	C.W.	Guide
152-41-360	3.60	126	3+2	H	120	SiC
152-41-390	3.90	134	3+2	H	120	SiC

PRECISION XT RIVER FEEDER

This new series can be defined "allround for extreme situations". They are perfectly calibrated for fishing in fast flowing rivers and canals. The progressive power action is maximized by the great power reserve in the butt section, being able to stop the big fish who is trying to escape in the middle of the stream. It is the perfect rod for barbell fishing with up to 150g feeders and still you can use in more quite situations. In Southern Europe they are used to fish from piers and beaches to catch gilt-head bream. The Precision River Feeder has two tips, one in fibreglass and one in solid carbon, to match different situations. The equipment is completed by SiC guides and natural cork handle.

Code	Length	C. Length	Sections	Actions	C.W.	Guide
152-42-360	3.60	126	3+2	HH	150	SiC
152-42-390	3.90	134	3+2	HH	150	SiC

NEW PRECISION XT SW FEEDER

Built with High Resistance carbon to bear any sort of stress, these rods can be heavily loaded to shoot heavy rigs at long distance. The big cage feeders can fly out where barbel, carp and catfish are waiting for food, while the rod is equally at home at sea side with closed end feeder packed with maggots to tempt the Mediterranean sea bream. The reliable overcap joints are further reinforced by crossed carbon bands without affecting the perfection of action curve. In order to suit the demand about naked handles, the rod shows separated rubber and EVA grips, with just blank in between. All the components have been carefully selected, with good quality double leg guides and sturdy screw reel seat to also accept big size reels. Three quiver tips are included: two nylon (Light, Medium) and one carbon (Heavy).

Code	Length	C. Length	Sections	Actions	C.W.	Guide
152-46-360	3.60	125	3+2	MH	90	SiC
152-46-390	3.90	135	3+2	H	110	SiC

Screw reel seat made from steel and rubber. Naked handle with EVA butt grip. Two quiver tips: one fiberglass (Medium) and one carbon (Heavy).

PRECISION XT FEEDER PLUS

S.H.M.R. CARBON

Powerful but balanced progressive rod made of Super High Modulus Carbon. We want to highlight the excellent casting performance of this new model: it really casts further and more accurately. We can define this rod a value for money rod. but you should not think this is a second category rod. Actually all the components we used to equip it is as good as those we use for more expensive rods: SiC guides, extra smooth for braided use too. EVA ergonomic handle and double super sensitive fibreglass tips.

SPECIFICATIONS:

The rod is supplied with 2 interchangeable quiver tips: Medium, Heavy action.

Double leg SiC guides.

All the rods are equipped with Hookholder.

Code	Length	C. Length	Sections	Actions	C.W.	Guide
152-43-360	3.60	126	3+2	MH	90	SiC
152-43-365	3.90	126	3+2	H	120	SiC

NEW PRECISION XT COMBI TIP

S.H.M.R. CARBON

A modern match & feeder rod which allows the pleasure anglers to switch from feeder to waggler in case fish move up in the water to look for warmer temperature. It happens so often in the commercial lakes, specially during summer season and in such cases a single rod like this can brilliantly do the job. This is possible thanks to the twin top section supplied with new Precision XT: one is the classic feeder top, carrying two different quiver tips (both fibreglass made 1 oz Medium and 2 oz. Heavy) and the other is a tubular type, powerful match top able to deal with waggler and pellet waggler up to 25 grams weight. The rod handle is proving how much Trabucco development team pays attention to functional details. An EVA fore grip for comfort and easy cleaning of reel seat area, then natural cork with hot printed logo, then a rubber butt grip ending with soft, rounded cap so useful during those long fights with powerful carp.

Screw reel seat made from steel and rubber. Natural cork handle with special EVA butt grip. Feeder top section + 2 quiver tip; tubular Match top section (250 gr).

Code	Length	C. Length	Sections	Actions	C.W.	Guide
152-44-360	3.60	125	3+3	MH	90	SiC

LAKE TROUT

Why spend more when you get a chance to find a higher quality rod at a lower price? This is a question that many anglers should ask, especially in lake trout fishing. Trabucco this year offers a great opportunity to all enthusiasts anglers of this unique opportunity: the ability to buy advanced technology and quality products at a lower market price. Before buying any trout rods please compare it to a Trabucco one, close your eyes and try to feel the differences ... At that point you will notice that the only difference is the price because our is the best one in the market. Use your brain, if you know fishing you choose Trabucco.

NEW DREAM TEAM XPS LAKE TROUT

SS SUPER SLIM BLANK SENSI TOUCH L CROSSED REINFORCED CX2 CARBON NANO-TEK

Top of the range series with Super Slim design which gives a nice handling to all rods, including the powerful 44LD. This specification comes from lake trout's competition world, as well as the spliced top section, which is vital to detect fish bites, specially when trout are particularly shy. The wonderful lightness and the outstanding strength of Dream Team XPS rods is due to CX2 carbon construction, in which the bonding agent is a nano-tech resin that can be evenly dispersed between layers, even in limited quantity. Guide's configuration is well designed, with "Y" frame guides to avoid vibrations and small diameters to get a nice flow of the line; wrappings show hi-class quality, and include coloured yarn to match action colour code bands visible on butt section of each rod. The series is wide enough to equip the demanding angler and let him face all weather conditions, in the small lakes as well as the big and deep ones located up north.

SPECIFICATIONS:

Code	Length	C. Length	Weight	Sect.	Action	C.W.	Guide

Plate reel seat, finely wrapped. Ultralight butt cap directly screwed into the carbon wall.

ASTORE PRO LAKE TROUT

Lightweight, strong and balanced: these are the characteristics for a tremarella/bombard rod. And the more you can get in these three categories, the more these rods are appreciated among the competitors. So to obtain such a brilliant result we decided to design each action independently from the others, trying to optimize the power curve removing as much sliding guides as possible. The result has been achieved by opting for seven sections blanks for actions from 1 to 4 and five sections for the actions 5 to 7. The carbon used could not be other than super high modulus CX-2, the only one that has the characteristics of perfect transmission of vibrations and yet so strong and lightweight. Also, to further increase the sensitivity of the rod, the reel-seat has been integrated in the butt section. SiC guides allow the safe use of smaller lines without the risk of

Super Slim blank made from CX2 Nano-Tek carbon. The rods are equipped with Hookholder. Medium leg guides with "Y" shaped frame (SiC ring).

Action colour coded wrappings.

SS SUPER SLIM BLANK SENSITOUCH CX2 CARBON NANO-TEK

overheat caused by friction. Every action is characterized by a band of different color on butt section.

NEW ATTRACTIVE PRO LAKE TROUT

An innovative solution applied to handle area gives these rods a real plus in term of comfort. It's the rubber shrink tube which dresses the bottom half of butt section, also providing easy cleaning and protection from scratch due to rod rack tubes. The fast tapered blanks are quite firm, with little or no oscillation after the cast, a common problem which can visibly reduce the distances. The great precision of action curves is perfectly followed by the mainline, thanks to the sliding guides carefully wrapped on to carbon pipes. Attractive Pro series is made of six actions, well spaced each other, and offer the match angler the chance to buy twin rods without spending a fortune, because prices have been targeted with great care since the very start of the project.

Code	Length	C. Length	Weight	Sect.	Action	C.W.	Guide
124-29-100	3.90	110	170	7	UL	1-4	SIC

124-29-600	4.40	125	237	6	MH	10-20	SIC

NEW ACTIVA LAKE TROUT

This new series follows former Syntium, but offers some new elements which are destined to draw the attention of more and more pleasure anglers. First of all, let's introduce the new combination of length and power – called 430MH – which can cast 25-30 grams bombardas at long range, in order to reach trout shoals looking for fresh temperatures in the deep lakes during hot summer. The rod is fitted with solid carbon tip to detect even the lightest bites. The new 40ML comes from old 3,90 rod, whose length has been brought to 4 metres to allow the use of longer hooklinks,

Code	Length	C. Length	Weight	Sect.	Action	C.W.	Guide
124-30-100	3.90	128	150	7	L	2-8	SIC
124-30-200	4.00	128	160	7	ML	4-15	SIC
124-30-300	4.20	128	190	7	M	10-20	SIC
124-30-400	4.20	128	210	7	MH	15-30	SIC

not a fashion issue but a real need with nowadays difficult trout. No change for the 7 section's configuration, because it's the only way to avoid the addition of sliding guides on sections below the top.

NEW ERION X-PWR LAKE TROUT

This series is particularly indicated for those small lakes which are so common all over Europe, where the rod's power is not destined to cast at range, but it's useful to lift trout from water at speedy rate. In fact, all five rods in the series have been designed around same length - namely 4 metres – and stand out for their compact closed length and slim handle diameters. The solid carbon tip, responsible of the neat bite indication, is fitted on second section via telescopic joint, a simple but effective solution at the same time. On top of each section, there is a crossed reinforcement made from an orthogonal carbon band; it is there to protect joints from heavy loads

Code	Length	C. Length	Weight	Sect.	Action	C.W.	Guide
124-31-100	4.00	85	150	8	L	2-6	S-SIC
124-31-200	4.00	85	160	8	ML	4-8	S-SIC
124-31-300	4.00	86	170	8	M	6-12	S-SIC

124-31-500	4.00	87	200	8	H	15-30	S-SIC

which could cause breakages. Such solution makes Erion able to bear the inevitable stress due to newcomer's rawness

NEW REVENTON MASTER LAKE

The cheapest of Trabucco lake trout rods can surprise more than a few expert anglers for the amount of technical specifications which have been put in this project. Firstly, the remarkable taper gives the rod a perfect balance and allows the newcomer to experience good casts. Secondly, as soon as the retrieve starts, any message coming from the hookbait is clearly sent to the user, even in case of shy bites. Thirdly, the production has been run under strict quality control, so that all telescopic joints are fitting perfectly, with great advantage in term of sensitivity and strength. The medium leg guides have been carefully chosen in order to avoid any excess of weight and leave the blank maximum freedom.

Code	Length	C. Length	Weight	Sect.	Action	C.W.	Guide
124-32-100	3.90	130	168	5	L	2-6	S-SiC
124-32-200	3.90	130	172	5	ML	4-10	S-SiC

124-32-400	4.20	130	180	5	MH	10-20	S-SiC

Medium leg guides with SiC ring. Plate reel seat, wrapped. Aluminium butt cap.

ASTORE TX BOLO

Adjustable rod series designed for river trout fishing, built in Super High Modulus Radial Carbon Technology in 4-5-6 and 7m lengths. Extremely light but robust and reliable, this rod is also recommended for other fishing techniques requiring a very stiff and strong rod, such as salt water fishing and bolognese with heavy floats. Equipped with Super S-Sic guides and amortized reel seat. A unique fishing rod, easy to use. It will be appreciated mainly by expert anglers.

Code	Length	C. Length	Weight	Sect.	Guide
124-45-500	4.00 - 5.00	147	260	5	Sic
124-45-600	4.00 - 5.00 - 6.00	150	345	6	Sic

MULTI LENGTH SYSTEM SENSi TOUCH CX2 CARBON NANO-TEK

NEW VANADIA XT-MATCH

Rods which show an impressive Super Slim butt, considering the tremendous power it can deliver, with a slightly upper reel seat which is there to help you push as much as you like. The body of these rods is engineered to be heavily loaded, thus boost heavy bombardas to the horizon. The job is done by CX-1 Micro Pitch carbon, whose structure is so tight that the blank's answer is strong and neat, without oscillations. The blank is further powered and protected by a cross winding carbon yarn, which is purposely missing on top section to generate a perfect action curve. Guides are short leg HD model, able to quickly disperse heat caused by the endless line flow, an essential part of lake trout fishing.

Code	Length	C. Length	Weight	Sect.	C.W.	Guide
150-34-450	4.50	130	202	7	10-60	Sic
150-34-455	4.50	130	208	7	20-80	Sic

Blanks made from Micro Pitch Carbon CX-1. Cross Winding carbon reinforcement.

Medium leg HD guides (quick heat dissipation).

CV CROSS WINDING SENSi TOUCH SS SUPER SLIM BLANK CX1 MICRO PITCH

SLURP & YUMMY BAIT

Honey worm, earthworm and some other larvae are the most common natural bait used in lake trout fishing. But they bring at least three disadvantages. First of all, they suffer high temperatures, and day after day their efficiency fades sharply. Secondly, they can't resist to trout's crunch, as they tear them. Consequently, they must be replaced after each trout landed, otherwise the bite's rate slows down, and maybe some bites are easily missed. Finally, with natural worms the correct hooking operation can be difficult, and to improve the hook position the angler has no other choice but to replace the bait. All these problems have been successfully solved by Trabucco with his own fantastic Yummy and Slurp artificial bait, which offer endless solutions in term of silhouette, size, texture, taste, colour and scent, up to helping the hookbait's rotation through computer designed shapes.

Find out more on page 328

BLACK HT BOMBARDAS

Developed and engineered by Trabucco team for lake trout competition.

These bombardas are made from EVA, a material which is known for the resistance to shocks and for its elasticity against compression. But there is something more, because the artificial nature of this material offer a consistent buoyancy, due to the even distribution of the air bubbles throughout the volume. Consequently, their behaviour in action is very much stable from one piece to another, and also during its life. In water, they sink according to four different plans and keep an almost horizontal attitude during the retrieve. That's important to ensure that the hookbait travels at regular depth, as well as offering the highest sensitivity. The action displayed in water depends from weight and position of brass stabilizers, which are placed in the heart of the body. The tubular stem is made from high strength plastic and is coloured to allow quick identification of each model.

BLACK HT SUPERFICIE

The extra weight in the range of 1-3 grams makes it useful to fish in the first meter below water's edge. Ideal for winter fishing with quick retrieve and extra long hooklinks, even beyond the 2 metres mark.

Code	Weight (g)	Extra Weight
017-00-060	6	1.0
017-00-080	8	1.5
017-00-100	10	1.5
017-00-120	12	2.0
017-00-150	15	2.0
017-00-200	20	2.0
017-00-250	25	3.0

BLACK HT MEZZO FONDO

Its name tells that it works wonder in mid-water with slow retrieve, but its weight pattern enables to also operate at higher speed during autumn and winter. Long hooklinks are recommended.

Code	Weight (g)	Extra Weight
017-01-060	6	1.5
017-01-080	8	2.5
017-01-100	10	3.0

BLACK HT BOMBARDAS - Swimming attitude

SLIM TUBE

The classic lead sinker, good in most conditions. It sinks slower than the short model. Bag of 5 pieces including rubber tube.

Code	Weight (g)
090-80-020	2.00
090-80-025	2.50
090-80-030	3.00
090-80-035	3.50
090-80-040	4.00
090-80-045	4.50
090-80-050	5.00
090-80-060	6.00

SUPER SLIM TUBE

Ultra thin and long, this lead sinks very slowly, so it's perfect for surface work. Bag of 5 pieces including rubber tube.

Code	Weight (g)
090-81-010	1.00
090-81-015	1.50
090-81-020	2.00
090-81-025	2.50
090-81-030	3.00
090-81-035	3.50
090-81-040	4.00

MICRO SLIM

A micro version of Slim Tub model, developed to create strings useful with wary trout. Bag of 5 pieces including rubber tube.

Code	Weight (g)
090-82-002	0.20
090-82-003	0.30
090-82-004	0.40
090-82-005	0.50
090-82-007	0.70
090-82-010	1.00
090-82-015	1.50

SHORT TUBE

Trout lead sinker with compact body, ideal for speed fishing or to swim close to the bottom. Bag of 5 pieces including rubber tube.

Code	Weight (g)
090-83-020	2.00
090-83-025	2.50
090-83-030	3.00

090-83-040	4.00
090-83-045	4.50
090-83-050	5.00

MICRO SFERE

Compact shape means higher sinking speed. Developed for medium speed surface work or slow retrieve close to the bottom. Bag of 5 pieces including rubber tube.

Code	Weight (g)
090-84-001	0.10
090-84-002	0.20
090-84-003	0.30
090-84-004	0.40
090-84-005	0.50
090-84-007	0.70
090-84-010	1.00

PLASTIC OLIVE

It is typically used in trout lake fishing to calibrate the float or themselves to "Saltarello". Recommended for clear waters when targeting very suspicious fish.

Code	Weight (g)	Pcs
013-97-002	2.0	5
013-97-003	3.0	5
013-97-004	4.0	5

VETRINI TROUT GHOST

Clear glass tubular sinkers for lake trout fishing at close distance. Available in bags of 3 or 4 pieces depending on size.

Code	Weight (g)	Pcs
013-95-002	2.0	4
013-95-003	3.0	4
013-95-004	4.0	4
013-95-006	6.0	3
013-95-008	8.0	3

VETRINI IRIIDIUM PIOMBATI

Small plastic sinkers. Compared to glass models, these sink slower and allow the angler to search the fish in a very shallow depth, even at short distance.

Code	Weight (g)	Extra Weight
017-70-020	2.0	1.4
017-70-030	3.0	1.7
017-70-040	4.0	1.9
017-70-050	5.0	2.1
017-70-060	6.0	2.3

SWIVELS & RUBBER STOPPERS

In order to get the best from bombardas, lead and glass sinkers, Trabucco range offers some excellent accessories.

The double and triple swivels belonging to Power Swivel assortment are perfect to download the inevitable torsion generated during the retrieve, because the hookbait spins quickly. Beyond the traditional swivels with connected eyes or multiple bodies, the HS Rolling Special is quite interesting because it offers a quick change clip to replace the hooklink instantaneously. We recommend to insert a segment of silicone tube on to the hooklink, before forming the loop. Once the loop has been connected to the swivel's clip, the tube locks everything. Please take care not to cover the clip's mouth with the tube.

The knot connecting swivel to mainline is subject to hard stress due to bombardas weight, so it's highly recommended to protect it with an Oval Rubber Stopper from Competition range, available in four sizes.

Find out more on page 324

BOMBARDA IRIDIUM ZERO GRAVITY

White colour Bombarda, made of unbreakable plastic material. It is floating and allow to fish on surface, both with a retrieve or still action. This particular Bombarda can be used also in those competition in which the surface fishing is not allowed.

Code	Weight (g)	Extra Wt.
017-45-040	4	0
017-45-060	6	0
017-45-080	8	0
017-45-100	10	0
017-45-150	15	0
017-45-200	20	0
017-45-300	30	0

BOMBARDA IRIDIUM PRO LIGHT

Satinated colour Bombarda, made of plastic material. Due the use of one only construction material the sinking capacity is guaranteed. The sinking grades are very small, in order to allow the angler to search trout on surface or mid depth.

Code	Weight (g)	Extra Wt.
017-65-040	4	0.8
017-65-060	6	1.2
017-65-080	8	1.6
017-65-100	10	2.0
017-65-150	15	3.0
017-65-200	20	4.0

AQUA BOMB

Water filled Bombarda, entirely made by transparent polycarbonate. It is possible to obtain a casting and floating weight by filling more or less the Aquabomb with water. Suggested for lake trout fishing and as well in sea, as a classic "buldo".

Code	Weight (g)
015-60-050	5
015-60-080	8
015-60-100	10

LONG CAST SPHIROLETTE

Long Cast Sphirolette represent the good solution to cast at long range any light lure or bait, as it often happens in lake trout fishing. Can also find good use at sea with grubs or to cast lightweight baits.

Code	Weight (g)
013-96-010	10
013-96-015	15
013-96-020	20

T-FORCE XPS TROUT

This transparent monofilament is dedicated to all the people who loves fishing for trout in lakes or fisheries. Its color makes it perfect for use especially in crystal clear water. The special manufacturing procedure used makes it extremely resistant to twisting and the extremely smooth surface allows to reach incredible casting distance even using lightweight lures or rigs. Available in five different diameters on 150 meters spool.

Find out more on page 199

PENNA TROTA

Straight peacock designed for trout fishing. Both ends are fluo painted to be reversed according to light conditions.

Code	Weight (g)
001-20-095	2.00, 3.00, 4.00, 5.00, 6.00

STRIKE IN LINE

Short dibber float with fluo top and line running through the body. Designed for shallow and running waters, it's just awesome for trout fishing in small rivers.

Code	Stem	Antenna	Weight (g)
001-20-100	Carbonio	Fiberglass	1.00, 2.00, 3.00, 4.00, 5.00

ZOOM IN LINE

Elongated dibber float, with fluo top, line running through the body and bushed top. Designed for lake trout, it can be well employed also for other species.

Code	Stem	Antenna	Weight (g)
001-20-090	Carbonio	Fiberglass	2.00, 3.00, 4.00, 5.00, 6.00

RIVER TROUT

When you fish trouts in rivers you often need a good strength and very good fishing tackles. We can provide you the correct adjustable rods, just perfect for this technique: light, stiff and powerful. In our catalogue you will find rods for super specialists, competition anglers and passionate anglers, that need short sections rods.

DREAM TEAM XPS RIVER

The top rod of our range is now the Dream Team Trabucco XPS River, a science fiction 10 meters of unsurpassed performance. Its excellence comes from the wise use of the best super high modulus carbon Nano-Tek CX-2 and from the specific design of each section. A judicious lay of the carbon fibers, both linear and radial, that varies in each element in order to have always and in any case the maximum performance. The encumbrance of the blank has been reduced to the minimum in order to allow easy transport and an easier handling, without thereby affect the fishing action, which turns out to be very strong and stiff and therefore makes possible to detect the most shy and wary bites. The strike is always ready, rapid and inexorable, a sort of shot that we guarantee to surprise the trout and firmly pierce it mouth with the hook. The blocks are made using the shrink tube, extremely versatile, reliable and lightweight. Single legged SiC guides allows you to use thinner monofilaments without harming it with the heat of friction, avoiding to deteriorate their technical qualities and prolonging their life.

Maurizio Biolcati

Code	Length	C. Length	Weight	Sections	Guide
124-49-100	10.00	160	499	8	SiC

ASTORE TX RIVER TROUT

Fishing for trout in rivers requires rods with very high specs, if only to attend the rigidity and lightness required. The Astore TX Trout River is built in CX-2 Nano-Tek Carbon, a super high modulus carbon that is unrivalled in reliability, rigidity, break resistance and lightness. The lower sections, those of greater diameter, have been designed to be just slightly tapered to allow the use of the shrink tube for the realization of the adjustable blocks, saving precious grams on the total weight which remains therefore not only restrained but also exceptionally well-arranged and thus balanced. Single foot SiC guides provide an excellent smoothness to the monofilament in every condition.

Code	Length	C. Length	Weight	Sections	Guide
124-43-700	7.00	140	308	7	SiC
124-43-800	8.00	146	403	8	SiC

ATTRACTIVE TRL RIVER TROUT

Maximum reactivity of the blank with a particular attention to the control of the fish. This was our target, but not only: we wanted a stiff rod (very stiff), light and with a slim blank. Thanks to the CX-1 High Modulus carbon the result is exciting, the rod is very light and very well balanced, but what surprises most is the stiffness ... it seems only the tip is bending. We really like this rod, ask your dealer to let you try and then compare it to any other rod in this price range, you will see that the value for money is unbeatable.

Code	Length	C. Length	Weight	Sections	Guide
124-44-500	5.00	135	285	5	SiC
124-44-600	6.00	135	405	6	SiC

SYNTIUM TRL RIVER

Practical and effective short butt section adjustable rod, stiff and powerful. Reliable in any situation, the blank is made from super high modulus radial carbon, light-weight but extremely strong and durable. A crossed carbon yarn has been added as reinforcement in the most stressed parts to enhance its stiffness and to allow to directly lift the prey. Short leg S-SiC guides complete the features of this interesting rod.

Code	Length	C. Length	Weight	Sections	Guide
124-79-500	5.00	125	206	5	S-SiC
124-79-600	6.00	137	440	6	S-SiC

ASTORE TX BOLO

MULTI LENGTH SYSTEM

SENSI TOUCH

CX2 CARBON NANO-TEK

RE TX BOLO 600S

A very stiff bolognese rod, but still slim, light weighted and well balanced. Designed to strike the prey and tearing it off the water quickly, without disturbing the fishing area. The tip is extremely sensitive and fast and can stop the fish run anticipating its reactions. The ability to adjust the length according to the fishing needs is a huge tactical advantage, but what impresses most is how this rod rules the fish. A fishing rod easy to use that will be appreciated mainly by expert anglers.

Code	Length	C. Length	Weight	Sections	Guide
124-45-500	4.00 - 5.00	145	187	5	SiC
124-45-600	4.00 - 5.00 - 6.00	150	280	6	SiC
124-45-700	4.00 - 5.00 - 6.00 - 7.00	150	340	7	SiC

ERION XS MINI BOLO

SENSI TOUCH CX-1 CARBON

Let's face it: a handy and compact rod, you can leave in the car and that is not only easy to use but first of all reliable, it is a rod that is interesting for everybody. So this is not a rod for specialists but a rod which finds its use in the stream as in the pond, river or at sea. The high resistance carbon is a guarantee of total reliability, forgiving the mistakes of beginners, but also guarantees lightness and precision. The ringing S-SiC quickly disperses the heat, and allows the safe use of even very thin monofilaments.

Code	Length	C. Length	Weight	Sections	Guide
124-83-320	3.20	63	120	7	SiC
124-83-360	3.60	64	150	8	SiC

SPECIMEN

Big fish never allow you any mistake. So you cannot accept any compromise when specimen hunting. We have rods designed to avoid that giant catfish and powerful sturgeons will find their way and escape in the deep. We know all these situations very well and this is why our specimen rods are the best...cause we are just like you: we really enjoy it only when everything is under control!

MAXXIS MONSTER

~~Power Joint~~ **CX-1**
CARBON

Armando Tiberi

We spent many hours on the river to test our new MAXXIS MONSTER fighting with huge catfish. Simply perfect to be used from the boat and for lure fishing from the shore, these rods revealed enormous power and progressive action which helps to rule even the toughest fish in extreme conditions. The blanks are built using full CX-1 Carbon and are equipped with double leg SIC guides. This rod is perfect to be used with braided lines and features the virtually unbreakable Magic Stick Tip. Ergonomic handle wrapped in premium quality EVA delivers the maximum comfort and grip in any situations.

Francesco Palli

NEW INDULGENCE SPECIMEN

A new telescopic series, developed to offer the pleasure angler affordable rods with compact closed length, reliable structure and good performances. In other words, everything needed to catch big size fish, packed in a few centimetres. The butt section length couldn't be shorter than it is, because reel seat position is an important specification for this sort of rods, which are destined to cast heavy feeders or simple ledger bomb with paste bait for carp and barbel fishing, both in lakes and fast running rivers. Blanks are made from High Resistance carbon, whose main difference with High Modulus is the ability to bear extreme stress, coming from fast and furious fights but also from hard life on the banks or on the boat. With their metal frame, guides are really unbreakable, while their SiC ring protects line from abrasion and excessive heating.

Code	Length	C.Length	Sect.	Test lbs	Guide
156-30-100	3.60	78	6	3.00	Metal Frame + SiC
156-30-200	3.60	78	6	3.50	Metal Frame + SiC
156-30-300	3.60	78	6	4.00	Metal Frame + SiC

S.H.M.R.
CARBON

Comfortable Rubber handle grip and butt grip. Graphite screw reel seat.

Super strong metal frame guides with SiC ring.

Trabucco logo is finely engraved on aluminium butt cap.

NEW EXCURSION T-SPECIMEN

In spite of relatively slim blank, it has no problems with big barbel, carp, catfish and eels, thanks to the High Resistance carbon construction which has proven to be extremely strong during preliminary field tests. Most anglers across Europe tend to specialize their fishing on just a single species, or like to go fishing in a limited number of venues. Therefore, they accumulate a lot of experience and skills in a relatively short time, getting good catches and good reputation as well. This new Excursion rod is expressly dedicated to them, with nice but effective specifications like tubular top, quality double leg guides and screw reel seat with steel hoods. The closed length of just one metre allows

it to be stored in the car boot: always ready to get into action!

Double leg SiC wrapped guides.

CARP FISHING

Target Big Fish! The direct confrontation and catching the fish is the objective pursued by those who practice these fishing techniques. We know this and our wide range of products is made to cover these needs with the proper rods: with the sole purpose of catching a powerful large fish! Considering that there are people who fish in large rivers and people who just fish in commercial fisheries, people who prefers the powerful two-piece, other who prefers three pieces and finally considering telescopic rods fans ... we propose a complete range, from more specialistic rods to the most versatile ones, so we are confident that you will surely find in these pages the rod for you. Certainly you will not find anywhere such a value for money rods.

LEGEND CARP X2

S.H.M.R.
CARBON

Full high resistance carbon rod made in 2 sections. The overall look is dramatic thanks to the first class woven carbon finishing. The progressive action is outstanding for the price, powerful when casting and yet enough soft to manage the carp during the fight. Best components has been used to finish the rod, using double leg SIC guides, ergonomic screw reel seat and EVA handle.

Goran Radovic

CYCLONE

S.H.M.R.
CARBON

The CYCLONE CARP is made in H.M. Carbon with woven Carbon on the joint and handle to enhance power and reliability. Progressive action while playing the carp but enough power to achieve long distance casting. SIC guides, non-slip handle and ergonomic reel seat.

Code	Length	C. Length	Sections	Test lbs	Guide
156-31-360	3.60	188	2	3.00	SIC

CYCLONE X3

S.H.M.R.
CARBON

Three pieces carp rod made using H.R. Carbon. Thanks to the new construction procedure this rod will surprise you for the perfect fast-parabolic action. Easy to carry and transport, this rod can be used in many situations. Equipped with first choice EVA handle and double leg SIC guides.

Code	Length	C. Length	Sections	Test lbs	Guide
156-32-360	3.60	125	3	3.00	SIC

THUNDER

S.H.M.R.
CARBON

If you are looking for a good carp rod, made from carbon and at an affordable price, stop here! The Thunder has been entirely made from high resistance carbon and features a classic progressive action, being able to cast well and to manage the retrieve of a big carp with no problems. Equipped with double legs S-SIC guides to allow you to use braided lines.

Code	Length	C. Length	Sections	Test lbs	Guide
156-39-360	3.60	188	2	3.00	SIC
156-39-390	3.90	195	2	3.00	SIC

LEGION CARP

S.H.M.R. CARBON

A wonderful telescopic rod, only 106cm when it's closed. The secret lies in the design: seven sections that can provide enormous power both during casting and during retrieving. Like all the telescopic rods, it has been designed for quick sessions. The Legion Carp is

a medium-high level rod and its action is very similar to that of a two-pieces construction. Equipped with double leg Sic guides.

Code	Length	C. Length	Sections	Test lbs	Guide
156-24-350	3.60	106	7	3.00	Sic

IMPRESSION

CROSSED REINFORCED S.H.M.R. CARBON

Telescopic rod in High Resistance Carbon reinforced with Carbon Tape spiral wrapping and Carbon Yarn Cross wrapping. Available in 3,60m length with 3,00 Lbs test curve. The Impression has a very powerful action for distance cast-

ing, and it is equipped with Super S-SIC guides. Very manageable and easy to transport when closed.

Code	Length	C. Length	Sections	Test lbs	Guide
156-22-360	3.60	107	7	3.00	Sic

INSOLENCE

S.H.M.R. CARBON

Many anglers prefer telescopic rods because they are obviously very easy to transport and because they can be prepared faster. The NEW INSOLENCE range of rods are very strong and characterized by a progressive action. Made in HR Carbon

and kevlar yarn wrapping to increase the power. Equipped with SIC guides, anti-slip EVA handle and latest design ergonomic screw reel seat. Ideal for those anglers who are looking a practical rod with great performance.

Code	Length	C. Length	Sections	Test lbs	Guide
156-29-360	3.60	84	7	3.00	Sic

SURFCASTING 2 & 3 SECTIONS

Great dedication and countless working hours made the Trabucco brand a landmark in the surf casting universe, not only in Europe but in the whole world, where top anglers of the most prestigious national teams, such as UK and Ireland, decided to use Trabucco rods for the most important competitions. To stop now it will be crazy, because the world is going ahead and the surf casting of nowadays is already light-years far from the surf casting of just 5 years ago. That's why we built a team of experienced competition anglers, to help the brand to switch to the next level and create a new generation of surf casting rods. The results of this co operation is under your eyes and we are really proud of it, because we know that now more than ever before we are ahead of anyone else, on the highest step of the podium.

NEW POETICA KW TORZITE

The new Poetica KW is something really special, it is not a "normal" evolution of the old Poetica, it is a true Copernican revolution. First of all the blank is made of super high modulus CX-2 Nano Tek carbon with low resin content, far lighter but better performing than any other carbon. Then we fine tuned a special tip where the bending curve is distributed to have a softer final part, made of glass, and a harder lower part made of carbon. The name for this special tip is FH-Rip Tip. Such a tip is really pushing during the cast but it is quite sensitive when fishing, even with rough sea. It is not a rod for everybody, it is a rod for demanding people that need a super rod able to cast as no other one, a true competition rod, competing with other anglers, competing with fish very far from the shore, competing with the strength of the sea. The Poetica KW is equipped with best guides ever made: the brand new super high tech Fuji Torzite with Titanium frame. The Poetica is the first surf casting rod featuring such guides! The inner diameter of the Torzite is 15% bigger than other same outer diameter, consequently they help casting even more. The reel seat is a Fuji DNPS Gold Label. Top rod ever!

SPECIFICATIONS:

FUJI GOLD REEL SEAT

On the Poetica MN range, we selected only the best components and as reel seat we used the ultra reliable Fuji Dnps gold label, entirely built by graphite it offers a great strength, ergonomic and designed to last longer.

BUTT CAP

The rod's butt ends with a soft rubber handle, which provides the perfect grip to control the rod during most quick and powerful casts. The rounded butt cap is particularly useful to lock the rod to the groin when a big fish is being retrieved.

FH RIP TIP

The Nano Tek high modulus carbon sheet, which gives power to Poetica's blank, sweetly blends into softer materials to provide the right sensitivity to detect fish bites. But the conversion is gradual, within the tubular top section, and this requires high class technology to avoid weak points and curve imperfections, which would cause a bad power transfer. All over the world, this concept is well known as "multi-action tip", but it's not equally common the process of layer's overlapping and fusion which bring to a perfect result, inch by inch.

POETICA KW TORZITE

The top of the top, the buttonhole of the Trabucco surf casting range cannot have a different name than Poetica, a name that gained reputation at the highest level of the international competitions.

Fuji TORZITE™

TITANIUM
Ultralight Titanium frame.

TORZITE™
-40%

SIC

Compared to SIC guides of same size, a Torzite guide offers a 15% wider ring, offering more room to running line. In addition, less weight applied to rod's blank (20-30%) means that it has more freedom to fully develop its reactivity, with great advantage on casting distances.

ULTRA LOW FRICTION

Torzite's gently round cross section shape allow the ring to contact line in double the length compared to the Sic. Thanks to it, the pressure to the ring is reduced half compared to the Sic.

During their endless research and development activity, Fuji engineers found the most advanced ceramic with a very compact structure and extremely smooth surface, being 40% lighter than Silicon Carbide (SIC).

Thanks to a dramatically angled ring, Fuji solved the line tangle problem forever. A common problem which normally causes time loss, sometimes line breakage and, in worst cases, even rod breakage.

The load is spread in the **POINT**

The load is spread in the length of the contact.

