EUROPE

Rapture

Year after year the Rapture brand keeps growing into consideration and into hearts of spinning fans. This responsibility gives us the strength to continue with increasing effort in research and development of new and more efficient lures and tackles. From these assumptions comes the new line of rods to complete the already impressive assortment we had. In the following pages you will find lures, accessories and tackles second to none in matter of quality, performance and reliability.

Every single item is moved into production only after having passed strict tests made by Rapture experts. Take a look to this catalogue and you will see the new casting and spinning rods designed by the best experts in this discipline, exclusive travel rods, a new innovative range of lures, and many other new accessories. Nevertheless we will not stop to research new building technologies, new materials and new techniques to grant you the most innovative products to satisfy your never ending passion.

WWW.RAPTURELURES.COM

Rapture is a brand gathering a huge number of hard and soft lures, both for fresh and salt water, and a great assortment of rods, always more calibrated on specific predator fishing techniques. We are always very attentive to the new fishing styles and trends and we like to receive inputs and share opinions on social networks. Sign in our Newsletter to get the latest news and write us what you think. On Rapture social network pages you can share your videos and pictures too.

THE ULTIMATE DESIGN
FOR SPECIALISTS

CX NANO CARBON

Nanotechnology application to carbon material.
The most evolved fibers in the world.

CX-1 CARBON

The purest super high modulus carbon for superior performance.

S.H.R. CARBON

High Resistance Carbon – Top reliability in every situation.

World quality Japanese components.

SICHD GUIDES

Corrosion free, strong and light frame. Fast heat dissipation.

SS SUPER SLIM BLANK

Smaller diameter blank in the category.

P.F.A. TIP ACTION

Power tip action for a proper management of fish fight.

D.C.G.

Digitally controlled graphite layers.

TWR

Reinforced blank through a specific sized carbon layer.

WIVERN

NEW 2013

WIVERN S

CX NANO CARBON

Two spinning models of absolute relevance, characterized by a super slim super high modulus CX1 carbon blank, carefully designed to have rapid tip action M and ML. Guides are genuine Fuji SiC K frame, spaced as specified by the KR Concept protocol by Fuji, to bring out the best qualities of the blank and maximize casting distance. The reelseat is a genuine Fuji too, SKSS type, made of nylon and graphite, which allows a great contact with the blank and superior ergonomic. The split handle is characterized by AAA cork and first quality Eva elements.

NEW 2013 VALKALL

CX-1 CARBON

When you make something perfect you have to shout it to the world and be proud of it. There is no other bass rod on the market that can match the characteristics and the price of a Valkall. The Pro Team Rapture has been involved for a long time on this project, and the result is a series of one-piece rods just fantastic and at a price that makes them affordable for everyone. Blank is made of high modulus CX-1 carbon, light and responsive, and it is equipped with a high density EVA handle. SiC guides frame is K style and it is able to drastically reduce any tangling problem during casting. The Valkall family consists of a large number of models specific for the main bass fishing techniques. If you do not try them you can not understand what we're talking about! 5 spinning models and 8 casting.

Assassin XS

SICHD CX-1 GUIDES CARBON

The ASSASSIN spinning rods series has become a reference point for many fans of fishing lures across Europe. The wide range makes them able to cover virtually all the specifications required for the most innovative techniques, from bass fishing with worms, trout fishing with jigs and spinners and pike on the powerful sizes. The thin blank allows maximum sensitivity keeping powerful action even in the most delicate situations and thanks to his power allows to land big fishes easily, even in very snaggy area. Spigot joint, full Woven carbon blank, Japanese-style handle and high grade Sic Sea guides, perfect for braid. All rods are supplied with cordura tube.

Assassin XC

SICHD CX-1 GUIDES CARBON

Casting rod series is made up of 2 two sections models, extremely easy to transport and store, but at the same time with the same action of one section rods. This is only possible using full Woven Carbon spigot joints. CX-1 Carbon Blank makes these rods extremely fast and powerful, keeping sensitivity at the highest level. These rods are designed especially for black bass and pike fishing with swimbait, jerkbait or big soft lures. The new three section handle is made with first choice EVA and makes the rod more comfortable to use with an even better grip, Sic Sea guides. All rods are supplied with a nice Cordura tube.

Matthew's Rod

SIC HD CX-1
GUIDES CARBON

Rods made of woven high modulus carbon tissues combined with the latest fibers generation. The small diameter of the blanks facilitate handling without reducing reliability. The length of 6'5" and the short EVA Japanese style handle, facilitate boat fishing and belly boat fishing. They are assembled by hand with double leg SIC guides on casting rods and single leg on spinning model. The series includes three one-piece (two Spinning and one Casting version).

BladeSpin

CX-1 **Fuji**
CARBON

Rapture Blade is a superb one piece spinning rod, entirely constructed in IM8 carbon which is combined with woven carbon in the handle section to increase the stiffness and the sensitivity. The blank diameter has a slim profile and the rod has the extremely rigid tip action. The series, developed in 5 different length and casting powers are fitted with original Fuji Alconite guides and Fuji reel seat. Lots of attention is paid to the handle where we used the best quality natural cork (AAA Grade) for optimal grip and comfort in all conditions.

XANTYA

CX NANO CARBON SS SUPER SLIM BLANK Fuji

Series of rods of the highest level which are characterized by a completely custom design, carefully cared in every detail and able to meet all Japan style lovers. CX1 Carbon blank, highly reactive for rapid action L and UL. Original Fuji SiC KLH, KT and KB rings arranged according to the K-R Concept dictates of the same Japanese company, which drastically reduces the possibility that the line will tangle guide frames. Original Fuji SKSS reel seat made of nylon and graphite, extremely lightweight and allowing the best contact with the blank and perfect ergonomics. The end of butt section is finished with an oversized EVA knob to balance the rod in the best way. Just amazing, you will love this rod.

NEW 2013 SLASHER

Slasher, as the name itself says, a rod specially designed for long casting. The progressive and powerful action increases casting distance and if you compare Slasher to other similar rods, there is no doubt about its long casting skills. During line retrieve and in the final moment of a fight it will give you that extra power you need to win the battle, changing its action from progressive to tip. You will love the accuracy and the strength this rod delivers during tough fights! The Slasher is made of super high modulus CX-1 carbon finished with differentiated stratifications by element, in order to obtain that difficult alchemy that is a fast tip action rod still able to easily cast at great distance. SiC guides, salt water resistant, are carefully arranged on the blank to minimize friction during casting. Blank is finished with a beautiful highly detailed high-density EVA and Rubber Cork handle with anodized aluminium inserts.

NEW 2013 LAGOON

SIC HD GUIDES

Full series of spinning rods for ultra light and light fishing, carefully finished in every detail and carefully designed to get a very rewarding fishing action. Carbon fiber blank is super slim and extremely sensitive, exalted by a reel seat leaving exposed a large part of the blank that remains in contact with the hand. Guides are SIC with K frame, very useful because it eliminates any possibility of line tangle and because they are braided friendly. Split handle is made of first grade cork, as a rod of this kind deserves.

JIG FIGHTER

S.H.R. CARBON

An excellent, versatile rod series for lightweight jigs, surface lures, minnow baits, grubs and small spinners. Extremely sensitive, fitted with natural cork handle and "V" type guides. The high sensitivity of the solid tip, makes this series an ideal choice for trout and perch fishing and generally for all the techniques that require the use of jigs up to 21g.

BLACK SPIN

SIC HD CX-1 GUIDES CARBON

The pleasure of light and ultra light spinning is enhanced by the Black Spin series. Perfect in the finish details and very light, the Black Spins are mounted with "Y" type titanium guides, spigot joint, high density three section ergonomic EVA handle (with touch blank) and a very slim blank made in CX-1 carbon. Thanks to their ideal balance, the angler never loses contact and control of the bait even when using light lines and lures up to 3g (like small spoons, small grubs, micro spinners). Excellent reliability and outstanding value for money.

NEW 2013 *Sentinel*

SIC HD CX-1 GUIDES CARBON

Hybrid model of spinning rod. It is actually a telescopic rod which fits a separate handle. It is therefore a solution that is able to maintain the quality of both solutions: the practicality and the compactness of a telescopic and the power reserve and the stiffness of a two pieces rod. SiC guides allow to use of braided lines, even very small in diameter, while the cork handle gives exceptional comfort.

