# Rapture

RAPTURE IS A DYNAMIC BRAND  
CONSTANTLY EXPANDING ON THE MARKET.  
BORN FROM THE PASSION AND EXPERIENCE  
OF PROFESSIONAL ANGLERS.

Every single item is moved into production only after having passed strict tests made by Rapture experts. Take a look to this catalogue and you will see the new casting and spinning rods designed by the best experts in this discipline, exclusive travel rods, a new innovative range of lures, and many other new accessories. Nevertheless we will not stop to research new building technologies, new materials and new techniques to grant you the most innovative products to satisfy your never ending passion.

Year after year the Rapture brand keeps growing into consideration and into hearts of spinning fans. This responsibility gives us the strength to continue with increasing effort in research and development of new and more efficient lures and tackles. From these assumptions comes the new line of rods to complete the already impressive assortment we had. In the following pages you will find lures, accessories and tackles second to none in matter of quality, performance and reliability.

# Rapture

Rapture is a brand gathering a huge number of hard and soft lures, both for fresh and salt water, and a great assortment of rods, always more calibrated on specific predator fishing techniques. We are always very attentive to the new fishing styles and trends and we like to receive inputs and share opinions on social networks. Sign in our Newsletter to get the latest news and write us what you think. On Rapture social network pages you can share your videos and pictures too.

## RODS TECHNOLOGIES:

### **SX4** CARBON CLOTH NANO TECHNOLOGY

The new Japanese multidirectional carbon cloth is able to offer tremendous performance.

### **S.H.R.** CARBON

High Resistance Carbon – Top reliability in every situation.

### **TWB** THICK WALL BLANK DESIGN

Reinforced blank through a specific sized carbon layer.

### **CX** NANO CARBON

Nanotechnology application to carbon material. The most evolved fibers in the world.

### **SS** SUPER SLIM BLANK

Smaller diameter blank in their category.

### **P.F.A. TIP** ACTION

Power tip action for a proper management of fish fight.

### **CX0** CARBON MICRO-PITCH

CX-1 Carbon even lighter and stronger thanks to the Micro-Pitching process.

World quality Japanese components.

### **D.C.G** DIGITALLY CONTROLLED GRAPHITE

Digitally controlled graphite layers.

### **CX-1** CARBON

The purest super high modulus carbon for superior performance.

### **SICHD** GUIDES

Corrosion free, strong and light frame. Fast heat dissipation.

Super Top level one piece rods designed for competition by the Rapture Team and Marco Iseppi. 6 models for spinning and 4 models for casting, to cover all the needs of Italian and European Bassmen.

## XRAY

**SX4** CARBON CLOTH  
NANO TECHNOLOGY

**SIC HD** GUIDES 

Every and each model has been independently designed for a single technique or for two similar techniques. We took maniac care of every and each detail to obtain one of the best rod for Pro Bass Anglers. The blanks, sensitive and reactive, are super reliable, standing the strongest stresses and strikes. To build them, Rapture in co operation with Toray®, developed a special Carbon tissue named SX4 Carbon Cloth – Nano Technology. This material is made of the purest high modulus carbon fibres, bonded by the a small quantity of resins, and molecularly woven to create a sort of wrapping tissue where fibres are positioned at 45° and 135°. This peculiar positioning at given angles is able to distribute the stress and loads along the whole surface of the blank, making the rod strongest than ever. The high grade EVA handle is split, to reduce the already small weight of the blank and

make it super balanced. Guides are prime grade SiC and can be used with braided lines.

# Rapture FRESHWATER BASS RODS

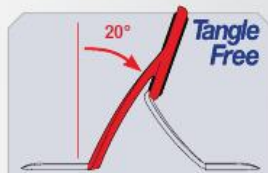

Sitting on top of the Rapture range, Wivern rods are specially dedicated to the most careful and demanding angler, who understands the great advantages of one-piece structure, knows the performances of High Modulus carbon and appreciates the quality of Fuji original components. With the double version, spinning and casting, and with their range of actions, these rods are in a position to handle any Bass and Pike.

## WIVERN

CX NANO CARBON

A spinning model of absolute relevance, characterized by a super slim super high modulus CX1 carbon blank, carefully designed to have rapid tip action. Guides are genuine Fuji SIC K frame, spaced as specified by the KR Concept protocol by Fuji, to bring out the best qualities of the blank and maximize casting distance. The reel seat is a genuine Fuji too, made from nylon and graphite, which allows a great contact with the blank and superior ergonomic. The split handle is made from AAA cork and first quality EVA grips.

Thanks to a dramatically angled ring, Fuji solved the line tangle problem forever. A common problem which normally causes time loss, sometimes line breakage and, in worst cases, even rod breakage.