CX2
CARBON NANO-TEK

The new series of surf casting rod Impera is born for competition, designed with the contribution of the whole Trabucco Surf Casting Team that tested the blanks for months. The final result is an excellent combination of performance, light weight and reliability. The rod has been made using the fantastic super high modulus CX-2 Nano Tek carbon, a special super stiff but super light weight material, due to the extremely low percentage of resin. A so powerful but also a so balanced blank is perfect for long fishing sessions that won't break your back in two. The tip is hybrid, a solid carbon tip that is perfectly connected to the lower hollow part, strong and sensitive. A so

technological blank deserves top components such as Titanium frame SIC SeaGuide guides and Fuji DNPS Gold Label reel seat.

171-56-255	4.50	157	3	250	Sea Guide Tit. SIC

SPECIFICATIONS:

CX-2 NANO-TEK LRC

Last generation Super High Modulus Carbon produced with an exclusive process that allow to produce an extremely pure carbon fibre with a very low resin content. Such a pure material greatly enhances the mechanical response to stress, thus being much higher than the Carbon usually used to build fishing rods, and has a very low specific gravity. The final result given by this technology is a super performing, extremely light fishing rod.

SEA GUIDE TITANIUM SIC

The inner stone, made of SIC, is the best you can get in term of smoothness, heat dispersion and abrasion resistance. But the strongest point of the new Titanium guides is undoubtedly the stiffness and the lightness of the frame. Titanium is also salt water resistant, so this material has incredible properties indeed! A rod equipped with Titanium guides will always have superior performance

because the action of the blank will not be influenced by the weight of the guides.

FUJI GOLD REEL SEAT

On the Impera range, we selected only the best components and as reel seat we used the ultra reliable Fuji DNPS gold label, entirely built by graphite it offers a great strength, ergonomic and designed to last longer.

BUTT CAP. Special rubber butt grip with rounded rubber cap, it helps all the operations during the casts or when fishing and additionally it has the function to protect the butt end.

HYBRID TIP. In order to give Impera the highest possible sensitivity, a carbon solid tip has been inserted, glued and carefully wrapped on to the tubular portion of top section. This solution required a specific technology to obtain strength around the joint area and curve perfection of the whole top. The most delicate bites are consequently shown at their best, while at the same time the strike is very accurate and safe, enabling the use of relatively fine hooklinks.

CX2
NANO-TEK

A definitely brilliant rod series, which stands off the average for its interesting list of technical specifications. The blank is made from CX-2 Nano LRC, a low resin content carbon of the highest modulus available. The whole range of casting weight models has an impressive fast reactive action and it can be used in whatever sea or wind condition. The components are top level: genuine Fuji Alconite guides with fluorescent inserts and genuine Fuji Gold Series reel seat. The 4.50 meters versions features a more parabolic action to allow any kind of casting style. The Cassiopea 120 gr, unlike other casting weight models, fits 7 guides, the perfect choice to drive the tighter line coils created by smaller sized reels. More powerful models have 8 guides and must be combined with bigger reels (8000 and 1000 sizes). We want to highlight the heavier model too, a 300 g casting weight rod, one of the most powerful

surf rods on the market. This model is actually able to accomplish any challenge and it is a perfect choice for shark and rock fishing with live bait. The super sensitive tubular carbon tips mounted on each model have been crafted in order to be active also during the casting action, when they help to push your lead to the horizon.

XPS VELVET PROCAST

NEW

300m / 600m

Specially developed for Surf Casting competitions, it's produced in an intense, warm yellow colour which is quite visible both under daylight and during the night, when the head lamp allows to immediately find the real direction taken by the line. Extremely soft, velvet skinned thanks to silicone treatment and without memory, it flows easily out from the reel's spool, allowing long casts and preventing the inexperienced user from creating line tangles. On the knot side, it's easy to pull tightly, even in larger diameters: on the hook's shank as well as on shock leader it creates neat and small knots.

Find out more on page 209

KRYPTERIA

Hi grade series of powerful yet sensitive surf casting rods, designed in three equal sections with small diameter's blanks. They are built from CX-2 Nano LRC, a special low resin content carbon material. These rods feature a very sensitive solid carbon tip. The Krypteria show peculiar specifications that can be appreciated notably on the 4.50 models, as the moderately fast action make these rods suitable for every casting technique. The light weight and robust blank is reactive and you can feel its casting power in every moment of your casting action. The outstanding components are top quality and salt water resistant: Sea Guide Titanium frame guides with inner SiC ring, Fuji Gold Series ergonomic reel seat and Trabucco rubber butt grip.

SPECIFICATIONS:

The final result given by this technology is a super performing, extremely light fishing rod.

BUTT CAP

The Krypteria is an outstanding rod that is light and robust. That's why we decided to equip it with a rubber Butt Cap. The rubber sort we used is extremely tough, standing against abrasions and salt water, but it is also extremely light. To some people it can seem a worthless detail but, on the contrary, it is icing on the cake. And we love to take care of our products, even for the smallest details.

NEMESEAN MN

Series of three section's rods based on very well tested blanks, made from CX-1 Micro Pitch Carbon, a strong, reliable and fast reactive material that matches modern market requests. This series features very good salt water resistant finishing and components such as a genuine Fuji Gold Series ergonomic reel seat and Sea Guide Hero Hi-Grade guides with SiC rings. The Nemesea MN is offered at an average price but it is the only rod in this segment whose performance can be compared to top level rods. The wonderful cosmetic does justice to the brilliant action.

SALT WATER RESISTANT

For special techniques such as light surf and beach ledgering it is common to use light weight rods with limited casting weight. Having said that, it is not true you must give in to fish very far from shore. Main problem is that very few reels have the specs that can combine with these light rods. So you need a wide spool reel and, at the same time, a light weight reel otherwise you will compromise the balance between rod and reel.

Find out more on page 172

NEW ATHENA X-TREME

The Athena series was born in the end of 2013 and it has been so welcomed by anglers to deserve after a so short time an upgraded version. The new Athena is made of a very special carbon, whose fibers are wrapper really tight to get an extremely reliable and stiff blank. This carbon, the CX-1 Micro Pitch is one of the reasons why this rod will be among the best sellers for 2015 too. Accurately finished and with a nice brilliant yellow colour, now definitely THE Athena colour, the blank is equipped with SiC corrosion proof

NEW EPICA X-CAST

Maybe it is not evident but the Epica series are very likely the best selling series within the Trabucco assortment. This happens because the Epica rods feature the most advanced solutions and technology, normally displayed on top class rods, at very affordable price. The new XCast series is a very good example of wise designing e top components. Available both in the classic 4.20m length and in the longer 4.50m, much appreciated by peo-

ple engaged in competition. The blank is made of high modulus carbon CX-1 Micro Pitch and it is equipped with first class SiC SeaGuide guides, to reduce the friction with

the line. The stainless steel frame is corrosion free. The Webo DPS reel seat is reliable and will last forever. The ergonomic lower part of the handle will help you to get the best from your casting ability. The tip is hybrid, a solid carbon part that is perfectly connected to the lower hollow part, strong and yet sensitive.

NEW SERENITY COMPETITION

A little for the competition and a little for normal anglers; the Serenity Competition is a rod with very good performance but offered for an affordable price. For sure this rod is one of the more pleasant easy to use on the beach, and this is due to the perfectly balanced blank that can be used for hours with no strain. Casting performance is outstanding due to the building material, the high modulus CX-1 carbon and the smooth SiC SeaGuide guides.

The tip is hybrid, a solid carbon part that is perfectly connected to the lower hollow part, strong and yet sensitive.

Fuji

CX-1 CARBON

Amazing 3 sections surf casting rod that has been tested for a very long time before to be approved for mass production. The blank is made of High Modulus CX-1 Carbon and it is perfect for long distance and heavy duty fishing. The 200g casting power makes this rod one of the best to use when the sea is really rough. Extreme conditions are made for the Firebird. The tip has been made mixing carbon and fibreglass, in this way the tip is adding extra power during casting but stays sensitive while fishing. The famous Zero Friction Blank and the new casting K frame SiC guides grant longer casts, also in windy conditions. The K shaped frame virtually reduces to zero the friction with the line, avoiding to break it in case it would flow in too wide coils.

FOLGORE REVOLUTION

Three sections surf casting rod with stiff progressive parabolic action, the easiest solution for longer casts without any efforts. The tip is hybrid, being made from a mix of High Density Carbon and Fiberglass. We opted for this solution to increase sensitivity to

fish bites and to perfectly manage the fighting fish. The CX-1 Carbon blank is equipped with salt water resistant MN SiC guides.

FOLGORE LONG CAST

Three sections Surf Casting rod with stiff action and real 200 grams casting power. Despite the great power of the blank, the Folgore Surf LC is very sensitive, thanks to the special hybrid tip, made from carbon and solid fiberglass. The blank is made of super reliable CX-1

Carbon and it is equipped with low profile SiC guides: this solution allows longer casts and the use of multipliers. All components are salt water resistant.

FOSTORIA COASTMASTER

New version of the proven Fostoria series. The blank is now more reactive, thanks to the new higher modulus carbon fibres we used. Thanks to this material, the rod is now more balanced too. The Fostoria Coast Master is also much more sensitive thanks to the new hybrid

tip, really useful to spot the more delicate bites and to understand the sea bottom morphology, using the lead as a probe. Equipped with salt water resistant MN SiC guides.

FOSTORIA OVERCAST

Totally new blank for a very well known and appreciated worldwide surf casting rod. The new Fostoria Overcast is made from High Resistance Carbon, a material that grants superior performances both when casting and fishing, thanks to the hybrid carbon/fiberglass

tip. It is evident that every component of this rod is resistant to salt water corrosion, including the low profile SiC guides.

Giuseppe Alesi

NEW HISASHI F-31

Specially developed for light surf casting, it's the ideal weapon to search fish when they are particularly shy, as it can present worms in the most natural way. The beak point grants penetration and holding properties, while the long shank offers room for long worms, easing both baiting and disgorging operations. The straight eye can be tied in several ways, saving most of the line's breaking strength.

We recommend to connect the hook through twisted line loop, as it gives the hook-bait total mobility and resists to fish teeth better than single line. The ending barb works as bait keeper.

NEW XTR SURFCASTING PRO TEAM

Nowadays, surf casting is an advanced sea fishing branch, which in Italy has seen a fast development, more than in the rest of Europe; along with thousands of pleasure anglers there are many match surf fans, who like to adopt the finest quality tackle and accessories. To them, Trabucco offers a new range of technical luggage, showing a young and intriguing design, based on black and chartreuse, a trendy colour in between yellow and green, which moved from the fashion world to pervade other fields of the industry. But cosmetic is just one of the interesting points of XTR Pro Team range, because materials and practical solutions are destined to impress the end user surely more than it. Using a waterproof and washable material weighing 1200 denier, bags, rucksacks and rod holdalls are built to last. The addition of plastic boxes with many compartments enables to take full advantage of the inside room to neatly store all accessories. The special paddings, the stiff bottoms, the handles and shoulder belts, the zippers and seams are made with great care and precision.

HYBRID TIP
Both Suspiria display a great fishing sensitivity, thanks to the spliced top including a solid carbon tip.

Find out more on page 312

NEW ADMIRAL STORM RIDER

Three sections surf casting rod made of carbon whose fibers has been interlaced with a specific design that increases stiffness and consequential casting distance. Despite the very affordable price, this rod can deliver very good performance and the casting power of 160 g is absolutely real. Very good rod for those who start

NEW ADMIRAL SEAQUEST

The Admiral Sea Quest is a powerful rod, very good choice for long casting even if it is not too stiff. This action is easier to use and can allow even the newbies of long casting to attend good distance. The high resistance carbon blank is obviously not as fast as other rods, but it can react in a very accurate way. The SiC guides are smoother than others and

NEW ADMIRAL ORIZZONTE

Very strong and reliable surf casting rod able to face heavy sea conditions with no problem. The Admiral Orizzonte is made of high resistance carbon and reinforced in the joints with transverse high resistance carbon bands. The big screw reel seat can easily host large surf casting reels, up to 12000 size and even bigger. The tip is hybrid, a solid carbon part that is perfectly connected to the lower

hollow part, strong and yet sensitive. Stainless steel corrosion proof SiC guides.

Code	Length	C. Length	Sections	C.W.	Guide

NEW OCEANIC DISTANCE SURF

The new Oceanic is the entry level model for the 3 sections surf casting rod from Trabucco. Despite the very affordable price, it has been designed following the same principles of more expensive rods. The blank is made of HRC (High Resistance Compo-

site) reinforced with a carbon yarn and is super strong and reliable. The stainless steel frame SiC guides are corrosion resistant and super smooth.

to use 3 section surf rods. Also featuring Zero Friction Blank, corrosion free SiC guides and hybrid solid carbon tip.

CASSIOPEA MX2

The Cassiopea MX2 is the natural evolution of the classic and historical English rods, from whom it takes the basic concepts and contents, changing them according to the most modern needs and the latest technological materials.

AERAS HYPERTEK

Very interesting 2 sections surf rod, versatile and performing long distance casting.

NEW CASSIOPEA MX2

Even if the market in this moment is asking for a large quantity of 3 sections surf rods, for sure the most beautiful rods for surf casting are the 2 sections one, the so called bass rods. The Cassiopea MX2 is the natural evolution of the classic and historical English rods, from whom it takes the basic concepts and contents, changing them according to the most modern needs and the latest technological materials. The blank is incredibly

The tip section, a key part to define the action of a 2 section rod, is FH Rip Tip, that means that the building involves glass and carbon fibers mixing in a progressive way from the top to the base of the tip. Casting power, accuracy of the cast and finally sensitivity, all is depending on this special tip. The Cassiopea MX2 is equipped with the finest components such as a Fuji DPS Gold Label reel seat and Fuji Alconite guides. The lower handle on the butt section is made by a shrinking tube and a hard rubber butt knob, a perfect solution to secure the hand during the casting phase. Put in joint.

Code	Length	C. Length	Sections	C.W.	Guide
171-54-160	4.15	145	2	(2-6 oz) 160 g	Fuji MNA
171-54-200	4.15	145	2	(3-7 oz) 200 g	Fuji MNA
171-54-230	4.15	145	2	(4-8 oz) 230 g	Fuji MNA

stiff and high performing, made from high modulus CX-2 Nano Tek LRC carbon. The fast action is absolutely fantastic and you will experience the most incredible casting sensation.

SPECIFICATIONS CASSIOPEA MX2 AND AERAS HYPERTEK:

FUJI DNPS REEL SEAT

On the Cassiopea MX2 range, we selected only the best components and as reel seat we used the ultra reliable Fuji DNPS gold label, entirely built by graphite it offers a great strength, ergonomic and designed to last longer.

BUTT CAP

The butt end cap is a feature that many don't consider. But in fact it helps all the operations during the casts or when fishing and additionally it has the function to protect the butt end. We've designed also special rubber caps also for the inner sections to prevent any damage during the transport.

FH RIP TIP

Both Cassiopea and Aeras series feature the fantastic FH Rip Tip top section. It has a tubular structure, and it's built through a special technology. In the top area, which is destined to detect fish bites, the high modulus carbon is gradually replaced by lower modulus materials, up to become 100% fiberglass to get the required sensitivity.

NEW AERAS HYPERTEK

Very interesting 2 sections surf rod, versatile and performing long distance casting. The Aeras is made of the equal sections joint with a spigot and made of high modulus carbon CX-1 Micro Pitch. The building structure of the blank gives the angler sensation he cannot feel without a 2 sections rod. The special FH Rip Tip, made of a combination of glass and carbon, has the typical bend of an English bass rod. Equipped with SiC Seaguide guides with stainless steel frame. The reel seat is Fuji DNPS Gold Label and can easily harbor big pit reels.

Great visibility during the night, thanks to the glow-in-the-dark tape which wounds the tip.

SURFCASTING TELESCOPIC

Love and hate. Telescopic surf casting rods don't know half measures. Many anglers just dislike them, but on the other hand, many other will never go fishing without them. We want everybody happy and thanks to our great knowledge and experience that lead us to build the most beautiful 3 sections rods in the world, we think to be able to deliver the best telescopic rods ever. We are so confident in our job that we think that some 3 section's lovers will integrate their own rod range with some of our telescopic! Also for telescopic we invested money, time and attention, we casted thousands and thousands of times, to make our tele-rods the best you can buy.

CASSANDRA MN

It was difficult to do better than the previous Cassandra, very likely the thinner telescopic surf rod in its class on the market. We think we have succeeded, thanks to the use of the fantastic CX-2 Nano Carbon, a material whose molecules are very tightly linked, allowing you to have less resin in the blank and a more fast response during the cast. The tip is short, without any sliding guide, high performance during the casting action but also sensitive during the fishing action. The butt section is completed with a nice aluminium and rubber cap. The salt water resistant equip-

NEW LOCUSTA XT

It's the natural evolution of former Locusta, of which it keeps the reactivity that had achieved the approval from thousands of Italian surfcaster, making them say that it was casting like a three section rod! Thanks to Emiliano Tenerelli and Trabucco team work, now the action range is wider, offering different casting weights to satisfy current demand. Technical features also grow, as now guides are from Sea Guide to improve resistance to saltwater and reel seat is the same ergonomic model which until yesterday was available on Cassandra series only. Good news also on the butt grip front, which has been shaped to provide total control when the rod is pushed forward and the energy must be concentrated to reach the targeted distance. Finally,

XTRA CASTING PERFORMANCE

CX-1 CARBON

NEW NIGHTWISH EXTREME CAST

New series oriented to surfcasting competitions, which takes the DNA from former Nightwish, with addition of some important innovations which give it a new identity. The High Modulus CX-1 carbon has been confirmed for the blank, because it gives the rod the correct reaction to best caster's casting requirements, while the guide's configuration is totally revised. Taking advantage from the excellent quality of Sea Guide frames, the technicians of Trabucco team tested some prototypes with larger diameter's guides, obtaining a better line's flow and consequently longer casting distances. In order to provide the best possible control of the casting operation, they even added the same anatomic butt grip of new Locusta. Brilliant!

NEW SEATALISMAN CASTMASTER

FAST REACTION BLANK **SENSI TOUCH** **CROSSED REINFORCED**

Within the vast collection of Trabucco telesurf rods, Sea Talisman is the link between the famous top of the range rods and those destined to the pleasure angler. In fact, this series features some quality specifications, like blank's slimmness and responsiveness, but is offered at surprising prices. Therefore, the anglers who like to face their first competitions have good chances without spending a fortune, also finding brilliant reels in the Trabucco line-up to perfectly match these rods. Well refined in the small details, Sea Talisman rods fit MN guides with a special corrosion proof finish, plus the ergonomic graphite reel seat: everything right to bear saltwater injuries and to last long time.

ADMIRAL MAGNUM SURF

The Admiral Magnum Surf is a series of rods as the market requires: long telescopic (4.20 meters) and with several options about different casting power. The carbon cross reinforced High Modulus Carbon blank features a medium tip action, so it is possible to cast a mile without fatiguing your back and even if you have not a great knowledge of casting techniques. The sensitive tip allows you to fully control your prey and to force it over the wave if you need to do so. These rods are equipped with SiC guides

and Zero Friction Blank, the very same finish that we use on top level rods.

ANDROMEDA

Andromeda family is a classic example of Trabucco's vocation to follow all traditions, trends and even the slightest variations within each single fishing style. A solid tip version, another with tubular top, a third one with special guide's configuration. Different solutions and performances according to the actual conditions of use on the beaches of Mediterranean and not only.

ANDROMEDA TEKNO SURF

Surf Casting series fully made of High Resistance Carbon reinforced with Carbon tape in all the point that are subjected to higher stress. These rods are specifically designed to get a strong tip action. The short tip section is solid, strong and sensitive at the same time. This solution allows also more accurate casting. The SiC guides can be used with braided lines. Screw reel seat and non slip handle.

ANDROMEDA OCEAN MASTER

A powerful telescopic rod, designed for people who like to experience surf casting with strong rods. The tip is strong and stiff, as usually requested by Atlantic ocean anglers, and guides are "Pipe style", with first one foldable. This is the right rod for Spanish, Portuguese and French market. The cosmetic is eye catching and components are all salt water resistant.

Code	Length	C. Length	Sections	C.W.	Guide
171-24-420	4.20	117	4	250	SIC MN

SEARIDER MASTER BEACH

Sensitive rods designed for salt water light fishing, both from the shore and from piers and breakwaters. It can be used from the shore fishing for striped breams when the sea is calm, being able to good distance casting without spoiling the more delicate baits. It can be used from piers and breakwaters using feeders with maggots for all the marine fish that love it, such as sea bass and gilt head bream. The action of the blank allows the use of low diameter hook length.

NEW AVALON GALAXY SURF

Good telescopic rods which take life from a nicely balanced mix of carbon and fibreglass to serve pleasure anglers fishing from the beach as well as from the rocks, where the reliability sits on top of their wish list. The pure carbon is employed on joint's cross reinforcements and to create the white painted solid tip, because the positive end of any fishing session depends mostly from the "communication" between fish and angler. The strong double leg guides, wrapped carefully, feature the vital SiC ring to resist from abrasion caused by salt and sand brought in by the line. Those elements are the worst enemy of any guide, and Trabucco team know it well!

Code	Length	C. Length	Sections	C.W.	Guide

SEARIDER PRO SENSOR

Among the materials available in the industry, High Resistance carbon is one of the most simple ones, but is worldwide used for its properties to bear high stress and for doing it on the basis of long time term. That's why Trabucco technicians trusted it when designed these Sea Rider, as they liked to offer to newcomers or occasional surfers rods which should have been safe also in front of some inevitable misuse. The top section is made from solid carbon to grant sensitivity and strength, while double leg guides have SIC ring. Reel seat comes from Trabucco's top of the range, with upper hood which is integrated in the shape and lower one screw driven for total safety.

Code	Length	C. Length	Sections	C.W.	Guide

AVALON PRO SURF 6500

The Avalon Surf is offered to an affordable price and designed for those who want to take their first steps in the surf techniques. It shows an elegant cosmetics with an ultra reliable mechanics.

Extremely lightweight despite the size, Avalon Surf features a graphite body and spool, the AS line roller, super balance system and the power handle ends with a soft ergonomic knob. Available in two colors (Red and Blue) for an elegant combination with Avalon rods.

SPOOLED WITH XP-Line

Find out more on page 181

LIGHT SURF & BEACH LEGERING

Light Surf and Beach Legering are typically Italian fishing styles, born to adapt the original surf casting to the conditions of the Mediterranean sea, where tides are minimal and waves not as powerful as in the ocean. Both funny and highly specialized, they enable to catch big fish, so that reliable tackle is absolutely a must. Nowadays, Trabucco offers to the wide public of fans a complete range of rods, which have been developed and refined in close cooperation with a team of experts. Blanks which can accurately cast at great distance even the lightest lead, with the sensitivity to detect the most shy bites. Actions which are perfect to employ light lines and sophisticated rigs, engineered to maximise the pleasure coming from the direct contact with the fish.

NEW CATTURA MN2 BEACH

The Cattura is so famous among the Beach Legering rods that it does not need any presentation. The Cattura MN2 series is now larger, with the brand new 4..50 m 120 g casting weight model. We received so many requests for a model that could be able to cast farther and still be super sensitive that we decided to design it. The new 4.50m 120 g is the perfect solution for super sensitive fishing at very long distance. We remind you the whole Cattura M2 series feature CX-2 Nano LRC carbon blanks, a material that is almost free of resins and so it becomes more reactive and lighter. All the rods are equipped by 3 solid ultra sensitive carbon put in tips, able to detect bites and to "read"

the bottom roughness like a sonar! The first class components include original Fuji Alconite guides and Fuji Gold reel seats.

170-96-500	5.00	170	3+3	120	Fuji A MN

SPECIFICATIONS:

FUJI ALCONITE GUIDES
The guide assembly made by Fuji Alconite is the very best on the market! The stainless steel frame supported by Alconite stone (hard and perfectly smooth) provides the best slip of the line.

FUJI GOLD REEL SEAT
On the MN range, we selected only the best components and as reel seat we used the ultra reliable Fuji Dnps gold label, entirely built by graphite it offers a great strength, ergonomic and designed to last longer.

BUTT CAP
The butt end cap is a feature that many don't consider. But in fact it helps all the operations during the casts or when fishing and additionally it has the function to protect the butt end. We've designed also special rubber caps also for the inner sections to prevent any damage during the transport.

SOLID TIPS
Solid Tips Three tips are supplied with the rod:
Green: Super sensitive for pier fishing.
Yellow: Super calibrated for fishing without shock leader.
Red: Tougher action for shock leaders use.

SIRENIA MN

Innovative 3 sections blank designed to provide a rod with single tubular tip showing great sensitivity. The rod is extremely light due to the use of the CX-2 Nano Tek Carbon and its bending curve is progressive and reactive enough to get casting performance very close to stiffer surf casting rods. This is really an outstanding example of good engineering, where Trabucco team put on the table his own fishing experience along with know-how in selecting the best materials and details. Components are at top level and include SiC Sea Guide guides with titanium

corrosion free frame, Fuji Gold reel seat and Trabucco aluminium/rubber butt cap.

Code	Length	C. Length	Sections	C.W.	Guide
170-94-420	4.20	144	3	100	SiC
170-94-450	4.50	157	3	100	SiC
170-94-500	5.00	170	3	100	SiC

SPECIFICATIONS:

TITANIUM GUIDES
The inner stone, made of SiC, is the best you can get in term of smoothness, heat dispersion and abrasion resistance. But the strongest point of the new Titanium guides is undoubtedly the stiffness and the lightness of the frame. Titanium

is also salt water resistant, so this material has incredible properties indeed! A rod equipped with Titanium guides will always have superior performance because the action of the blank will not be influenced by the weight of the guides.

FUJI GOLD REEL SEAT
You cannot avoid to use a Fuji equipment when you want a first quality accessory for your rod. Surf Casting anglers usually mistreat their rods, using them in an aggressive environment and in extremely tough conditions. The Fuji Gold reel seat is the best you can get in terms of longevity and safety, always keeping your reel right into its position without any problem for years and years.

ment and in extremely tough conditions. The Fuji Gold reel seat is the best you can get in terms of longevity and safety, always keeping your reel right into its position without any problem for years and years.

BUTT CAP
The Sirenia is an outstanding rod that is light and robust. That's why we decided to equip it with a rubber Butt Cap. The rubber sort we used is extremely tough, standing against abrasions and salt water, but it is also extremely light. To some people it can seem a worthless detail but, on the contrary, it is icing on the cake. And we love to take care of our products, even in the smallest details.

NEW XANDRIA MN BEACH

3 sections Beach Legering rod equipped with 2 put in sensitive tips made of solid carbon. The new Xandria project has been developed with the supervision of Giuseppe Alesi, famous light surf Italian champion, to achieve a perfectly balanced and light blank, able to cast at distance. The Xandria has a very fast action that is perfect for smooth or just rough sea, when it can still cast at distance with relatively light leads. Equipped with corrosion free SiC guides.

Ergonomic graphite screw reel seat with steel lower hood. Special rubber butt grip with soft, rounded cap.

Code	Length	C. Length	Sections	C.W.	Guide

yellow / medium

Giuseppe Alesi

NEW FOLGORE BEACH

The Folgore Beach Casting features a very small diameter, super balanced blank. The diameter of the blank of the 4.50 model at the reel seat is just 20mm, and for the 4.20 is as small as 18mm. So the Folgore is the rod you must choose for all the finesse fishing techniques from the beach, with smooth and just rough sea, when it is able to present the baits at a good distance and great accuracy. The blank is made of super high modulus CX-1 carbon and it is strong enough to fight big gilt-head bream. It is equipped with 2 solid carbon put in tips for different casting weights and with stainless steel frame SiC guides. Great value for money.

Two solid carbon interchangeable tips: red (stiff), yellow (medium).

XENOS XOS 6000

The Light Surf technique almost never needs big pit reels, mainly to avoid to compromise the rod balance: light surf rods usually never exceed the 120 g casting power. The Trabucco Xenos XOS 6000 is the perfect reel for this technique thanks to its features: a wide diameter spool that helps to cast longer distances; a medium-low ratio to grant a great cranking power in every situation; an aluminium spool to spool braided lines too. Xenos gears are first quality and designed in Japan, they are supported by 6 stainless steel bearings for perfect smoothness and reliability.

NEW XPS LONG CAST FLUO

Xps LongCast Fluo is a high strength line which has been specifically designed as an extreme distance casting line for all sea techniques and which will improve range by around 15% compared with conventional lines. It's super soft, and smooth thanks to an advanced silicon coating which improves abrasion resistance too.

LongCast works equally well when used on either a multiplier or fixed spool reel.

CEPHALONIA MN

A five meters rod is not only useful, we could say indispensable in competitions. Trabucco developed this seven section's rod made from CX-2 Nano-Tek Carbon, whose fantastic blank is able of fully unleashing all the power needed to cast a hundred grams, while remaining very sensitive in the management of the minimal weight of 50 grams. The components are of high standard, such as corrosion proof guides and screw reel seat with stainless steel hoods. The elegant and useful Trabucco rubber butt cap complete what is undoubtedly one of the best competition rods in the market!

FAST REACTION BLANK
XTRA CASTING PERFORMANCE

CW CROSS WRAPPING

CX-2 CARBON NANO-TEK

ORACLE XR

This telescopic beach legering rod is a really interesting model, which stands up within the vast range of already brilliant rods. Just perfect for light beach fishing, it's made from high grade CX-1 carbon. Casting range is quite high, 120 grams, but the blank is lightweight, easy to use and well balanced, as per the top of the range models. Very good components such as the salt water proof guides, ergonomic graphite reel seat and rubber butt grip are completing this good rod.

NIGHTWISH EXTREME BEACH

FAST REACTION BLANK

Zero
SPINNING RESISTANCE

CX-1 CARBON

Telescopic rod made from high grade CX-1 carbon in 5 sections with tip action, very light blank but still able to cast far from the shore, as requested by modern Beach Legering. Tip section is made from solid carbon and all components are salt water protected, from the graphite reel seat to the SiC guides.

Trabucco team can be really proud of this project.

Code	Length	C. Length	Sections	C.W.	Guide
170-83-420	4.20	143	5	100	SiC

AEGEAN PROGRESS BEACH

Magnificent telescopic rod for Beach Ledgering featuring two solid carbon put in tips. The fast reaction blank has been made from High Modulus CX-1 Carbon and its diameter is very thin, even if it is also very good for long casting action. Max power is 100 g, but, taking advantage from the two tips, you can actually fish from 20 to 100 g without any problem. The Aegean Progress Beach has a high class finishing, with Sensi Touch butt section and Zero Friction Blank painting. Ergonomic graphite reel seat, SiC single leg guides and rubber butt grip with fighting cap are nice additions.

The rod is supplied with two interchangeable tips.

Code	Length	C. Length	Sections	C.W.	Guide
171-65-420	4.20	125	4+2	100	SiC

BAIT INDICATOR PRO SURF

Designed in conjunction with Trabucco Surfcasting Team, this is the latest innovation in the surfcasting bite detection. The device must be applied on the reel line between the first and second guide from the butt, adjusting the weight according to the sea conditions: the heavier the weight, the less sensitive the indicator. Mn Surf Indicator can be used either by day, fitting the specially provided multicolor antenna, or by night, fitting a 4.5mm chemical light.

Find out more on page 318

LOCUSTA TEKNO MORMORA

True fast action Beach Legering blank, able to cast small weights up to 100 grams beyond the 100 meters mark. The CX-1 High Modulus Carbon blank has a tip action that is able to absorb the biggest fish runs, avoiding to break the smallest diameter hooklength. Due to the very light weight, it is the perfect rod for active fishing, that is keeping the rod in hand, slightly trolling the bait over the sandy or muddy bottom to tease fish reaction. The extra sensitive tip allows to detect even the shiest bites. SiC guides.

Code	Length	C. Length	Sections	C.W.	Guide
171-66-420	4.20	123	5	100	SiC

SEATALISMAN BEACH MASTER

Two rod's series for Beach Legering. The casting vocation of the Sea Talisman, whose casting power is max 100 grams, is enhanced by the Zero Friction blank finishing. Available in two versions, 4.00 and 4.20 meters, with the latter very good for competition purposes. The light weight and reliable blank is made from High Modulus CX-1 Carbon, one of the finest carbon fibres in the market nowadays. The non slip handle is covered by the special Sensi Touch varnishing. SiC guides.

Code	Length	C. Length	Sections	C.W.	Guide
171-62-400	4.00	145	5	100	SiC
171-62-420	4.20	159	5	100	SiC

ADMIRAL MASTER BEACH

Lightweight but powerful, the Admiral Master Beach is made from crossed reinforced carbon for extra reliability. The blank is telescopic in 4 sections, with 2 interchangeable tip sections with different casting power and action, max casting weight 100g. The two tips are essential in all those situations when instead to change your rod it is more easy, and less expensive, just to change the tip in order to adapt your technique to the changed conditions. The lighter tip can also be used in combination with feeder and maggots. This rod is extremely eclectic and versatile, and should never miss in the bag of the passionate beach angler.

Code	Length	C. Length	Sections	C.W.	Guide
171-64-400	4.00	121	4+2	100	SiC

ANDROMEDA BEACH MORMORA

Very light Beach Legering rod, with an impressive value for money. The blank is made of 5 sections of reinforced High Modulus Radial Carbon, and develops a progressive action during the casting, being able to cast in distance even very light leads. As it is to understand from the name, this rods has been designed for mormora (striped bream) fishing from the beach, and it can be used as well for other elusive salt water fish, like the gilt head bream. All the guides are double leg S-SiC.

Code	Length	C. Length	Sections	C.W.	Guide
170-37-400	4.00	142	5	100	SiC

FINGER PROTECTOR

Our Finger Protector is a small but really important accessory who can't miss in the tackle box of any beach caster. Even when casting at extreme distance with heavy lead your finger will be safe, no more injury on your finger. The sensitivity will not be effected as we have used a very soft fabric, and the soft neoprene cuff can fit to any size of wrist.

Emiliano Tenerelli

MAX PLUS PHANTOM

NEW

A few hours within waves, which carry sand and debris and which continuously rub it against the bottom, for the main line are the most severe quality test. But no problem for the Phantom of new Trabucco Max Plus range, which is well protected against abrasion, therefore presenting itself as the ideal one for light surf and beach legering. The crystal clear look is a real plus in the particularly clean waters, while the sensible softness helps a lot while tightening any sort of knots, as their volume results smaller.

150m / 300m / 1000m

TELEBOAT RODS

From tackle point of view, boat fishing is a mix of tradition and evolution, with a wide background and, at the same time, a strong potential for wide growth in the whole Mediterranean Sea. Rods must be first of all reliable, then adapted to local needs, then nicely priced, and all these are fields in which the Trabucco engineering is naturally

succeeding, thanks to an advanced technology and thanks to the attention about the finest details in term of action and components. Great results are waiting for you: just go out with your boat and be sure that everything will be easier with these fantastic rods.

ASTORE SEA POWER

Three telescopic boat rods for light drifting with some great properties: extremely thin talons, amazingly sensitive and with a perfect action. They are so a nice mix of technology, innovation and experience, supported by a CX-2 Nano Carbon Tek material. The blank is thus really powerful but always balanced and light weight. The blanks are built in 6 sections plus 2 put in tips, one in solid carbon and one in solid fibreglass, both coming with guides. The fibreglass

tip has been chosen for pelagic fishes such as: bonito, mackerel and little tunny. The carbon tip is more indicated for bottom fishing with weights from 30 to 200 g for other kind of

fish: grouper, snapper, conger and sea bream. Equipped with SiC stainless steel double leg guides. The three sections above butt are adjustable to allow the user adapt the rod's length to fishing conditions.