CX-1 CARBON

Telescopic rod which feature a perfect action that can be compared to a one piece rod. Made with CX-1 carbon, they are fitted with "Y" frame guides and an ergonomic 3 section EVA handle. This rod will surprise with its lightness, its compact size when closed and extraordinarily slim diameter of the blank which is unbelievably slim for a 5 section telescopic rod. A very important detail is the innovative system, so that when the rod is being closed, accidental breakage or damage to the guides is prevented.

WindBlow

NEW 2013 Forward

S.H.R. CARBON

Wide spinning rods family dedicated to medium-heavy fishing. Carbon blank with semi parabolic action and excellent power reserve. The 2 pieces are joint put over style, just to enhance resistance and reliability over time. The series consists of 8 models, all with actions ranging from M to H. The SiC guides are K style frame, particularly convenient because they are able to take the line away from blank and definitely avoid any tangling accident. EVA handle.

Green Creek

SIC HD GUIDES CARBON CX-1

The fishing pleasure of light and ultra-light spinning is enhanced by the Green Creek Series. Perfect details and very lightweight, the Green Creeks are mounted with SIC Sea guides, spigot joint, natural cork handle and a wooden reel seat for maximum sensitivity during the fishing action. The perfectly balanced blank give to the angler total contact and control of the lure even when using ultra-light tackle. A versatile rod, good for surface lures, spinnerbaits, topwater plugs, smaller crank, small grubs and worms, especially in still water. The 2,40 and 2,70m are designed for those who like fishing in big lakes and river with mid-lightweight lures with a parabolic and sensitive rod. Complete range for fishing with medium and light baits.

BLACK ROCK

SICHD CX-1
GUIDES CARBON

Two spinning rods absolutely powerful and sturdy, made of CX-1 with a special reinforced cross tube (X-Tape) that wraps around the blank to further strengthen the structure due to the high casting weights, 120 and 140g is more subject to stress and compression work. Both long 9'0" (2.70 m) in 2 equal sections are fitted with large diameter anti-corrosion double leg HD guide to maximize ease the escape of the lines and the passage of any knot junction between the braid and the fluorocarbon leader. They have an ultra fast action very quickly and are able to cast at a considerable distance very heavy and bulky baits with relative ease. They are dedicated to very extreme spinning that caters to the river giants such as catfish and sea shore jigging, by reefs and cliffs on high grounds with metal jigs of good weight.

Keison

SIC HD CX-1 GUIDES CARBON

Two pieces rods robust and powerful with very high performance and medium-fast action, versatile since they can easily cast both light bait and artificial lures up to 50g. They are made of carbon CX-1, in two sections with put-over joint and hybrid guides, which uses HD-SIC black finish guides regular single-stemmed type and low rider. The number of guides and their positioning allows a more linear lines release and then casting into a greater range. Their use ranges from the main predators of fresh water fish, up to large shad for pike and other predators, or at sea on rocky cliffs and very rough seas or extreme conditions. The whole series has the EVA handle into three sections, reinforced graphite reel seat, good and pleasant finish.

BLACK IKA

SIC HD GUIDES CX-1 CARBON

Interesting price for this Fast action and light weight two pieces rod. It comes with low frame guides and ergonomic EVA handle, Touch Blank style. We designed this rod for sea bass and sea trout fishing. The slim and balanced blank allow long hours of fun without tiring the angler's arms, even casting 1 Oz. lures. It can be used with jerk baits, top water lures and soft boats. We recommend you to use braided lines to exalt its casting abilities. Beside that the Black Ika can be even used for squid fishing, a typical Japanese style of fishing, using 4.0 (15 g) squid jigs.

GULFSTREAM

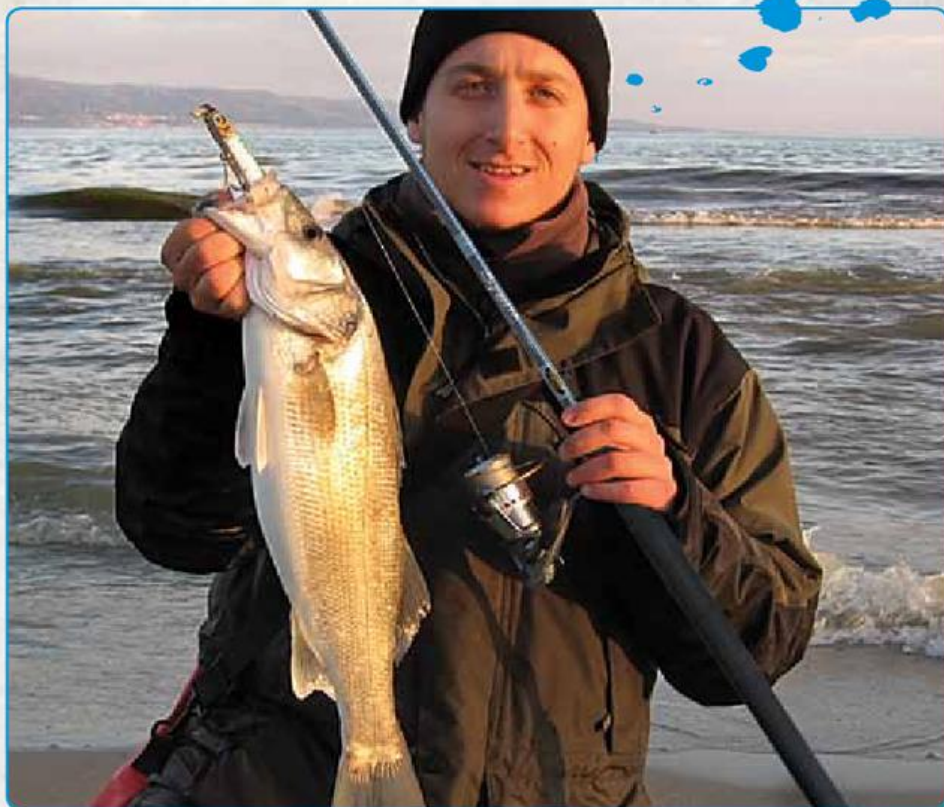

SICHD CX NANO GUIDES CARBON

Fantastic, super performing salt water rod, really versatile and made in 1+1 pieces, that is the tip section is entering the butt section right above the reel seat. Light weight and still able to cast and manage lures up to 60 grams and over. The slim blank cuts the air and the tip is sensitive, you can really "feel" how your lures is swimming down the surface. Action, power and lightness are all at top levels. This rod is not for those anglers fishing inside sea ports or when the sea is calm. The Gulfstream is the perfect rod for wild cliffs, big waves and big challenges. Typical preys are big sea bass and blue fish. In addition to that, thank to the accuracy with which this rod is able to twist and animate top water lures, it is perfect for leerfish fishing from the shore. Braided friendly HD-SiC guides and EVA handle.

Spectra

SICHD S.H.R. GUIDES CARBON

Rod built with HM and HR carbon featuring a slim blank, with outstanding casting performance, fast action and with good power reserve. Spectra can be used with a variety of different lures. Low frame guides hand assembling, EVA handle Japanese style and screw reel seat. The wide casting range, the sensitivity of the tip and the fast action, making these rods particularly interesting for salt water spinning. The Medium Heavy model is also suitable for last generation jerk baits and heavy lures. The Heavy action is recommended for big lipless and medium sized poppers.

HORIZON Progressive

CX-1 CARBON

Horizon Progressive can cast longer and more accurately, even in windy conditions, thanks to the fast action of the blank and to the small sized guides. The CX-1 Carbon blank is resistant and reliable, allowing safe retrieves of big fish. It is equipped with genuine Fuji IPS reel seat and low frame salt water proof guides.

The whole series is so suitable for salt water fishing, from low cliffs or rivers mouth. Horizon rods best match with long jerks.