Saverio Rosa

VANADIA XT POWER

With this telescopic series, Trabucco engineers managed to design a medium-heavy bolentino rod with slim profile blanks offering a stunning power at the same time. Vanadia XT Power is a rod which offers plenty of stiffness, a quality tool destined to the demanding angler who likes to quickly lift the strongest fish from the sea bottom, avoiding that they find some rocks or snags to cut the line. Vanadia XT Power is supplied with two interchangeable solid fibreglass tips which provide the required sensitivity, while the power body leaves no time to the fish to produce any fast run. Guide's configuration is double leg guides on butt and section above, then single legs to follow rod's action. All have SiC ring to allow braided line's use.

Supplied with 2 interchangeable tips.

Code	Length	C. Length	Sections	C.W.	Guide
162-22-400	4.00	149	6+2	160	SiC
162-22-500	5.00	151	7+2	160	SiC

Saverio Rosa

Fuji LS stainless steel reel seat. Two interchangeable tips: one made from solid carbon, the other in solid fibreglass, both carefully wrapped with guides.

VANADIA MASTER SEA

SENSI TOUCH 2 FLEX XTIP CX-1 CARBON MULTI LENGTH SYSTEM

Telescopic rod series made from CX-1 carbon, perfect to face the toughest fights with difficult fish. The action is more parabolic compared to Haws Albacore series to reduce the stress to hooklinks which, consequently, can be finer and of course more efficient. The structure is well reinforced in the key areas to optimize power, strength and lightness. The series is made of two rods of 4 and 5 metres; both fit an adjustable length device, which allows the rod to be used at one metre shorter. Each rod is supplied with two interchangeable solid fibreglass tips to offer a different grade of sensitivity, double leg guides featuring stainless steel frame; butt handle coated with a special paint to provide fantastic grip.

Two different power interchangeable tips.

162-47-500	4.00/5.00	130	5+2	300	SiC

VANADIA POWER ROCK

SENSI TOUCH TTIP CX2 CARBON NANO-TEK MULTI LENGTH SYSTEM

Telescopic rod dedicated to rock fishing, boat fishing and livebait bolentino. The full CX Nano Carbon blank provides to this rod a perfect balance, perfectly combined to the extreme power. This allows you to lift and land even the bigger fish and to face extreme fighting without any problem. All components are quite strong and saltwater proof, from double leg SIC guides to the plate reel seat with rubber support. The telescopic top section is made from solid carbon and painted in fluo orange for bite detection. Length is adjustable, thanks to the rubber device on section above butt.

Code	Length	C. Length	Sections	C.W.	Guide
162-48-450	3.50/4.50	148	6	200	SiC
162-48-550	4.50/5.50	153	7	200	SiC

ATTRACTIVE BOAT MASTER

Power and control: two words summarize the features of this perfect instrument for the bolentino fishing. A maximum casting weight of 300 grams in a four meters rod, built in four sections with two interchangeable solid tips. Originally designed for a medium heavy bottom fishing at good depth, this rod takes advantage from the total length of four meters to be also excellent for light drifting, of course using large diameter lines to handle fights in total safety. The blank is made from CX-1 carbon and has a cross reinforcing carbon braid that makes it a secure and perfect partner in any fishing situation. Fitted with SIC stainless steel frame guides.

Supplied with 2 interchangeable tips.

Code	Length	C. Length	Sections	C.W.	Guide
162-46-400	4.00	140	4+2	300	SIC

HAWS

HAWS ALBACORE

Power, rigidity and lightness are the main characteristics of this rod, which is without doubt the best on the market in this category. A rod built without any compromise made from CX-1 carbon, strengthened by high modulus carbon yarn wrapping. The handle is made by a rubber shrink tube process for perfect control during the casting and the fight.

The section above butt fits a rubber device to adjust length at one metre shorter. Three interchangeable solid tips allow to adapt rod's sensitivity to fishing conditions. A recommended sea rod for Bonito, Sea Bass and Mullet.

Code	Length	C. Length	Sections	C.W.	Guide
162-41-500	4.00/5.00	142	5+3	5-150	SIC
162-41-600	5.00/6.00	152	6+3	5-150	SIC

SEATALISMAN TEKNO BOAT

This is a perfect combination between a bottom fishing boat rod and a light drifting rod. Action is medium heavy and can be used for fishing snappers and groupers. With these species of fish it is key to be able to counter fight the initial run in order to avoid the breaking the line on bottom rocks. The whole blank is so active during the fight, with a sensitive tip that detects the bites and powerful lower sections that will tire the fish. The starting guide is double leg, while all the other are single leg, to have a better action and lighter weight. The Sea Talisman features two different interchangeable tips, one is made from solid glass while the other is made from solid carbon; the components resistant to corrosion, with graphite reel seat and stainless steel frame SiC guides.

MULTI LENGTH SYSTEM SENSITIVE TOUCH 2 FLEX XTIP CX-1 CARBON

rod fully bent, then netted an albacore or a snapper while they were just waiting for an ordinary fish, whose expected weight should have been a few hundred grams?

HAWS RED SNAPPER

2 FLEX XTIP CROSSED REINFORCED CX-1 CARBON

Developed in two different lengths, these rods show strength and stiffness to easily handle 200 grams weight. Entirely made from High Resistance carbon, are supplied with two interchangeable sensitive solid tips (1 fiberglass + 1 carbon) for use with different weights. Thanks to short closed length, these rods are easy to carry and to store on the boat. Fitted

with double leg SiC stainless steel guides and a strong screw reel seat.

Code	Length	C. Length	Sections	C.W.	Guide
162-42-350	3.50	119	6+2	200	SiC
162-42-400	4.00	121	7+2	200	SiC

ATTRACTIVE ADRIATICA

Beautiful rod for boat and light drifting. The CX-1 high modulus carbon blank is stiff

and progressive, allowing to manage every situation of fight, even when using low diameter lines with a big fish pulling on the other side. It can be used and actually enjoyed while fishing with the rod always in the hand, thanks to the super balanced and light weight blank. All gui-

des are double leg SiC and the rod's length is adjustable, allowing two length for better fishing action. It features two interchangeable tips of different action.

MEDEA TELEBOAT

This rod feature a blank made from High Resistance Cross Carbon, which make them extremely strong and lightweight, offering an unrivalled progressive action and sensitivity. Medea Teleboat has been made to provide

the maximum control of the fish while fighting. Incredible power in the butt to manage fish even when they are bigger than expected!

SOLARIS

SOLARIS PRO BOAT

Beautiful rod for boat fishing, dedicated to those who look for a value rod that can be used with different techniques. It features a full high modulus CX-1 carbon blank, reinforced by a double wrapping of high resistance carbon to withstand the most severe shocks. Available in sizes of 3 and 3,60 metres, it excels in both bottom and midwater fishing, where you can enjoy its action fighting with mackerel, horse mackerel and chub mackerel. Obviously, this wide range of use, which means that it is possible to fish with leads ranging from 10 to even 200 grams, can be obtained not only through fanatical designing attention, but also through

CROSS WINDING SENSi TOUCH 2 FLEX 2XTIP CX-1 CARBON

Supplied with 2 fiberglass tips.

An high grade rod offered at reasonable price, developed for medium-heavy bolentino with 250 grams casting power. With a powerful but progressive action, this rod is particularly suitable for bottom fishing at depths of up to 60 meters. A rod built without any compromise, made from CX-1 carbon and strengthened with the carbon Cross Winding to provide power, balance and sensitivity, everything associated with an exceptional lightweight. The rod is supplied with two tips showing different power, and features salt water proof guides plus non-slip handle.

NEW DEYLAN MAX DEEP

SENSi TOUCH 2 FLEX 2XTIP CX-1 CARBON MICRO-PITCH

Ergonomic graphite reel seat. Double legs guides with protective O-rings.

The Deylan Max Deep is a telescopic rod with an extremely stiff blank, made from CX1 low resin content carbon, which is perfect for boat fishing in deep water (70-100 m). The whole structure of the blank is able to manage heavy lead, while still keeping high sensitivity. This rod is equipped with 2 fiberglass put in tips (Light and Medium) for use with different weights and making possible to use it for fishing in shallow water too. Double leg stainless steel frame SiC guides and ergonomic graphite reel seat with aluminium hood.

NEW DEYLAN SEA POWER

SENSi TOUCH TIPS CX-1 CARBON MICRO-PITCH

Super nice action and greatly handy, the Deylan Sea Power is a telescopic rod for boat deep sea fishing. It can deal with leads up to 400 g and fight good sized preys. The super high modulus CX-1 carbon is very reliable and stiff enough to provide a perfect sensitivity, while the bite detection job is perfectly done by the telescopic solid glass tip. The Trabucco team use this rod for deep sea fishing with live bait or dead natural bait. The double leg SiC guides allow the use of braided lines. Ergonomic graphite reel seat with aluminium hood.

Telescopic solid fiberglass tip.

Code	Length	C. Length	Sections	C.W.	Guide

NEW MAX PLUS SUPER SEA

Sea fishing is tough life for the reel's line, because saltwater and sun light, often particularly strong, aren't keen at all with the polymers which all lines are made from, actually shortening their life length beyond what the other enemies already do: friction through rod's guides, contact with sand and rocks, stress due to heavy leads, damages caused by fish fins. With his new Super Sea, belonging to Max Plus range, Trabucco gives a neat solution to all those problems, at the same time even keeping extraordinary levels of smoothness and softness.

Find out more on page 217

SONIC

The endless list of different coast shapes and natural environments offer fantastic chances to the boat angler, but also causes the need of a vast range of dedicated rods, as tackle should be adapted to depth and sea conditions. For such reason Trabucco continuously develops wide and complete families of rods like Sonic.

NEW SONIC XS TEKNO

The composite fiber blank of the Sonic XS Tekno is well balanced and shows the perfect action to fish for small and medium pelagic, such as mackerel, scad, bogue etc. But the blank is strong enough to fight with bigger predators as bonito and skipjack. The SiC guides feature a corrosion free stainless steel frame.

Code	Length	C. Length	Sections	C.W.	Guide

TELEBOAT & DEEP SEA

TELE TIP **POWER FIBRE**

Definitely boat fishing is one of the most popular style of fishing, and it is typically done using medium length rods, light but still rigid enough to be able to fight fish that are often of a very interesting sizes. The Triton rods have been created to meet this need about easy to use, effective and affordable rods. The blank is made from Composite Power Fibre and can be used with up to 150 grams lead for the Deep Sea and 200 grams for the Teleboat, both being able to fight and pull big fish from the bottom of the sea, while the top nylon multicolor tip is surprisingly very sensitive and strong at the same time. Triton are equipped with double leg S-SIC guides and non-slip grip butt section.

VEKTOR

Bolentino is surely one of the most antique boat fishing style, well known all over the Mediterranean sea since the stone age, when it was done holding the line over the fore finger to detect the bite. Nowadays, the sport has moved forward with rod and reel, but the vast range of fish species which can be caught is still the same, including sea bream, cod, conger eels in case of bottom fishing, then mackerel, bonitos and blue fish when fishing midwater. The ideal rod? A Vektor by Trabucco, of course!

VEKTOR BOLENTINO

Wide family of rods designed for light, medium and heavy boat fishing. We paid a lot of attention to create these models, in order to get a stiff and reliable blank and a supersensitive action, using a fibreglass tip. The rods are equipped with braided friendly S-SiC guides with stainless steel frame, extremely resistant to salt water.

Code	Length	C. Length	Sections	C.W.	Guide

168-34-240	2.40	90	5	120	S-SiC

NEW Vektor DORADA

This the true classic telescopic boat rod for Mediterranean Sea fishing. Light weight, sturdy and really sensitive, this rod delivers hours and hours of pure fishing fun and still be able to fight against pretty big fish. The butt handle is covered by soft EVA and include a strong screw reel seat. The telescopic tip is made from solid fibreglass to provide sensitivity and strength at the same time.

Code	Length	C. Length	Sections	C.W.	Guide
168-37-180	1.80	63	5	50-150 g	S-SiC
168-37-210	2.10	69	5	50-150 g	S-SiC

NEW TACKLE BOX SYSTEM

Finally everything finds its own place on the boat, thanks to the fantastic Rapture tackle box! Made from stiff plastic material, which is quite strong and resistant to any temperature, this new product allows storing all bits and pieces we need for a fishing session on the boat, which find their safe place in a myriad of adaptable compartments within the three clear drawers with different depth. They are accessible from the front tilt cover, which can become a convenient counter while preparing the rigs. Snelled hooks, ready rigs and sabiki rigs have their own space, with a dedicated shell cover for easy access. All angles are rounded to avoid snagging the line. The sturdy handle folds completely and disappears in the dedicated recess.

BOAT RODS

The rods you'll find in these page are the results of hard engineering work, development and hundreds of hours spent fishing with them. Boat fishing can put under enormous stress a rod and that's why we used just the best materials, reliable and tested again, to be sure that the rods you're going to purchase will never let you down and will last longer.

HERAKLION BOAT POWER

A rod made with the latest generation CX-2 Nano-Tek Carbon further reinforced with Cross Winding System. The blank is ultra-tapered for maximum progress when loaded, while the spigots joints are designed to ensure maximum strength and follow perfectly the rod blank action. All the rods have two fiberglass tips with different power, but are both able to cope with the declared rod weight power, original Fuji salt water proof guides, non-slip handle and stainless steel reel seat Fuji LS. A higher-level tool dedicated to the true experts in the bolentino.

Original Fuji salt water proof guides, stainless steel reel seat Fuji LS.

VANADIA PRO BOAT

A beautiful deep fishing rod medium depth, divided into two sections marked taper, made entirely from high modulus carbon CX-1: an extremely powerful and responsive material. The joint system is very reliable, progressive joint processing eliminates the problem of blocking sections and safeguards the keeping of disconnection. Very stiff and well balanced is characterized by high sensitivity of the two tips provided and for the excellent progress of the blank. Top-level components: "essential" reel seat, Sea Guide Boat rings for maximum performance when using braided lines.

HERAKLION EXTREME DEEP

A super powerful rod made in CX-2 Nano-Tek Carbon. The blank is the perfect synthesis of power and reliability, characterized by extremely progressive action to compensate the powerful counterattack of the big fish that will go to undermine. Heavy duty components, SiC guides (silicon carbide) to allow the use of braided lines. Reel seat is of the type

H-DPS (suitable for electric reels) and is fitted with gimbal cap and first choice EVA handle.

FULGEA DEEP POWER

Boat fishing rods series offered with three interchangeable tips of 100g, 200g, and 300g, all made from solid fibreglass and designed for medium depth fishing. Blank in full CX-1 S.H.R. Carbon, extremely lightweight but strong. Thanks to the Ultra-Conic butt section design it's possible to store the solid tips inside the butt, for a safe and easy transport. The butt section design also helps the overall balance and the rod feel extremely lightweight.

Fulgea Deep Power is also fitted with an ergonomic screw reel seat, saltwater proof components and SiC guides, allowing also the use of braided lines. Available in a range of lengths and actions to cover all needs.

Code	Length	C. Length	Sections	C.W.	Guide

EPICA XTREME

Trabucco designed this rod for all the no-limits fishing lovers, a powerful and reliable tool with two spigot jointed sections. It can be used to fish at any depth and is able to face every fish dwelling down there. Perfect for fishing on deep reefs and wrecks, where big congers, groupers and rocklings grow at bigger sizes. It can be used in combination with electric reels as well. SiC salt water protected guides have been chosen for this rod, since heavy fishing is usually combined with braided lines.

RUSHWAVE XP BOAT

N.F.C. (Nano Fiber Carbon) blank for this allround high performance boat rod showing a beautiful, progressive curve and a significant power reserve in the lower part of the blank. It can be used with great satisfaction both as a trolling rods, 12-20 lbs class, and as a medium/deep sea bottom rod, thanks to the sensitive tip and general light weight. The long tip is directly inserted into the butt section. The prime grade EVA ergonomic handle is equipped with an aluminium reel seat and gimbal. The lowered frame SiC guides allow a safe use of braided lines.

167-48-210	210	170	1+1	300	SiC

SEARIDER BOLENTINO

Series of 2 sections versatile boat rods: true allround models that will fit most of the fishing techniques you can use from your boat. The powerful progressive action blank is just perfect and we are offering two casting weight categories in 4 length. Despite the blank's power, the rod is really sensitive, using a fibreglass tip expertly joined to the rest of the rod. The handle is extremely comfortable and is equipped with an EVA Split handle. The S-SiC guides have a stainless steel frame for salt water use.

TRITON TEKNO SEA

This is a special series of one piece boat rods built from reinforced Power Fibre. Due to the specific building process, Trabucco succeeded to design a rod that even in 1.20-1.50m delivers the right action and is able to manage at best lures up to 200 g. The Triton Tekno Sea are true salt water rods and are equipped with corrosion free S-SiC braided friendly guides. They are versatile and reliable, and can be used in a number of situations, from classic bottom fishing for different sea bream species to mid water fishing with Sabiki.

Code	Length	C. Length	Sections	C.W.	Guide

SQUID-EGING & SABIKI

Always at the fore front in new techniques and to help you to improve your catches, here you'll find our latest development about the Eging, Karei and Sabiki fishing.

NEW KAZUMA MASTER SQUID

New family of extremely light and easy to use squid rods for boat fishing. The blank is equipped by a large number of corrosion free guides that helps to transmit vibrations and improve sensitivity. The super sensitive tip can detect with great precision the squid bites. In evidence the 3 pieces configuration which makes these rods so easy to transport and store, plus the butt grip, which is flattened for easy hold within armpit when jigging.

Code	Length	C. Length	Sections	C.W.	Guides
160-84-180	1.80	73	3	100	S-SiC
160-84-210	2.10	86	3	100	S-SiC

KAZUMA MASTER ISO

Based on a parabolic action equipped with many small corrosion free S-SiC guides, these rods are the perfect solution for catching lots of squid. The super slim HVE fibre blank has been specifically designed to manage the typical runs of squids without harming their delicate tentacles.

Code	Length	C. Length	Sections	C.W.	Guides
160-83-180	1.80	100	2	150	S-SiC
160-83-210	2.10	110	2	150	S-SiC
160-83-240	2.40	130	2	150	S-SiC
160-83-270	2.70	140	2	150	S-SiC

The strong graphite reel seat with steel hoods. The butt grip is flattened and carries Kazuma laser engraved logo.

TRITON SQUID STICK

These rods offer a wide casting power range, making them suitable for all the squid fishing techniques. The new Triton Squid are long between 1.65 and 1.80m and have been designed for squid fishing. The HRC blank makes them really comfortable, having a very small butt section diameter. They can be used both with small lures, such as Tatak, and traditional and heavier squid jigs. The super sensitive tip will make the detection of bites far easier.

Code	Length	C. Length	Sections	C.W.	Guides

TROLLING

When you are boating on the sea and trolling for big predators you cannot make any compromise, otherwise you risk to miss the fish of your life. Our new trolling rods are born to avoid such serious drawback. Our top of the range families are Windrose Titanium, Windrose Pro Fighter and T-Game, and we believe they will become your best allies in the magic moment when the fish of your life will attack your lure.

Saverio Rosa

NEW T-GAME

XTREME ACTION E-GLASS BLANK

Amongst the Trabucco trolling rods range, the T-game is for sure the most "american" one, both for the components and cosmetic and for the action and consequent class test. The blank is powerful and designed for challenging fishing to fast and pugnacious fish. The 1+1 rods are available in 6' and 6'6" length, all equipped with SeaGuide SiC guides, stainless steel frame. The anodized aluminium reel seat is a reliable model from Pacific Bay, and carries double screw for total safety. The gimbal is made of anodized alluminium too, and is protected by a removable rubber cap.

Offset handle and fore grip are made from EVA. Pacific Bay reel seat.

Sea Guide guides with stainless steel frame and SiC ring.

Slick butt ending with gimbal.

SEALION OB

8+2
SS SHIELDED BALL BEARING

Sealion OB is a reliable series of trolling reels developed for all those sea anglers who refuse to accept any compromise on quality of their own tackle.

Find out more on page 191

WINDROSE

The trolling rods Wind Rose Pro-Fighter series are made for those experts who demand a concentration of technology and expertise to their equipments.

WINDROSE TITANIUM

XTREME ACTION **NFC**
NANO FIBER CARBON

A trolling rods series, dedicated to the hi-tech trolling world, following the requirements of the new saltwater fishing techniques. The superb parabolic action with the ultra fine blank helps to boat the fish in every situation. Built entirely by Nano Carbon Fiber with a Magic Stick technology which ensures sensitivity and durability, the WINDROSE TITANIUM is extremely light and strong; the special SiC guide

assembly helps it to be a very innovative rod. A series of rods of the highest quality multi-purpose properties that make them suitable for a different fishing style as: the downrigger, live bait and guardian triggering. Aluminium reel seat and removable butt represents unrivalled value for money.

CARATTERISTICHE TECNICHE:

The aluminium gimbal butt, the offset slick butt and quality aluminium ALPS reel seat further enrich this rod, which is surely destined to offer great performances.

All rods are fitted with Sea Guide SiC double wrapped guides, perfectly suitable for braided line use.

WINDROSE PRO FIGHTER

XTREME ACTION

The Wind Rose Pro-Fighter series are made for those experts who demand a concentration of technology and expertise to their equipments. This series of perfect war instruments is presented to the angler in five versions to have the right rod for every situation. Built thanks to an innovative formula of composite material, the PRO FIGHTER Series combines progressive parabolic action, power and lightness. All five models are fitted with SiC guides, so they can be used with braided lines. The series is offered with special guide assembly designed by our experts to increase the already high reserve of power that distinguishes these rods. The aluminium gimbal cup enriches the product for great performance.

Two 6 feet PRO FIGHTER are dedicated to those who want a high performance stand-up. Perfect for fishing with the downrigger (sunk), the pro-fighter 6-foot turn out amazingly handy, and, at the same time, secure and powerful in dealing with the most challenging fights with big amberjack, snapper and grouper. Three 7 feet extremely light and sensitive are specially designed for lead guard fishing style. With their low weight and ergonomic grips, these rods can also be used for fishing with rod in the hand.

BIG GAME

XTREME ACTION

The Trabucco team of engineers designed this rod for heavy trolling. Blank is made from solid E-Glass, the best solution when you come to true fighting rods, with a fantastic parabolic action able to face with big pelagic predators. The range is wide, 3 models to cover all needs, and all models are equipped with roller guides. The Big game rods are suitable both for fast surface trolling and bluefin tuna drifting. Every roller is fixed to the blank with under wrapping to preserve it from breakage risk even during maximum

efforts. These rods feature aluminium reel seat, gimbal and slick butt handle.

Code	Length	C. Length	Sect.	Power	Guides

RUSHWAVE

RUSHWAVE STRIKER

XTRME ACTION **NFC**
NANO FIBER CARBON

A 2,10 meters rod dedicated to the trolling angler that likes to have onboard a high specification rod with medium progressive action and with an excellent power reserve. Designed by our experts for down rigger trolling with livebait, this rod is perfect for trolling with mullet, cuttlefish, squid or horse mackerel. It is equipped with an aluminium gimbal resistant to corrosion for durability and better fighting comfort. Despite the slim blank, the Rushwave is able to safely manage big fish like amberjack, grey snapper and

groupers, thanks to the Nano Fiber Carbon construction and double leg low profile SiC guides.

Code	Length	C. Length	Sections	Power	Guides
167-44-210	2.10	115	2	12-20lb	SiC x 9

RUSHWAVE POWER STICK

XTRME ACTION

CARATTERISTICHE TECNICHE:

Usually light weight and power are specifications which can't live together in the same rod. But the new Rush Wave Power Stick, built from hollow E-Glass, succeeds to wonderfully combine them. The lighter models are just perfect for live bait trolling, using small diameter braided lines. This combination will allow to fish for snappers on rocky habitats. The 50 lbs version features a starting and top roller, to minimize line stress during strong fights with big fish. SiC guides are the correct complement and are suitable for braided lines. Every guide or roller is also under wrapped to protect the blank when it's extremely bent. Aluminium gimbal butt.

Code	Length	C. Length	Sections	Power	Guides
167-46-012	1.80	145	1+1	12lb	SiC x 7
167-46-020	1.80	145	1+1	20lb	SiC x 7

167-46-050	1.80	145	1+1	50lb	SiC+TRG x 7

ARUBA TROLLING

Owning a Travel trolling rod which has a total length of 215 cm with a one section rod action has always been the dream of every fisherman. Finally, thanks to careful design of the Trabucco's engineers, everything is now possible. With NFC technology (Nano Carbon Fiber), it has been possible to obtain a 5 sections rod with spigot joints which has a parabolic and progressive action subject of such power that rivals the more famous one-piece currently available in the market. Offering 20-30 lbs test curve, is extremely versatile for a trolling technique, ranging from lead guard, down rigger and live bait surface trolling. Comfort and technology for a rod that can not miss in any traveller's luggage. Supplied with a stiff cordura tube for safe transportation.

Code	Length	C. Length	Sections	Power	Guides
167-31-100	2.15	52	6	20-30lb	Sic x 10

SKIPJACK

Skipjack has been designed to satisfy the highly-demanding anglers who look for a stand-up rod with the sensitivity of a standard long trolling model. With the size slightly longer than normal stand-ups and their special blank construction, these rods perfectly combine the best of both worlds. Sensitive tip, length around 170 cm and powerful back bone are the winning details of this multi-purpose rod series. The 6-12, 12-20 and 20-30 lbs rods, structured with hollow blank and carrying SIC guides, are suggested for live bait surface trolling to catch bluefish and snappers.

MERIDIAN FIGHTER STAND UP

The Trabucco Meridian series is made of composite super durable and reliable E-Glass, finished according to the method of superimposed layers to get an action equivalent to that of a much higher priced rod. It is therefore a very funny rods which leaves space to the fight with the fish, while maintaining an exceptional reserve of power in the lower part of the blank. The series includes 6 actions to cover at their best different fishing conditions, from mackerel to bonito, from dolphin fish to his majesty the bluefin tuna.

The first two rods of the series, 12-16lb and 16-20lb, have been fitted with HD salt water resistant S-SIC guides. The next two actions 20-30 and 30-50 lbs fit a TRG HD roller on top for better management of large diameter's nylon and also features a reinforced safety reel seat. Finally the 50-80 lbs, designed for bluefin tuna fishing, carries two TRG HD rollers (the first and the last) to cover the points of greatest friction, and a reinforced safety reel seat. The price will surprise you.

XTREME ACTION **NFC**
NANO FIBER CARBON

XTREME ACTION

Saverio Rosa

The 30-50 lbs rod has a solid blank and full rollers to face long and tough fighting with giant tuna.

Code	Length	C. Length	Sections	Power	Guides

MERIDIAN GT

3+1
SS SHIELDED
BALL BEARING

- Graphite body is salt water resistant
- Side plates are reinforced by a stainless steel ring, to strengthen the whole chassis.
- The smooth drag has a Max Drag of 20 lbs and can be set up very carefully.

Specially designed for trolling in the Mediterranean sea, which has a higher salinity ratio compared to the oceans, this multiplier is fully protected from saltwater corrosion and fits stainless steel ball bearings with double side shield. Offering a powerful star drag system plus fighting handle knob, it has no levelwind and it's compatible with braided lines.

Saverio Rosa

NEW TSUNAMI TROLLING

XTREME ACTION

Stand-up series of rods with fast action. The family is made of 2 models of 6'6 and 2 of 7', very good for trolling with live bait close to the bottom. The ergonomic handle allows to apply all the cranking power to the rod and reel complex, exploiting all the force of the angler. The reels seat and the gimbal are made from extra stiff graphite. The reliable and light weight blank is just perfect for Mediterranean Sea trolling.

Thanks to the special frame shape, guides and top guide are amazingly strong. Double wrappings.

Strong reel seat made from graphite and steel, fitted upside down for extreme strength.

Code	Length	C. Length	Sections	Power	Guides
167-38-130	6'6" (1.98)	165	1+1	12/30	S-SiC x 8
167-38-140	6'6" (1.98)	165	1+1	15/40	S-SiC x 8
167-38-230	7' (2.10)	175	1+1	12/30	S-SiC x 8
167-38-240	7' (2.10)	175	1+1	15/40	S-SiC x 8

NEW TRIDENT TROLLING

XTREME ACTION

Gimbal butt with tailor made rubber cap.

Small family of two 1+1 rods with an extremely amusing action, thank to a blank that allows a sporting and sensitive fight with the fish. The tip of this rod, made from solid fiberglass, matches perfectly with the rest of the blank, and this is the secret of the nice combination between sensitivity and strength of the whole rod. The Trident rod is the one that everybody would like to have to practice inshore trolling for bonito and other predators. Reel seat and gimbal made from hard graphite. Heavy duty stainless steel SiC guides can be used with braided lines, and are fixed by double wrapping.

Code	Length	C. Length	Sections	Power	Guides
167-34-112	6' (1.83)	150	1+1	6/12	S-SiC x 8
167-34-120	6' (1.83)	150	1+1	12/20	S-SiC x 8
167-34-130	6' (1.83)	150	1+1	20/30	S-SiC x 8

NEPTUNE

NEPTUNE TROLLING

XTRME ACTION

New series dedicated to small and medium coastal trolling. This rod has a very amusing parabolic action, able to satisfy those anglers who like to have more contact with the prey and then derive more satisfaction.

On the other hand such an action allows to face fights with greater security and because of the perfect curve of the blank it is possible to fight fish even larger than the power of the blank would let you imagine. Despite the affordable price, the Neptune Trolling maintain high quality standards, such as the aluminium gimbal and braided-proof guides with under wrappings. Such details are unmatched in rods with similar price range!

Code	Length	C. Length	Sections	Power	Guides
167-33-112	1.80	180	1	6/12lb	S-SiC x 7
167-33-120	1.80	180	1	12/20lb	S-SiC x 7
167-33-130	1.80	180	1	20/30lb	S-SiC x 7

NEPTUNE MARINER

XTRME ACTION E-GLASS BLANK

Series of hybrid rods, suitable both for heavy bottom fishing and trolling, and able to face epic fights with really big fish. To highlight this double use, Trabucco printed on blank both trolling power and casting weight. The 180 cm blank is built in one piece and each guide has been wrapped and under wrapped

for increased safety. Neptune Marine rods feature DPS reel seat and braided-proof guides.

Code	Length	C. Length	Sections	Power	Guides
167-36-020	1.80	180	1	12/20lb	S-SiC x 6
167-36-030	1.80	180	1	20/30lb	S-SiC x 6

NEPTUNE SR

- All the gears are salt water treated and perform a 3.8:1 gear ratio, the correct compromise between speed and power.
- Both sizes feature level wind for an easy use and perfect line lay.
- Graphite body is light weight and corrosion resistant.

Very simple and easy to use, reliable and durable. In a few words the complete description of these good multipliers by Trabucco. The gear ratio, which is relatively low, enables the reel to develop high retrieving power, while the levelwind assists the newcomer and the occasional user. Perfect to match the Neptune trolling rods, these reels are particularly elegant and offer a total protection against saltwater.

HOBBY

When fishing is pure pleasure, what counts is to get fun without investing a fortune. So one of these reliable rods is more than enough: just

add a Trabucco reel, some good advice from the retailer and... go fishing!

NEW ACCORD BOLO

A bolognese rod to be stored in the car's booth, ready to face any event, including the injuries the children will reserve it. The Accord is a simple and reliable rod, which just needs one

of those pre-spoiled Auris or Regent Trabucco reel to make everybody happy.

Code	Length	C. Length	Sections	Guides
163-74-300	3.00	115	3	S-SiC
163-74-400	4.00	115	4	S-SiC
163-74-500	5.00	115	5	S-SiC

Code	Length	C. Length	Sections	Guides

163-73-500	5.00	115	5	-
163-73-600	6.00	115	6	-

EXPANDER BOLO

Telescopic rods with small closed length, made in Powerfibre. Strong and reliable, these cheap tools are ideal for to get started in the fascinating world of fishing in fresh and salt waters.

Code	Length	C. Length	Sections	Guides
163-72-300	3.00	115	3	S-SiC
163-72-400	4.00	115	4	S-SiC
163-72-500	5.00	115	5	S-SiC
163-72-600	6.00	115	6	S-SiC

DEMON CARP TELE

Three different sizes for this telescopic rod series. Extremely strong thanks to the Powerfibre construction, they can be used with big sized elastic. These rods are made for all the people who love margin fishing in carp fisheries, available in size 1.80, 2.40 and 3.00m.

Codice	Lunghezza	Ingombro	Sezioni
163-31-180	1.80	67	3
163-31-240	2.40	67	4
163-31-300	3.00	67	5

DEMON CARP MARGIN POLE

Series of short margin pole designed for heavily stocked carp fisheries. The blank is extremely strong and totally reliable thanks to the full Power Glass construction, this allows big sized elastics to be used to fight even the toughest fish.

Code	Length	C. Length	Sections
163-33-300	3.00	120	3
163-33-400	4.00	120	4

DEMON FEEDER

HRC
HIGH RESISTANCE COMPOSITE

The Demon Series has been designed for feeder fishing in lake, canal or river. The super resistant blank is made of HRC, a light weight and reliable composite material. Every model is equipped with two tips, both with the same action but having different power. The rods features S-SiC guides, really useful to disperse heat during prolonged fights.

Code	Model	Length	C. Length	Sct	Action	C.W.	Guides
163-25-330	Carp	3.30	116	3+2	MH	90	S-SiC

163-27-390	River	3.90	136	3+2	HH	150	S-SiC

NEW POWER TELE

A comprehensive range of telescopic rods destined to bottom fishing with leads ranging from 120 to 200 grams weight, both in fresh and saltwater. Made from Powerfibre to grant strength and durability, they fit metal frame guides and screw reel seat with steel hoods. Yellow, green and orange colour help to identify their casting weight. The closed length is quite short to ease the transport.

Code	Model	Length	C. Length	C.W.	Sect.	Guides
165-70-120	Green Power	3.60	110	120	4	S-SiC
165-70-125	Green Power	3.90	110	120	4	S-SiC
165-70-160	Yellow Power	3.60	110	150	4	S-SiC
165-70-165	Yellow Power	3.90	110	150	4	S-SiC
165-70-200	Orange Power	3.60	110	200	4	S-SiC
165-70-205	Orange Power	3.9	110	200	4	S-SiC

REVENGE WRC

Series of telescopic rods extremely durable and reliable, made of Powerfibre, powerful but lightweight material. They are equipped with S-SiC guides and sliding guides, plus shock absorber reel seat.

Code	Model	Length	C. Length	Sections	Guides
165-40-300	Seabass 120	3.00	107	4	S-SiC
165-40-350	Seabass 120	3.50	107	4	S-SiC

HRC
HIGH RESISTANCE COMPOSITE

TRABUCCO REELS: TECHNOLOGY AND DESIGN

The new Trabucco reel's collection include some real jewels from mechanical point of view, with metal bodies highlighting the hi range models on performance side, plus some interesting innovations which are destined to draw the attention. As always, we have spent our best energies to care about design, because we believe that fishing tackle shouldn't just have an utility, but should also be nice. After all, we are Italians, and would like the world to notice it!