NEW 2013

Vivid

SIC HD CX-1 GUIDES CARBON

Ultra light rods dedicated to the light rock fishing game with small soft baits and metal jigs. The super slim blank, one of the lightest on the market, has been made of super high modulus carbon CX-1 for maximum sensitivity due to the intrinsic characteristics of the material that allows a really impressive transmission of vibrations of microscopic lures. The tip is solid carbon to exalt this incredible sensitivity. You will have the sensation to fish with the line between your fingers! The SiC guides are totally resistant to marine corrosion and allow the use of superfine diameter braided lines without any problems. The Japanese styled split handle is made of high density EVA. Very high end finishes complete the blank in the proper way, special black and red wrappings and pearled painting all over the rod will highlight these superb fishing rods along the European piers and cliffs.

ARTIGLIO

SIC HD CX-1 GUIDES CARBON

The light spinning is becoming very popular among fishermen for trout, chub and perch, and this series meets their specific needs because you can easily cast small baits up to 7 grams of weight. Made of carbon CX-1 in two pieces with spigots on woven carbon joints, presenting tip action, fast and precise, able to easily identify even the most delicate bite.

CODE	LENGTH	C. LENGTH	SECTIONS	POWER	C.W.	OZ LORE	LB LINE	GUIDES

Saltwater predators fishing from the shore is absolutely booming in recent times. But this growth is not supported by a production of quality rods, and very often you can actually see people adapting fresh water rods to their needs, very often with poor results. It is evident this adapting is not what a serious angler wants. That's why Rapture focused its effort into building a series of shore fishing rods, dedicated to salt water fishing and nothing else. These efforts produced the Up Tide series, Super High Modulus Carbon CX-1 blanks, light weight and resistant, HD-SiC guides, braided friendly and corrosion free, accurate wrappings and top quality EVA handles. The Up Tide series is the solution for many, if not all, your needs. In this series you can find different models, each of them tuned for you specific salt water need. Choose yours!

**NEW
2013**

Up tide *Shore Cast*

**CX-1
CARBON**

Specific rods for shore fishing with great casting skills and excellent blank power. The very sensitive tip allows the use of bait in a wide range of weights. This is the classical sae bass and blue fish rod, to be used in challenging conditions, such as rough seas or high cliff.

CODE	LENGTH	C. LENGTH	SECTIONS	ACTION	C.W.	LB LINE	GUIDES

OCEAN VIB

CX NANO CARBON 

The "Vibrations of 'Ocean': No name is more suitable for this wonderful series of rods in which power, reliability, lightness and components are top. Developed according to the classical Japanese style criteria, which provide short, thin and responsive and progressive action rods, specifications that you can find in all models. These characteristics greatly help the jerking action with bulky and heavy short jigs, allowing you to keep in direct contact with the lure in any fishing conditions, even when fast drifting. The result is less effort during fishing action and longer and more productive sessions. These rods are made in two sections with the tip fitting into the handle "put in" and are made of the CX-Nano Carbon, that's why they are so thin, light but still durable, robust and able to counteract long and powerful runs of big preys.

Equipped with double leg genuine Fuji Alconite guides, braided friendly, and flanged top guide, to avoid any possible contact between the line and the frame. All guides feature under wrapping and double wrappings, for extra toughness. The fore grip is made of shaped Duplon, for better ergonomic, while the handle is completed with an aluminium gimbal and a Fuji DPS reel seat. The wide range of Ocean Vib VJ is complete and able to cover all the needs, from medium-light jiggging up to heavier one, both for short and long jerking actions.

OCEAN VIB POPPING

CX NANO CARBON 

Rapture is always ready to follow new fishing trends, offering a series of heavy spinning rods devoted not only to tropical heavy popping, as it can be easily got by printing of the Giant Trevally on the blank, but suitable for Mediterranean boat fishing too, fishing for schooling Bluefin Tuna.

There are 3 models in the range, starting from the "light" model, with medium-progressive action able to cast lures up to 110 gr, so ideal for pencil poppers and tapered stick baits. Then we have the intermediate model, 170g casting power more suitable for larger poppers and wtd stick baits, and finally most powerful one, the Extra Heavy action, for lures up to 220g, which is specifically designed for "Big Cup Head" poppers that require a rod that is not only able to cast them but also to retrieve them. Powerful but relatively easy to cast with due to the length of 8' (2.44 m) and 9' (2.70 m) all models are able to manage perfectly the lure during retrieve, even at long distance.

The CX-Nano Carbon blank is able to react promptly to the large predator bites, even with a reel drag set to 10 kilos. 1+1 rods, with Duplon and EVA handle for better grip, Fuji Reel seat and Fuji Alconite guides, equipped with underwrapping. An aluminium

GULFSTREAM

Rod characterized by powerful and lightweight ultra fast action, for a multiple use in various techniques. It has a very thin CX-Nano Carbon blank, can handle very well up to 60g spinning lures and jigs up to 150g. Two put in sections mounted on the split handle. Hybrid guides has been designed for dual use with HD-SIC braided guides, saltwater resistant. It's a very stiff rod, but with the thin tip which gives a remarkable progression in the casting phase and excellent sensitivity in the recovery. Versatile tool suitable for use according to the fishing needs: traditional jiggling with a particular fondness for the "long jerking" and spinning with metal lure, bait stick WTD (walk the dog) and also for tropical popping as a light rod for medium-sized prey in the ocean reefs.

The series Snatch consists of five models independently and accurately designed for the use in specific boat fishing techniques. For each project we involved numerous field testers in order to get the best blank for each specific technique, using the best materials and using them wisely.

All the blanks are made of High Modulus CX-1 Carbon in order to obtain lightness but also power, both the characteristics necessary for a pleasant and prolonged use over time. The handles have been made of high density EVA, for maximum comfort, which in some cases has been shaped in an innovative way in order to guarantee the best ergonomics possible.

All guides are SiC Sea Guide, the ideal choice for the use of braided lines, that lines are exactly the ones that will be more used in combination with these rods. Guides, where necessary, have been added with under wrappings to preserve the blank when under load. In this way the frame of the guide rests on an extra wrapping instead on carbon, thus increasing the global reliability.

A winning project for the most advanced techniques of boat fishing!

SNATCH VERTICAL CLASS

P.F.A. TIP ACTION **SIC HD** GUIDES **CX NANO** CARBON

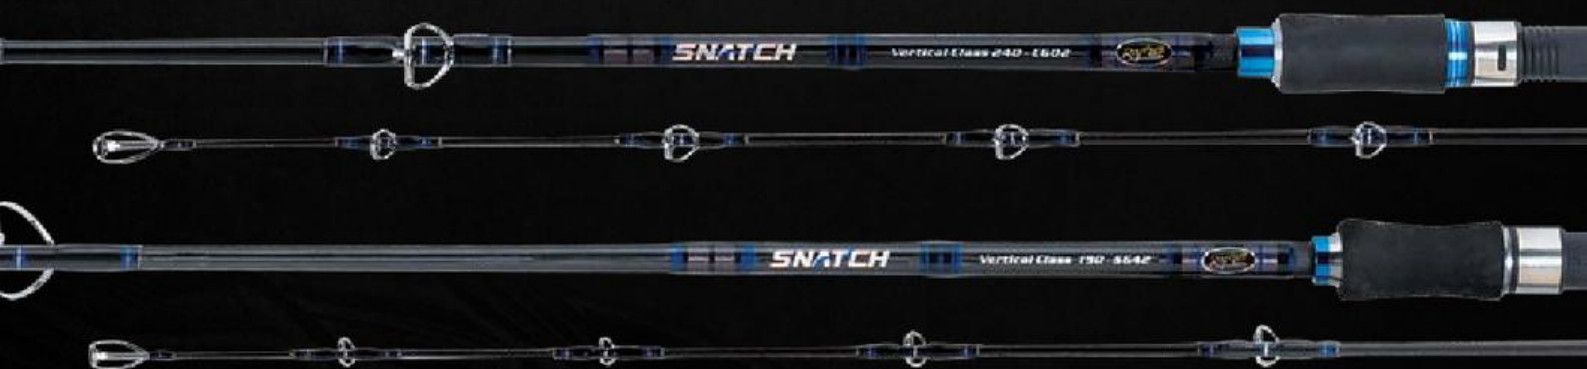

Series of rods designed for boat jig fishing that use a 1+1 blank with put in joint. The blank is markedly tapered to get the maximum power while maintaining an unmatched tip sensitivity. Snatch Vertical Class are available in two versions, for spinning or conventional reels. The trigger reel seat version features a special shaped handle, specifically for under arm use.