The stiffness of reel's structure is very important to allow a smooth rotation of inner gear, because all mechanisms are fitting to the body in many points. A really stiff body offers safe, stable and firm anchorage to internal parts, while a normal one, subject to deformations under load, actually limits their freedom and creates the well known sticky effect which - for too long time - has been regarded as synonymous of quality. The precision and high quality of gears are useless if the body is subject to flex and torque. The same applies to ball bearings: an high number doesn't improve the rotation power if their seat is prone to deformation. That's why more and more Trabucco quality reels are built around a metal body, being it the ultralight magnesium alloy or the versatile and convenient aluminium. The difference is immediately felt during a strong fish fight, as the line is easily retrieved, without forcing with the rod. A totally new mix of emotions, able to change the fishing pleasure and confirm Trabucco brand as one of the most attractive in the world.

THE BODY

Body and rotor fully made of premium quality metal alloys, built to withstand the most challenging situations and to last in time. This technology belongs to top range reels only.

With a specific gravity 20% lower than aluminium and an even higher stiffness, the Magnesium alloy is definitely the most advanced material to produce reel's bodies. Great fashion, but also great performances.

Innovative technology that allowed us to produce fully Carbon Body and rotor, the top you can get in terms of lightness and still able to grant a great resistance to mechanical stress. As per the Metal Body this technology has been used for top range reel only.

Hybrid Body means a body made of aluminium and graphite. The aluminium has the task to withstand the mechanical stress, while the graphite helps to keep the weight as light as possible. Hybrid Body reels can grant you to fish safely and with light equipment.

Innovative material added of uni directional Carbon micro fibres. This technology is the ideal combination between light weight and stiffness. It is naturally corrosion free and we use this material for high performance reels only.

It is the more common material used in the fishing tackle industry for reel building: light weight and reliable. It is anyway a very important step to add an appropriate structural development to get outstanding performance from it. Only a few companies can do it properly.

THE GEARS

GEAR RATIO. The Gear Ratio defines the number of rotor's turns for each complete revolution of the handle, therefore the number of turns of mainline that are wrapped in a spool at each turn of the handle. Higher is the first number, faster the reel will turn and consequently greater is the amount of lines recovered for each complete revolution of the handle. We recommend fast reels for long-casting fishing techniques where you need to cast and retrieve more often, while slower models come into play when you need high recovery power.

LONG LIFE GEAR

We have to talk about raw materials and in particular metals, because these are at the heart of all the gears. Durability and performance of derive mainly from the quality of the materials involved in the construction of pinions, gears and bearings... for these mechanical parts Trabucco uses only the best quality materials such as bronze and steel... we don't use other materials because only these can provide the reliability standard and resistance that our customers deserve.

BALL BEARING SYSTEM. A well designed mechanic uses only high quality ball bearings to improve the gears motion. The BBS indication on each product, provides the number of the bearings used on the reel. The first figure is the quantity of the ball bearings used, whilst the second is the number of the roller bearing. The roller bearing is one-way only, and it's positioned on the central pinion to force the rotation and prevents the reels from the even the smallest back turn, also known as the "One way clutch". The ball bearings reduce friction of moving parts and the more there are, the better the mechanics work.

PG (PRECISION GEAR)

Are the basis of the mechanical function of our reels. The fluidity and smoothness of rotation that Precision Gears provide is responsible for the speed and above all of the power of the reel. The rotors and the gears of our reels featuring the PG technology are designed using the latest 3D software, thus to guarantee the perfect assembly of every single part to improve efficiency and reduce friction.

After so many years from the date we started to sell our first models, we are still engaged into design and development like it was the very first day. The many innovations that you will find in the new models are the result of assiduous research done on the main characteristics that must have a perfect reel. Our aim is to offer you products that stand out from the crowd for their reliability and performance.

LINE MANAGEMENT SYSTEM

WORM SHAFT GEAR WSG

WORM SHAFT GEAR. The worm gear is a double groove engraved into a pinion. In this way the traction is carried with uniformity, reducing friction and giving a smoother retrieve. The Worm Shaft Gear is also reducing line tension, responsible of the oscillations of the spool and so the line winding is perfect.

SOS SLOW OSCILLATION SYSTEM

SLOW OSCILLATION SYSTEM. It is the most evolved line laying system. During the retrieve action the SOS slow down the spool oscillation movement in regard to rotor speed, allowing a more accurate and compact line lay. Looking carefully at the spool you will notice a different speed going from bottom to top and vice versa. This technology, applied on top range reels, always grant a perfect line lay and avoid line wigs when castings.

CW CROSS WINDER

CROSS WINDER. To those fishermen who do not have a complete experience of the art of fishing, which use either mono or braided lines, we recommend to buy a reel with the "cross winder" line spooling system, instead of a reel with the most performing WSG. The spooling is very tidy with Cross Winder, provides good casting distances and reduces the possibility of tangles. The "X" spooling in fact compact lines and allows a best spooling even with lower tensioned mainline.

AS ROLLER ANTITWIST SYSTEM

ANTITWIST SYSTEM. Traditional line rollers force tension on to the line at every turn of the handle and this can cause line tangles. All our reels nowadays are fitted with the new Anti twist line roller together with WSG and SOS systems to avoid this problem and also extending the life of even the lightest of the monofilaments.

POWERBAIL

TUBULAR BAIL. In several models, we introduced a aluminum tubular bail that is larger than traditional ones. Although larger, these new bails are lighter and more durable than traditional. Due to their special shape and the innovative conical joint, they drive automatically monofilament inside the line roller even when the nylon is not perfectly under tension.

ROTOR STOP SYSTEM

Even in the highest quality reels sometimes during the cast the bail arm can accidentally close. With this new locking system, fitted onto the rotor, this risk has been almost completely eliminated. The angler is advised by an audible click that the bail arm is locked correctly.

VIBRATION DAMPER

AVS ANTI VIBRO SYSTEM

ANTI VIBRO SYSTEM. We asked our designers the challenge to minimize or even cancel the vibrations emitted by reels during the recovery phase. Thanks to the new 3D software, they have been able to design well balanced rotors (Super Balance System) but for top range reels we wanted something more. We focused on the stabilization of the gears and the subsequent cancellation of the games that swing the spool. The result is excellent, the pinion holds the spool firmly on its axis and this does not oscillate even when drag is in traction. We are particularly pleased with the results ... You just have to try.

SBS Super Balance System

SUPER BALANCE SYSTEM. This new technology is obtained just using the latest computers 3D softwares, which allows the designing and later the construction of perfectly balanced rotors without the addition of external weights. The resulting balance reduces any vibrations of the reel during the recovery. All our reels are designed using these softwares and deeply tested before the production, and you'll find at least the SBS system across the whole range.

ANTIREVERSE SYSTEM

ONE WAY CLUTCH

ONE WAY CLUTCH (INFINITE ANTI-REVERSE). Anti-reverse system in use in most of our reels. Thanks to a lever usually located above or below reel body you can plug or unplug the operation of the one-way roller bearing that holds the main shaft and provides an excellent infinite anti-reverse performance, with our One-Way Clutch system you'll find absolutely zero free-play on the handle.

MULTI STOP SYSTEM

MULTI STOP SYSTEM (ANTI-REVERSE). On reel that's not possible to fit the infinite antireverse and therefore is not used the one-way roller bearing, we have designed an effective alternative system to block the rotor motion. The Multi Stop System slows down the rotor sequentially in several key points when rotates in the opposite direction to that of the line winding.

SEA FISHING TECHNOLOGIES

SWR SALT WATER RESISTANT

SWR (SALT WATER RESISTANCE). A construction technology applied to the reels dedicated to saltwater fishing and who affects all the metal parts (making them unassailable by salt, UV and temperature), all the seals (to prevent the sea water comes into contact with the mechanics, with special O-ring were sealed all possible splits), and even the mechanical parts (suitably enhanced depending on the type of prey that you want to capture and type of technique fishing must be adopted).

DRAG SYSTEM

MICROMETRIC DRAG

The drag is a device whose operation depends from the friction generated by mechanical rubbing between the brake washers that make up the brake system. The drag power is determined by the number of the washers, their diameter and the material they are made. Its power is directly proportional to the number of washers and their diameter. The most used washers on our range are made PTFE coated (felt discs in PTFE based oil bath), while the more expensive reels feature carbon cloth washers, that provides even higher performance. The drag quality is primarily determined by its smoothness, drag must operate smoothly even under high pressure. Another point is the micro adjusting, which means that to each click of the knob must be corresponding into a micro increase or decrease of the power. The Trabucco reels stand out because of the high drag power and the excellent progression of the drag.

FAST PLAY DRAG

Brand new drag system featuring a dual-presetting mode that incorporates in one single device all the free runner drag facilities. It acts directly into the spool, allowing to have a more direct, progressive and fine tuning drag system. The free spool setting is regulated by the inner knob, while to switch to the combat drag is enough to half turning the main drag knob.

FREE RUNNER

When this device entered carp fishing with such force it revolutionised the sport to such an extent it became essential. It is now also much favoured in other freshwater and saltwater applications. The free runner lever situated on the back of the body allows the angler to switch from the pre-tensioned drag for fish playing to the "free" position, and back again easily. On our reels all the Free Runner reels features oversized washers to always guarantee a good control and smoothness.

MAX DRAG (DRAG BRAKING POWER)

Only in the Top Range reels, the most expensive and mainly dedicated to the sea fishing, which shows the MAX DRAG power. Carefully measured and expressed in kgs, the real drag power is calculated during the traction with disks fully engaged. Warning, drag must operate during the calculation of the Max Drag, if the disks are blocked the Max Drag increases, but the drag is not working properly and the measurement is invalid. For Trabucco Max Drag means real drag braking power.

LINE'S MANAGEMENT

V-SPOOL DESIGN. The V-Spool Design spools reduce the friction between the line and the lip during the cast, reducing the number and the diameter of the coming out coils and thus reducing dramatically the risks of tangles when using braided lines. The lower friction make your casts longer and more accurate too, improving your fishing experience and extending the life of your spooled line.

CNC MACHINE CUT ALUMINIUM SPOOL. Top range reels feature spools tooled "bleed" from one piece of solid aluminum. The CNC machine lathe ensures a complete perfection of shape, the maximum smoothness of the line during casting, exceptional tensile strength, pressure and any other force exerted. CNC aluminum spool are extremely lightweight but yet offer the highest structural resistance to impact and abrasion.

SUPERLIGHT SPOOLS. On medium range reels, just to contain the final cost, we preferred to fit graphite spool instead of the metal. The graphite is a rugged and lightweight material, it is often used for the construction of the reels bodies and thanks for his technical / structural well-suited features is perfect for the construction of the spools. The reels have been equipped with a graphite spool are marked on the box with Superlight logo.

SPARE SPOOLS. Trabucco gives you the chance to duplicate and even triplicate the spools of the reel you have purchased. Many of our models have one or more spare spools in order to give the buyer the opportunity to load lines of different diameters, or braided or nylon. By doing so you can fish with a single reel in many ways or with different techniques. The number shown in the logo indicates the number of spare spools the reel comes with.

SWT (SALT WATER TREATED). The SWT (Salt Water Treated) is a recent manufacturing process, less efficient if compared to the SWR but still allowing using the reel in salt water for a long time without any corrosion risk. Under strong loads and in tough conditions, typical of salt water game, the SWT does not add any weight to the whole reel. This new manufacturing process is using special hi tech varnishes and it used on all the parts sensible to salt, making them even harder. In a nut shell this procedure will not only make your reel salt water resistant but just more resistant to all solicitations.

INVICTUS

ENJOY THE POWER OF TECHNOLOGY

Advanced metal alloys and high modulus carbon: only handle's knob is made from traditional material! But high grade materials can do little if there isn't the right technology to draw the best from them, and in this case plenty of it has been employed. Just a couple of handle turns, with a fighting beast at the other end of your line, will let you feel the extreme power which is hidden inside your Invictus.

The spool's lip is remarkably thin and "V" shaped to minimize line friction during the cast and to increase distances and accuracy (V Spool Design).

The line roller is designed to avoid line torque at each handle's turn, so that line will flow smoothly and last longer (Anti Twist System).

The ultra-thin grooves we can see through a lens prove that the spool has actually been machined from a solid piece of aluminium for higher strength.

NEW INVICTUS

The Invictus reel is just the last in time of this state of the art projects and is featuring many technological innovations. The hybrid structure is made of aluminium and graphite to maximize the benefits from both materials: the body is made of aluminium, so really really stiff. For this reason all the gears are working in the perfect position and will do it for years. The rotor, made of carbon, is suffering less solicitations and so it is made of lighter material. The rotor is equipped with a thick hollow bail arm, super strong and impossible to deform. The reel comes with two aluminium spools, both machined from a single aluminium piece. One of the two has been designed for monofilament and it is high capacity, while the other, designed for braided lines, is shallower and features a rubber band to prevent the braided

sliding. The lip of both spools is built with an angle, giving birth to the V-Spool Design, a solution that allows the line to come out easier and increasing casting distance. Drags are made of stainless steel and carbon discs and are sealed, to prevent dirty and salt to enter between the discs. The handle too is machined from a single piece of aluminium. 9+1 stainless steel double shielded bearings make this reel really smooth. The Invictus has a ratio of 5.2:1 and it is suitable for bolo and waggler fishing in sizes 2500 and 4000, while it is perfect for spinning and feeder fishing in sizes 4000 and 5000. The gears have been designed to bear thousands and thousands of casts and retrieves.

FEATURES

- Super stiff aluminium body
- Aluminium side cover
- Ultralight carbon rotor
- Aluminium hollow bail
- Anti-twist Titanium line roller
- Main deep aluminium spool (on twin BB)
- Spare match aluminium spool, featuring a rubber band to avoid braided lines slipping under extreme tension
- Sealed drag to avoid water, salt and dust getting inside

- Stainless steel main shaft
- Infinite anti-reverse
- Stainless steel double shielded ball bearings
- CNC handle, machine cut from a single piece of solid aluminium

The high capacity spool has parallel grooves in the throat, which are intended to give a correct start to line's spooling. That's why the spool's label must always be removed!

The spare spool has a reduced capacity to ease thin line's loading. The central rubber band is there to avoid braided line's slipping under extreme pulls.

All ball bearings are sealed on both sides to keep grease inside and avoid water, sand and salt getting in and possibly affecting their rotation.

On each side of the body there are two steel plates, which are destined to raise stiffness along handle axis. The positive effect is easily felt during a fish fight.

The reel's structure is an hi-tech "full metal", as both body and side cover are made from aluminium to offer the best possible stiffness and durability.

On right, the Invictus rotor is made from high modulus carbon, the stiffest and lightest among the materials which can bear enormous load and stress. Its essential design is not only a fantastic fashion detail, but plays an important role on balance and rotation smoothness points of view. As a matter of fact, its lightness pushes back the reel's barycentre, while reducing the energy needed to cause the rotation. The computer drew it asymmetric in order to counterbalance the bail's weight, thus optimizing the rotation's smoothness of the whole reel.

MANIAC

NEW MANIAC FD

All anglers intensely love their hobby and often their friends tell them they're like maniacs. Very likely they are right, and that's why we designed the Maniac reel, that is a reel that won't miss to make an impression for the incredible combination of sturdiness and smoothness. The whole reel is made from strong aluminium to make it a master piece of strength. The body, the side cover and the rotor, everything is made from aluminium. And so are the tubular bail arm, the spool and the handle. Both the spool and the handle are CNC machine cut from a single piece of pure aluminium. The drag system is not weaker and it is really smooth, featuring alternate stainless steel and carbon washers. The spool features a bent lip, the so called V-Spool Design, to help the line to come out easier. The central part of the spool is covered with a rubber band to prevent the braided lines sliding under strong traction. The 9+1 bearings are made from stainless steel and double shielded. Available in 3 sizes, the Maniac is a reel that will make a difference, especially when you need a strong cranking power. We think Maniac is the best choice for anglers fishing with feeder in fast flowing rivers, with bombardas for lake trout or beach legering.

FEATURES

- Hi-Tech metal body
- CNC carved aluminium spool (shallow match type)
- Hollow Power Bail with Anti Twist line roller
- Carbon and steel disks drag
- Sealed drag

- Sealed stainless steel ball bearings
- Infinite Anti-reverse

POWERBAIL

034-11-501	Alum. Spare Spool 5000			Ø 0.260 mm - 130 m			

The Maniac drag box include a set of high technology disks, with same style of big game multipliers. The alternation of steel and carbon elements provides power, smoothness and heat dispersion for safe and comfortable control of the fish run.

The handle operates directly on to the drive gear. This solution is the best one for integral power transmission, because energy generated during retrieve is not dispersed through plays and vibrations. For transport, the handle can be fold down to reduce the volume of the reel.

Maniac is prepared for sea fishing, and for such reason the drag box is sealed by a soft rubber lining which avoids water, sand and salt getting inside. Of course, it's highly recommended to wash the reel under tap water after each fishing session.

XENOS cx

A really nice reel which combines the excellent gearing quality to a sporting, young design. The ultralight body helps reducing weight without missing stiffness, thanks to the advanced engineering of the structure. The rotation's smoothness is coming from 9 stainless steel high precision double shielded ball bearings and the stainless steel one way clutch. The spool is itself an hybrid, aluminium/carbon in this case, and it is really light. The spooling is just perfect, thanks to the S-Curve System that spread homogeneously the line with a slow oscillation. The final hybrid part is the custom handle: stainless steel/carbon with EVA knob. The brilliant Xenos is not an hybrid though: it is 100% quality only.

FEATURES

- Ultra Light CX Carbon Body
- Hybrid aluminium/carbon main spool
- Graphite Extra Sp.
- Double Shielded SS Long Life Ball Bearings
- Instant anti-reverse system
- Titanium Line Roller

- Carbon Cover Drag Knob
- Hybrid Carbon SS Handle
- X-Power Drive
- Eva ergonomic handle knob

NEW AIRMAG

If light weight is nice, then for sure the Airmag is beautiful! Featuring a super light weight magnesium body and a carbon rotor, the Airmag is the candidate to become the perfect reel to match with high end bolo rods and top class match rods. The tubular aluminium bail arm is super light as well. The main spool is made from cold forged aluminium and equipped with a super smooth drag, featuring stainless steel and carbon washers. The newly designed handle is very light and extremely stiff. To stay on light weight concept, even the spare spool is super light, being made from graphite. We also need to highlight the high speed ratio 6.0:1. Speed, light weight and smoothness, these three peculiarities make the Airmag the best reel for competition. The 7+1 bearing are made from stainless steel and double shielded, so you can use your Airmag during your next vacation on the sea!

FEATURES

- Ultralight yet stiff Magnesium alloy body
- Superlight carbon rotor
- Aluminium Longcast main spool
- Graphite spare spool
- Aluminium hollow bail

- Sealed drag with carbon disks
- Sealed stainless steel ball bearings
- Infinite anti-reverse
- Aluminium handle

XPLORE

XPLORE

The design of a new reel model requires long times and when in the end we come to the final product we always feel satisfied. When we finished the Xplore project the satisfaction was really huge because we thought to have achieved a result that far exceeded our initial expectations. The Xplore is just the reel we all fell in love with and we are sure that everybody will test it, then will show the same feeling. The extra stiff graphite body includes a heart made of powerful and reliable stainless steel gears supported by 9+1 premium quality bearings, also them made of stainless steel and double shielded for protection for dirty and water. The aluminium spool features a V shape lip for easier line casting and includes a sealed drag with oversized stainless steel and carbon washers. This solution is perfect for a smoother drag with no initial momentum. The positive screw aluminium handle is adding precision and it is equipped with a non-slip high density EVA knob. Available in sizes from 3000 to 5000. We are sure this model will have a great success cause of its versatility and its undisputed quality.

FEATURES

- Stainless Steel Main Shaft & Main Gear Shaft
- Stainless Steel One Way Clutch
- Double Shielded SS Long Life Ball Bearings
- Aluminium spool with holes
- Twin Ball Bearing Spool
- Micro-Adjusting Front Drag With Stainless Steel And Carbon Textile Drag Washers
- Fully sealed Drag
- Positive-Screw-Lock CNC Handle & Fighting Knob
- Titanium Line Roller
- Aluminium handle directly connected to drive gear

XPLORE MATCH NEW

In 2014 Trabucco presented the Xplore reel and if you are expert and passionate anglers and now you are not using one, that means you are part of a minority or that you missed a super performing reel.

In 2015 Trabucco presents the Match version of the Xplore, designed for competition anglers. The Xplore Match is a reel designed for the competition and features super smooth gears and low capacity spool, designed to be filled with the right quantity of monofilament. It fits bolo, match, trout and light feeder rods. The 2000 size is perfect for light bolo and light match rods and has a capacity of 100 m of 0.20 mm line. The 4000 size is fitting most of the match rods and has a capacity of 120 m of 0.26. Finally the 5000 size is perfect for feeder fishing, with a capacity of 130 m of 0.26 mm. The latter model spool is wider and so it is better for long distance casting. The super smooth gears are supported by 9+1 stainless steel double shielded bearings.

FEATURES

- Extra tough body and rotor
- V-shaped aluminium spool
- Aluminium hollow bail
- Sealed drag
- Double shielded stainless steel ball bearings
- Infinite anti-reverse
- CNC machine cut handle made from a solid piece of aluminium

LANCER HS

Latest generation spinning reel with super compact carbon body, very light but powerful and strong. The CNC machined aluminium long cast spool has a very large diameter to allow longer and more accurate casting. The main shaft is bigger than usual to support the increased turning mass while the titanium coated line roller dissipates more efficiently both the heat and the line twists. The reel is super smooth thanks to the premium quality of the 9 double shielded stainless steel ball bearing and the one way clutch. The drag is micro adjusting at the most precision level thank to the huge diameter drag washers. It is available in 4500 and 5500 sizes.

FEATURES

- Advanced design oversized aluminium spool

- Ultra Light CX Carbon Body
- Double Shielded Stainless Steel Long Life Ball Bearings
- Titanium Line Roller
- Carbon Cover Drag Knob
- Aluminium handle
- Eva ergonomic handle knob

VERTEX

Family of front drag reels fully built in aluminium, with extremely tough and reliable body. This reel can actually stand the toughest fights. Main spool and handle arm are also made from aluminium. This compact reel is really handy and suited for predator fishing, especially with live bait. Its strength points are, besides the full metal body, the power drag and the low gear ratio. Gears are extremely smooth, thanks to seven

stainless steel ball bearings and the one way clutch. An extremely rugged reel with top precision gear.

FEATURES

AIRBLADE

WHEN
LIGHTNESS IS
THE NORM

FEATURES

- Super Light Rotor - Using space-craft materials, the rotor is now lighter and tougher.
- Innovative One Touch Handle - EVA covered balanced handle knob made from ABS shock resistant material.
- No gaps between side covers and no screws on exterior parts.
- Ultra Slim spacecraft metal body, lighter but stronger than graphite. All gears are protected by a single super resistant shell.
- Easy maintenance. Lubricating has never been so easy. Access from back part of the reel.

AIRBLADE

Nowadays it is quite hard to show something really new. But we strongly believe the Airblade Pro will be able to amaze, surprise and make many anglers fall in love with it. It is a brand new concept that requested a wide variety of new technologies and knowledge to create it. And each single innovation has been carried to increase your fishing experience. The body is a mono piece of spacecraft metallic alloy 7075 hosting the whole gears ensemble. Sides are part of the main body and so there are no gaps between main body and side plates and consequently no screws on the body of the reel! Therefore, all this is a kind of one-piece ensemble that can be lubricated through a special lower port, the unique way to get in. And what about measurements? The critical point of every reel is the oscillation gear, that specific part that under different commercial names is responsible of the line lay. This is usually the thicker part of every reel on the market.

But the Airblade is only 12 mm thick in that position. Just Incredible! No other words to define that. The whole body is so thin and innovative, and all the gears, rotor, bail arms and everything else is made of the same special space grade metallic alloy, getting 2 results: to have a durable and super light weight reel (only 260 grams on size 4000). Beside this, a reel with so many (actually every) metallic parts can be cosmetized in thousands of ways, just anodizing those parts. The reel is very smooth, using 7 super high quality ball bearing and one way clutch.

The wide success of Air Blade concept has given the start to a revolutionary new model which offers all the advantages of "free runner" system, without the negative aspects due to weight and volume of the gears intended to manage it.

NEW AIRBLADE FS

At first sight, it's a brilliant front drag reel; lightweight, wide spool, ultraslim metal body, smooth rotation, precise bail trip, perfect drag function, one touch folding handle. But an accurate inspection tells you that the spool's skirt must play an unusual role, because it's free from spool's structure and can be manually rotated to engage the free runner mechanism. What does it mean? The free runner system is, practically, a bit loose second drag, which leaves the spool free to turn and give line to the fish, so that it can develop the first run without any risk for the hooklink. The light drag tension is important to avoid backlash, which would be inevitable in case of total spool's freedom. When the user decides to start line retrieve, he must simply push forward the handle by one quarter of turn: in this way, the free runner is automatically disengaged and main drag gets into play, of course at level previously set by the user. A click

sound informs that free runner system is off, and the fun starts! Big fish are of course the main target of this reel: carp, barbel, mullet, seabass and sea bream, which fall to the bait carried by float or feeder rig presented through definitely finer hooklinks, as the line now gets the protection from Trabucco free runner!

The spool's skirt is milled to provide enough grip to user's fingers. A slight clockwise rotation puts main drag off and makes the free running system start, while a click sound confirms that everything is ok.

FEATURES

- Ultraslim body made from spacecraft metal alloy
- No screws on exterior parts
- Superlight rotor made from spacecraft metal alloy
- Aluminium spool
- Titanium Line Roller
- Free Runner system
- Infinite anti-reverse
- Aluminium one touch folding handle

After a few centimetres of handle rotation, the free runner system is automatically disengaged, and main drag system gets into play, of course at level previously set by the user at the start of fishing session.

The free runner system fitted on new Air Blade FD is quite efficient, because it works right in the heart of the reel, exactly on the big roller anti-reverse bearing. No power dispersion means superior smoothness, specially in the vital moment of first fish run!

033-72-401	Alum. Spare Spool 4000					

SKORPION

Maurizio Fedeli

NEW SKORPION

Strong and accurate: these are two of the main specifications of a Skorpion. The body is made from aluminium and the rotor is made from light weight graphite. Due to this construction, the body is really stiff and all the inner gears will always work perfectly, even under heavy load. The spool is made from cold forged aluminium, while the handle is made from machine cut aluminium. The spooling is perfect due to the Worm Shaft Gear. The Skorpion comes with a second graphite spool having same capacity of the main one. The 7+1 bearings are stainless steel Long Life quality.

FEATURES

- Hybrid body made from aluminium and graphite
- Ultralight aluminium main spool
- Graphite spare spool
- Hollow bail with anti twist line roller
- Micro-adjustable drag with oversized washers
- Long Life stainless steel ball bearings

- Infinite anti-reverse
- Worm shaft system for a perfect line lay
- Power Fight aluminium handle with EVA knob

The infinite anti-reverse system works thanks to this oversized roller's bearing.

A lot of slim holes make the aluminium spool lighter and nice.

Thanks to its special design, the worm shaft is responsible of perfect line lay on reel's spool, with neat angles between each coils. As a consequence, the casting distance is improved, due to easier line flow. This important part is hidden in the Skorpion's body.

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.

034-12-400	4000	365	5.2:1 (82 cm)	Ø 20 mm - 285 m	1	7+1

NEW FIRESTAR

Firestar is yet another reel exploiting the same hybrid body technology, taking the advantage of both aluminium and graphite. The foot and the frame of this reel are aluminium made, while all the other parts are graphite made. The tubular bail arm is made of aluminium too. Both the main spool and the handle are made of machined cut aluminium. The drag is one of the strong points of this reel, featuring oversized washers able to disperse heat and to be regulated with great accuracy. A spare graphite spool comes inside the

box. The powerful gears work with remarkable smoothness cause of 5+1 Long Life stainless steel bearings.

FEATURES

- Hybrid body made from aluminium and graphite
- Ultralight aluminium main spool
- Graphite spare spool
- Hollow bail with anti twist line roller
- Micro-adjustable drag with oversized washers

- Long Life stainless steel ball bearings
- Infinite anti-reverse
- Power Fight aluminium handle with EVA knob

NEW NEOX

It is not easy to find a family of reels that can be able to fit such a large number of different fishing techniques as the Neox family does. Available in 4 sizes and equipped with top level technical features, this 2015 news from Trabucco will make a name of itself, doesn't matter which fishing technique involved. Hybrid body, that is aluminium made foot and frame, graphite side plates and rotor, to lower the overall weight without affecting the overall stiffness: this is the secret. The aluminium spool has been widely perforated to lower the weight too. A spare graphite spool is available inside the trading box. The aluminium handle is longer than usual, to get extra cranking power. The drag is very smooth and can be calibrated with great accuracy. The smoothness of the gears is supported by 9+1 Long Life stainless steel bearings placed in the higher friction points.

FEATURES

- Hybrid body made from aluminium and graphite
- Ultralight CNC aluminium main spool
- Graphite spare spool
- Hollow bail with anti twist line roller
- Micro-adjustable drag with oversized washers

- Long Life stainless steel ball bearings
- Infinite anti-reverse
- Power Fight aluminium handle

MAGNEX

MAGNEX

Magnex outstands for its innovative and modern design, but just fishing with it you'll understand the real performance of this reel. Entirely designed in Japan with the latest 3D software, it's packed full of the latest technology, all enclosed in a X-Tra Tough body extremely lightweight and strong in the same time to eliminate any vibration. The LLG gears are fitted on 5 S.S Long Life ball bearings, combined with 1 Roller Bearing running the one-way clutch. The V-Shaped rotor is assisted by the IRSS system to prevent accidental bail closure, whilst the the PowerBail helps the overall balance without increasing the weight. The aluminium spool features large holes to reduce again unnecessary weight, and the Advanced Power Drag is completely sealed, running on oversized drag washers and with the addition of a ball bearing to increase the smoothness. As a result the drag is extremely precise, progressive and powerful. A concentrate of cutting edge technology and performance, offered to an affordable price, ideal for both freshwater and saltwater fishing from the bolo, waggler or feeder fishing, to the spinning.

FEATURES

- X-tra tough graphite body
- Cnc Machine Cut Long Cast Superlight Aluminium Spool
- Rotary Flat Oscillation System
- V-Shaped Rotor
- Cold forged One Touch aluminium folding handle
- Front Drag System With Sealed Ptfе Coated Magnun Drag Washers

KEIRAN

Keiran series was born from a project that included European and Japanese designers to build an original shaped spinning reel with high end performance. It is evident the Keiran is not a cheap reel nor that is a reel for beginners. On the contrary, it is a super technological reel able to really satisfy the most demanding pleasure anglers as well as most qualified match anglers. The ultra compact body is the key to get a super robust and smooth gear. The free running sensation is enhanced by the precision high quality material gears that turn exactly like a Swiss clock. The aluminium spool has been made much more light applying a wise cutting that is not influencing the rotation nor affecting balance in a bad way. Between the excellent features, we want to highlight the extra light but extra tough carbon handle, refined with an EVA knob for extra firm cranking.

FEATURES

- Stainless Steel Main Shaft & Main Gear Shaft
- Hybrid Carbon & Aluminum Spool
- Graphite spare spool
- Double Shielded SS Long Life Ball Bearings
- Hybrid Carbon SS Handle
- Titanium Line Roller

POWERBAIL AS ROLLER ANTI TWIST SYSTEM US3 ULTRA SLIM BODY DESIGN ONE WAY CLUTCH GXV CROSS WINDER

SPARK

Interesting series of front drag reels, compact body, rugged and very smooth. Three sizes available 2000, 3000 and 6000 to match more popular fishing techniques. Main body is graphite, while the spool is made of super light, cold forged aluminium, as well as the handle. Reliable material for a reliable reel. Spark features 7 precision ball bearings and a one way clutch. Very good line lay, thanks to the cross winding system. The spooled line is never stressed, thanks to the anti twist titanium line roller. Oversized discs drag is just perfect, and allows an accurate set up.

FEATURES

- X-tra tough graphite body
- Aluminium main spool
- Graphite spare spool
- Double Shielded SS Long Life Ball Bearings
- Titanium Line Roller

NEW LEXAN

Entirely made of extra stiff graphite, the Lexan is a reel available in 3 sizes and that can be used in a variety of situations and fishing techniques. Spool and handle are made of machined cut aluminium. The smoothness is very good, thanks to the use of 5+1 Long Life stainless steel bearings. The Lexan is a superior performance reel that is offered at a very convenient price.

FEATURES

- Graphite body
- Ultralight CNC aluminium main spool
- Graphite spare spool
- Hollow bail with anti twist line roller
- Micro-adjustable drag with oversized washers
- Long Life stainless steel ball bearings
- Infinite anti-reverse
- Power Fight CNC aluminium handle

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.

NEW EXXON

If you are searching for a small sized body reel that is still able to face challenging fishing techniques, then the Exxon is for sure the best choice you can do. To get an optimal compromise between light weight and stiffness, we built the Exxon with hardened graphite. The super light main spool is made of cold forged aluminium, while the spare spool is graphite made. Spooling is one of the strong points of this reel, and you can use very thin lines without getting any problem. The machined cut aluminium handle, together with the 5+1 Long Life stainless steel bearings, complete the equipment of this reel that can be used for Bolognese fishing and for light and ultra light spinning.

FEATURES

- Super stiff hi-tech graphite body
- Ultralight aluminium main spool
- Graphite spare spool
- Hollow bail with anti twist line roller
- Micro-adjustable drag with oversized washers
- Double shielded stainless steel ball bearings
- Power Fight aluminium handle

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.

033-94-300	3000	295	5.1:1 (64 cm)	Ø 20 mm - 200 m	1	5+1
033-94-400	4000	315	5.1:1 (72 cm)	Ø 25 mm - 150 m	1	5+1

NEW WINDLEX

Aggressive look and high technology in the same reel, this is the Windlex, a reel offering a great value for the money. The super smooth gears are hosted inside a super stiff graphite body and supported by 5+1 Long Life stainless steel bearings. Such a configuration is pretty unusual for this price point. The high quality handle is aluminium machined cut and it is longer than usual, to add cranking power to the already powerful gears. The tubular bail arm is sturdy and stress resistant. A spare graphite spool is available inside the trade box.

FEATURES

- Super stiff hi-tech graphite body
- Longcast CNC aluminium main spool
- Graphite spare spool
- Hollow bail with anti twist line roller
- Micro-adjustable drag with oversized washers

- Long Life stainless steel ball bearings
- Infinite anti-reverse
- Power Fight aluminium handle with Soft Touch knob

NEW MITO XTC

The Mito is presented in 4 sizes to satisfy the needs of almost any angler of fresh and salt water. Very good refined and evocative in its striking white and black dress, this model has body and rotor graphite made and a cold forged aluminium spool. The handle is machined cut aluminium. The smoothness is brilliant, thanks to 5+1 Long Life stainless steel high quality bearings. The tubular aluminium bail arm is a quality one, super tough and crush-proof. The main spool, together with the spare graphite one, feature wide super smooth, heat dispersing, drag washers.