SNATCH CASTING & JIGGING

SIC HD GUIDES CX NANO CARBON

Ideal for fishing feeding pelagic predators, using metal jigs or specific long jerks, so casting the lure, but that can also be used in techniques involving vertical retrieve. It is therefore a particularly versatile rod, featuring light weight and unrivaled stopping power. It is recommended for use with braids class between 20 and 30 pounds. The first guide is reversed to minimize the friction and to avoid any risk of line tangles when casting.

SNATCH INCHIKU

SS SUPER SLIM BLANK PFA.TIP ACTION SICHD GUIDES CX NANO CARBON

Series devoted to Inchiku fishing and light jigging; Inchiku is a Japanese technique that has recently revolutionized many beliefs of European anglers. These rods are extremely light with parabolic-progressive action, very sensitive and are able to manage the lure with great precision. The blank retains exceptional power reserves even at maximum curve, guaranteeing the best performance even in really challenging situations.

TOSHIMA KABURA

D.C.G. TWR SIC HD
DIGITALLY CONTROLLED GRANITE THICK WALL BLANK DESIGN GUIDES

Tested in Sardinia, the Toshiba Kabura gave to our field testers great emotions. You can imagine that they were bale to catch a 25 kilos Swordfish with it! We don't think that every fishing session will be so lucky, but in any case you will be likely catching a lot of snappers, sea breams, groupers, John Dory etc. Toshiba are fast, responsive and sensitive, so perfect for fishing in medium depth, detecting bites. These rods are equipped with many low frame SiC Sea Guide HD guides of small diameter with double wrappings. First three guides are double legged, while the others are single legged, to have smaller weight on the blank, keeping the action perfect. Ergonomic EVA handle.

TOSHIMA INCHIKU XT

D.C.G. TWR SIC HD
DIGITALLY CONTROLLED GRANITE THICK WALL BLANK DESIGN GUIDES

We chose this 2,30m length because during our testing it was clear that this size was perfect to help to perform the simple and harmonious actions that are typical for the technique of Inchiku fishing. We all know that this style of fishing can give unexpected catches sometimes, that's why we have used a full DCG Carbon

blank which makes this rod totally reliable and extremely fast when you need to set the hooks quickly. Two section blank, extremely lightweight and with specific salt water resistant features for the guides like under wrapping fitting. Premium grade non slip EVA handle.

TOSHIMA LIGHT JIGGING

The Toshiba Light Jigging have born for fishing with small jigs, Inchiku, Kabura and Tai Jigs, to fish for sparidae (Breams). To properly use these types of lures, the rod must be light weight and flexible, but also have a powerful butt section. Toshiba Light Jig owns all these specs, together with saltwater proof components, such as SiC Sea Guide guides, suitable for use of thinnest braided lines, high density

TAKUMI

SS SUPER SLIM BLANK **SIC HD** GUIDES **CX NANO** CARBON

Designed for those who love slim and light rods with a perfect action and, above all, a great power. The action of blank is always progressive, being more parabolic in lighter models and fast in the heavier ones, and it is obtained using CX-Nano Carbon which reveals excellent characteristics of resistance and elasticity even on thin and light blanks. The equipment includes under wrapped SiC HD guides to dissipate the heat generated by the friction of braided. Guides are single leg for the two lighter models and double leg for harder ones. A choice that respects the prerogatives of lightweight and easy to use rods, sensitive and responsive even with small jigs and to meet the new trends that recommend a reduction of all the equipment to achieve better results with less effort. These rods are 2 sections with tip that fits in the handle, where the joint is reinforced by an aluminum ring. The handle is split type with fore grip that houses the reinforced reel seat and rear grip with rounded fighting butt, to allow fish fighting without belt.

SQUALL

D.C.G DIGITALLY CONTROLLED GRAPHITE **TWB** THICK WALL BLANK DESIGN **SIC HD** GUIDES **CX NANO** CARBON

Do not be fooled by the price of this rod. Even if Squall has been designed for Jigging beginners, you will find that these rods have all what it is needed for this technique: light weight and sensitivity for jerking the jigs at best without effort, parabolic action to increase fun and power the toughest catches. There are three models for use with spinning reels and two for conventional ones, featuring trigger reel seat. They are equipped with salt water proof SiC guides, big sized reel seat, ergonomic neoprene handle, providing extra comfort and grip even during long fights, and nylon gimbal. Bright cosmetic, where each colour coincides with a specific action.

KYUSHU SP VJ

SIC HD GUIDES

A wide and complete range of Vertical Jigging rods born to satisfy lovers of this technique. Value for money project. The two sections blank has been made of Super High Modulus Carbon, and it is slim, responsive and really powerful, to combat with extra large and strong preys. All the components are of excellent quality: tough screw reel seat, double leg stainless steel frame SiC guides, braided friendly, ergonomically shaped EVA handle and aluminium gimbal completed with a rubber cover, to fish without fighting belt too. In evidence also the accurate wrappings and under wrappings of guides and the superb cosmetic. Seven models to fully meet all the needs of jig fishing.

121-70-000	Kjos Tube Case

Kjos FLY REEL

New reel offered one size: line 7/8. The Kjos is a "normal harbor" entirely produced in aluminum, both body and spool are obtained by numeric control machinery. The drag system is classic, with disk compression. The Kjos can be used left or right handle. Extraordinary value for money.

CODE	MODEL	WEIGHT	CAPACITY
032-90-800	Kjos Fly Line 7/8	185g	200 yds 20#backing
032-90-801	Line 7/8 Spare Spool		

GUIDE MASTER AMC SERIES

Large harbor fly reel with frame and spool fully machined from bar stock aluminum to extremely tight tolerances. 2 ball bearings support the mechanical parts subject to stress, and an additional roller bearing supports the one way clutch. The gear is extremely reliable and precision, and the drag is wide range adjustable.

CODE	SIZE	Ømm	WEIGHT (g)	CAPACITY	BALL BEARING

GUIDE MASTER ADC SERIES

Large arbor performance reel for all keen fly anglers. Featuring wide range adjustable drag housed in a die-cast aluminum frame. The one-way roller bearing operates on a precision machined stainless steel spool shaft and 2 BB support the gear. Black color. Quick spool release system.

CROSS SYSTEM

The spooling is very tidy with Cross Winder, providing good casting distance and reducing the possibility of tangles. The "X" spooling in fact compacts the line and allows a best spooling. This system can be employed for both monofilaments and braided lines.

POWER BAIL

In several models, we introduced an aluminum tubular bail that is larger than traditional ones. Although larger, these new bails are lighter and more durable than traditional.

ROLLER ANTITWIST SYSTEM

The conventional line rollers, every turns of the handle, force the line to twist on itself causing annoying tangles. The Anti-Twist Line Roller dramatically reduces the line twist problem and reducing the wearing of your line.

S B S

Super Balance System

This new technology is obtained just using the latest computers 3D softwares, which allows the designing and later the construction of perfectly balanced rotors without the addition of external weights.

AVS

ANTI VIBRO SYSTEM

We asked our designers the challenge to minimize or even cancel the vibrations emitted by reels during the recovery phase. Thanks to the new 3D software, they have been able to design well balanced rotors (Super Balance System) but for top range reels we wanted something more. We focused on the stabilization of the gears and the subsequent cancellation of the games that swing the spool. The result is excellent, the pinion holds the spool firmly on its axis and this does not oscillate even when drag is in traction. We are particularly pleased with the results... You just have to try.

ONE WAY CLUTCH

Antireverse system in use in most reels. Thanks to a lever usually located above or below reel body you can plug or unplug the operation of the one-way roller bearing that locks the rotor. When the antireverse is inserted is always in direct bearing on the mechanics (fluidity) and can just turn the handle backwards just by winding lines; when it is stationary can also turn the handle forward and spooling nylon.

S.O.S. SYSTEM

With this revolutionary system, the rotor turns at a very high speed while the spool makes its turn up and down at a slower speed. This action delivers perfect parallel winding, thereby avoiding the line tension from normal spooling movements and therefore making longer casting easily possible.