FEATURES

KRONOS XT

From ultralight spinning to bolognese, from waggler to feeder fishing, this nice reel series gets everybody happy with its fantastic quality/price ratio, which gave it a strong popularity and wide diffusion in Italy as well as abroad. In Italy the cosmetic and design are always first elements of evaluation, while in the central Europe the strength and performances are taken into serious consideration, and also on such front the Kronos XT offers the best that money can buy. The Kronos XT features 5 ball bearing + one way clutch. The aluminium spool has a tapered profile, allowing longer casts. The aluminium handle grants great cranking power and extra reliability. The icing on the cake is a superior drag system, really smooth, usually found only on much much more expensive reels.

FEATURES

- Graphite body
- Ultralight aluminium main spool
- Graphite spare spool
- Hollow bail with anti twist line roller
- Micro-adjustable drag with oversized washers
- Long Life stainless steel ball bearings
- Infinite anti-reverse
- Aluminium handle

NEW QOSMIO cx

The Qosmio project is really interesting and it is made of two sizes, a 3000 and a 4000 graphite compact bodies equipped with a cold forged aluminium spool. The wide diameter

of the spool will help to increase the casting distance. Qosmio are made in a very simple but functional way, exploiting powerful smooth gears supported by 3+1 Long Life stainless steel bearings. Despite the good price, the Qosmio is really smooth and offers even a second graphite spool and a cold forged aluminium handle. Not easy to find similar equipment at this price point!

FEATURES

- Super stiff hi-tech graphite body
- Longcast CNC aluminium main spool
- Graphite spare spool
- Traditional bail with anti twist line roller
- Micro-adjustable drag with oversized washers
- Long Life stainless steel ball bearings
- Infinite anti-reverse
- Power Fight aluminium handle with rubber knob

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
033-96-300	3000	255	5.0:1 (71 cm)	Ø 25 mm - 200 m	1	3+1
033-96-400	4000	255	5.0:1 (71 cm)	Ø 30 mm - 160 m	1	3+1

The aluminium handle is swept to follow rotor shape. This detail positively affects rotation balance - specially at high speed - as the handle's weight is closer to reel's centre of gravity.

Great care has been put in every detail, with stylish holes in spool's skirt and nice windows which make the rotor lighter.

The micro grooves which are visible on the spool through a magnifier lens are the signs left by CNC machine. This proves that it has actually been carved from a solid piece of aluminium to obtain extreme strength.

TRONIK XTR5

This exclusive reel has been designed and engineered by the same team of technicians that created the Airblade and for some aspects it resumes certain concepts. If the first reel featured a completely new shape, the second one, the Tronik, seems to be a brilliant summary of old and new styles. The shape of the body and rotor is futuristic, rich in round bends and empty spaces. These shape is futuristic but it is remembering as well the reels with circular bodies of our grandfathers.

Technically, the body is a single graphite frame including the 5.1:1 gears where a unique aluminium handle is set. The handle is bent around its own axis, being this way more innovative but also stiffer. Like for Airblade, it's possible to fold it just pushing the red button, so reducing the volume of the reel to easily store the rod into the holdall. The spool is a hybrid aluminium and graphite, giving a strong visual impact and a very low weight. Inside the spool, the drag system features extra large washers, up to 30% wider than usual, and it is so really micro adjusting. Bail arms are always a critical point and they have been made in aircraft aluminium. 5 ball bearings support the inner gears. It is appropriate to underline here that cause of the very narrow body, only 16mm without the side covers, it was not possible to put a one way clutch inside. For that purpose, the team of engineers designed an innovative semi-infinite anti reverse system that can work without the one way clutch. This solution is on the other hand very good to increase the cranking power of the reel, because the normally used one way clutch are often responsible of cranking power decrease up to 30%. Once again Trabucco is in the forefront of innovations in fishing tackle!

FEATURES

- Super Light Rotor. Using spacecraft materials the rotor is lighter and tougher.
- Innovative one touch handle, with EVA covered balanced handle knob made from ABS shock resistant material.
- No gap between side covers and no screws on exterior parts.

LEGACY FD

NEW

Here is the Legacy second edition, a family of reels that confirmed to be able to amaze all the anglers cause of its performance. The amazing look of this reel is just enhancing the great technical value. The gears are super smooth due to the 2+1 stainless steel bearings positioned in the locations suffering the highest friction. Body and balanced rotor are made of light and stiff graphite, to contain the total weight. The stiffness of the graphite is a warranty of a long life of all inner gears. The bail arm is equipped with anti twist line roller, very important for long fishing sessions with no line problems. The main spool is really nice, made of anodized aluminium and corrosion free. The spare spool is super light graphite made. To increase cranking power the Legacy features a cold forged aluminium handle. The great range of models can really satisfy all the needs, from fresh to salt water. From 1000 size, specific for finesse fishing to 6000 for bottom fishing, passing through the 4000 that is a really allround size.

FEATURES

- Graphite body
- Ultralight CNC aluminium spool
- Graphite spare spool
- Traditional bail with anti twist line roller
- Micro-adjustable drag with oversized washers
- Long Life stainless steel ball bearings
- Infinite anti-reverse
- Aluminium handle

REGENT FA

Wide new family of reels that are good to be used in a variety of techniques, both in fresh and salt water. Despite their gear is supported by a single bearing, the movement is really smooth. We achieved this result using self-lubricating Teflon bushes and a Multistop antireverse. The smallest sizes, like the 1000 and 2000, are very good for light and ultra light spinning, while the 3000 and 4000 sizes are widely used with Bolognese and Bombarda rods. The bigger sizes like 5000 and 6000, thanks to the high capacity of their spools, are perfect for live bait and bottom fishing and for many salt water uses. The reels are pre spooled and they are ready to go as soon as they come out of their box.

SPOOLED WITH **XP-Line**

AURIS EVO FA

New wide series of reels offering a good solution for style of fishing at a very competitive price. Retrieve is very smooth even if only one ball bearing has been used. This is due to the top quality bushes used instead. Gear ratio has been differentiated, 5.5:1 for smaller sizes, 5.2:1 for bigger, to match the different techniques needs. We improved the handle introducing a new 4 pegs locking system, obtaining a smooth retrieve and preserving gears from use. This series can count on some pre-spooled models as well, available in sizes 3000 and 6000. In this was the anglers has the comfort to buy a ready to go reel and the possibility to see hoe hood these reels spool the line. Not

to mention the possibility to buy at a competitive price both a good reel and a good Trabucco quality line.

AURIS MICRO

Super light series sold with pre spooled line. The possibility to see this reel already spooled allow the anglers to appreciate the spooling system. Drag is very well calibrated and gear, despite dimensions, is powerful and reliable.

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
033-44-100	1000	162	5.5:1 (69 cm)	Spooled	-	1

ZEON XT MICRO

This tiny model is designed for ultra-light spinning and is available in one size only. Featuring a stainless steel ball bearing, front micrometric drag, graphite spool, Multistop system and balanced handle with a soft knob. Is perfect for trout fishing, with a light spinning rod and ultra light lures.

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
031-18-100	100	150	5.5:1 (69 cm)	Ø 0.18 mm - 145 m	-	1

CASTFORCE FEEDER

CASTFORCE FEEDER

Model specially designed for feeder fishing in rivers and large bodies of water. It is a light weight graphite body reel equipped with a long cast machine cut aluminium spool able to spool up to 135 m of 0.35 line. Cranking power is assured by the low ratio 4.9:1 and the quality of the gears and bearings, 6 of the Long Life sort and one way clutch to support the instant anti reverse. The handle too is made of cold forged aluminium to keep the general feeling of power. The Castforce Feeder features a second spare graphite spool, really useful if you use the same reel in very different situations that require different lines spooled. Despite its medium size, this model fights with no problem even against big carp.

ferent situations that require different lines spooled. Despite its medium size, this model fights with no problem even against big carp.

FEATURES

- Graphite body
- Oversized aluminium main spool
- Graphite spare spool
- Line Guard Protector
- Hollow bail with Anti Twist line roller
- Micro-adjustable drag with oversized disks
- Infinite anti-reverse
- Aluminium handle

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
033-87-500	5000	375	4.9:1 (85cm)	Ø 0.30 mm - 180 m	1	6+1

QOSMIO FEEDER

Feeder fishing is having more and more success all over Europe, both in fresh and salt water. To satisfy the market needs Trabucco is introducing a brand new reel, specifically designed for this high effective and funny technique. The high end quality of the materials used to build the new Qosmio Feeder allow a super smooth and effortless retrieve of the biggest fish. The ratio has been chosen to have enough speed and still enough power. The conical spool allows longer and more accurate casts, preserving the spooled line from stress and granting a longer use and better performance.

FEATURES

- Graphite body
- Oversized aluminium main spool
- Hollow bail with Anti Twist line roller
- Micro-adjustable drag with oversized disks

- Infinite anti-reverse
- Aluminium handle

NEW QOSMIO CX FEEDER

The new Trabucco reel for feeder fishing won't certainly go unnoticed. The brand new Qosmio CX Feeder is a 5000 sized reel specifically designed for feeder fishing, considering all the specificities of this technique. The graphite body is compact and light weight, and is equipped with an aluminium spool and handle. We choose to go for an aluminium handle to increase the cranking power, while the spool must be aluminium to allow the use of fine braided lines, as, for instance, the new Trabucco Dyna-Tex Power Silk Feeder Braid. The 5,5:1 gear ratio is fast enough to reduce the retrieving time, very important during the competition, but not enough to go down in cranking power. For all the anglers who prefer to use monofilaments instead of braided, the graphite spare spool will be ok, and they will save some weight too. All the gears are supported by 3+1 Long Life stainless steel bearings.

The micro grooves on spool are the signs left by CNC machine. This proves that it has actually been carved from a solid piece of aluminium to obtain extreme resistance.

FEATURES

- Ultra stiff hi-tech graphite body
- CNC aluminium main spool (shallow)
- Graphite extra spool (deep)
- Traditional bail with Anti Twist line roller
- Micro adjustable drag with oversized washers
- Infinite anti-reverse
- Aluminium handle with rubber knob

MARVEL

Gianluigi Sorti

MARVEL CRX

Super smooth reel, whose gears are supported by 9 Long Life Ball Bearing and 1 One Way bearing, equipped with Free Spool System. The drag is the real strong point of Marvel, featuring wider discs and super fine adjusting options. Main spool is made of aluminium, while the second spool is made of graphite. The fighting handle is aluminium machine cut.

FEATURES

Goran Radovic

AURIS BR

SPOOLED WITH **XP-Line**

High quality components encased in a graphite body. Thanks to this features it is extremely lightweight and durable. The Free Runner Trabucco entry level is perfect for those who want to start ledgering or boat fishing session. Quality and warranty for this product are unbeatable in this price range, especially considering a very wide spools that helps keep the line in perfect condition at all times without forming loops. Auris BR is just sold spooled with XP line to allow his spooling features.

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
033-28-400	4000	320	5.2:1 (82 cm)	Ø 0.30 mm - 180 m	-	1
033-28-500	5000	402	5.2:1 (86 cm)	Ø 0.30 mm - 300 m	-	1

AXIS BR

You don't need to pay a fortune for good light weight free runner reel, if it comes from Trabucco, of course. Even if this reel is so light weight, it does not mean it is not strong or reliable enough. On the contrary, this reel is the proof that a good project can exceed market requests. Smooth and well balanced, this reel is good for every fishing style requiring a reliable drag. Axis Br comes already spooled with genuine Trabucco XP-Line Carp 0.35.

ing a reliable drag. Axis Br comes already spooled with genuine Trabucco XP-Line Carp 0.35.

SPOOLED WITH **XP-Line**

XRIDE

NEW X-RIDE SURF

Not only Trabucco top of the range, but world class reels! X-Ride is a series specially developed for surf casting around a large long cast spool and limited weight to perfectly match nowadays lighter surf rods. The graphite body is particularly thin and elegant, while the spool, made from anodized aluminium, is fitted on to a polymer frame which avoids line slipping down, thus eliminating tangle risks, specially when using fine lines. The aluminium handle is long and swept; gears rotation is assisted by 13 ball bearings, including the large one which drives the infinite anti-reverse. Drag is sealed to avoid salt and sand getting in. Thanks to worm shaft, the line lay is absolutely perfect. The tubular bail is made from aluminium, and is quite strong and light at the same time. The whole reel is protected against corrosion, and ball bearings are double shielded to prevent salt and sand damaging their function. Size 8000 is oriented to light surf, with light weight and a wide, tapered spool (7 cm diameter and 4 cm height), which enables impressive casts even with light leads such as 50 or 75 grams. The new size 10000 is destined to proper surf casting, with a 25% higher spool to obtain a wider angle in lines distribution, which means that friction between line coils is reduced during the cast. Both reels are equipped with cast lock system to avoid incidental closure, so that the bail arm can be closed manually only.

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
035-06-080	8000	625	4.6:1 (94 cm)	Ø 0.32 mm - 320 m	-	12+1
035-06-100	10000	750	4.5:1 (97 cm)	Ø 0.35 mm - 270 m	-	12+1 NEW
035-06-081	Long Cast Spare Spool 8000					
035-06-101	Long Cast Spare Spool 10000					

The 8000 and 10000 spools differ in length. The 10000 is recommended in case thick lines are spooled, because the coils form a wider angle.

On left, the standard ball bearings are open to get salt within balls. On right, the shielded version from X-Ride series is safe from aggressive agents.

Thanks to its special design, the worm shaft is responsible of perfect line lay on reel's spool. As a consequence, the casting distance is improved, due to easier line flow.

FEATURES

- Hi-Tech graphite body and rotor
- Ultralight aluminium long cast spool
- Hollow bail with titanium Anti Twist line roller
- Double Shielded SS Long Life Ball Bearings
- Saltwater & Dust Proof Drag
- Infinite Antireverse
- Stainless Steel main shaft
- Worm Shaft for a perfect line lay
- Bail arm lock system (manual closure only)
- Machined aluminium handle with rubber knob

LANCER SURF

NEW LANCER SURF

The Lancer Surf is a great surf casting reel made of super stiff, light weight graphite, whose overall weight is only 700 g. The oscillation system spools the line perfectly and it is super slow, lowering the stress to the line. The super slow oscillation system together with the worm shaft gear are the perfect solution for a perfect line lay that is key for long casts. The super tapered spool is designed for long casting as well. The Lancer Surf is not only a reel casting like a cannon, it is a powerful reel too, due to the low 4.3:1 ratio gears and the aluminium fighting handle. The crushproof tubular aluminium bail arm is equipped with a blocking system that prevents casual closing. The closing is just by hand. The new drag is the special Fast Play Drag, so with only one drag turn, the spool goes from totally blocked to totally free. This solution is useful when you need to give line rapidly or when you need to hang on the line the bite detectors. The 6+1 Long Life bearings are stainless steel and salt water proof. A second aluminium spool can be purchased separately at a really affordable price.

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
035-14-800	8000	700	4.3:1 (92 cm)	Ø 0.30 mm - 260 m	-	6+1
035-14-801	Aluminium Spare Spool					

By just half a turn of drag knob, the drag is completely loose or totally fastened.

Light and strong aluminium tubular bail, with anti-twist line roller.

Thanks to its special design, the worm shaft is responsible of perfect line lay.

Power and smoothness thanks to the multi-disk drag (steel and PTFE coated disks).

FEATURES

- Hi-Tech graphite body and rotor
- Ultralight aluminium Longcast spool
- Hollow bail with titanium Anti Twist line roller
- Stainless steel Long Life Ball Bearings
- Sealed drag, with PTFE coated disks
- Infinite Antireverse
- Worm Shaft for a perfect line lay
- Bail arm lock system (manual closure only)
- Stainless Steel main shaft

XENOS

Emiliano Tenerelli

XENOS LDX

Japanese designed high performance reel, made precious by several technical solutions that increase the fishing experience with it. Graphite body is light weight but robust, while the aluminium fighting handle features a large knob that is very comfortable. Long cast cold forged aluminium spool is conical shaped and together with the perfect worm shaft line lay, grants the longer casts possible. Drag system is sealed to preserve

its integrity from salt water and sand, so it can be always ready when needed. Graphite spare spool. Additional aluminium spare spool can be purchased separately at a very competitive price.

FEATURES

- Hi-Tech graphite body and rotor
- Ultralight aluminium easy cast spool
- Graphite extra spool
- Hollow bail with titanium Anti Twist line roller
- Rotary Flat Oscillation System
- Double Shielded SS Long Life Ball Bearings
- Saltwater & Dust Proof Drag
- Infinite Antireverse
- Worm Shaft for a perfect line lay
- Stainless Steel main shaft
- Bail arm lock system (manual closure only)

Hidden in the body's hearth, there is an important part of Xenos LDX. Thanks to its special design, the worm shaft is responsible of perfect line lay on reel's spool. As a consequence, the casting distance is improved, due to easier line flow.

The titanium line roller is linked to bail arm with a tapered sleeve which drives the line to roller, even when tension is very low.

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
035-10-100	10000	700	3.9:1 (90cm)	Ø 0.30 mm - 385 m	1	5+1
035-10-101	Easy Cast Spare Spool					

On left, the standard ball bearings are open to get salt within balls. On right, the shielded version fitted on Xenos LDX series is safe from aggressive agents.

XENOS SURF POWER

Japanese project, Italian Design. Carefully finished in every detail, the Xenos family is synonymous of reliability and long lasting quality. The proof is the Xenos family producing new models year after year. The new Power Surf it is actually a powerful reel with all a rugged reel should have and nothing more. The graphite body is very stiff, to preserve gears, and the aluminium handle is one touch for best storing. The graphite spool is conical to help line to exit during casting and to get longer distances. 5 stainless steel saltwater proof ball bearings and a one way clutch support the gears. The bail arm is hollow, lighter but way more resistant. Additional spare spools can be eventually purchased at a very competitive price.

One touch is enough to fold the handle arm, thus reducing the reel's volume to easily store the rod into the holdall.

FEATURES

- Graphite body and rotor
- Graphite Longcast spool
- Traditional bail with Anti Twist line roller
- Double Shielded SS Long Life Ball Bearings
- Saltwater & Dust Proof Drag
- Infinite Antireverse
- Rotary Flat Oscillation System
- Stainless Steel main shaft
- Aluminium one touch folding handle

POWERBAIL

035-12-101	Lightweight Graphite Spare Spool					

NEW CASTFORCE PRO SURF

The Castforce Pro Surf is a long casting reel offered at a very nice price but designed and equipped as more expensive models. The cold forged aluminium Long Cast spool features a smart system preventing the line to go under the skirt. Body and rotor are graphite made, the aluminium is machined cut aluminium and finished with a fighting knob. The tubular aluminium bail arm is crushproof. Since many anglers are into competitions, we decided to add a spare graphite spool that can be spooled with a different diameter line, to be used in different weather conditions. The 6+1 Long Life stainless steel bearings are salt water treated.

FEATURES

MAXXIS

NEW MAXXIS HYPER SURF

With a complete saltwater protection and sealed ball bearings, it's well prepared to face the tough life at sea side, its true vocation. But it's not just that: the new series Maxxis Hyper Surf offers a lot more, starting from a perfect volume's ratio which is based on a compact body and large spool, destined to smoothly handle the line with its wide diameter, tapered profile and slim lip. The worm shaft is behind a clean line lay, and the job is done with slower than standard oscillation; the best way to provide a quick, neat and trouble free cast is to regularly wind the line onto the spool, and in this sense Maxxis doesn't fear the comparison to the rest of surf casting reels. The aluminium handle is nicely swept to keep its barycentre as close as possible to body's axis, thus limiting the oscillations during the retrieve. With such list of technical specifications, everybody would expect an high price, but this is surely going to shock the whole beach community.

FEATURES

- X-Tra Tough graphite body
- Longcast aluminium spool
- Longcast aluminium spare spool
- Traditional bail with Anti-Twist line roller
- Sealed stainless steel ball bearings
- Infinite antireverse
- Worm Shaft for a perfect line lay
- Aluminium handle with ergonomic rubber knob

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.

035-15-100	10000	735	4.5:1 (98 cm)	Ø 0.40 mm - 220 m	1	3+1

MAXXIS PRO SURF

This is a Big "Free Runner" with a fast drag release located on the spool. With this new device the drag and the extra drag features are adjustable independently. The result is a truly micrometric adjustment system that allows you to switch from "free running" to normal use by turning the drag knob by just half a turn. Equipped with four stainless steel ball bearings and sealed by a salt-proof special treatment the Maxxis Pro Surf incorporates an infinite anti-reverse roller bearing. Other features include anti-tangle, flow concept bail mechanism and worm shaft for perfect cross spool winding, fighting ergonomic handle (turned from solid) plus, super hard alloy graphite body, low capacity spool. All these outstanding features make this reel perfect for surf-casting.

FAST PLAY DRAG - Drag system featuring a dual-presetting mode that incorporates in a single device all free runner drag facilities. It acts directly into the spool, allowing to have a more direct, progressive and fine tuning drag system. The free spool setting is regulated by the inner knob, while to switch to combat drag half turning the main drag knob is enough.

On left, the standard ball bearings are open to get salt within balls. On right, the shielded version from Maxxis Pro Surf series is totally safe from aggressive agents.

FEATURES

- Hi-Tech graphite body and rotor
- Aluminium Longcast spool
- Traditional bail with Anti Twist line roller
- Shielded SS Long Life Ball Bearings
- Infinite Antireverse
- Worm Shaft for a perfect line lay
- Machined aluminium handle with oversized knob

032-77-751	Maxxis Pro Surf 10000 Spare Spool					

HyronCast

NEW HYRONCAST

Compact and powerful, the Hyroncast is for sure one of the most powerful reels you can use from the beach and the boat. The graphite body holds a powerful gear with a quite fast ratio gear of 4.9:1 and a number of features that many beach casters will appreciate, as the worm shaft gear for a perfect line lay and a tapered aluminium spool. A perfect line lay is the best start to get a long cast. A second graphite spool comes into the box. A so powerful gear is supported by a fighting handle, made of machine cut aluminium. All the 6+1 Long Life bearings are stainless steel and salt water protected.

Aluminium Power Bail with specially shaped Anti Twist line roller.

Thanks to its special design, the worm shaft is responsible of perfect line lay on reel's spool, with neat angles between each coils. As a consequence, the casting distance is damatically improved, due to easier line flow.

FEATURES

Giuseppe Alessi

KRONOS

KRONOS PRO SURF

When you need a powerful retrieve and expect reliability without frills, the nit is the time for rugged, plain and efficacious reels, such as the new Kronos Pro Surf. An extra strong graphite body combined with an aluminium forged long cast spool and a powerful drag, featuring oversized discs, able to face whatever difficult situation on the shore. The weight is light, so you can couple this reel even with light surf rods, but still a very good choice cause of the casting skills. Gears are smooth thanks to 6 Long Life ball bearings and one way clutch. The aluminium handle is long and making a good lever when retrieving heavy preys. This reel comes with spare graphite spool.

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
U33-38-100	8000	755	4.7:1 (100cm)	Ø 0,30mm - 450m	1	6+1

KRONOS SW

The Kronos Surf Casting reels family is now bigger as we introduced two new reels, the SW models, designed for Beach Casting with medium weight leads, around 75-125 g. These two models, 6000 and 8000 size, have a compact body and are light weight, being entirely made of corrosion resistant graphite. Main spool is aluminium, the spare one in polymer. The aluminium handle is very nice and features an high density ergonomic EVA fighting knob. The ratio of 4.9:1 for both models grants a lot of cranking power. Despite the small body the Kronos Surf SW

spools are really wide, being able to be filled with close to 500m of 0.20 (SW 6000) or close to 400m of 0.30 (SW 8000).

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
033-39-600	6000	551	4.9:1 (92 cm)	Ø 0.20 mm - 490 m	1	6+1
033-39-800	8000	536	4.9:1 (98 cm)	Ø 0.30 mm - 390 m	1	6+1

HORNET xTC

High capacity and super reliable surf casting reel featuring first quality equipment. The wide conical aluminium spool has a capacity of 450 meters of 0.30 and its profile helps to increase the casting distance. The reel has a second graphite spool as well. The spooling is perfect thanks to the Worm Shaft gear and the slow oscillation system SOS. Gears are really smooth thanks to 6 stainless steel salt water resistant ball bearing and the one way bearing.

The line clip is round and is assisted by a spring in order to avoid any line damage.

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
033-84-990	10000	755	4.7:1 (105 cm)	Ø 0.30 mm - 480 m	1	6+1

ALIOTH SURF

Series of surf casting reels featuring very good performance for a very interesting price point. The body is graphite made, to stay light weight, while the spool and the handle are made of cold forged aluminium to give power. The wide diameter spool is perfect for long casting, together with the perfect line lay given by the worm shaft system. The line is always safe cause it will pass through an anti twist roller guide line. Gears are supported by 4 ball bearing and one way clutch. The drag has oversized discs and it is sealed to protect it against salt water and sand. Two sizes available, 8000 and 10000, to meet different needs throughout Europe.

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
035-02-080	8000	582	4.8:1 (98 cm)	Ø 0.25 mm - 260 m	-	4+1
035-02-100	10000	693	4.3:1 (104 cm)	Ø 0.35 mm - 240 m	-	4+1

FEATURES

POWERBAIL

NEW ANDROMEDA LONG CAST

Medium priced Surf Casting reel that despite the price offers a wide choice of specs that normally you can find only in more expensive models. We have here a wide ultra light graphite conical spool, absolutely necessary for long casting, and a perfect cross line spooling thanks to the Worm Shaft System. Both these solutions grant you long distance and no problems with your line. The slow oscillation gears help to keep the line healthy for a long long time, so you will not need to change it that often. One Touch foldable handle and 4+1 salt water protected bearing will make all your retrieves really smooth.

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
033-37-990	10000	720	4.7:1 (100 cm)	Ø 0.45 mm - 300 m	-	4+1

NEW SEARIDER NRG SURF

New series of reels designed for bottom salt water fishing, from the shores, the rocks or piers. The Searider NRG Surf has been initially conceived for surf casting from sandy beaches, but thanks to its versatility and the possibility to choose between 2 sizes, it can be used in more situations. The 8000 is perfect for surf casting and live bait fishing from the rocks, searching for the big bluefish. The 6500 is a very good compromise between light weight and power for Beach Legering technique.

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
033-34-650	6500	510	4.9:1 (92 cm)	Ø 0.25 mm - 300 m	-	4+1
033-34-800	8000	515	4.9:1 (98 cm)	Ø 0.35 mm - 370 m	-	4+1

OCEANIC SURF

This reel has been designed for anglers that face the Surf Casting technique for the first time. The low price should not mislead you, because the Oceanic Surf features a perfect spooling with crossing line system. We decided to sell this reel pre spooled with Trabucco XP Line, to make you know this very good line too, very good specially for Surf Casting. The graphite conical spool will help you for sure to attain very long casts.

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
033-43-100	8000	613	4.1:1 (91 cm)	Ø 0.40 mm - 250 m	-	1

Emiliano Tenerelli

AVALON PRO SURF

The Avalon Surf is offered to an affordable price and designed for those who want to take their first steps in the surf techniques. It shows an elegant cosmetics with an ultra reliable mechanics. Fitted with only one ball bearing but definitely well designed and assembled, it delivers a great smoothness and a good retrieve power ideal for the surfcaster. The size 6500 is ideal to be combined with telescopic rods and a gear ratio of 4.1:1 but still delivers a good line covering. Extremely lightweight despite the size, Avalon Surf features a graphite body and spool, the AS line roller, super balance system and the power handle ends with a soft ergonomic knob. Available in two colors (Red and Blue) for an elegant combination with Avalon rods.

FEATURES

Code	Model	Weight	Gear Ratio	Spool Capacity	Extra Sp.	B.B.
U33-42-100	6500	620	4.1:1 (82 cm)	Ø 0.40 mm - 200 m	-	1
U33-42-200	6500	620	4.1:1 (82 cm)	Ø 0.40 mm - 200 m	-	1

EXCEED

Top saltwater game spinning reel. Exceed series is designed for extreme fishing, as tropical popping, deep speed jigging and heavy spinning, from the boat and from the shore as well.

Reels born not to accept any compromise, a perfect combination of cutting edge technology and performance.

EXCEEDING YOUR EXPECTATIONS!

EMOTION

Salt water spinning, from the boat targeting blue tuna hunting in schools, or other noble and pugnacious species is absolutely a serious affair, not leaving any chance to improvisation or last minute equipment. It is key to use reels casting at greater distance, able to face longer than 1 meter fishes, made of powerful muscles, light enough not tire the casting anglers even after several hours of fishing. And it is key as well to know you can count on them in very instant of the fight, you can count on every single screw! And it is essential the drag can stand such a fight, being able to turn the head of the prey in the right direction when the moment is come, even if the line is whizzing through the guides and the rod blank is creaking. Who tried this perfectly knows what we mean. And knows this strong emotion can become obsession and reason of life. And finally knows he needs an Exceed reel!

FULL METAL BODY

The whole body of an Extreme reel is made of metallic alloy and aluminium, extremely resistant but lightweight materials, only 855 gr for the big 10000, a real winch for legendary trophy fishes.

The whole oversized precision gears are made of rugged premium quality materials as well and are absolutely reliable: stainless steel drive gear, manganese/bronze alloy oscillation gear, stainless steel pinion and main axis. Positive Screw Lock handle, directly self locking into main gear. 4 mm solid aluminium bail arm. Bronze alloy drag knob and clicker. Nothing is left to chance.

The main image shows a fisherman in a dark jacket and cap, holding a large, fresh blue fish (likely a tuna) vertically. The fish's mouth is open, showing its teeth. To the right, a silver and blue fishing reel is prominently displayed. The reel has 'EXCEED 8000 SPIN' and 'SWR' branding. Below the reel, there are several technical specifications in a grid format:

METAL BODY	SWR SALTWATER RESISTANT
6+1 SS SHIELDED BEARINGS	20Kg MAX DRAG

Below the specifications, there are two inset images: one showing a close-up of the reel's handle and another showing a close-up of the reel's internal components, including the bearings and the drag system.

DRAG & MAX DRAG

Exceed spool is a masterpiece of engineering: made of combination of aluminium and carbon to reduce total weight without compromising the overall strength. It is supported by two big stainless steel shielded bearings positioned on the main axis. The powerful drag is made of alternate carbon and stainless steel discs insuring a Max Drag of 30 Kg for all sizes (20 Kg on Salt Water Spin series), strong enough to stop, if you can!, the violent escape of big predators, such as a big GT or a Dogtooth Tuna, searching for shelter between some submerged sharp reef to cut the leader. Despite such a power it is possible to set it with great accuracy, throughout the whole scale. Capacity of the spool of each model has been designed carefully for that model only.

DESTINATION SALT WATER

Evidently designed for salt water use, Exceed reels feature sealed body and drag, 10 shielded stainless steel bearings, one of them made of metaformaldehyde supporting the titanium line roller. It is for sure the bearing the more exposed to water and to heat generated by friction and so needed an extraordinary care to choose the right material. Body features a special lubrication port designed to lubricate gears. All metal parts have been treated against salt water and all aluminium parts have been anodized to prevent corrosion. The anti reverse is permanent for safety reasons and it is supported by a one way stainless steel roller and a recovery stainless steel anti reverse pawl. 4.1:1 gear ratio gives the correct fighting power to fight against the strongest salt water predators, such as bluefin tuna and big GT. Exceed is the perfect reel for the heaviest spinning in Mediterranean Sea, deep vertical jigging and popping into tropical oceans. Dedicated to fanatics searching for strong excitement!

EXCEED SW

Since years the Exceed SW has been taken as example of the best reel in its category for heavy fishing from the boat. It has become so popular you can even find some models that tries to imitate it! All these imitations usually fail their attempt because always lacking of something, that is essentially the quality. And despite a lower quality they are even more expensive, without any technical motivation. All this could be enough to feel proud of ourselves, to have believed since the beginning to the possibility to build a superior quality reel at a price that can be defined reasonable and that everybody can buy. After a so long time from his first launch on the market, the Exceed SW continues to find the favour of anglers and the glory of numerous fishing reports thanks to its great strength, reliability and endurance. It has been used fishing with heavy metal jigs, and so it went under strong and continuous stress; it has been used for Bluefin tuna spinning, and it never gave any signal of failure; finally it has been taken to vacation in the tropical seas, where suffered the worst treatment you can imagine, for days and days. Not a single one of these experiences ever harmed it, or just dip into its "skin" (by the way it's "skin", or to better say its body, is made of a noble alloy made of Aluminum, Silica, Copper and Magnesium). If you don't like compromises forget the rest and just fish with an Exceed SW!

FEATURES

- Stainless Steel Drive gears, Pinion gear & Oscillation-Pinion gear
- Max drag 30 Kg (66lb)
- Gear box lubrication port / hole
- Al-Si-Cu-Mg Aluminium alloy body / rotor / bail arm assembly
- Manganese bronze alloy oscillation gear
- Non reversible LARGE one-way bearing (permanent one-way)
- Stainless steel backup anti reverse pawl
- Positive-Screw-lock CNC handle & knob
- Twin Ball bearing spool (for high speed drag runs)
- Stainless steel and carbon textile drag washers, fine adjustment from full release to full lock with super smooth all the way
- Fully sealed Body & Drag (100% water proof reel)
- No rust Polyester (Metatormaldehyde) Bearing line level pulley
- Titanium Line roller
- Solid 4mm bail wire
- All Stainless steel alloy for all other metal components
- 10+1 S. S. shielded bearings
- Gear ratio 4.1:1

NEW EXCEED SW-H

Three years already passed since the launch of the very first Exceed reel, and still it is one of the most requested. And it could not be otherwise since this reel is offering incredible performance and at an incredible price. In this 3 years some thing changed and also the fishing tackle world have seen major changes. Actually, more and more, people are fishing the bluefin tuna casting medium sized metal jigs. And people started to ask for specific reels for this sporting technique. The new Exceed SW 5500 H has been designed to satisfy the needs of this peupe, featuring a 4.9:1 high speed ratio to allow a perfect retrieve of the metal jigs and a smaller, but not weaker body. Body and rotor are made of the same alloy (Al-Si-Cu-Mg) and sealed with a rubber o-ring. The 10+1 bearings are reinforced, double shielded and stainless steel. The Max Drag is 20 Kg. The new designed handle is a great addition: it is made of stainless steel and designed to be absolutely strong and reliable. The Exceed 5500 SW H is also a light weight reel, only 520g, cause it must be used for long times, but also as powerful as a tuna reel must be.

FEATURES

- Stainless Steel Drive gears, Pinion gear & Oscillation-Pinion gear
- Max drag 20 Kg (44lb)
- Gear box lubrication port / hole
- Al-Si-Cu-Mg Aluminium alloy body / rotor / bail arm assembly
- Manganese bronze alloy oscillation gear
- Non reversible large one-way bearing (permanent one-way)
- Stainless steel backup anti reverse pawl
- Positive-Screw-lock CNC handle & knob
- Twin Ball bearing spool (for high speed drag runs)
- Titanium Line roller
- Solid 4mm bail wire
- Stainless steel and carbon textile drag washers, fine adjustment from full release to full lock with super smooth all the way
- Fully sealed Body & Drag (100% water proof reel)
- No rust Polyester (Metaformaldehyde) Bearing line level pulley
- All Stainless steel alloy for all other metal components
- 10+1 Stainless steel shielded bearings
- Gear ratio 4.1:1

EXCEED SPIN

Strong excitement and epic battles with huge fish as well, are not at all exclusive to tropical boat fishing. Fishing from the shore, and often absolutely from the shore, that big fish, the dream of our life just escapes! Cause of a sharp rock or cause of a malicious wave... And that happens just because people is not equipped in the correct way... cause a normal equipment simply cannot stand a dream of a fish! That's why the Exceed Spin was born. Rugged aluminium body, light weight but as tough as iron, less than 500 gr for a 4000 size and still able to spool up to 220 meters of 0.40 line. Anti reverse is permanent with a recovery stainless steel anti reverse pawl to prevent accidents. The fighting handle is fully made of forged aluminium, including the beautiful knob. Drag is absolutely one of a kind and never seen before on reels of the same category of Exceed Salt Water Spin, featuring a 20 Kg Max Drag. An absurd specification for some people but an absolute need for other, ambitious, people.

Premium specs also for the stainless steel gears, the bronze pinion salt water protected and the titanium line roller. Line lay is perfect preventing digging for braided lines and so avoiding dangerous situation when fighting with a big fish. Bailarm is hollow, strong, reliable and lighter than conventional bailarms. Every single part is functional to extreme predators fishing.

X-PLORE SW-H

NEW X-PLORE SW-H

The original design that led us to the production of the very good Xplore reels has been taken to the max using powerful materials to create a new super reel, the new Xplore SW. This strong, powerful reels features a small sized, light weight body entirely made of aluminium. Actually both body and rotor has been made of reinforced aluminium alloy, so the gears can be protected inside this kind of ultra resistant shield. The wide diameter spools, made of aluminium, has been equipped with a titanium lip, to decrease the friction of the line. Also the power handle is made of aluminium, and finished with a fighting knob. The 7+1 bearings are stainless steel, double shielded and salt water proof, so nothing can get in. Two different version of this reel are available: a size 6000, just 470 g and a ratio of 5.9:1, just perfect for salt water spinning, both from the boat and from the shore; a size 7000, 490g, gear ratio 4.9:1 that is intended for light drifting, jigging and bottom fishing.

033-99-601	Spare Spool 6000H					
033-99-701	Spare Spool 7000H					

On left, the standard ball bearings are open to get water and salt within balls. On right, the shielded version is totally safe from aggressive agents.

The holes on spool's skirt play the double role to make it lighter and definitely nice.

The upper lip of the spool is remarkably thin and "V" shaped to limit the line friction as much as possible, allowing to get longer casting distances (V Spool Design).

The drag system is sealed and include steel and carbon disks.

SWAT xs

The Trabucco team is developing since years a sophisticated project that gave birth to reels of absolute value such as the Exceed SW and the Exceed Spin. Of course many project has been carried at the same time and after the birth of the first two (the Exceed families), the third one is ready to go now. It is the aggressive Swat XS, a front drag spinning reel for strong emotions, rugged and tough, as in the same tradition that the Exceeds, but also easy to use and really enjoyable. We bet so many people will fall in love of this "gentle war machine"! We are not presenting an allround reel family, good always and everywhere, but a true cranking machine that inside a relatively small and light weight body hides a powerful gears heart. Swat XS gears actually originate from Exceed gears and so they are super reliable in extreme conditions, from medium to big inshore (and fresh water too!) fish to offshore monsters. When using a Swat you must never surrender your wildest dreams!!!

NITRO PG

Boat fishing reel, specifically designed for light drifting and speed jigging. Super tough thanks to the full metal body, carefully protecting inner gears. Smooth retrieve through 5 double shielded stainless steel bearings and the one way clutch. Key feature is the powerful drag, with a 15 kilos test, able to face big and fast salt water predators. Rotor, spool and handle made of cold forged aluminium.

Enormous cranking power with no play nor vibrations, thanks to the handle directly connected to drive gear.

Drag system is based on steel and carbon disks to develop huge power and disperse heat at the same time.

AIR BLADE POWER SW

NEW AIRBLADE POWER SW

Trabucco team is investing more and more into new technologies and design that can add value to his reels, to increase their quality and make the fishing experience of his customers just great. The new Airblade Power SW is just the last of the many steps already taken by this company, and it is a project that leads the Airblade family straight to salt water fishing. It is an heavy duty and bigger version that is witnessing the good quality of the original project. The whole reel is made of aluminium and it is sealed with a rubber o-ring to prevent to water to enter the body. To maximize this effect, there are no screws on the body of the reel, making it even more powerful. All the Long Life bearing are stainless steel and salt water proof: they will last forever. To increase the cranking power the aluminium handle is featuring a fighting knob. Available into 2 sizes, the Airblade is going to become one of the more interesting news for 2015 for salt water predator spinning.

The handle folds instantaneously, thanks to the one touch button.

The metal rotor has been drawn by computer to reduce weight and improve balance as well.

Body profile is ultraslim and has no external screws.

MAXXIS

MAXXIS PG

To complete the Maxxis range we've introduced the Maxxis PG 8000, featuring X-Tra Tough alloy body and designed to heavy duty specialities, such as the deep vertical jigging or the heavy spinning. All the seven Long Life SS ball bearings are sealed and give total reliability and smoothness to this high level reel, whilst the Roller Bearing run the one-way clutch, but here you'll not find the anti-reverse lever as in most of the proper saltwater reels. To protect the gears, the body is fully sealed to prevent any water come in and it's completely built with aluminium alloy as well as the rotor, the side plates and the bail arm assembly. Digital designed stainless and bronze alloy gears. The max drag power is 20Kg and again it is completely sealed from water, salt and any other debris, thanks to the o-ring positioned on the knob and through a closure disk to protect the washers. The drag works on stainless steel and carbon textile drag washers, with a fine adjustment from full release to full lock with super smooth motion all the way. The body is thin and flattened, while the rotor features a hybrid skirt made of carbon cloths, with the CNC machine cut aluminium handle fitted with an "custom" made oversized handle knob. The 4.4:1 gear ratio, is perfect for the deep vertical jigging, heavy duty spinning or popping to target the big saltwater predators. Everything is built to handle the heaviest of braided lines and control large, strong-pulling predators.

FEATURES

Enormous cranking power with no play nor vibrations, thanks to the handle directly connected to drive gear.

Main shaft is made from stainless steel to provide strength and durability.

Code	Model	Weight	Gear Ratio	Spool Capacity	Bob.Extra	B.B.
032-79-800	8000	776	4.4:1(96 cm)	18 lb - 350 m	-	7+1

MAXXIS SW GAME

Compact design, strong and reliable range of reels designed for saltwater fishing. The X-Tra Tough Body and rotor are made from a special blend of graphite, stronger and lighter than regular materials. To increase the torque resistance under maximum load, the bail arms are built by solid aluminium, so that line roller works in optimum conditions. The high performance drag system is completely sealed and based on PTFE washers to guarantee high smoothness and progression from minimum to the highest setting. All ball bearings are sealed, while gears and metal parts are Saltwater Proof, and the body has been sealed for additional protection. The aluminium Powerbail is hollow and made by one piece only, so lighter and stronger than any other on the market. The gear ratio of 4.8:1 is perfect for the light to medium jigging, kabura fishing and medium spinning, while the aluminium CNC handle is strong and lightweight and ends with a "custom" Eva Knob, ergonomic and able to guarantee optimal grip in all conditions.

The drag system is sealed to avoid water and salt intrusion.

The Powerbail include a tapered link to Anti Twist line roller, which is Titanium coated.

SEAWOLF

4 SHIELDED
SS BALL
BEARINGS

The gold anodized dress is a traditional classic in the multiplier trolling reel's market, while the Maxel structure and engineering are the most advanced the industry can now offer to the keen anglers who look for the best only. Total reliability and strength are the two main targets which have driven the development and production of these reels, along with unique design, precision engineering and totally saltwater proof materials. Each single component has been created to get the best performance, starting from one-piece frame, machined from solid 6061-T6 tempered aluminium, well known in the aerospace and naval industry for the torque resistance property, up to consider stainless steel gearsings, aluminium spool and sealed ball bearings. SeaWolf reels are available in the range of 20-50 lbs, all featuring double speed and an extremely powerful and progressive drag, based on carbon disks to deal with the fastest runs of big sea fish.

The exclusive ergonomic 1-Bar handle is able to provide maximum cranking power with minimal effort. T-Bar actually makes the most of hand, wrist and forearm. Construction material has been chosen not to burn hands even if sun exposed during Summertime.

FEATURES

- 6061-T6 machined one piece aluminum frame
- Cold forged aluminum spool and side plates
- Precision-machined stainless steel gears
- Carbon-based contaminant-resistant drag materia
- 4 shielded stainless steel ball bearings
- Extremely tight tolerance to prevent line eating
- Heavy duty stainless steel ratcheting clicker design
- Heavy duty stainless steel drive and spool shafts
- CNC aluminum anodized reel foot
- Main shaft bearing stabilizer prevents excessive side pressure on spool bearings
- New power T-Bar handle for increased comfort and torque
- Stainless steel rod clamp and harness lugs
- Serialized identification

MACHINED RIGID FRAME. Aircraft grade aluminum construction incorporating Maxel rigid machine technology. All Maxel reels feature a strong, rigid, one-piece fully machined aluminum frame. These monolithic bar-stock frames not only keep the moving parts in precise alignment, but also maintain exacting control tolerances under heavy loading while fighting big fish.

HIGH-TECH COLD FORGED SPOOLS. Thanks to Maxel expertise and the latest cold forging technology applied during productions stages, the super strong, cold forged aluminum spool and side plates stand up to line pressure and hard fighting stresses.

ANTI CORROSION STAINLESS STEEL BEARINGS.

Maxel use top quality shielded stainless steel ball bearings assure corrosion resistance and smooth operation on line release and recovery.

MAXEL
ENGINEERED EXCELLENCE

TROLLING & JIGGING

Trabucco is the official distributor of the trolling and vertical jigging Maxel multiplier reels on the Italian market.

A reliable range of products which has been developed for those who will never accept any compromise on quality.

SEALION OB

An Hi-Tech multiplier designed for trolling and specifically with braided lines. This is the right model to fish with the downrigger and with the drift lead; in fact, it features an increased capacity spool, granting the possibility to spool enough meters of the big diameter braided required. It is evident that for other specifications we did not change the good specs that made the Sea Wolf and the Sea Lion the best multipliers to be used on a boat. So also the Sea Lion OB features a machined 6061-T6 aluminium frame. This one piece frame is the best warranty you can have about the solidity and the reliability of the reel. All the gears are made from stainless steel, the only material that can last for countless years in an aggressive and salty environment. The spool and the side covers are made of cold forged aluminium, to keep them light weight but still very strong. The lever drag and the handle have ergonomic shape and are easy to access, because when you are fighting a big fish everything must be just handy. If you summarize what a Maxel OB is giving you: light weight, ergonomic design, 100% salt water proof, stainless steel and carbon drag washers, eight double shielded stainless steel bearings and much more, you will understand why we are giving 5 years warranty. Because a Maxel reel is made for fishing and it will do it well for a long, long time.

8+2
SS SHIELDED BALL BEARING

Code	Model	Gear Ratio	Spool Capacity	Max Strike Drag	Max Full Drag	B.B.
030-01-206	06LH	4.5 : 1	310 m - 20 lb	5 kg	6 kg	8+2
030-01-209	09RH	4.5 : 1	410 m - 20 lb	8 kg	10 kg	8+2

CARBON DRAG SYSTEM. Maxel unique Carbon Drag system delivers wide range and smooth operation at all settings. The contaminant resistant carbon surfaces are treated with a precise amount of specially formulated MAXEL drag grease that resists water absorption and maintains powerful drag settings. Constant, steady friction and excellent heat displacement are assured through the drag surface design.

ERGO POWER KNOB. Maxel ergonomically shaped power knob provides maximum power with minimum fatigue for the game angler. The power knob takes full advantage of the natural dynamics of the human hand, wrist and forearm to help sustain power and endurance for the game angler.

SEALION

8+2
SS SHIELDED
BALL BEARING

Incorporating Maxel's precision engineering technology, designed with optimum mechanism and added features, the SeaLion series will give anglers more confidence and power during overhead jigging and live baiting. The SeaLion reels are made from 6061-T6 tempered aluminum with ported cross bars for weight reduction, and wider spool for larger line capacity. The upgraded carbon drag system is capable of outrageous drag pressures, plus the improved pre-set knob and lever drag control mechanism, allowing the SeaLion reels more precise and consistent drag setting. Also with fulcrum clicker design, it stops drag lever backing off while jigging. The SeaLion series features 2 sizes 8Lb e 10Lb available only with two speed retrieve and with right or truly left handle version to choose from.

2-SPEED GEARING. Maxel 2-Speed system consists of two sets of stainless steel main and pinion gears, allowing anglers the option of a high-speed ratio or a power ratio for maximum torque. Maxel shifting system is designed to operate in a simple and reliable way, just push the shift button and handle in for low gear, offering you the power to fight big game fish; push button and pull handle out so as to switch back to high speed ratio for quick line recovery.

PRE-SET & DRAG LEVER. Maxel pre-set knob and drag lever are designed user-friendly for precise and constant drag settings from FREE (no drag pressure), to STRIKE (where you fight the fish), until FULL (provides extra drag pressure when you need it). Turn the pre-set knob clockwise for more drag pressure, counter-clockwise for less drag pressure.

FEATURES

- 6061-T6 machined one piece aluminum frame
- Cold forged aluminum spool and side plates
- Precision-machined stainless steel gears
- Contaminant-resistant carbon drag material with special grease
- With fulcrum clicker design to stop drag lever backing off
- Oversized shielded stainless steel ball bearings for better support and strength
- Slim frame and narrow spool increased 10% more line capacity
- Newly designed balance handle to minimize the jigging vibration
- Excellent free spool
- Serialized identification

MERIDIAN GT

3+1
SS SHIELDED
BALL BEARING

Meridian trolling reels are the perfect complement for Meridian Fighter Stand Up rods, and are a good and versatile option for Mediterranean trolling. Graphite body is salt water resistant and side plates are reinforced by a stainless steel ring, to strengthen the whole chassis. Handle and spool are anodized aluminium. So the reel can be spooled with braided line. The smooth drag has a Max Drag of 20 lbs and can be set up very carefully. 3+1 stainless steel shielded bearings. Fighting handle with power knob.

Code	Model	Weight	Gear Ratio	Spool Capacity	Best Drag	B.B.

NEPTUNE SR

3 SHIELDED
SS BALL
BEARINGS

Family of easy to use, long lasting and reliable conventional reels. Two models, 15/30 and 20/40 sharing the bigger part of specs, with the exception of the Max Drag, being 20 lbs for the smaller size, and 30 lbs for the bigger one. All the gears are salt water treated and perform a 3.8:1 gear ratio, the correct compromise between speed and power. The spool, and the handle too, is made from anodized aluminium, so it can be used with braided lines. Both sizes feature level wind for an easy use and perfect line lay. Graphite body is light weight and corrosion resistant. 3 stainless steel shielded bearings.

Code	Model	Weight	Gear Ratio	Spool Capacity	Best Drag	B.B.

030-55-300	20 / 40	520	3.8:1	Ø 0.45 mm - 260 m	30 lb	3

LINES & BRAIDED

First of all, the contact with bait or lure, then link to the fish. Not a mere accessory, but a vital piece of tackle, which deserves the best attentions. Line and fishing are actually inseparable.

DYNA TEX

PE braided lines with great strength per diameter, thanks to the high number of strands the profile is rounder, avoiding the line digging in the spool.

Series of monofilaments super resistant to shocks and knots, always reliable and top quality. A timeless classic of Italian fishing style.

Diamond

A true hi spec competition line. Quality and performance always consistent. It is just the best way to build super strong and totally invisible hook length.

MAXPLUS

A new range, specialized in the most common fresh and saltwater uses. Total reliability and a plus: the side cover which include the hole to hang each spool in the shop.

XPS

Hi-Tech monofilaments of the latest generation, each series is dedicated to a specific fishing techniques and it is essential due to its unique structure

Super soft and abrasion resistant monofilaments, the best for spooling your reels. Specific lines available for Match, Surf Casting, Predator, Feeder and, generally, for all the techniques that need long casting performance.

SUPER ELITE

The highest quality monofilament in the world. You will never find on the market any other monofilament with such a high strength test.

XP-Line

Reliable monofilaments family with specific polymers for each fishing technique. The parallel winding grants a great care of the product and an always consistent quality.

TPS TRABUCCO PARALLEL SPOOLING

Just after extrusion process, which converts the raw material into the final product commonly known as fishing line, the monofilament must already face some enemies, which tend to affect its integrity and degrade its quality. Ultra-violet rays get it older, decreasing its linear strength; the humidity is a critical factor, as it

shouldn't be too low, nor too high, because it has some influence on flexibility of the product and on its stretch properties. All elements which count a lot in term of specification's stability during the line's life, important details to whom Trabucco production pays a lot of care and attention. But there is a factor that, more than the others, can actually cast a dark shadow on to line's performances, and such point is the spooling process. When the monofilament gets from the big spools to commercial, small ones, the machines involved in the operation can induce abnormal tension and torque, up to "loading" the line with a stress that will be given us back when we will wind it on to the reel's spool or when we will use it to build up a rig or an hooklink. The solution used by Trabucco to overcome this problem on high end lines is the parallel spooling, a special process which cannot be applied on the whole range due to longer time process that, in the end, causes cost's increase. A very special machine lays every coil parallel to the previous one under high precision and minimal tension, without inducing any torsion and generating the fantastic effect which everybody can see through a magnifying glass. Excess of accuracy? Maniacal care? Nothing wrong, because only in this way the line will come off the spool with unchanged specifications, the best precondition to get the optimum from it, with less tendency to tangle and with a smooth flow through rod's guides.

Gábor Nagy

SPIN

DYNA TEX

Dyna-Tex is a super abrasion resistant braided multifibre line that can be used for spinning, vertical jigging, long range casting or for fishing with every other technique. It is practically non-elastic and incredibly soft to allow long casting. Dyna-Tex colour is moss green with a twist of yarns resistant to abrasion and twisting. When used as a shock leader it can be connected to the main line with a Mahin knot. For attaching a swivel we recommend the use of the Palomar knot and Eyed hooks can be fitted with the "knotless knot". The 80lbs version is targeted at big catfish fishing.

NEW POWER SILK FEEDER BRAID **DYNA TEX**

Specially developed for feeder fishing, this braided line is a combination of super strong Dyna Tex fibers and other heavier ones, which make this line sink perfectly and lay on the bottom. Such behaviour is well appreciated in feeder fishing, as it drops those line bows for ever. Therefore, the strike is neat, powerful and hook setting is very accurate: up to yesterday, just a nice dream. The available diameters allow to face all possible fishing conditions with a very high abrasion resistance and a round cross section. A shock leader twice long as the rod itself is highly recommended, maybe made from XPS Match Reel.

POWER SILK

DYNA TEX

Brand new Dyna-Tex braided line, very tightened weaving to achieve a rounder profile. External surface has been treated to achieve a silk like finishing, very comfortable and enjoyable during fishing sessions, when the braided passes through the guides of the rod with minimized friction. Breaking strength printed on label are reported to plain knot. More technical fishing knots will easily achieve higher breaking strength. Spool delivered in thick plastic box for better storage.

FUSION BRAID

DYNA TEX

Made using the latest Japanese technology, Dyna-Tex Fusion Braid is produced with high tension procedure which allows to obtain more compact fibers that can be better spooled on the reel, drastically reducing the possibility of tangles. The special coating provides exceptional abrasion resistance and a much smoother surface than the classical braided lines. This protects the guides, ensuring durability of the line and extreme casting performance. The total absence of elasticity allows you to immediately set the hooks even when fishing at extreme distance. Available in smoke grey from diameter 0,10 to 0,30 in a classy spool of 100m.

25m

NEW

Made from 100% fluorocarbon, this line is particularly soft, abrasion resistant and well sinking. Its main characteristic is the very low light refraction index, which makes it almost invisible in water. Remarkably waterproof, it keeps the original breaking strength - already higher than the average - even after a long time of stay in water. Perfect for hooklinks destined either to fresh or salt water, it is totally UV resistant for a longer life. From now, beyond the traditional 50 m spools, it is also available in 25 m version.

MATCH STRONG

Electronically controlled to ensure accurate and consistent diameter, this match line features unrivalled knot strength and softness. The clear, dichroic colour makes it perfect to build hooklinks and rigs for freshwater as well as saltwater. The advanced spooling process, based on perfectly parallel winding, enables to avoid those dangerous torsions which affect strength and casting distances, making the line virtually tangle free. Today, the successful XPS Match Strong family grows with the addition of new 25 metres spools, surely destined to succeed in the hooklink field, also in feeder fishing segment.

TPS

POWER PLUS

Last generation monofilament to create low visibility, high strength hook links. Polymeric chains that form the core of the line are longer and more powerful, giving as a final result a tougher and softer line, for a perfect presentation of bait. XPS Power Plus has a nice packaging with a PVC trade box containing another thick plastic box with line retainer to better preserve quality line from light and dirt.

LUCIFER LINE

The Lucifer is a brand very famous within the angling fans of England by many years. Under this brand name we have produced a wide range of specific product for the commercial fisheries and carps in general. Ideal for making rigs and even used as mainline. It is a pretty rigid monofilament, with total absence of memory and sealed by water absorption by the innovative ceramic coating process, new for this season. Crystal clear color.

MATCH PRO

Crystal clear colored, claimed as one of the best long pole and fishing to hand monofilament ever produced. The new ceramic technology launched by the T-Force laboratories has immediately encountered the approval of all anglers worldwide, as it gives an incredible knot resistance and linear strength. It is recommended as mainline for long pole and line to hand fishing, as well as for the rig making. The ceramic coating also seal completely the nylon core making it 100% waterproof without increasing the diameter, like happen usually with the normal silicone coatings. Another evidence of the superior technology of the T-Force laboratories, that have been always years ahead of the competitors.

SOFT FEEL

TPS XPS T-FORCE

The latest generation of high resistance monofilaments issued by the T-Force technology the World's leading producer of hi-tech fishing monofilaments. With its strength exceeding even extreme limits this line also features a total memory absence. XPS Soft Feel is a ultra-supple monofilament specifically developed for all styles of reel fishing. It's a floating line so it's particularly suited to Bolognese both for fresh and saltwater uses. Its smoothness helps the flowing from the reel spool during casts, without any kind of torsion and increasing casting distances. The ceramic coating of the nylon polymer core, makes this line completely waterproof and totally memory-free.

MATCH REEL

TPS XPS T-FORCE

Smoke grey colored new monofilament, of last generation, developed for all kind of reel fishing styles. The particular technical qualities of these new nylon resins and polymers, allow to a better flow into the guides, superior to any other high quality reel line in the market. It also helps the flowing out from the reel spool, without any kind of torsion. The ceramic coating of the nylon polymer core, makes this line completely waterproof and cancel any kind of memory. Despite its strength, the new Match Reel is supple and soft. It is spooled in parallel, in 150mt spools packed into a new Japan style box, very classy. It is truly one of the best specific reel line, that combine the greatest flowing and abrasion capacity together the legendary and even improved resistance of all T-Force monofilaments.

New line made through a very special production process, which integrate nano-particles of ceramic into a polymer matrix. Those particles, well known in the industry for their properties to resist any sharp step in temperature, protect the line's core in ice-cold conditions, which are the worst enemy of line's softness and breaking strength. The exter-

nal fluorocarbon layer adds protection from abrasion, UV rays and aggressive agents. The final result is an extremely high performance line, destined to draw the attention of the northern European anglers who fish on ice, as well as the continental ones who like trout fishing, and who will appreciate its resistance to cut. Each spool is supplied with a soft,

elastic ring which enables to pick up the needed segment of line; a typical sign of attention to user's needs, which marks the Trabucco production since ever.

MATCH SINKING

Japanese production monofilament made especially for waggler or feeder fishing. The main feature of this innovative monofilament is its high specific weight which allows it to sink extremely easily. Special surface treatment ensures high abrasion resistance and total absence of memory, both fundamental for this type of fishing where the line is subject to great stress. The special molecular composition ensures low elasticity for rapid, sure strikes. Parallel wound to better preserve its incredible characteristics. 150 & 300m spools.

FEEDER PLUS

TPS

XPS FORCE

Feeder fishing is becoming more and more popular, that's why we introduce an upgraded monofilament specifically designed. We paid a lot of attention to abrasion resistance and sinking ratio, two of the most important features for a feeder line, obtaining what's probably the best line actually on the market. Stretching is significantly reduced to detect even the most delicate bites at long distance. In a camouflage color to match the lakedbed.

TROUT

TPS

XPS FORCE

This new transparent monofilament is dedicated to all the people who loves fishing for trout in lakes or in natural waters. Its color makes it perfect for use especially in crystal clear water. The special manufacturing procedure used makes it extremely resistant to twisting and the extremely smooth surface allows to reach incredible casting distance even using light-weight lures or rigs. Available in five different diameters on 150 meters spool.

BLACK BASS

This new dark green colour monofilament has been developed for Black Bass fishing, highly demanded by the US market and also from Europe during the last years. It is the strongest polymer ever produced by the T-Force laboratories, with a very low stretch capacity, softer than any other specific spinning line, and it offers the right technical features that allow the angler to more accurate and longer casts. The absence of elasticity gives the "direct bait control" allowing to have the faster strike capacity you have ever experienced.

SPINNING PIKE

Another specific spinning monofilament. We have used the qualities of the Black Bass but in this version we have increased the abrasion resistance, in order to offer the greatest resistance to the jaws of those big Pikes. The absence of elasticity allow the immediate strike, and also helps the reel drag during the fight. dark green colored, offered in spools of 150mts, parallel spooled and individually packed from diameter 0,16 up to 0,35mm.

CARP ENDURO

A carp fishing Japanese production monofilament. Principal characteristic of this monofilament is the high specific weight that allows to sinking with extreme facility. The surface treatment guarantees besides, a high resistance to the abrasion and a complete absence of memory, fundamental in these types of fishing in which the mainline is submitted to strong stresses. The molecular composition guarantees a low degree of elasticity, that allows a strong rapids and sure hook setting. Spools comes in parallel winding to preserve to the best his unbelievable characteristics.

TROUTER

The innovative line structure combined with the external silicone coating, reduces the mechanical memory of the line maintaining a great softness, ideal for a correct bait presentation. Completely impermeable, the particular coating isolates the inner line structure from external agents, preserving the line characteristics for a long time and also in the lowest temperatures. The frictions are reduced to the minimum allowing long castings and reducing to the least one the abrasion against the guides. The transparent colour maintains low refraction degree in all kinds of waters.

SPINNING PERCH

Monofilament expressly developed for Perch fishing both with live or dead baits or spinning. It comes in a microic light grey color, invisible under water. It features an excellent abrasion resistance and a controlled stretch this to allow more accurate and longer casts. The absence of elasticity gives the "direct bait control" allowing to have the faster strike capacity you have ever experienced and a bait control. To achieve this results T-Force has developed specific polymers, added an higher tensile and knot strenght. It comes in 150mt spools parallel spooled and individually packed.

PRO CARP

This monofilament, created by top Anglo-Saxon experts especially for Carp Fishing, is highly abrasion-resistant with great knot strength and a complete absence of memory, combined with low elasticity for rapid hook setting even over long distances. During casting its softness reduces friction with the guides to a minimum, allowing longer, more precise casts. The brown colour gives perfect camouflage. Parallel wound in 300 to 1.000m spools.

TOURNAMENT TOUGH

Spooled with the system "parallel" that eliminates completely the line torsion during the production process. This version Tournament Tough is particularly soft and with an extraordinary traction strength. It is recommended for fishing with telescopic whips but also for reel fishing for long casts. The color is clear microic. Delivered in single box with spools of 150, 300 and 500 mts, with diameters from 0,106 up to 0,50 mm.

SUPER CAST

This monofilament has been developed for the reel fishing, such as spinning, for its great flowing capacity. It allows to long distance casts and it features a superior abrasion resistance than many other monofilament in the market place. The pale green color assures a perfect mimetism into the water. It is available in spools of 150, 300 and 500 mts in single spool box.

SUPER ISO

XPS FORCE

This version of T-Force has been developed for sea fishing. Extraordinary strength and resistant to abrasion and corrosion due to the salt. Its knot strength had become a legend into the fishing world, and is superior to any other monofilament in the market place. The dark blue color makes it invisible in fishing.

TPS

DEEP ISO

FORCE

This new Monofilament is specifically developed for boat fishing. It is highly visible and soft with a total lack of memory. The special red color is highly visible on the surface for better control of line, while at 10m of depth makes it absolutely invisible to the fish. Deep Iso is particularly resistant to traction and torsion, and can therefore be safely used for trolling. The silicone-based coating makes it waterproof and airtight to combat saltwater marine agents.

TPS

SPECIAL SEA

FORCE

T-Force mono created and developed with trolling and game fishing in mind. The color is crystal clear, and it has an unbelievable resistance to the abrasion and sea corrosion. This line has virtually no memory, an ideal quality for a trolling line. During the production process it is coated with a special resin treatment in order to seal the polymers and protect the line from salty agents. Supplied with 300mts spools in individual box.

TEKNO SALTWATER

T-Force XPS Tekno Saltwater is a super high quality nylon mono that is very different from almost any other line on the market. Its molecular structure is organized to avoid stretching and to keep a very good breaking strength. In a nutshell, it performs very close to a braided line, being really sensitive, but still keeping the good qualities of nylon monofilaments, such as a lower friction when passing through the guides and a superior manageability. The crystal blue colour and the silicon surface treatment make this line really perfect for bottom fishing from the boat and spinning.

TPS

SEALION

T-Force has been always at the fore front of research and development applied to fishing line and only thanks to this continuous efforts we're able to present this hi-tech line that combines the advantages of the fluorocarbon to the characteristics of T-Force lines. The main features of the fluorocarbon coating are the low-level light refraction which makes it completely invisible in the water, the increased abrasion resistance and the super smooth surface to aid casting distance and accuracy, all combined with a low stretch. It's also totally waterproof to avoid water absorbing and maintain its breaking strength after many hours of use. Whilst the inner core guarantees a great suppleness, high knot strength and memory free. Designed primarily for saltwater fishing, both to be spooled or as a rig and hookline line.

SPECIAL CASTING

As all the other lines of the T-Force series, Special Casting is parallel spooled, an exclusive production process that completely eliminates the line torsion. This version is hot red coloured, and it is recommended for sea fishing because the red colour is the first colour that disappear into the salt water, due the light refraction. It can be also used in fresh water, for those techniques that require a great line flowing for extra-long casts.

FLUOROCARBON

SALTWATER

Brand new Fluorocarbon 100%, super soft and specifically designed for the most challenging techniques in salt water. Vast range of diameters, going from 0.12 to 1.00, in 50 meters spool from 0.12 to 0.50 and in 25 meters wrist spools in bigger diameters. Packaging is really interesting cause inside the PVC trade box, there is another thick plastic box with line retainer to better preserve quality line. Abrasion resistance superior specs you can't do without in saltwater, and close to total invisibility underwater.

- High Abrasion Resistance
- Superior Knot Strength
- Molecular Treatment
- Tournament Class
- Super Soft

NEW BIG GAME

Excellent big game line, packed in spools of 600 metres to take full advantage of reel's capacity with limited waste or none at all. Its light blue colour, highly dichroic, allows a perfect bait or lure presentation. The multi-layer structure is due to the most advanced Japanese technology: the high strength polymer core is wound by a first layer powered with ceramic components, which are there to bear temperature gaps. A second film takes care of abrasions and keeps out the dangerous UV rays, then the upper coating is made from special silicones which protect the line from salt, of course one of the worst enemies of any fishing line. Both linear and knot strength are particularly brilliant.

NEW SOFT MAX

When fishing with natural bait or lure, the leader's suppleness can make the difference between success and failure, because it can afflict bait presentation. Apart from suppleness, one of the most important features are abrasion and shock resistance, which are both offered by this new line. In fact, Soft Max has been tailor made to do that job, also because it's ultra-soft and – at the same time – shows a particularly tough surface which protects the core from aggressive agents and fish's teeth. The remarkable shock resistance comes from the programmed stretching, which helps hook's setting as well as absorb sudden hits like fast bites, which are so common in saltwater fishing. The line is crystal clear and shows a very high knot strength.

NEW LONGCAST FLUO

XPS FORCE

A nice aluminium box is the individual container of this quality line's spool: a touch of fashion but also a reliable protector from aggressive elements during the product's life, on the shop's wall as well as at user's home. The product belongs to a special family of lines, which in Japan is well known and respected by surf casters. Products with a remarkable softness, featuring a silky skin due to a secret silicone treatment. The line runs smoothly through rod's guides, with great advantage in term of casting distance. The second quality point is the high visibility, thanks to the strong colours, and Longcast Fluo follows the trend with its intense and persistent fluo orange, greatly useful in night fishing. A small sticker, applied every 150 metres, enables to draw the best from the huge spool's content.

SURF DISTANCE

XPS FORCE

XPS Surf Casting Distance monofilament have some new and important features: the light pink colour used allows to easily detect the line, which is extremely important on this kind of fishing. In the meantime the light pink became barely visible under water, helping in all the situations with suspicious fish. We used a special manufacturing process which makes this line totally safe from saltwater, even after long use. Totally memory free and smooth, this line will make possible to reach extreme casting distance.

TAPER LINE

Tapered monofilament especially for surf-casting. Exceptionally resistant to abrasion and traction. The last 15m of this special monofilament are tapered on both sides to act as a flexible coupling leaders so that in the event of prolonged use or breakage of the tapered leader the monofilament can be rewound backwards onto the reel to give a perfect monofilament with tapered leader with flexible coupling again. It is knotless to eliminate the chance of breaking under tension. Sold in 10 x 250m spool packs.

XPS FORGE

Specially developed for Surf Casting competitions, it's produced in an intense, warm yellow colour which is quite visible both under daylight and during the night, when the head lamp allows to immediately find the real direction taken by the line. Extremely soft, velvet skinned thanks to silicone treatment and without memory, it flows easily out from the reel's spool, allowing long casts and preventing the inexperienced user from creating line tangles. On the knot side, it's easy to pull tightly, even in larger diameters: on the hook's shank as well as on shock leader it creates neat and small knots. The range of diameters is wide enough to satisfy every need of the modern surf caster.

SPECIAL SEA HI-VIZ

XPS FORGE

New saltwater monofilament in white colour, available in 300 and 600 meters spool. This monofilament is mainly made for boat fishing but can be used also for fishing from the shore when high visibility lines are required. The special manufacturing process used for this line make it perfect for heavy duty fishing, like when you need to boat the fish as faster as possible or while fishing closer to rocky areas.

SURF CASTING

A surf-casting monofilament extremely soft with a total absence of memory. It allows longer and precise casting of any other monofilaments in the market. The special covering by a new silicone coating, makes it impermeable and unassailable from the sea agents.

150m

300m

This line has been developed for those anglers that need to make very long casts. The color fluo-yellow is immediately visible for the angler, but it is almost invisible into the water. This line has a very good flowing qualities, high abrasion resistance and it is super soft, a combination of factors that allow this line to be the best in terms of casting

capacity. The very low elasticity allows the angler to be always in close contact with the bait and transmit an immediate strike on the bite. It is completely waterproof, like all the S-Force monofilaments, and as well as saltproof. Available in spools of 150 and 300 mts in individual box.