SX1

SX-1 outstands for its innovative design, but just fishing with it you'll understand the real performance of this reel. Entirely designed in Japan with the latest 3D software, it's packed full of the latest technology, all enclosed in a X-Tra Tough body extremely lightweight but strong at the same time to eliminate any vibration. The LLG gears are fitted on 5 S.S Long Life Japanese ball bearings, combined with 1 Roller Bearing running the one-way clutch. The V-Shaped rotor is assisted by the IRSS system to prevent accidental bail closure, whilst the PowerBail, lighter and stronger than conventional bail arms, helps the overall balance. SX-1 is supplied with two spools both introducing the new Hybrid concept, engineered in a mixture of aluminum and woven carbon to reduce weights without compromise the strength. The spools are supplied in two different versions: the X-Light spool is a conventional aluminum-core spool extremely light and designed to be used with monofilaments, while the Braided Concept Spool features a special core designed to be used in conjunction with braided lines. As the spools, the same Hybrid Concept has been applied designing the handle, thus to reduce again weight and get the extreme performance. The drag assembly is completely sealed from water any other debris and it works on oversized washers with the addition of a ball bearing to increase the smoothness. A concentrate of cutting edge technology and performance.

TECHNICAL FEATURES

- 7 SS Long Life Ball Bearing Jap
- 1 Stainless Steel Roller Bearing
- Infinite Anti Reverse «one Way» System
- X-Tra Tough Body
- AVS Rotary Flat Oscillation System
- V-Shaped Rotor
- X-Light Hybrid Aluminum/Carbon Handle
- EVA ergonomic handle knob
- X-Light Hybrid Aluminum/Carbon Spool
- Braided Concept Hybrid Aluminium/Carbon Spool
- Front Drag System With Sealed Ptfе Coated Magnum Drag Washes
- AS Anti Twist Line Roller
- Powerball

XENOS XOS

All gears are in S.S. while the central shaft controls the Slow Oscillation System drive which regulates line winding. The roller bearing on the central shaft ensures exceptional fluidity. Other components include infinite anti-reverse, single-piece handle in aluminum with soft touch knob, anti-twist line roller, oversized aluminum hollow bail and aluminum body. The sizes 3000 and 4000 are perfects for medium-light lures, whilst the 6000 is particularly suited for vertical jigging and heavy duty spinning.

Wildish

The brand new WILDISH FD series can be used in every situation with every spinning technique, for freshwater and especially for saltwater. The main gear is supported by seven long life ball bearings, sealed and totally salt waterproof. The oversized drag washers allows to fight easily with the toughest fish. Three different sizes available.

TECHNICAL FEATURES

- 7+1 S.S Long Life Ball Bearings
- Infinite antireverse "One way"

DEIMOS

Deimos offers an attractive design and important technical solution. The high quality components and the main gear give total smoothness to these reels. Featuring 9 ball bearing and 1 roller bearing to run the one-way clutch, to guarantee a great fluidity and good retrieve power. The SBS technology avoid any vibration and improve the smoothness on the retrieve, AS line roller is very kind to the line and provides the anti twist system, while the Powerball ensures that the line fit the roller perfectly all the way. The spool is made by aluminum and the graphite spare spool is supplied as a standard. Whilst the drag results powerful and progressive, perfect to fish both with monofilaments or braided lines.

TECHNICAL FEATURES

- 5+1 Long Life Ball Bearings
- Infinite antireverse "One way"
- High Tech Graphite body and rotor
- X-Cross System
- Fighting Handle
- AS Line Roller (antitwist system)
- Powerball
- Micrometric Drag
- Graphite Spare Spool

Ventoso

Assassin

THOR

Vento BC

The new low profile Rapture bait casting reel shows an aggressive look. Important features are: the corrosion resistant spool in aluminum alloy, the adjustable magnetic brake allowing better casting performance and the removable side plate that allows an easy access to the gear. High reliability.

TECHNICAL FEATURES
1pc Aluminium Die-Cast Body
8+1 S.S Long Life Ball Bearings
High Precision Gears with 7.0:1 Gear Ratio
Precision Japanese B.B on Spool Shaft
Magnetic Drag System
Oversized Carbon Drag Washer
Precision Die-Cast Brass Main Gears and Pignon
Titanium Nitride-Coated, aluminium oxide line guide
Fighting Alu. Handle with Soft Ergonomic Knobs

CODE	SIZE	GRS	GEAR RATIO	CAPACITY #	B.B.
031-85-200	1000	240	7.0:1(90cm)	0.30-130m	8+1

Assassin BC

This reel is the perfect tool for those seeking an easy to use reel having the possibility to use it in a wide range of situations. Designed for short and medium distances, this reel is extremely versatile, thanks to the easy adjusting brake which allows to use a wide range of different lures weight. Its compact size, good line capacity and excellent drag will ensure a perfect control during combat. ASSASSIN BC is definitely a superb fishing machine.

TECHNICAL FEATURES
1pc Aluminium Die-Cast Body
7+1 S.S Long Life Ball Bearings
High Precision Gears with 6.2:1 Gear Ratio

DYNA TEX FIRE ICE

The new DYNA-TEX FIRE ICE is the result of many investments and efforts from Rapture. The quality we have achieved in this braided line is simply incredible: diameter - strength ratio is at the top if compared with other translucent clear braided lines, as for the abrasion resistance. With this super line is possible to cast at incredible distance cause of the smooth surface, and thanks to the zero stretch you can detect the most shy bites and easily set the hook even when fishing far from the shore. Available in 100m spool from diameter 0.10 to 0.30 . We recommend "Palomar" knot for swivel and "Mahin" knot for connection with other lines.

TECHNICAL FEATURES

- Superior Coating
- Near 0% Stretch
- More Compact
- Thinner Diameters
- Rounder Profile
- No Reel Memory
- Highest Abrasion Resistant
- Superior Knot Strength
- Longlasting Performance

DYNA TEX SPIN X4

Rapture in conjunction with Dyna-Tex Fiber, world leader in synthetic yarn industry, have developed a unique braided line to meet the demands of modern anglers. Dyna-Tex Spin 4X is produced under high tension with a cutting edge technology, allowing to obtain a more compact fibers that packs better on any reels reducing any chance of wind knots. Dyna-Tex Spin 4X offers an incredible strain to diameter ratio and the highest abrasion resistance combined with a maximum sensitivity, allowing longer and more accurate casts. The slick surface increases dramatically the smoothness reducing the friction against the guides and any fish loss. Thanks to its ultra-fine diameter, Dyna-Tex Spin 4X is suitable for casting, spinning and vertical fishing as it cuts through the water with ease allowing the angler to remain in contact with the bait.

TECHNICAL FEATURES
Near 0% Stretch
More Compact
Thinner Diameters
Rounder Profile
Smoother Surface
No Reel Memory
Highest Abrasion Resistant
Superior Knot Strength
Longlasting Performances

The new X4 is a 4 strands polyethylene braided line, built with a very tight and complex structure that giving an extraordinary compactness and a consequent exceptional roundness in diameter. The evolution of braided Dyna-Tex, specifically the X4, is even more effective in terms of flexibility and handling, easily found by simply touching the line with your hands. These characteristics of flexibility and roundness are critical to a braid that was created specifically for casting. Our Pro Team Rapture choose two colors: a classical Low-Viz Moss Green, ideal for most situations, and an equally classical Hi-Viz, Neon Yellow, especially useful in low light conditions or those fishing techniques where it is absolutely essential to have a clear understanding about the position of the bait. The diameter / breaking strain ratio is top class, due to the use of high quality PE fibers.

BRAIDED & MONO

FLUO SPIN

Predator fishing line 100% Fluorocarbon construction. Unmatched performance in extra clear and transparent waters. Thanks to the lowest water refraction in its category, it cannot be detected by fish and so cannot alarm them. Perfect for spooky species such as trout and perch. The wide range of diameters can fit the needs of many different fishing styles though. The incredible abrasion resistance makes it ideal for fishing in heavy cover spot, and occasionally it can be used also to tie high resistance leaders.

SPIN PIKE

This new greenish-brown monofilament is designed specifically for pike fishing and other big freshwater predators. It is exceptionally strong and has the perfect combination of low stretch and softness making every lure easy to cast. Unlike other cheap spinning lines the low stretch feature allows the angler to have a much more direct control of the lure and easily strike the fish. Parallel winding and packed on 150m spools.