LONG CAST CARP

S-FORCE JAPAN

Monofilament especially developed for long distance night fishing. Thanks to the particular composition and the colour yellow-fluo crayon, results in very high visibility at night or in poor light. This version features good fluidity, thanks to the spooling system and particularly the silicone coating that reduces the resistance allowing longer casts. Low elasticity maintains an immediate contact with the bait and the hooked fish. Excellent abrasion resistance and strength under tension.

TPS

SOFT CARP HV

S-FORCE JAPAN

The main characteristic of this mono is the fluorescent green coloration, that makes it visible to the angler in any conditions whilst also maintaining a good low visibility in the water. The surface silicon treatment, drastically reduces line abrasion, guaranteeing a long life duration without equal. The absence of memory and the softness ensure correct and smooth line travel from the spool during casting, enabling longer and more accurate casts. To further improve the performance a new parallel spooling system has been adopted, that eliminates uneven tensions in the production phase.

This version of S-Force has been developed for trout fishing with the special style of "bombarda", those special floats typically used in Italy but now spreading

in all Europe. The particular structure gives a very low memory to the line but offers as well a great softness. It is completely waterproof, and it keeps all the technical prerogatives also in extreme cold waters. The color is a new pastel violet, immediately visible out of the water but almost invisible in depth.

MATCH SINKING

One of the best-selling line of the range. The special coating based on silicon, give to this line a great fluidity during the cast, assuring to angler much longer casts and a long lasting. Once experienced one of our S-Force lines, you will never come back to another line. The main features of this particular version is the controlled stretch capacity and the sinking quality, as well as an unbelievable and complete absence of memory. It is a line highly recommended for waggler and feeder fishing. The colour is a very dark blue, nearly black, and it is parallel spooled.

Gianluigi Sorti

NEW MAX PLUS ALLROUND

This line can be employed both on the reel and to make rigs, thanks to his low memory and high abrasion resistance. Those factors generate a great knot strength, because knot's coils can be much tightened without risking that they damage each other. Beyond the technical specifications, the Max Plus Allround shows an incredible value for money. The product is suitable for any fishing style, both in fresh and saltwater, and is packed in 150, 300 and 1000 metres spools protected by a special cover which protects line from UV rays and enables the retailer to easily hang them on to the shop's display wall. Colour is light transparent green.

NEW MAX PLUS BOLO

New line featuring an amazing abrasion resistance, thus protected against shot's pressure, rod's guides friction and sliding floats rubbing. In addition, this product is notably soft and memory free, specifications which produce a smooth flow during casting. The wide and soft coils are a real advantage, specially when the rod is wet due to rain or water droplets at sea side, because the contact points are down to the minimum. Max Plus Bolo is packed in the classic 150 m spools, featuring a shell which both allows hanging it to display boards and protects line from sun light. The colour is transparent light purple.

NEW MAX PLUS CARP

The new Max Plus Carp is a highly specialized line, mainly oriented to big fish hunting thanks to his huge abrasion resistance and knot strength. In addition, the low memory and reduced stretch at low fast and accurate strikes, as well as an improved bite detection. The brown, dichroic colour is quite mimetic in most water environments, thus ideal for big carp fishing. The value for money is really attractive, as well as the packaging; in fact, the product is presented in 150 and 300 metres spools, with a side shell which filters UV rays and also include the slot destined to hang on to shop's display panel.

NEW MAX PLUS SPECIMEN

The perfect line for match and feeder fishing, designed through a special formula which enabled to get a product featuring high gravity, thus sinking and stiff. The surface treatment provides high abrasion resistance, very low memory and stretch, plus high knot strength. Packed in 150 metres spools, it's protected from UV rays during its shelf life, because the special side protection filters light. The glossy black colour helps the user to see where the fish goes during the fight. The product shows an interesting value for money.

NEW MAX PLUS SPINNING

This new line has been specifically designed for spinning, where it does the job thanks to its very low stretch. This specification generates a greater sensitivity, offering to the user a neat perception of lure movements and contacts with underwater structures, as well as quick and neat strikes, even in difficult conditions. Providing extreme linear strength, at the same time it is particularly soft to ease accurate casting. Coloured in dark green, it's packed in the traditional 150 m spools, featuring a protective shell which keeps UV rays off and includes the hole to hang it on shop's display wall.

NEW MAX PLUS PHANTOM

Phantom is the "ghost" line within Max Plus range. His crystal clear color makes it almost invisible in water, practically performing like the universal solution for all reel fishing styles, also giving the best in case the straight line is a must (without hooklink). Other relevant merits are high abrasion resistance and knot strength, along with a nice smoothness, always a good asset in term of bait presentation. Undoubtedly, the whole specification list draws the attention of sea boat experts, as they can use it to make perfect multiple hook's rigs. The line is offered in 150, 300 and 1000 m spools, with a surprising value for money and with a nice cover which acts as UV rays protector and include a slot for the application on to shop's display boards.

NEW MAX PLUS SUPER SEA

Coloured in light blue, it's the perfect line for sea fishing, even when water is particularly clear. The extremely high abrasion resistance is further enhanced by a surface treatment which makes it very smooth and protects it from aggressive agents such as sun light and salt water. The outstanding softness also helps knot's tightening, which become very small. Wide range of packing, with standard spools of 150 and 300 m, plus the 1000 m version for the intensive users, all featuring the side shield which include the hole to hang them up on to shop's display boards.

XPS SUPERCARBON HOOKS

LASER SHARP POINT

Extra Performance Series is the name of Trabucco quality hooks developed for top match anglers, which now gets much wider also touching different segments such as feeder fishing, commercial carping, trout fishing, light drifting and beach ledgering.

In line with existing series, also the new ones display "extra performance", because the extreme quality is not only achieved with the development of new shapes, but also through the employed materials, the finish and functional details. The strength/lightness ratio has been tailored size by size, taking advantage of the special hi-carbon content steel, which is only available in Japan, where these fantastic hooks are produced under strict quality control. All points are chemically sharpened, then further finished by laser to get absolute perfection and durability.

NEW

NEW 120 XN

N Nickel **●** Regular

This pattern is well known all over Europe since when the carbon content steel was unknown in the fishing tackle industry. From roach to mullets, from eels to soles, it has caught so many species both in fresh and salt waters, showing great efficiency when baited up and while removed from fish mouth. It's popularity is certainly also due to the long point, parallel to shank, and to the narrow ankle which provide bait and fish hold. All bait which are normally pushed on to the shank are finely matching it: from pinkies and squatts to earthworms in freshwater; from anchovy fillet to shrimp's tail in the saltwater.

NEW 121 XB

BR Bronzed **🔨** Forged **🔪** MicroBarb

Its code recalls the classic 120, as its shape comes from long shank popularity, but its strength is stepped up. In fact the wire thickness is oversized, thus the point has a wide base which enables it to bear stress and torsion inevitably generated during those long fights with big fish. Maggots, casters and worms are the ideal baits for it to catch chub, carp and huge bream, both on the pole and on waggler or feeder rods. No need to add a big barb on such strong point: that's why Trabucco team opted for micro barb instead.

NEW 110XN & 110XK

● Regular **🔪** MicroBarb

The great hooking efficiency and the extreme strength are the reason why this pattern is extremely popular all over Europe. As a matter of fact, this is the hook used by Goran Radovic, 2014 World Champion, for his fantastic pole show with many big barbel caught in fast running water. The long, ultra-sharp point with beak profile provides quick and deep penetration also in the hardest mouths, with the narrow ankle ensuring that fish can't get rid of the hook. With maggots and worms is a brilliant partner for pole, bolo, waggler and feeder rods. It is offered in two different finish: nickel and black nickel.

XPS

INNOVATIVE PACKAGING

The new bags contain 25 hooks to keep the individual price as low as possible. Their design has been cared in every detail, with upper part of the card changing main colour according to hook's finish, while the lower portion is almost free from decorations to allow the best possible visibility of the product inside. In order to enable the consumer to quickly identify the hook's shape, it has been printed in a dedicated cell. For the first time ever, also wire diameter is indicated on each bag, so that the user can evaluate the strength level, maybe making comparisons between different series.

IN THE SHOP

Every 10 bags of hooks, the retailer will find a back card showing the product's item number. Such card should take place on the display wall, beyond hook's bags, and will be useful to place an order when he will run out of stock.

NEW 631XB & 631XK

For all match anglers across Europe this pattern is a must since the eighties, and its popularity is probably second to none, thanks to the extreme efficiency in many conditions. The wide, round bend can accommodate several baits like maggots, casters worms, sweetcorn, punched bread and all their cocktails. Good for waggler and feeder fishing, has shown great chances with the bolognese and pole, too. Trabucco offers it in two different finish: bronzed and black nickel.

NEW 410XN

N Nickel Regular MicroBarb

An extra-fine version of series 631, it keeps the round, wide bend and the long point, but it's even more match fishing oriented thanks to the fine wire, which enables to obtain perfect presentation when fish are particularly shy. Also the shank's length has been changed, opting for a longer lever which improves strike's efficiency very much. In case of sea match fishing with telescopic poles or bolognese rods, such shank helps saving hooklinks from fish teeth. The micro barb does not damage the delicate worms like bloodworm and is also perfect for bread punch canal fishing.

Above, a single caster perfectly presented on a 631XB hook; below, a nice scardola caught by Gianluigi Sorti on the river Mincio around Peschiera del Garda.

NEW 635XB

BR Bronzed Regular MicroBarb

Among many variations of the classic 631, now available in the market, this genuine one from Trabucco offers an incredible strength to catch big fish with small bait like single maggot, casters and worms. Compared to the standard 631 pattern, its wire is oversized and point is much longer, a detail which the experts regard as very important. The micro barb does not damage the living baits, with the obvious advantages in terms of catches. Nowadays, match venues are subject to extreme pressure, so the fish are more and more careful in front of big hookbaits and quite often pick up very small ones. Try it, and you will understand why we forecast a great success for this series.

NEW 701XK

BN Black Nickel Forged Barbless

More and more match anglers now understand the great advantages of barbless hooks, which really can improve catch rates not only with the pole, but also with bolo, match and even feeder rods. All the words spent by experts, journalists and match winners about natural presentation immediately come into reality when somebody tries hooks like this 701XK by Trabucco. Both living baits and fighting fish are held by hook's ankle, a vital part of the design because all stress and hooking power get through it. Problems greatly solved by a slightly forged curve and an in-turned point.

NEW 415XB

BR Bronzed Regular MicroBarb

An excellent match hook, destined to high grade anglers who can draw the best from it by fine elasticate of their poles. In fact, lightness is its best merit, and this factor puts the 415XB on top of roach and bream hooks, which are known to be very careful when picking up any bait which is presented in unnatural way. Before float's antenna shows any sign of life, they reject the hookbait, which is left damaged and surely cannot produce another bite! The micro barb is a must to limit the damage to delicate living baits like bloodworm, maggots and small worms.

NEW 210XB

BR Bronzed Regular MicroBarb

Specially developed for tough match conditions, when sudden hookbait change can produce unexpected bites. That's why this series has been designed with medium wire and with a wide gape which can allow to alternate different bait without replacing the hook. Therefore, a bunch of maggots can leave the place to a sweetcorn grain, or to a worm and caster cocktail, or even to several, small worms to form a sort of octopus. Practically, the angler can go for colour contrast or stimulate the attack by wriggling baits. A true allrounder which can't miss in a serious seatbox.

NEW 440XN

N Nickel Regular

A great balance between lightness and strength is the secret of this allround hook series, which is perfect to match a wide variety of baits: from maggots to worms, from bread to sweetcorn, from natural honey worms to silicone ones which nowadays are getting more and more popular among trout anglers. The ankle is there to keep the hookbait into correct position, and this is more important in case of trout fishing, because the whole thing must actually rotate during retrieve. On normal hooks, the hookbait tend to slide down the bend, affecting the rotation: this is not the case with 440XN.

NEW 623XK

BN Black Nickel Forged MicroBarb

This is a medium wire, long shanked hook which can face thousands of fishing conditions with great success. The black nickel finish is not only a matter of fashion or a nice cosmetic, but provides protection from abrasion and salt, specially on the weakest area, which is the point's end. This means that the hook can last longer, specially in tough conditions like saltwater fishing. The ankle has been designed to suit trout fishing, because soft worms need to be kept in place, otherwise they tend to slide down the gape, actually affecting the rotation of hookbait, which is vital to catch many fish.

Goran "Gica" Radovic during his fantastic performance at 2014 World Championship.

NEW 710XB

BR **Bronzed** **Forged** **Bent**

A great hook to be used when the stress is high, but some finesse is needed at the same time. It's the case of big chub fishing with the bolognese rod and casters as hookbait. The presentation must be spot on, but the fish requires strength to hold and drive it to the landing net. It's also the case of matches involving feeder fishing, specially when bream are the target species: some lightness in the approach pays dividends, but any bonus fish must absolutely reach the keepnet. The most innovative area of this hook is the point, as it's fine on top, then it quickly gets thick and ends with a relatively small barb. Easy penetration as soon as the fish picks up the bait, then safe hold. Definitely worth a try.

NEW 666XK

BN **Black Nickel** **Forged** **Bent** **Barbless**

In most rivers holding big fish and nearly all commercial lakes, the barb is banned to protect fish destined to be released. That's why the new XPS range also include a hook like this, combining high strength with barbless point. The bent gape provides great hooking efficiency, while the in-turned point creates a narrow ankle which is in charge of holding the fish during hard fight. With black nickel finish, the point gets an extra protection against wear, allowing the angler to catch many fish without being forced to replace the hook before the end of the match.

Mario Barros

NEW 405XN

N **Nickel** **Forged**

A quite powerful hook, useful when the expected catches are potentially big. His shape is well known and widely used in Italy since ever in case of heavy leger fishing for carp, big barbel and tench, as well as at sea side for sea bream and many other strong fighters, which can actually crunch the hook together with the bait! His powerful structure makes it the ideal partner for feeder and method fishing, where it can match strong hooklinks. The commercial angler can get benefits from the smaller sizes, which also display adequate strength.

SYMBOLS 1 Hook Size ...020 Product Code

The correct presentation of a living crab on three XPS 735XN hooks, simply the best in the sea bream fishing. In spite of the rig, the crab is free to walk on the sea bottom, attracting the attention of the fish. The hook's size doesn't matter so much, because fish teeth actually crunch the crab's shell, enabling the points to fit, but it's their strength which counts the most. With their special carbon steel and forged bend, 735XN hooks are actually too strong even for such a powerful fish!

NEW 735XN

N Nickel **F** Forged

Specially dedicated to sea fishing, this hook is tremendously reliable and efficient. For such reason it's the main choice of boat anglers in the Mediterranean sea, who can catch big fish with paste bait or even tough shells. Compared to shank's length, the point is quite long, as it goes beyond 50% of total hook's length. This specification grants a firm hold in any condition, and, combined with beak profile plus in-turning design, makes a fantastic combination of power and safety.

NEW 261XK

BN Black Nickel **F** Forged

All those anglers who love hard fighting fish know that often they live under thick covers or between snags. In such environments, the fish must be quickly pulled away from the dangerous features, but, to do so, the hook must bear tremendous pressure. This 261XK is the solution developed by Trabucco team, with a super strong structure and an in-turned point which never gives up. Black nickel finish provides extra protection against abrasion and saltwater, actually expanding hook's life.

NEW 620XK

BN Black Nickel **F** Forged **B** Bent **3D-CUT**

A stunning concentrate of strength and efficiency, with the fantastic 3D point, the super strong structure and the bend which pushes the hooking power beyond the imagination. The special point is almost flat on the inside, while has a rib running along the outside. Such feature strengthens the whole point, without affecting the penetration at all, easing it through the toughest mouths. The end result is a fantastic hook mainly for sea fishing, but also for commercial fishing in the smaller sizes. Black nickel finish offers protection against wear and salt.

XPS SPECIAL SERIES

The five series shown in the 2014 catalogue are confirmed also for 2015 season, because the success they gained amongst top match anglers has really been wide and enthusiastic. Three of these series feature the PTFE finish, a Japanese technology which pushes hook's efficiency to an higher level.

TEF-TEK

PTFE is a well known polymer which is frictionless and highly resistant to wear. Once applied to XPS hooks, it dramatically improves their performances.

- Camouflage: the hook's colour is faded, thus less obtrusive towards the environment in which fish live and feed. The absence of any reflection is worth specially when fishing shallow or gin clear waters.
- Protection: the PTFE treatment protects the point from abrasion caused by multiple catches and inevitable hit to the bottom or snags.
- Efficiency: thanks to the extremely smooth surface, the knot's coils get very much tight and neat. Consequently, the knot's volume is reduced with the resulting improved presentation.
- Bait hooking: The hook's point gets easily through living bait's skin, without causing any tear even in case of thick wire, which is the case of most feeder patterns.

TFK 10

Brand new hook coated with the innovative Tef-Tek process and chemically sharpened needle point. Featuring a wide gap, medium wire shank and extremely strong. With micro barb and slightly reversed point. Ideal for big-sized fish.

PRO SWORD TO NYLON

The Pro-Sword hooks to nylon are produced with handcraft work, in order to give the best performance.

They are tied with a Japanese monofilament of very high quality, supple and with an excellent knot strength. The hooks are tied in order stay and show the bait always in the right position, perpendicularly on the ideal fishing line.

The quality controls are very strict and accurate, because these hooks are made for competitions, and so they must offer a constant quality during the whole production.

The special packaging makes extremely easy and fast to take out the hooks, and avoid the creation of sharp corners on the line. The selection of the patterns we have used is the result of a 20 years long legendary fishing career, all over the rivers of Europe.

Every bag contains 10 hooks to nylon.

HIGH CARBON STEEL HOOKS
SUPER SHARP NEEDLE POINT
JAPAN TECHNOLOGY

NEW P1039 MATCH

A classic hook for modern feeder fishing, offering a nice balance between strength and lightness. The out-turned eye helps knotless knot to be used to form hair rigs and present sweetcorn, pellets and mini boilies. The fantastic beak point is designed with a fine top edge in order to provide the first prick when the fish bolts and is strong enough to hold firmly during the fight with big fish.

BR Bronzed

Ringed

NEW P1003 POWER

Nowadays, the gap between heavy feeder and carp fishing is narrow as never before, specially thanks to method fishing and thanks to the wide offer of dedicated baits such as pellets and mini boilies. This means that hooks are subject to higher pressure than in the past, so Trabucco team decided to also develop special hooks like this. Every detail has been carefully studied: from wire thickness to turned eye, from super sharp beak point to nice bronzed finish, a must for this sort of hooks.

NEW F31-SURF

Specially developed for light surf casting, it's the ideal weapon to search fish when they are particularly shy, as it can present worms in the most natural way. The beak point grants penetration and holding properties, while the long shank offers room for long worms, easing both baiting and disgorging operations. The straight eye can be tied in several ways, saving most of the line's breaking strength.

PRE-TIED RIGS

Series of rigs ready to use and developed and tested by World Champion anglers. Thirteen versions for every kind of ground bottom and fish species, assembled with first quality accessories on a special semi-soft spool on which they can be easily rewinded once used.

GREY MULLET SPECIAL

This 5 or 8 hooks rig has been designed and created for grey mullet fishing, but it has also proven attractive to many other species. It can be used in two different ways: 1) On the surface baited with a piece of stale bread - 2) On the bottom with a tangerine-sized ball of groundbait. For the latter application, Trabucco Team Master Mullet White groundbait is recommended.

Grey Mullet 5

SPECIAL STRIPED BREAM 140-150

This rig has been designed and created for striped bream fishing and for sandy bottom fishing. It is used while drifting so that when the line is cast the rig lays out perfectly. The weight is attached to the swivel with a spring catch and the tip works with two hooks under the sinker and one above. Suitable for use on all sandy or muddy bottoms for catching striped bream, sea bream and gurnard.

MACKEREL PLUS

This rig has been designed and created for fishing big chub mackerel. The large hooks can hold copious amounts of bait for even super size fish! Usually used in suspension with light weights or sometimes mounted on a line with a sliding float. It can also be used successfully for other techniques such as fishing from the shore.

SABIKI

Sabiki rigs are the best way to fish from the boat for small pelagic predators such as mackerel and scad.

The chemically sharpened carbon hooks are equipped with feathers, fluorescent beads and fish skin. We suggest to use our rigs with a weight proportioned to the stream of the water. A too heavy lead will make your fishing not really good. Your Sabiki must always fluctuate in the stream.

WATCH THE VIDEO

FUEDAY

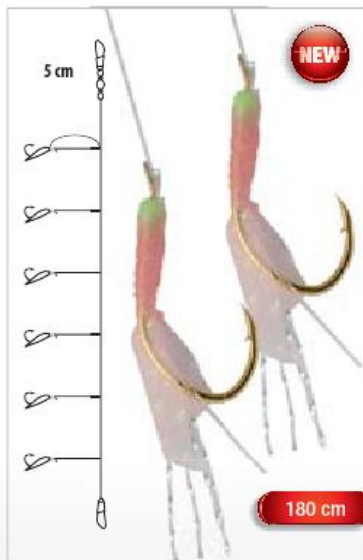

Ready tied rigs for both freshwater and saltwater fishing, that can be used even without any live baits thanks to the special feathers and fish skins used to assemble them. With Sabiky you'll be able to catch fishes all around the world. Each rig have been tested for long time before its launch on the market. One of the most important advice is to try them with different size of leads, as they allow you to change the retrieve. Instead to use a lead you can try them with a feeder filled with groundbait, to stimulate the fishes to feed. Available in different combinations hook/monofilament, in many varieties and different colours.

FLOATS

The Trabucco catalogue floats section is a wide-angle shot showing how our Company is deeply involved in every aspect of fishing. You can find Hi Tech floats for competition and very good quality floats for passionate anglers, and they can be used both in fresh and salt water. The assortment is also rich of floats that can be used in combination with a chemical light. You cannot do without them if you are fishing in salt water or in carp fisheries night competitions.

DREAM TEAM 1

Competition float for still water, very good in a wind condition. The slim shape with the stainless steel stem and fluorescent glass fibre antenna are perfect for bloodworm fishing.

NEW SUPREME SAIL

The slimmest flat float in the world performs brilliantly thanks to its narrow profile, which gets the minimum pressure from the water when it's hold dead still. Beyond the slimness, the body perimeter is well sharpened to let water run smoothly along its sides. The result is a very stable, vibration free float which enables to use a 20-30% lighter rig compared to traditional flat floats.

NEW CARP BLUE

A new generation of unbreakable pole floats, mainly destined to commercial lakes (carpodrome) as they can bear extreme pressure as well as any accidental shock. Their body is made from EVA (Ethilene Vinyl Acetate), an artificial material with a sponge-like structure which line can't cut. Having no metal eye, the rig line is completely straight, thus free from any damage.

NEW RACE CARP

In the commercial fishing (carpodrome) the float must bear any sort of stress and shock, with line tending to cut the body during extreme traction. That's why Trabucco developed these in-line floats for such matches.

Size	2.00	3.00	4.00	6.00

MARKER TROLLER

Float designed for trolling with live or dead baits. The shaped tube is used to adjust the fishing depth, avoiding that it does not slip down towards the bait when trolling or retrieved. The Red fluo painted tip guarantees an excellent visibility in every conditions.

MARKER AGGRESSOR

Float series products in transparent epoxy material. The ends are painted with fluorescent paint for high visibility. Available in different configurations, they lend themselves to various fishing situations, including long distance. Excellent for fishing at sea and in fresh water and even in very deep water. Ideal for fishing with live baits. Excellent value for money.

GROUNDBAITS

Trabucco produces its own groundbaits since 1986, by selecting the best ingredients on the worldwide markets, and by formulas created and developed on the banks of the rivers and competition venues of all Europe, and most of all, by the experience of a living legend like Roberto Trabucco.

Maurizio Fedeli

ULTIMATE GROUNDBAITS

All the Trabucco groundbaits are ready to use and don't require any additional ingredient in general sense, but of course every angler has his "secrets" and the wide range of ingredients and aromas of our range, can match every kind of demand and requirement. Our range is made by three series: the Team Master, recently developed in cooperation with the World Champion and Italian Champion Luigi Sorti; the Ultimate, issued by many years and rekon at international level, one of the best and most complete available in all market places.

XP 3000 LEAM

These are the special leams developed in cooperation with Team Ravanelli; successfully used during National and International matches.

Maurizio Fedeli

XP3000 Damp Leam is an extremely soft terre de somme with very fine granulometry, therefore ideal for the realization of the over damp leam or possibly sieved dry from the bag, to create the classical cloud to stain. Damp Leam XP 3000 is available both in classic brown color and in black. XP3000 River Leam is heavier than the previous ones, especially suitable to add weight to any groundbait or to be used in medium fast rivers with frequent baiting action (classic example Medelana venue).

Code	Description	Bag
062-16-100	Xp 3000 * Damp Leam	2kg
062-16-200	Xp 3000 * Black Damp Leam	2kg
062-16-300	Xp 3000 * River Leam	2kg

ADDITIVES AND INGREDIENTS

Trabucco offers a range of ingredients to create custom recipes, according everyone's preferences and needs. Every single ingredient has its specific own use and different

Code	Description	Proprietà	Bag
064-10-100	Collante X Fouillis	Highly Sticky	1kg

062-15-100	Terre De Riviere Ocre	Sticky	3kg
PP 0030 22 00	Tourteau De Mais Gros	Disgregant/Slightly Sweet	1kg

organic qualities, that we have listed in the "Legenda" in order to make easier the correct use.

TORTEAU DE MAIS GROS

This component doesn't have any influence on nutritional properties of the groundbait, because oil has been drawn from the raw material, but only on mechanic behaviour of the mix. Due to its nature and texture, it has no binding power, so that Tourteau is added to quickly break up the groundbait balls when fishing midwater, both within pole range and long distance waggler action.

TERRE D'ETANG

With a slightly darker color and higher binding power than Terre De Somme/Damp Leam, it is therefore ideal to be added to your groundbait in deeper areas or with a moderate current. Also good for delivering a larger amounts of bait, especially when fishing with jokers.

TERRE DE RIVIERE OCREE

Leam with a moderate binding power and an excellent light brown color. To be added to groundbait, in the presence of moderate currents or deep venues. It is often over wetted and used to convey a large amount of bait or jokers when for fishing for bream in still waters.

METHOD & SPECIALIST MIX

These fantastic fishmeal groundbaits have been designed and tested without compromise by Roberto Trabucco in conjunction with all our best consultants, specifically for match and feeder anglers. They're produced using only the finest, natural and selected ingredients with a high protein content and the addition of attractors and stimulants. They're also produced in small batches to ensure a constant quality and the freshest groundbait.

Code	Description	Bag
060-02-000	Green Method Mix	1kg
060-02-100	Carp Method	1kg
060-02-200	Dark Expander	1kg
060-02-300	Super Natural	1kg

DARK EXPANDER

Dark colour and fine grain mix, it is particularly effective on bream, crucian and carp. The ingredients include fish meal with a lower nutritional value and minced expander pellets to ensure good dispersion even at lower temperatures.

SUPER NATURAL

This ground bait has been created for fishing fisheries, canals and rivers. The fine grain mix is made with selected ingredients such as fish meal and sweeties, the best combination if you need a ground bait able to stop the fish for a long time.

GREEN METHOD MIX

Brand new "Sweet Fishmeal", ground bait, i.e. based on fish meal but with the addition of sweet flavour ingredients. The colour is light green thanks to the Betaine Green. It has been designed especially for open-end and method feeder fishing for carp, crucian and big bream.

CARP METHOD

This high nutritional value ground bait has been created for fishing big carp and you should use it in Spring and Summer time. Great for use with open-end feeders, cage feeders or with flatbed method feeders. The main ingredient is the fish meal and so it is fast dissolving ground bait.

PELLET CARP BROWN

Pellet of new formula developed for the big carps and crucians. Very dark color and added with fish oil. It has been developed in cooperation with Trabucco Team World Club Champion.

Code	Description	Bag
060-50-700	Micro-Pellet Elite 1 mm	1kg

GNT COMPETITION

TAKE APART

Top of the range for the new season, the GNT Match Net is built with high modulus carbon, offering extreme stiffness and leghtness at the same time. The top section have been reinforced with additional carbon wraps and the screw is protected by shrink tube. The two butt sections comes with the graphics and allows it to be used both a the maximum length

and at 4m too. GNT also features the Advanced Slide Easy Finish as seen on the best long poles.

Code	Description	Length
080-83-540	GNT Match Net	5.40 m

ERION NETTER

TAKE APART

Put over handle built in HMR carbon and reinforced at points of greatest stress, offering a great stiffness and strong enough to suit all competitions, including commercial carp fisheries. It comes with two butt sections both featuring graphics and allowing it to be used at two lengths. It's also fitted with an additional screw on the second sections, this to remove the

top section and get a super stiff and strong handle.

Code	Description	Length
080-76-430	Erion Netter	4.30 m
080-76-540	Erion Netter	4.30 m

DREAM TEAM XPS NET

TAKE APART

Three sections net handle extremely light, rigid and balanced. Made in H.R. Carbon using a special reinforcements wich make this product almost unbreakable. Double Carbon reinforcements in the top end. Length 4.00m.

Code	Description	Length
080-82-400	Dream Team XPS Net	4.00 m

NEW SYNTIUM PRO

TAKE APART

Stiff, reactive and well balanced, thanks to the fast tapered profile. The structure in 4 sections with put-over joints is made from High Resistance carbon, and is completely protected by a crossed carbon yarn wich contrasts the ovalization during peaks of stress. The reduced closed length (113 cm only) enables to use the handle at different lengths below 4

metres, which is useful not only during pleasure sessions but also under some particular match conditions. Slide easy finish (ASEF) for comfortable use.

Code	Description	Length
080-99-400	Syntium Pro Net	4.00 m

LUCIFER MAX POWER

TAKE APART

Landing net handle entirely made in Carbon HR. Stiff, strong but lightweight, thanks to the two section design. Designed with the commercial carp fisheries in mind where mixed bag of both silvers and carp are the order of the day and where you can really appreciate the slim profile of the sections and its overall features. Of course it can be well employed on tra-

ditional matches where you need a reliable and stiff handle. The top thread is resistant to wear and corrosion.

Code	Description	Length
080-98-340	Lucifer Max Power	3.40 m

Mario Baptista

ANTRAX NET

TELE

This 5m long handle is suited to those situations where extra length is needed. Robust and reliable, it is perfect both for sea and fresh water use. The handle has reinforcements at the points of greatest stress and the internal thread is highly resistant to rust and saltwater.

Code	Description	Length
080-93-500	Antrax Net	5.00 m

PRECISION NET

TELE & TAKE APART

A wide range of net handles, constructed entirely in carbon composite Durawall HR. Excellent stiffness and strength, combined with lightness and good handling. The internal thread is highly resistant to rust and saltwater and is fixed to the blank with a sturdy rivet. Excellent value for money.

Code	Description	Length
080-91-300	Precision Net Tele	3.00 m
080-91-400	Precision Net Tele	4.00 m
080-92-300	Precision Net Take Apart	3.00 m
080-92-400	Precision Net Take Apart	2.00 m

REVENGE WRC POWERLAND

TELE

Telescopic handle available at 3 and 4 mts, entirely made of Powerfibre. It is really a versatile tool that can suit all conditions, from saltwater fishing to commercial fisheries. Provided of bronze thread and special grip coating on butt end.

Code	Description	Length
080-69-300	Revenge WRC Powerland	3.00 m
080-69-400	Revenge WRC Powerland	4.00 m

TELELAND

TELE

Telescopic handle available at 2,00 and 2,40 mts length. Made of Powerfibre it resolves all transport problems due the very short size of the sections, of just 30 cmts. Extremely reliable it is the best solution for all those fishing styles in which the angler must often change his fishing spot.

Code	Description	Length
080-85-200	Teleland	2.00 m
080-85-240	Teleland	2.40 m

NET HEAD & LANDING NET ADVANCED DESIGN

TX pro-net

Trabucco offers a wide range of landing net heads, developed and tested by the best Italian and European anglers. They are made of anodized aluminium, and offer a variety of shapes and mesh qualities. The hydrodynamic designs have been developed by the 20 years experience, and allow to manoeuvre the landing net head easily when following the fish approaching.

TX-3D MONO MESH

Available in three different sizes, these are all made by mono 6mm mesh to improve the lightness and offer less resistance in water. The D shape frame is made of anodized aluminium for added resistance, keeping the heads extremely light. The Eva fitted on the frame helps the buoyancy of the landing net, when approaching the fish and the handling when unhooking.

Code	Description	L	W	H
083-66-210	TX-3D Mono Mesh	45	40	23
083-66-220	TX-3D Mono Mesh	50	45	25
083-66-230	TX-3D Mono Mesh	55	50	25

TX-3D 2 MESH

They're built with a dual size mesh, large on the sides and a thick fish friendly material on the bottom. The D shape frame is made of anodized aluminium to increase resistance keeping the heads extremely light. Available in four different sizes.

Code	Description	L	W	H
083-66-010	TX-3D 2 Mesh	45	40	23
083-66-020	TX-3D 2 Mesh	50	45	25
083-66-030	TX-3D 2 Mesh	55	50	25
083-66-040	TX-3D 2 Mesh	60	55	28

TX-3D RUBBA MESH

Brand new net heads featuring the new latex coated mesh. Exceptionally strong, hydrodynamic but still very light as they don't absorb water. The D shaped aluminium frame gives more strength, fish friendly mesh perfect for commercial fisheries.

Code	Description	L	W	H
083-66-110	TX-3D Rubba Mesh	45	40	23
083-66-120	TX-3D Rubba Mesh	50	45	25

083-66-140	TX-3D Rubba Mesh	60	55	28

TX-MATCH PE

Brand new net heads fitted with fish friendly Pe mesh and D shaped aluminium frame. Definitely the lightest heads on the market, they're perfect for silver fish such as Bream and Roach. The depth allows to net the fish easier and quickly.

Code	Description	L	W	H
083-66-310	TX-MATCH PE 3mm	45	40	20
083-66-320	TX-MATCH PE 3mm	50	45	22

TX-MATCH MONO

Brand new net heads, available in two different sizes and fitted with Mono Mesh 6mm. The D shaped aluminium frame is strong and yet light. The depth allows to net the fish easier and quickly.

Code	Description	L	W	H
083-66-410	TX-MATCH Mono 6mm	45	40	20
083-66-420	TX-MATCH Mono 6mm	50	45	22

TR PRO NET

Two net heads designed with an increased depth to allow easily land those bonus fish. The TR Mono is made by a 20mm mono mesh, particularly suited to carp or sea fishing from docks. The PE mesh is totally "fish friendly", suited to both silver fish or carp and avoid the rig to tangle on the net for easy use.

MONO

PE

GNT SL STATION

The GNT-SL STATION model has been designed to be lightweight and very stable. The frame features an exclusive minimalist but innovative style, it has an "X" shape that gives the whole structure a very strong and stiff touch, while keeping the weight as low as possible. Platform too has been totally re designed and does not share any moving part with the main station, so it is much more stable and safe for fishing action. Beside that it has been built in a non-slip material and it can be opened up to 44 cm, adapting at best with all the kinds of terrain. Round legs are 25 mm in diameter and are closer to the station, so every accessory you are going to add, it will be always at hand, improving the comfort and the speed of the fishing action. Stable, easy and quick to set up, the station has a lateral drawer positioned just under the seat, and a removable set of drawers with 3 compartments, one of them with central drawers, very easy to use while seated. It can be personalized using all the Genius modulus or the new accessories from the XPS series, adapting your station to your style of fishing.