SPIN CAST

Technical monofilament created for spinning. The particular internal structure combined with the outer silicon coating reduces the mechanical memory of the line while maintaining an excellent handling and castability. It is therefore ideal for long casting and intensive lure fishing. Fully waterproof, thanks to the special coating that insulates the structure of the line from the exterior. It maintains all its characteristics unchanged even after prolonged use even at very low temperatures. The color, light grey-green transparent, maintains a very low degree of refraction in the water.

SPIN ZANDER CRISTALL

We spent many hours on research and development for this new monofilament. This new product match perfectly all the most important features required from the modern zander angler. The particular colour of this innovative monofilament is the best you can get for good visibility to the angler outside the water and at the same time reduced visibility inside the water to obtain an optimal presentation of the bait. Thanks to no memory construction and low stretch is possible to easily detect the lightest bites.

VERTICAL JIGGING

DYNA TEX

Following the request of many Rapture fans from whole Europe we decided to enlarge the assortment of this famous braided line for Vertical Jigging with two new diameters: 80lb and 100lb. These two new pound tests are perfect for heavy jigging but also for trolling, where it is extremely important to know exactly how deep you are fishing. With Dyna-Tex Vertical this is possible as it is coloured differently every 10 meters. Each of these coloured sections (6 different colours) are repeated along the whole length of the spool. Protected by an abrasion resistant coating this is probably the most persistent and resistant saltwater braided line on the market. We suggest to use the "Mahin" knot to connect Dyna-Tex to other lines, while we recommend to use the "Palomar" knot to connect to swivels or hooks.

TECHNICAL FEATURES	
Superior Coating

VERTICAL JIG MONO

Designed for all Vertical Jigging lovers, this mono is produced from a mix of Japanese co-polymers which provides extreme abrasion resistance and reduced stretch. With Vertical Jig Mono it is always possible to know how deep you are fishing thanks to different colour every 10 meters, these coloured sections are repeated in six different colour for the all 300 meters length. The great knot strength, the lack of memory and anti-UV treatment, make this line a perfect choice also for spinning.

PROSERIES

LIMITED EDITION

BLACKNICKEL & PERMA STEEL VMC TREBLE HOOKS

EXTRA STRONG FORGED SPLIT RINGS

WOBBLING ACTION

Wobbling lure, with strong tail action. Wobbling will excite predators producing extra vibrations and flashes.

WIGGLING ACTION

Crazy side to side action, great for targeting finicky predators of any species.

DART ACTION

Darting lures must be jerked, adding movement with rod tip. The lure will therefore dart in several directions just like a wounded fish.

S-CONCEPT ACTION

These lures swim creating a sort of S into the water. In this way it is possible to scout a larger area.

WEIGHT MOVING

Several weights are housed inside the body lure, in one or more inner rooms allowing them to move back and forth. During casting action they will move to the tail, increasing casting distance, while during retrieve will move to the head, increasing stability.

FIXED WEIGHT

The weights inside the body lure cannot move. In this situation the lure is much less noisy and very useful in over fished venues.

ROLLING

Rolling lure, the body is rolling on its own axis. Extra flashes and tight swim.

RATTLE SOUND

Inner weights produce high frequency vibrations.

BASS SOUND

Inner weights produce low frequency vibrations.

FULL WIRE / THROUGH WIRE DESIGN

Full Wire (Through Wire) construction simply means you have a wire connection from the tow point to the hook hang points. It's the strongest method for making lures.

HOT BUZZ

This small and sinking crankbait features an unrivalled erratic action, perfect when predator fish is not that active. The wide range of colours and their shape which perfectly imitate natural prey fish make it a perfect lure through the whole fishing season.

MYSTIC SWIMMER

Jointed and lipless sinking swimbait. It can really swims as soon as it enters water, even if let sinking on its own. A slow steady retrieve accented by rod tip movements will take it alive, while a soft rattling will excite predators curiosity. Observe it carefully during retrieve and you too will think you are staring at a live fish!

SILENT SHAD

Our new SILENT SHAD is definitely a multipurpose lure, as a matter of fact sizes and weight makes it suitable for every freshwater predator. The slow sinking action allows to fish at different water levels and to retrieve at different speeds to achieve different goals. During our test we used this lure with steady retrieve alternating few breaks to let the Silent Shad sink for few seconds with really good success on black bass, pike, big trout, asp and catfish too. Top quality components and genuine VMC treble hooks makes this swimbait totally reliable.

S-STALKER

Long Jerk bait that can be used in many situations. The profile of the body and of the lip allow a very wide swimming action, exploring a vast quantity of water. It can be retrieved either linearly or with pauses and restarts or it can be jerked. In fresh water, pike will definitely be the more interested in this lure, while at sea it will be barracuda stubbornly chasing him.

SUPERTIDE

The SUPERTIDE has been specifically designed to catch all marine predators with a spinning technique. The result is a bait that is very resistant to impact and to the worst weather and sea conditions. Thanks to its aerodynamic shape it can be cast enormous distances even in unfavourable strong wind conditions (as is frequent during fishing trips at sea). Deadly for Bass, Serra and Amberjack.

HOOKS: #06 VMC Permanent Steel
RUNNING DEPTH: 0.6-1.6m

WINDEX

RAINBOW TROUT

This spoon features a very aerodynamic shape which allows long and accurate cast and a circle coloured insert to improve attraction and visibility. This spoon is fitted with a single hook, and can thus be used in many reservoirs for catch and release. The hooking ratio is the same as using treble hooks thanks to the special shape of this hook. Can be used in lakes or creeks targeting trout, chub, asp and perch.

CODE	WEIGHT
188-05-00_	2.0g
188-05-01_	3.0g
188-05-02_	4.0g

SILVER TROUT

The new Silver Trout has a less curved body and that's why it is able to better "cut" the water. This feature allows you to cast longer and to fish in deeper water levels. It is a very good solution every time you need a fast retrieve. Excellent for fishing in lakes and rivers targeting trout, asp, chub and perch. Fitted with single genuine VMC hook.

CODE	WEIGHT
188-05-03_	4.0g
188-05-04_	6.0g

BROWN TROUT

We reduced the thickness and enlarged the surface of the blade to make this lure suitable for slow retrieve and shallow waters. We recommend a steady and slow retrieve with occasional stops to let it sink. Absolutely deadly for most of fresh water predators. Fitted with single genuine VMC hook.

CODE	WEIGHT
188-05-05_	6.0g

SPINNER AG

The oval shape of the AG Spinner blade is the most proper to fish in lakes or slow flowing rivers. We used a wide range of colors for the blades to enhance visual stimulation and trigger strikes in any situation. The compact body allows to cast accurately very far, fitted with genuine VMC treble hooks.

CODE	WEIGHT	HOOK SIZE
188-05-06_	3.0g	08
188-05-07_	5.0g	06
188-05-08_	6.5g	04
188-05-09_	9.5g	02

SPINNER AGL

The willow leaf blade used for our new Spinner AGL is the best solution to fish in the deeper lakes or river. This spinner is performing at its best if retrieved slowly and steady. Depending on sizes this lure is deadly for trout, perch, asp, black bass and pike. Fitted with genuine VMC treble hooks.

CODE	WEIGHT	HOOK SIZE
188-05-15_	3.0g	08

DANCER FROG

Frog imitation with hollow collapsible rubber body. So realistic and so effective for surface fishing. Silicone skirts imitate the legs without creating snagging problems, so you can use the frog between weeds. The chemically sharpened hooks are so strong to allow to literally "extract" fishes from heavy cover. The body has an internal rattling system to increase to the max the attracting power. Nevertheless the rattling system is removable to increase lure buoyancy and visibility above water. Three different sizes available: 45 mm - 7 g, 55 mm - 14 g and 65 mm - 16 g.

PROTEAM

PREMIUM SELECTION CUSTOM SOFT BAITS
THE ULTIMATE DESIGN FOR SPECIALISTS

Rapture's Soft Lures are made of superior quality material, soft but still durable. These powerful scented lures are packed in a preserving oil that will maintain their outstanding performance. Every and each Soft Lure has its own design which is specific and effective, tested and improved by our Pro Team for long time before launching it in the market. We are committed to achieve details perfection and absolute quality to get the best performance. Try them and you won't regret!