SPECIFICATIONS

- Light alloy frame
- Sliding footplate with anti-slip system
- Removable base unit
- Telescopic legs with no-marking knobs
- Swivelling mud foot
- Padded pole gel seat
- Padded and adjustable shoulder strap
- Compatible with all the Genius Accessories

MODULAR SYSTEM

The newly designed sliding footplate offers a great stability and it's easy to place on all terrain.

The side spring button allows to easily remove the base unit.

Code	Description
116-00-650	Seatbox GNT-SL Station

NEW GNT X 925 STATION

New fishing station which has been engineered starting from the positive experience of GNT-SL model, which has had a great success amongst match anglers across whole Europe. The frame is actually a stunning mix of art and technology, with the fantastic aluminium "bridge" which keeps the seat up and distributes the load directly to the four main legs, as well as it signs the seatbox as one of the most beautiful ones ever seen in the market. The aggressive red frame is the only fashion detail, as everything else is oriented to extreme functionality, in line with the other products in the Trabucco range. The product is extremely light and rigid, but, at first sight, is the general compactness to strongly draw the attention. In fact, the seatbox body's height is limited to 48 cm, but the gap between footplate and seat can be quickly increased removing the lower set of drawers and placing it on top, just below the cushion. The sliding GNT footplate is confirmed also on this model, with the holes destined to provide a safe grip, as it's still unrivalled in term of adaptation to the ground profile.

SPECIFICATIONS

- Innovative tubular aluminium frame
- Six Ø 25 mm legs (four telescopic)
- Wide, tilting mud feet
- Sliding aluminium footplate
- Non-marking screws
- Padded pole gel seat
- Padded and adjustable shoulder strap
- Removable base unit, made of:
 - upper tray 4 cm deep
 - central unit with 2 front drawers
 - lower tray 4 cm deep
- Accessories' tray below seat, 4 cm deep
- Compatible with all Genius components and accessories

MODULAR SYSTEM

Both front drawers are equipped with dividers to practically and neatly store all the small tools.

The pole seat is super padded with gel and is nicely decorated by a red band.

Code	Description
116-00-660	Seatbox GNT X 925 Station

The fantastic bridge frame is a mix of art and technology which unmistakably signs the seatbox as one of the best ever.

GNT PRO STATION

GNT Station Pro is designed to meet the needs of the best European match anglers and Trabucco designed together with them. The lightweight and rigid monocoque frame is provided with three levels for easy positioning on any terrain. The legs uses the largely tested Fast-Lock System, a solution that those who have tried in previous versions will never leave and which ensures an easy and rapid setting, without tightening any screw. Other screws present on this station are under leveled, while the legs have a wide adjustable footprint to adapt to all land without bury themselves. The modules have also been designed to maximize the capacity, thus ensuring a large usable space inside them, while the front drawers offer the possibility to be divided using special dividers included. The comfort is guaranteed by a gel filled pillow and features the classic rigid cup for housing the rod; pillow's shape is also designed to support the angler's back during fishing action to maintain a correct posture. The platform also features large perforations to ensure anti-slip function. It is available a wide range of accessories making the GNT-Station Pro definitely the best on the market today: a stable and flexible workstation, very comfortable and light.

SPECIFICATIONS

- Powerfibre and 6015 Aluminium Monocoque
- Sliding Footplate with ant-slip System
- Removable base unit
- 2 front drawers with integrated dividers
- 3 rigs and accessories trays
- Telescopic legs with no-marking knobs
- Swivelling mud feet
- 3 built-in spirit levels
- Padded and adjustable shoulder strap
- Padded pole gel seat

MODULAR SYSTEM

Code	Description
116-00-580	Seatbox GNT Pro Station

All the hinges are made of durable ABS, to allow a complete seatbox customization thanks to the wide range of modules available.

Three spirit levels built into the seatbox frame help the correct positioning on all kind of terrain.

Both front drawers are equipped with dividers to practically and neatly store all the small tools.

NEW GNT X5 MATCH STATION

New seatbox which perfectly deserves the name of "match station", as it can be completed and super tuned by the addition of a virtually endless list of components and accessories of the Genius range. The frame is made from light and strong tubular aluminium, and telescopic leg's length is adjustable via a practical push lever. The locking system is quite interesting, as it's not due to normal screws, but made of clamp brakes whose grip is so smooth and safe at the same time. The wide rubber knobs allow

a quick setting up operation, even on steep banks. The footplate is sliding to enable partial opening in case a bulky stone is just in the middle of the fishing place. Beyond such advantage, of course this solution makes the seatbox compact for easy transport. All feet are mud proof and tilting around a ball head. GNT-X5 Station is definitely one of the most modern and attractive seatboxes available in the market, with a stunning quality/price ratio.

MODULAR SYSTEM

SPECIFICATIONS

- Tubular aluminium frame
- Six Ø 25 mm legs (four telescopic)
- Wide, tilting mud feet
- Sliding aluminium footplate
- Padded pole gel seat
- Accessorie's tray below seat, 7 cm deep
- The removable base unit is made of:
 - upper tray 4 cm deep
 - central unit with 2 front drawers
 - lower tray 4 cm deep

Description
Seatbox GNT-X5 Match Station

NEW **GNT 725 STATION**

A new, excellent seatbox which is well placed within the great Trabucco range, thanks to the full compatibility with Genius components and accessories. The main specification is the adjustable seat height, which comes from the fact that the main body is linked to the legs independently from the footplate. Smooth and stable non-marking screws are standard also on this model: the wide rubber screw's head pushes firmly towards the leg, avoiding to damage it. The base unit include a 10 cm deep tray, which

is useful to store reels, catapults, wagglers and most bulky accessories. From the heart of the body, a sliding side tray is quite useful while fishing to hold the handy tools. The folding footplate is made of parallel bars to provide good grip also in case of muddy feet. The adjustable leg system is probably the easiest and safest to use among those now available in the market.

SPECIFICATIONS

- Tubular aluminium frame
- Six Ø 25 mm legs (four telescopic)
- Wide, tilting mud feet
- Folding aluminium footplate
- Adjustable seat height
- Padded pole seat
- Main body is made of:
 - upper tray 4 cm deep
 - central unit with 2 front drawers and 1 side tray
 - lower tray 10 cm deep
- Padded and adjustable shoulder strap
- Compatible with all Genius components and accessories.

Code	Description

GNT 3 XP

Completely made in aluminum and equipped with folding platform. It has a large drawer, located under the seat, two convenient front sliding drawers plus a side drawer that can hold all the accessories you use most frequently. The seat is made of anatomically foam and includes rod holders. The GNT-3XP can be completed with all the accessories in the Genius series to provide the ultimate in customization.

SPECIFICATIONS

- Light alloy frame
- Foldable footplate with anti-slip system
- Swivelling mud feet
- Padded pole gel seat
- Padded and adjustable shoulder strap
- Compatible with all the Genius Accessories

Code	Description
116-00-600	Seatbox GNT 3 XP

The main body is connected to the legs independently from footplate, so that the seat height is fully adjustable.

The adjustable locking footplate is quick and extremely safe.

The adjustable legs system is the quickest and safest now available in the market.

MODULAR SYSTEM

The seatbox can be adapted to personal needs through the wide range of Genius modules.

Alessandro Bruni

GNT 3

Modular basic version of the seatbox can be customized with the addition of the platform, modules and all the accessories available in the series Genius. Made of aluminum, has anatomical foam pillow, 2 large compartments to hold all the accessories, two comfortable sliding drawers plus a side drawer able to hold the material, which must

be easily found while remaining seated. Practical, basic, lightweight and ideal for the recreational anglers, both they fish in fresh or saltwater.

MODULAR SYSTEM

NEW GNT CHAIR

ONLY 5.5 kg!

Wide, comfortable, strong and extremely compact for transport: it's the innovative aluminium framed fishing chair developed by Trabucco. Nowadays, this sort of products is recognized as "feeder chair", but why the other categories of anglers should stay away from it? After all, fishing is pleasure, therefore it should be lived at the very best, also from the comfort point of view. In the car, it takes a limited space: with back rest fully reclined and legs fixed to dedicated clips, this chair finds place even

in the smallest city cars. The walk to fishing spot is eased by a padded shoulder strap and EVA handle. The gel seat cushion hidden a wide accessory tray, 43x30 cm and 5 cm deep. The 58 cm long legs, with diameter of 25 mm and fitting tilt mud feet, enable to safely accommodate this chair on the steepest banks and accept all accessories of Genius or XPS Clamp-On range to build up an efficient and super tuned fishing station.

UNIVERSAL CLAMP ACCESSORIES

UNIVERSAL CLAMP

A new range of aluminium arms, destined to customize the seatbox, which draws the attention for its chance to fit almost any leg without being inserted from top, but simply attached laterally.

Thanks to the innovative "Universal Clamp" system, the body of these accessories opens like a clamp, enabling to grab the leg on required position, in spite of any other accessory already fixed along the leg. Two sets of rubber adaptors, supplied with each single accessory, allows to fit round legs having 25 or 30 mm diameter, practically the whole world of modern seatboxes. If used without any adaptor, the clamp can fit square legs of 20x20 mm size. The practicality, safety and durability of these clever accessories is destined to make history and reinforce Trabucco image among competition specialist tackle field.

The Genius Specialist accessories has been designed to convert a normal chair into a true and complete fishing station. It is actually possible to add all the accessories both on squared or round frames of different diameters, while the regulation system allows to adjust the slant for your convenience.

GENIUS SPECIALIST FEEDER CHAIR

In the first year of life, the Genius Specialist Chair has got a fantastic success across the whole Europe, thanks to the high specifications but also thanks to the accessories that allow to further upgrade its comfort level. The unique slant regulation system perfectly suit the feeder expert's needs, while the chance to apply them to square or round structures widens their popularity.

UMBRELLAS & BANKSTICKS

Sun, wind and rain are the elements which mostly disturb pleasure and efficacy of fishing action, but the solution is available under several form. Along with traditional models, now Trabucco offers small

sized umbrellas, specifically designed for bait and groundbait, as well as the innovative versions featuring light grey colour fabric, which reflects sun rays to keep a lower temperature inside of the shelter.

XPS FLUORO POWER LATEX

Super silicon treated solid elastic, supple and forgiving on the strike and produced by pure latex. The innovative extruding process allows to obtain a perfectly round profile, with an high and progressive stretch factor and it retracts faster inside the pole. Supplied in 10 or 7.5m spools according to the size, produced in high visibility colors and ultra-resistant to wear, it's the first choice of the Ravanelli Team Trabucco.

FEATURES:

- 100% Pure Latex
- Super Smooth with Slip Silicon treatment
- Highly visible fluorescent colours
- High factor stretch and dual-phase action
- Retract faster inside the pole
- Produced to be more forgiving on the strike
- Supplied in 10m or 7.5m spools
- Available in 8 sizes to cover all fishing styles

XPS

XPS POWER CORE HOLLOW ELASTIC

Manufactured from the very highest quality raw materials available and to the strictest quality standards, using the twin core hollow system. The core is strong and durable, making it more powerful, while the outer layer increase smoothness. Power Core not only stretches further than any other elastic on the market, but also retracts faster, which is without doubt a massive benefit on landing bonus fish faster. Now available also in the 1.2 and 1.5mm diameters, supplied in 4m pack, ideal to elasticated up to two top kit and to get the XPS Power Core outstanding performances also when fishing for silver. Available in 8 sizes to cover any pole fishing situation.

FEATURES:

- Double Core Latex
- Smoother Surface
- High Stretch
- Retracts Faster
- Dualphase Action
- Self-Lubricated

XPS CARP HYPER POWER

This new elastic has been created using only the purest raw materials and its diameter is computer checked along its whole length, to grant all the anglers the best performance and reliability even for the most extreme fishing techniques. The latex compound is extremely stretchable and so has a huge power reserve, still keeping a progressive action. This feature is the secret to easily win arsh battles with big fishes. The surface of the elastic has been treated with silicon, to get a super smooth feeling and reduce friction.

FEATURES:

- 100% Hyper Stretch Pure Latex
- Super Smooth with Slip Silicon treatment
- Highly visible fluorescent colours
- High factor stretch and dual-phase action
- Retract faster inside the pole
- Produced to be more forgiving on the strike
- Supplied in 10m or 7.5m spools

XPS DOUBLE FLUORO LATEX

This high quality latex elastic has been developed to make the threading of the popular Double Elastic easier. You can now elastic your top kit as you did with a single strand and once threaded the Double Fluoro can be easily separated into a perfect Double Elastic System. Comes in 6m spools to elasticate up to two top 3.

FEATURES:

- 100% pure latex
- Developed to make elastication easy
- Strands can be separated once fitted
- Produced to be more forgiving on the strike
- Highly visible fluorescent colours
- Super smooth
- Supplied in 6 metre spools
- Available in 5 sizes to cover all fishing styles

DACRON CONNECTORS

Trabucco Dacron connectors have been specifically developed to provide a neat link between your elastic and your rig. The Dacron holds your rig away from your pole tip whilst the purpose designed bead makes sure the Dacron points forwards to keep tangles to an absolute minimum. Available in two sizes to suit most popular elastic sizes.

Code	Size
102-07-000/10	Small
102-07-010/10	Large

VESPE INTERMEDIATES

Specially designed flexible internal guides made from 100% pure PTFE will "lift" your elastic off the side wall stopping DRAG and FRICTION ...so no matter where your fish runs it's the smoothest elasticsation system ever!

Code	Description	Bore Ø mm
103-08-001/10	Intermediates	2.3

XPS PULLA BUNG

Manufactured from lightweight plastic the XPS Pulla Bung can be used as a regular pole bung, but enables the angler to pull the elastic tighter after unshipping. The advantage is that you can use lighter elastics, but tighten it for netting if you hook a bonus fish. This means

you don't need to play and net big carp on long top kit, which leads to better control, faster netting and less pole breakages.

Code	Description
102-40-000/10	Xps Pulla Bung

COMPETITION X-FINE SILICONE

High performance, ultra fine silicone tube. Designed to fit the finest wire and carbon pole stems. Colour coded for easy recognition.

FEEDERS & ACCESSORIES

Today, feeder fishing lives a magic moment, not only in Italy but also in the countries where it was popular many years before. This is due to the chance to get tremendous catches in any weather condition, to the short preparation time and to the simple tackle involved. But the sudden popularity has opened doors to those who just come in when it's easy to succeed; at Trabucco, we believe in feeder fishing since ever, and the old general catalogues provide the evidence through their pages. Even when the World Feeder Championship didn't exist at all, we already spent our best attention and care into feeder's development, with same passion which currently boosts our range to grow again.

AIRTEK SPECIALIST

Maurizio Biolcati

FLATBED METHOD FEEDER & FLEXY MOULD

Available in the Inline or Elasticated version. The Inline is equipped with a swivel for self strike rigging or for sliding rigging, used in combination with a Fast Change Bead. The Elasticated version allows you to use much thinner hook lengths. For both the versions the flat bed grants a strong grip on the bottom, while the peculiar ribbed design keeps the groundbait right in position.

Put some pre-damped ground bait into the mould and position the hook with the bait in the centre.

Fill the mould with the rest of the ground bait, taking care to cover the hook with the bait.

Carefully position the Method Feeder in centre of the mould and press firmly.

Press the bottom part of the mould to come out the Method feeder with the perfectly shaped ground bait.

When the feeder will lay on the bottom the bait will be positioned over the ground bait, that will start its attractive action.

When the ground bait will dissolve it will cover the whole feeder, while the bait will be ready to be swallowed by the fish.

FAST CHANGE BEAD

Born to complement any Method Feeder, the Fast Change Beads protect the hooklink knot from any damage coming from the feeder's weight and, at the same time, enable to quickly interchange several hooklinks without cutting it.

Code	Description	Pcs
101-57-000/10	Fast Change Beads	5

AIRTEK SPECIALIST MICRO PELLET FEEDER

How it appears the Micro Pellet Feeder as soon as it lands on the bottom. The pellets start to come out and the bait is already uncovered.

After a short time the pellets start to come out in a sort of small cascade, taking the bait with them. The bait is always perfectly presented.

The Micro Pellet Feeder can be used as well in combination with ground bait instead of pellets. The final result will be the same.

The micro pellet approach is one of the most recent introductions in Europe; it's effectiveness comes from the need to stimulate big fish without feeding it up. The small size of dedicated feeders are due to the extreme conditions of use. In fact, they are oriented to tough situations, which are common during the last hour of a match, in the highly pressured waters or in winter. In all such three circumstances, fish feed on small sized bait in limited amounts of groundbait, often refusing to bite in case the hooklink is not thin enough. Trabucco range include two solutions: a standard one and an elasticated one, purposely developed for extremely shy fish, when a fine line is absolutely worth a try.

Code	Description	Size	Wt
140-67-010/10	Pellet Feeder Inline	M	24 g
140-67-020/10	Pellet Feeder Inline	L	35 g
140-67-110/10	Pellet Feeder Elasticated	M	24 g
140-67-120/10	Pellet Feeder Elasticated	L	35 g

PELLET FEEDER

The feeder is on the bottom and the ground bait starts to segregate, freeing the feeder content.

The ground bait has accomplished its restraint job and it is now melted: all the pellets are now free to come out.

The Pellet Feeder has been designed to be used with pellets. The pellets must be dampened and then gently pressed into the feeder and then blocked with a groundbait stopper. The action of the water will dissolve the groundbait stopper and will consequentially allow the pellets to come out towards the hook length.

OPEN END

The Airtek Specialist Open End is equipped with a wide shaped lead to increase the stability. The link between the feeder and the main line is semi-rigid, to obtain an anti tangle effect. The camo colour hides the feeder to the spooky fish, melting its shape with the natural colour of the surrounding environment.

POWERGUM

Powergum is a clear and elastic line, well known among feeder anglers for rig and stopper knot's making.

Code	Description	Ø
102-81-010/10	Power Gum	1.0 mm
102-81-020/10	Power Gum	1.3 mm
102-81-030/10	Power Gum	1.5 mm

NEW AIRTEK TWISTED FEEDER LINK

Simple and helpful for the newcomer, quick and efficient for the expert feeder angler. These new rig links offer everybody something good, with their controlled elasticity and anti-tangle properties of the twisted monofilament structure and the convenience of the two swivels at both ends, one of which is also fitting a snap. They can be employed in two ways, as they can become paternoster links for fixed or sliding feeder set-ups, or inserted between main line and hooklength to stiffen the area and act as shock buffer just below the feeder. In this case, a rubber bead should be added to protect knot from being hammered by the feeder itself. The green colour adds camouflage effect to avoid scaring shy fish.

Code	Description	Size	Pcs	Length
102-81-500/10	Airtek Twisted Feeder Link	S	2	20 cm
102-81-510/10	Airtek Twisted Feeder Link	L	2	30 cm

QUICKSTOP

The innovative Trabucco Competition Quickstop are a major breakthrough in bait stop design. Permanently attached to the hair, Quickstop reduce baiting time down and make attaching small baits like meat, corn and mini boilies super fast. The best, most convenient bait stops ever produced.

Code	Description	Pcs
101-58-000/10	Quickstops	60

1 Insert a baiting needle into the Quickstop on your hair rig.

2 Gently push the baiting needle (with the Quickstop on it) through the bait.

3 The finished presentation is absolutely spot on.

PASTE SPRING SET

Code	Description	Pcs
101-58-200/10	Paste Spring Set	3 sets

PASTE GRIPPER

Paste fishing made it easy! They're designed to alleviate missing bites and the paste coming off during the cast, two most common problems associated with paste fishing. It is basically a small rubber ball that has a stem attached to it, through which the hook point is passed. The paste is then moulded around the ball, stem and shank of the hook, leaving the point and part of the bend exposed. The Paste Gripper can be positioned at any point on the hook, to suit the anglers requirements eg. with the hook point coming out of the side or top of the ball of paste. It can be easily removed from barbless or semi-barbless hooks, and re-used many times. Suitable for almost all hook sizes.

Code	Description	Pcs
101-58-100/10	Paste Grippers	10

NEW HEAVY DUTY ANTI TANGLE TUBE

Strongly hated by feeder experts and conversely loved by millions of newcomers or pleasure anglers, who appreciate their efficiency and their anti-tangle properties in fresh and also salt water fishing. The main line gets through the bent tube, which protects it from any abrasion, and is knotted to the swivel of the hooklink. Just above the swivel, a rubber bead is highly recommended to protect the knot. The safety snap is ready to accept bomb or feeder: less than one minute and it's ready to fish! Three sizes are available: generally, the closer casting distance (or boat fishing) require the shortest tube, while longer range sees the longer tube getting into play.

Code	Description	Length	Pcs
101-55-650/10	Heavy Duty Anti Tangle Tube	55 mm	2
101-55-660/10	Heavy Duty Anti Tangle Tube	85 mm	2
101-55-670/10	Heavy Duty Anti Tangle Tube	120 mm	2

SLIDER FEEDER LINK

A great solution to solve a long list of problems of the feeder rigs. A segment of Power Gum, featuring a swivel snap on top and a swivel on the opposite end, lays flat on the bottom and provides elasticity, resistance and anti-tangle safety. Other advantage raises from the central snap, as it ensures speed and simplicity on bomb or feeder changes. Thanks to the oval rubber stoppers, the snap position can vary along the Powergum link according to fishing conditions. It can be used also connecting the feeder to the end of the link and hooklength to the central snap.

Code	Description	Pcs	Ø
102-81-100/10	Slider Feeder Link	2	1.0 mm
102-81-110/10	Slider Feeder Link	2	1.3 mm
102-81-120/10	Slider Feeder Link	2	1.5 mm

AIRTEK FEEDER

A really wide choice of feeder that are useful for a number of fishing situations but that has been designed to always perform at best and helping you to get really big fish. Every shape, every size

and weight, even every colour, has been carefully selected after a long time field testing made by our consultants in Italy and in the whole Europe.

CAGE FEEDERS

Cage are the veterans of feeder's field, because they born in the seventies, when some UK pioneer started using hair curlers. Their main merit is the quick and complete idruration of the content, also in case the groundbait has been wrongly dampened. A cage feeder rarely gets back with groundbait still inside, after a reasonable time, ensuring an optimal dispersion in the targeted swim and avoiding to create a groundbait trail when a fish is being played. Cage feeders also leave room to user's creativity, as between two groundbait plugs he can store a ball of sticky maggots, worms, casters, hemp, sweetcorn, pellets and everything can attract and stimulate fish in the middle of a groundbait cloud. Today, Trabucco introduces three new models, two of which are specialized in long range fishing, essential for the largest canals like Ostellato, but equally useful everywhere fish feed at the horizon.

NEW AIRTEK LONG RANGE CAGE FEEDER

Model for still water's long range, loaded at one end to ease the cast and sit upright on the bottom, thus providing a great sensitivity. The connection is based on snap swivel included in a strong monofilament loop. The "spodding" version is fairly large to introduce big quantity of groundbait at the start of the match or fishing session.

Code	Description	Size	Pcs	Wt

140-60-870/5	Airtek Spodding Cage Feeder	XL	2	30 g

AIRTEK LONG RANGE ROCKET FEEDER

Designed for extreme range fishing thanks to the compact, aerodynamic weight which is forwarded from body's centre to let it fly as a rocket. The weight is linked to frame through two arms only, so that the filling operation is quite easy by fingers. The connection is created by a strong monofilament loop.

Mario Baptista

AIRTEK CAGE

This model features a limited volume/weight ratio, therefore it keeps the bottom also when the river is pushing hardly. The plastic frame can bear any shock, while the rubber o-ring absorbs the stress otherwise destined to the line. The internal teeth grip the groundbait during the most powerful casts.

Code	Description	Pcs	Weight
140-60-310/5	Airtek Cage Feeder	2	20 g
140-60-320/5	Airtek Cage Feeder	2	30 g
140-60-330/5	Airtek Cage Feeder	2	40 g
140-60-340/5	Airtek Cage Feeder	2	50 g

NEW AIRTEK WIRE CAGE FEEDER

Classic cage feeders with metal wire frame, they feature a wide foot weight for the best stability once on river's bottom. The snap swivel is trapped within a rubber o-ring which is destined to absorb the casting load and work as anti-tangle. Two combinations of volume and weight are available to offer maximum versatility.

GNT MATCH TEAM

The range of bags and rod holdalls called "Match Team", is the most technically advanced that exists in today's market - designed to carry all the necessary equipment on long fishing trips.

In particular, this range is dedicated to all those who devote themselves entirely to fishing contests and to those for who fishing is a hobby. All these products are water-resistant, anti-tear, have double slider zippers and are extremely durable. All bags and some rod holdalls have a rigid reinforced base, foam handles and adjustable shoulder strap for easier carrying. All seams are made with triple thread of wire. Brand new design and colour scheme.

NEW RUCKSACK

XTR SURFCASTING PRO TEAM

Surf casting match circuit is now quite important in width and depth. In other words, there aren't numbers only, but also quality, and the natural consequence is that Trabucco brand is highly considered among the top anglers.

The 2014 Individual Italian Championship, held on Sicilian beaches around Messina, has been sponsored by Trabucco rightly because the feeling with surf casting is particularly strong. And it's natural that the company always keep investing in product's development, as proved by the launch of this technical luggage range. The new items are quite rich in features and show a neat cosmetic imprint, with black and chartreuse combination which gives the market a strong signal. Using a waterproof and washable material weighing 1200 denier, bags, rucksacks and rod holdalls are built to last. The addition of plastic boxes with many compartments enables to take full advantage of the inside room to neatly store all accessories. The special paddings, the stiff bottoms, the handles and shoulder belts, the zippers and seams are made with great care and precision.

COMPETITION PRO LUGGAGE

Along with GNT range, which is located on top of Trabucco line-up, now we introduce a new assortment of luggage, featuring better prices even though the quality is certainly high.

Born to offer nice solutions to club anglers or pleasure anglers who like the best, is made from a 600 denier fabric, which is located above the average in term of thickness, waterproofing and durability. The balanced combination of lightness and stiffness is destined to draw the attention of every sort of fresh and salt water anglers; people skilled enough to recognize Trabucco quality in rods and reels, thus like to adequately protect their jewels. As always, graphic is particularly young, and technical solutions oriented to simplicity.

SURF BOX

This seat box is made to face any situation of surf casting or sea boat fishing. Thanks to the 70 liters capacity (54x37x40cm) it can carry big quantity of bulky product or hold a good number of tackle boxes for bits and pieces. The special plastic material used is extremely strong, easy to wash and keep all the stored items perfectly dry. It's sold with removable pillow and is possible to fit a bait bowl in three different position.

Code	Description
117-00-010	Surf Box - Side Tray
117-00-000	Surf Box

COMPETITION SURF BOX

This seat box is perfect when long walk is needed to reach the swim, like in big lakes or for surf casting. Ultra-light aluminium frame, one big drawer and a 48 litres capacity inner section. The seat is well padded, two side pockets, one front pocket. All the feet are adjustable to make it stable in any condition. Easy to store thanks to the removable wheels.

BAIT INDICATOR PRO SURF

This is the latest innovation in surfcasting bite detection. The device must be applied on the reel line between the first and second guide from the butt, adjusting the weight according to the sea conditions: the heavier the weight, the less sensitive the indicator.

The surf indicator can be used either by day, fitting the specially provided multicolor antenna, or by night, fitting a 4.5mm chemical light.

Code
105-10-100/5

SURFCASTING BAITING NEEDLE

Special selection of high quality baiting needles, essential for surf casting. If the bait is badly positioned on the hook, it happens very frequently that the fish approaching it refuses to bite. That's why we offer you a series of selected premium needles, useful to always position your bait in the best and more natural possible way. The 0.6 mm diameter stainless steel needle (both ends blunt) is perfect with all the thinner worms, such as Mediterranean Arenicola and sandworm. The 0.9 mm diameter (both ends blunt) is available in two different length (20 and 30 cm) and it is perfect for baiting bigger worms such as lugworm, bibi, etc. The 1.4 mm needle is made of brass and features one pointy end. It is the good one for baiting dead fish slices.

Code	Description	Pcs	Ø	Size
105-10-300/10	Brass Needle	5	1.4	200 mm
105-10-310/10	Stainless Steel Needle	5	0.9	200 mm

SURF TEAM FINGER PROTECTOR

Our Finger Protector is a small but really important accessory who can't miss in the tackle box of any beach caster. Even when casting at extreme distance with heavy lead, your finger will be safe from injuries. The sensitivity will not be affected, as we have used a very soft fabric, and the soft neoprene cuff can fit to any size of wrist.

Code

Slurp!

Artificial baits

Trabucco's Soft Lures are made of superior quality material, soft but still durable. These powerful scented lures are packed in a preserving oil that will maintain their outstanding performance. Every and each Soft Lure has its own design which is specific and effective, tested and improved by our Pro Team for long time before launching it in the market. We are committed to achieve details perfection and absolute quality to get the best performance. Try them and you won't regret!

HONEY WORM

Honey Worms are available in two sizes, Regular and XL. These floating baits have a bent shape to increase the twisting action needed to appeal the trout and other predators. They can be used alone or in combination with other soft or live bait. The Honey Worms texture is really similar if not the very same of the live honey worms but they will always be available and they will not be spoiled after the first catch, being able to be re used several times before substitution.

FAT TROUT WORM

Fat Worm is a small compact worm that perfectly imitates the live bait. It can be used in combination with other lures, fishing with bombarda, it can be used rigged on a Rapture Jig Head, to make it dance on the bottom triggering the killer instinct of all trout species, including the wild mountain brown ones, and finally it can be rigged wacky without any weight, to get the super natural action of a worm falling through the water. All Fat Worms are fish scented. When the trout will bite, it will never stop chewing this delicatessen, allowing you an accurate and winning strike.

SPAGHETTI

Spaghetti are a classic and very popular bait for lake trout fishing in commercial fisheries. We added scent and oils in the formula of the Spaghetti Slurp! Baits, making them irresistible and giving you the edge to catch fish in every situation, when every other lure or bait already failed. All colours are very bright and vivid, to stimulate even the most apathetic trout.

Marco De Biase

BLOOD WORM

Slurp! Blood Worm is the perfect imitation of the Ver de Vase, the typical and most natural bait that normally lives in lakes and canals. So they are the most convenient baits for a large variety of fish, such as carp, crucian carp, bream etc. Available in its peculiar blood red colour.

The Yummy Baits are the trout's favourite of all times! Their texture is really super soft, so soft you've never seen a similar bait. Fish will bite with confidence such a sweetie! Yummy Baits are elastic too, so they are super resistant and can be used and used again. The lifelike texture has been super charged with fish scent for extra trigger action. You never had such a powerful bait on your hook!

YUMMY Bait

POWER SCENTED

Super soft

FALCETTO

In contrast to many other grubs, the Falchetto generates a high-efficient rotation movement thanks to its broad and short tail. Trout can thus easily detect these vibrations and smell the scent of the lure. Falchetto is anise scented in white colour and fish scented in all other colours. Eight pieces in a resealable plastic bag.

The broad and short tail generates a rotation and high frequency vibrations.

Code	Description	Colour	Pcs

182-12-080/10	Yummy Bait Falchetto	Green Chartreuse	8

BRUCONE

The Brucone is a perfectly shaped rotating lure which twists around its own axis during the retrieve and produces strong trout reactions. Less experienced anglers can use a baiting needle to correctly position this lure on the hook. The Brucone worms are delivered per 8 pieces in a resealable plastic bag. The white colour is anise scented, while all the other colours are fish scented.

Code	Description	Colour	Pcs
182-10-010/10	Yummy Bait Brucone	White	8

182-10-070/10	Yummy Bait Brucone	Orange	8
182-10-080/10	Yummy Bait Brucone	Green Chartreuse	8

Perfect hooking of the Brucone. This rigging generates an active rotation with intensive vibrations.

TAIL TWISTER

The Tail Twister is a preformed trout lure, which is rotating around its own axis during the retrieve and generates extraordinary intensive vibrations thanks to its round flat belly, driving crazy the laziest trout. A great trout and perch lure that can't be missing in any lure box. The Tail Twister is delivered per 8 pieces in a resealable plastic bag. The white colour is anise scented, while all the other colours are fish scented. From today, a smaller size is also available to widen the chances of this fantastic lure.

Perfect rigging of the Tail Twister with active rotation – the hook is buried within the body close to its round flat belly.

In order to increase rotation and the vibration's frequency, just bring the hook point out of the first part of the tail. But not too low!

CAMOLA

A true replica of an honey worm, one of the most appreciated trout baits. The camola is delivered per 8 pieces in a resealable plastic bag. The white colour is anise scented while the other colours are fish scented.

Two Camola Worms generate an intense rotation with strong vibrations.

Single-camola hookbait: fast baiting for fast action. The hook is completely buried inside camola's body. When the trout attacks, it is automatically hooked.

Marco De Biase

SOFTIE BIRD

Softie Birds is an incredible teaser for fishing up in the water, particularly for sailfish. Built in soft rubber, it offers a low resistance in the water while creating highly attractive splashes and bubbles. The different colours cover every combination water/weather. They're fitted with T-FORCE BIG GAME mono 120 Lbs length of 200 cm. The Softie Birds can be used alone in front of your favourite lure, or to create your own daisy chain.

Code	Size	Colour	mm / lbs	Length
189-79-620	15 cm	Black/Blue	1.20 / 120	200 cm
189-79-630	15 cm	Pink /White	1.20 / 120	200 cm

EXCITER BIRDS

The Exciter Birds are teaser with a classic shape but terribly effective, they will increase your catch rate. Once in the water, Exciter Bird causes splashes and bubbles on the surface that can attract predators from deep water up to the surface. The Exciter Birds can be used alone in front of your favourite lure, or in combination to increase the attractive power.

OCTOPUS SQUID

Octopus Squid are probably the most popular bait for sea fishing and we made them with the highest quality materials available now on the market. The Octopus have a tapered shape perfect for swimming, while all the colours have been accurately selected and all are holographic. They can be used alone, on the top of a dead fish or to make your favourite chain fitted with two or more octopus to attract big predators. They can be fished as well in conjunction with a teaser.

MADAI JIG SWIM

Brand new jig designed for saltwater vertical jigging, with the Japanese technique of Taikabura or Madai fishing. We suggest to fish Madai Swim in medium depth waters, preferably with sandy bottoms and jigged slower and near the bottom comparing to a classic vertical jig. It has Glow eyes for extra appeal in deep water plus durable skirt. Multiple hook system provides higher hook-up ratio. It's deadly attractive for all bottom feeders and predators, such as snappers, dentex and seabreams.

MADAI JIG ROUND

Fishing the Madai can be really profitable, especially when made in medium depth waters. Madai Jig Round features round shaped head design lets it sink quickly to the bottom and when jigged stabilize the jig parallel to the bottom maintaining a very natural appearance. Multiple hook system provides higher hookup ratio, while the Glow head Colors guarantees extra appeal in deep waters. Ideal for all predators and bottom feeders.

SEA JIGGER

Jig designed to catch bottom feeders and predators in medium and deep waters. It has Glow head for extra appeal in deep, a large skirt and it's fitted a high quality Japanese treble hooks. This provides higher hook-up ratio. Sea Jigger must be worked on or just off the bottom, in particular in sandy bottom where the retrieve and the fall create a cloud that naturally attracts inquisitive fish.