ACTIVE FORMULA

Peculiar texture increases scent and salt dispersion. Raising attractive power and catch rate.

SUPER SCENTED & SALT-IN

All lures are scented and salt in the compound to keep for longer their attractive power.

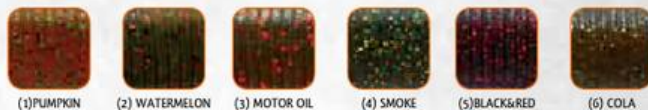

NEW 2013

Super Flick SUPER NATURAL MOTION **FLICK STICK**

The Flick Stick is a special worm for finesse presentation, a new design that gives a peculiar movement when sinking to the bottom. Built-in curves result in more fish-enticing action than other plastic worms. Deadly if used with a wacky jig head.

CODE	LENGTH	PCS/BAG
188-00-05_	4.5inch (11.5cm)	10

RATTLE SNAKE SUPER NATURAL MOTION

The Rattle Snake is a bait specifically created for finesse fishing. This worm is equipped with an innovative design that makes it fall in an extremely natural way and the two small appendages that produce different vibrations. The very high percentage of salt makes this bait extremely soft. Suggested Techniques: jig head, split shot, shot down, wacky and texas rig.

CODE	LENGTH	PCS/BAG
188-00-00_	4.5inch (11.5cm)	10

NEW 2013

NEW 2013

Intruder CURLY TAIL
SUPER NATURAL MOTION

The Intruder Curly Tail is a compact finesse worm with small body ribs and a grub. This design is great because you have a very compact body, able to enter thicker cover, but still able to produce many vibrations. Suggested Techniques: texas rig, split shot, jig head, trailer on jig.

CODE	LENGTH	PCS/BAG
188-00-30_	4inch (10cm)	10
188-00-35_	4.7inch (12cm)	10

Ribbed CURLY TAIL
SUPER NATURAL MOTION

NEW 2013

The Ribbed Curly Tail is a worm with a ribbed body, giving the bait a unique sinuosity, and has a very long curly tail that increases attacks during retrieve action, thus making the bait irresistible. Suggested Techniques: texas rig, split shot, jig head, trailer on jig.

CODE	LENGTH	PCS/BAG
188-00-15_	4inch (10cm)	10

Worm CURLY TAIL
SUPER NATURAL MOTION

NEW 2013

The Curly Tail is a classic worm with curly tail and slender body. During retrieve the tail produces highly appealing vibrations and the slim body provides excellent penetration into cover. The worm has been added of salt, ensuring greater retention of the bait in predator mouth. Suggested Techniques: texas rig, split shot, jig head.

CODE	LENGTH	PCS/BAG
188-00-10_	5.5inch (14cm)	10

WACKY WORM
SUPER NATURAL MOTION

The Wacky Worm is a straight and thick bait, whose aerodynamic shape and heavy weight make it very versatile and good for any situation you can find on the water. Thanks to its weight it can casted, skipped, flipped and pitched without any difficulty. Suggested Techniques: texas rig, split shot, carolina rig, trailer on jigs and jig head.

CODE	LENGTH	PCS/BAG
188-00-20_	5inch (12.5cm)	10

NEW 2013

NEW 2013

Paddle tail NIGHTCRAWLER
SUPER NATURAL MOTION

The Nightcrawler is a very versatile wormbait, with all the features needed to fool the more suspicious predators, tail design produces a natural action to make it more realistic. Suggested Techniques: texas rig, split shot, drop shot, wacky, carolina rig, jig trailer.

CODE	LENGTH	PCS/BAG
188-00-45_	6inch (15cm)	10

Mouse TAIL JERK
SUPER NATURAL MOTION

Mouse Tail Jerk is an innovative bait, its particular shape mimics forage fish and its thin tail produces irresistible vibrations during retrieve. Suggested Techniques: drop shot, split shot, texas rig, trailer on microjig.

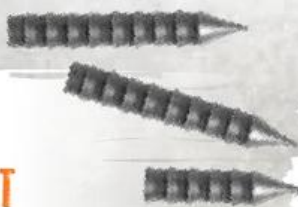

CODE	LENGTH	PCS/BAG
188-00-60_	3.7inch (9.5cm)	10

TECK SINK

NEW 2013

MEDUSA SUPER NATURAL MOTION

The Medusa is a lure with a straight and compact body, with a top skirt that increases its attracting power and gives a design that allows longer casts and fish in encumbered areas. Perfect for pitching and flipping. Suggested Techniques: jig head, Texas rig.

CODE	LENGTH	PCS/BAG
188-00-55_	4inch (10cm)	5

FAB GRUB SUPER NATURAL MOTION

NEW 2013

The Fab Grub is a soft bait for different uses, designed with a very large tail that emits many enticing vibrations during retrieve. The compact and extremely soft body allows predators to keep the bait in their mouth for a long time. It can be used in pitching, flipping, and as carolina trailer. Suggested Techniques: texas rig, carolina rig, trailer on jigs, spinnerbaits and chatterbait.

CODE	LENGTH	PCS/BAG
188-00-70_	3.4inch (8.5cm)	10

ZIGGY GRUB SUPER NATURAL MOTION

NEW 2013

The Ziggy Grub is actually a bait in between a grub and a worm. The ribs along the body give it a bulkier appearance and displace a significant amount of water, creating a lot of vibrations. The ribs also give the Ziggy Grub a feel and a texture that bass love, causing them to hold on longer for better hooksets. The soft, thin, flexible curly tail provides additional action on the fall. Suggested Techniques: texas rig, dropshot and flipping.

CODE	LENGTH	PCS/BAG
188-00-50_	3.2inch (8cm)	10

DEVIL CRAW

The Devil Craw is a creature looking like a shrimp, a bait that never fails, just perfect in heavy cover. Designed to easily break through dense cover to reach the big bass underneath. Suggested Techniques: texas rig, shot down, trailer on jig, jig head.

CODE	LENGTH	PCS/BAG
188-00-65	3.4inch (8.5cm)	10

SNEAKY CRAW

The Sneaky Craw is a realistic imitation of shrimp, equipped with two flat and thick claws, moving frantically in fall and making this bait easy to spot. Ideal for fishing in pitching and flipping inside thick cover. Suggested Techniques: texas rig, jig head, trailer jig.

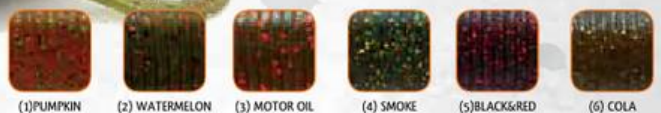

NEW 2013

CODE	LENGTH	PCS/BAG
188-00-40	4.5inch (11.5cm)	10

CRAZY LIZARD

The Crazy Lizard offers a great frant yet realistic swim and making this bait easy to spot. Great for fishing in pitching and flipping, or even on open waters. Suggested Techniques: texas rig, jig head, trailer jig.

CODE	LENGTH	PCS/BAG
188-00-23	4.7inch (12cm)	10

NEW 2013

BASS JIG

This weedless jighead will provide very good catches. The brand new head shape has been designed for easy fishing in heavy cover. Perfect for flipping and pitching. Rapture Bass Jigheads feature very resistant varnish and chemically sharpened hooks.

SEA MASTER PLIER

Stainless steel pliers, perfect for the toughest jobs in fresh or salt water. The handle is equipped with ergonomic and non-slip soft plate. Can be used to close crimps of various diameters and also to cut the tougher traces or lines. Comes with black cordura carry case which can be fitted to the belt.

CODE	DESCRIPTION
101-46-300	Sea Master Plier

SEA RIDER PLIER

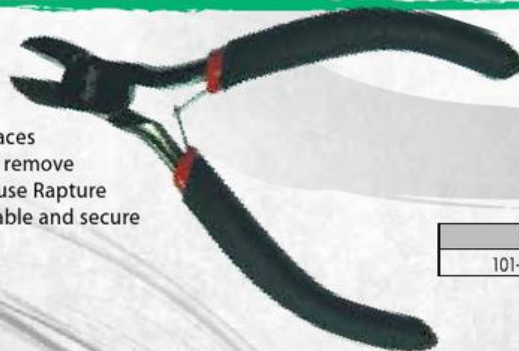

Stainless steel pliers, perfect for the toughest jobs in fresh or salt water. Particularly compact, are essential in unhooking operations of large predators, the handle feature a non-slip grip which is particularly comfortable. The high-strength material used for the jaws can easily cut the tougher wires or lines.

CODE	DESCRIPTION
101-46-350	Sea Rider Plier

CUTTING PLIER

High quality plier that features a side cutter able to cut wire traces and trebles, necessary to cut the point of the hook or treble to remove it reducing to minimal the risks for the fish. Quick and easy to use Rapture Cutting Plier is fitted with rubber handle to provide a comfortable and secure grip and a special finish to prevent from rusting.

SWIMMY

NEW 2013

SWIMMY

The Swimmy is a soft swimbait made of soft rubber with a specific shape to make its swimming incredibly realistic. The Swimmy shows all its enticing characteristics during the retrieve, even with a linear and slow retrieve, it can achieve the realistic look of a forage fish. Available in 3 sizes: 90, 120, 150. Suggested Techniques: texas rig, carolina rig, jig head, down shot

SWIMMY RIGGED

The Swimmy Rigged is a revolutionary lure combining all the benefits of soft bait with the simplicity of use typical of a hard bait. The soft silicone body is scented and equipped with a genuine VMC treble hook. Housed inside the body there is a polycarbonate skeleton that supports the lip. Really interesting, in addition to the jointed body, is the tail placed in a horizontal position to increase movement on the fall.

NEW 2013

DANCER PERCH

Perch and roach are natural preys for many fresh water predators such as pike, zander, black bass and catfish. Rapture has introduced some perfect imitations with a sinking action, created from the softest materials and with a perfect swimming action. In 2012 Rapture designed a 5 sections soft bait of just 12cm (34g) to complete the existing Dancer family and that can be easily used even with common spinning rods and reels. The colours and details have been carefully selected to give you great success with the big predators.

DANCER PIKE

This brand new soft lure has been designed for the big predators which live in our freshwaters as Pike, Catfish and Zander. The particular design of the body combined with the softest materials guarantee a perfect movement and the right sinking rate. The colours and details have been carefully selected to achieve maximum performance, while the tests developed with our collaborators have given impressive results.

CREATURE SHALLOW DIVER

Famous eel imitation now available in 2 smaller sizes (15 and 20 cm) and thus lighter (20 and 30g) that can be easily used with common medium spinning rods and reels. 6 very nice colours able to attract many predators in fresh water mainly but also in salt water. Stability and swimming action are really good and lifelike. Predators attack this lure when retrieved steady or when jumping it from the bottom to the surface.

CARBON COATED LEADERS

Brand new wire leader with exceptional features. The core is composed of a weave of high quality steel wire, to which are added carbon fibers using a particular and completely new building technique. The addition of carbon fibers allows a greater tensile strength if compared to common wires of same diameter and greatly improve the smoothness of hooklength.

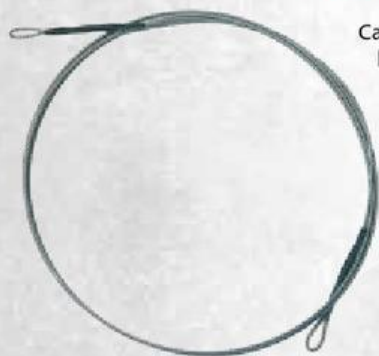

The final result is a more natural presentation of the bait that can dramatically increase your catch rate. The swimming action of lures and of dead baits (mort manié) will not be affected in a negative way.

WIRE LEADER

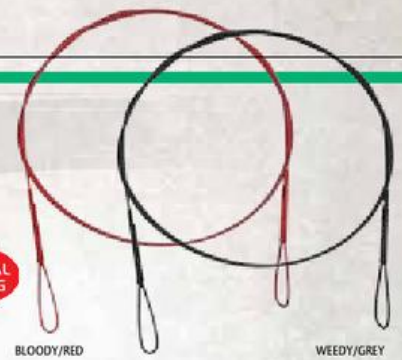

Nylon coated high resistance steel wire. Ideal for large predators fishing. We developed a new series of two virtually invisible in water colours: the Bloody (Red) and Weedy (Black). BLOODY WIRE is red, the first color vanishing underwater and also simulating a trace of blood. Perfect colour choice for both fresh and salt water. WEEDY WIRE is black and it is used in all those waters where there is rich vegetation. The package includes steel tubes.

WIRE LEADER LOOP/LOOP

Wire Leader assembled in various combinations for the fishing rigs constructions.

FISH GRIP

Essential tool for catch and release. It will hold your prey without arming it. Lightweight but sturdy and reliable.

CODE	DESCRIPTION
101-46-400	Fish Grip/25lbs

SPOT MARKER

The clever H shape design guarantees the marker will stay where it is put and always floats directly above the lead. A whopping 25m of line is attached to the lead strip and the high visibility orange plastic make it easy to spot at distance.

CODE	DESCRIPTION
101-46-200	Spot Marker

S.J. DOZER

The Dozer is one of the most popular and appreciated jig. It's easy to use but terribly catching to almost all species in you can find in our seas, such as snappers, dented or jack. The asymmetrical design of the body determines a very attractive action during the falls and retrieves. We advise to recover the lure with the technical short jerk, alternate to longer pull of the rod and falls.

Asami

ASAMI MADAI JIG

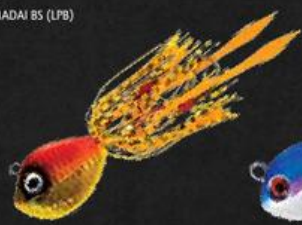

Special jig developed by Japanese professional anglers. The shiny color effect of this metal jig, in combination with the erratic movement of the soft plastic octopus, make it irresistible to many species of fish, which until few years ago, was possible to catch if not using live bait. It combines the powerful action of the jig with the winding movement of the octopus which is a recognized food for many predators. The species you can target using this lure are virtually countless: when you feel the strike you never know what is down there on the opposite side of the line.

ASAMI INCHIKU

New series of INCHIKU lures available from 70g to 100g. Inchiku fishing is a more effective evolution of vertical jigging. The most surprising effect of this new technique imported from Japan is its versatility: as a matter of fact this technique, unlike vertical jigging, can be practiced also from the shore. What you have to do is to let the bait sink to the bottom and start working it with a steady jerk action, depending on the situation you can use short or longer jerks action but always with the same rhythm.

Asami

ASAMI CASTING JIG

The aerodynamic shape reduces air friction during launch while maintaining a stable flight, making this lure capable of reaching extreme distances. Asami Jigs also have excellent action in water and can be retrieved steady or slowly jigged. Ideal for fishing from the shore, from piers or rocks, as well as for fishing offshore close the surface or jigging. Seabass, jacks, trevallies and barracudas are between the species that love this lures. All jigs come with original VMC hooks connected by a forged split ring for maximum strength.

JIG ROLL

A practical organizer to carry and store lead fish lures of all sizes. Like all items Rapture luggage these too are constructed with highly resistant and washable materials.

CODE	DESCRIPTION	SIZE CM
048-53-310	Jig Roll Organizer	52x18
048-53-350	Jig Roll Organizer	52x27

The Light Rock Fishing is a technique that can be practiced anywhere there is salt water, even in the absence of rocks. It was born in Japan but it is becoming a real Life Style in Southern Europe. In rocky or weedy environments, you can catch comber, wrasse, sea bream and of course the Mebaru, or scoriofish, the fish that in Japan gave its name to the technique. On mainly sandy environments you can more likely catch gilt-head bream, striped seabream in addition to... the Aji, or horse mackerel, the other fish that has given its name to a branch of the LRF. And in ports or near them it will be the sea bass to bite on your lure. The fishing techniques takes place not only on the bottom, between the crevices of the rocks, but also in midwater or even close to the surface. This technique is successful for its intrinsic ability to capture virtually any fish. And the size is not always that small...

MEBARU Rapture WORM

Glowing Colors!

All colors are glowing in the dark and therefore more visible even in low light conditions.

AJI WORM

Worm lure for midwater fast retrieve, very soft and sinuous action. Special for horse mackerel.

CODE	LENGTH MM	PCS