Three impressive casting models, developed around a super slim super high modulus CX1 carbon blank, carefully designed to have rapid action. Guides are genuine Fuji SIC K frame, spaced as specified by the KR Concept protocol by Fuji to draw the best qualities from the blank and maximize its power. The reel seat is genuine Fuji too, made from nylon and graphite, which allows a great contact with the blank and superior ergonomic. The split handle is made from AAA cork and first quality EVA elements.

**FINEZZA**

**SICHD CX0**  
GUIDES MICRO-PITCH

Wonderful series of rods that are very likely the best you can get for specialist light fishing techniques. You can use micro jigs or spoons, drop shot or split shot rigs. Every single aspect of these rods is meant to be used Finesse style. We choose to go for a so important light fishing family because it is more and more evident that a too heavy approach to fish is not the correct way for success. Light fishing is sometimes the only way to get the big ones! To get the premium performance of the Finezza series, that we offer in 3 versions for spinning and 3 for casting, we used the Super High Modulus CX-1 Micro Pitch Carbon, whose main feature is the superfine fibres, distributed in a way that easily distributes uniformly the load. Finally we used SiC guides for a safe use of braided lines.

High-Cone Profile  
SiC Guides  
Braided Proof & Anti-Tangle Top Guide.

The stiff body is followed by a super sensitive tip.

Rapture

Artista rods are absolute masterpieces in the spinning and casting competition market, even if they wink to extra esigent Bass Fishing market.

# ARTISTA

**SIC HD** GUIDES **CX-1** CARBON

Eleven one piece models (four spinning and seven casting) with Fast or Medium Fast actions to get the best performance from the extraordinary carbon fibres we used to build them: the CX-1 High Modulus Carbon. Every model is sacred to a specific technique, in some case two, and every model has been designed and crafted exactly for that technique. This time consuming job has been done by the whole Rapture Team. We are also proud of the colourful cosmetic that allows to identify one of the most beautiful Rapture rods wherever in the world. The SiC guides allow the use of braided lines. The handle is split and it is made on high density EVA for the best comfort.

The guide assembly has been carefully designed and placed, in order to perfectly suit action and use of each rod, thus maximising performance and casting accuracy. All guides are genuine SiC and completely braided proof. Top guide is designed to protect line and avoid tangles.

Artista handle's configuration. (A) Spinning - (B) Casting

Artista rods feature ergonomic reel seats, designed to improve sensitivity, enhance casting accuracy and offer an excellent comfort in every situation.

# VALKALL

SIC HD GUIDES CX-1 CARBON

When you make something perfect you have to shout it to the world and be proud of it. There is no other bass rod on the market that can match the characteristics and the price of a Valkall. The Pro Team Rapture has been involved for a long time on this project, and the result is a series of one-piece rods just fantastic and at a price that makes them affordable for everyone. Blank is made of high modulus CX-1 carbon, light and responsive, and it is equipped with a high density EVA handle. SiC guides frame is K style and it is able to drastically reduce any tangling problem during casting. The Valkall family consists of a large number of models specific for the main bass fishing techniques. If you do not try them you can not understand what we're talking about!

## Assassin xc

Assassin XC casting rod series is made up of 3 models, extremely easy to transport and store, but at the same time with the same action of one section rods. This is possible using full Woven Carbon Blanks and spigot joints. The CX-1 Carbon Blank makes these rods extremely fast and powerful, keeping sensitivity at the highest level. These rods are designed especially for black bass and pike fishing with big swimbait, jerkbait or big soft plastic lures. The new three section handle is made with first choice cork and EVA and makes the rod more comfortable to use with an even better grip, Sic Sea guides. All rods are supplied with a nice Cordura tube.

# ASSASSIN MXT

The "Power MagStick"

SIC HD CX-1 GUIDES CARBON

Two Sections medium length spinning rod whose stiff blank, powerful but sensitive, is perfect for Mort Manié (dead fish) and drop shot, to chase fishes suspending on the bottom. The action is medium fast and allows to force the prey outside heavy cover. Perfect balancer. The Assassin MXT is equipped with SiC guides, so braided lines can be used without any problem, and prime grade EVA quality handle.

## INOVA

SICHD GUIDES

Big family of fresh water rods that can be used in salt water as well, thanks to the inclusion of 10 feet models whose casting power is up to 80 g. These rods are really well balanced and made of a special material named Nano Carbon, very light, powerful and resistant. Handles are made of first quality natural cork and the blanks are equipped with SiC guides, so you can fish with braided lines with no worries. The capacity of heat dispersion of SiC material allows long fights with big fish without any risk to break the line.

## intruder

SICHD GUIDES CX-1 CARBON

When you want to target a really big fish, or you know you will have a long and struggling fight, the Intruder series is what you need. 11 models of spinning rods in two sections, going from 7 to 10 feet and casting powers going up to 100 g. Big zander, asp or pike in fresh water, bluefish or sea bass in salt water: nothing is out of reach of this rod series, carefully designed for the toughest situations. The ergonomic handle is made of natural cork and grants great comfort during long fishing sessions. These rods come with SiC guides for a safe use of braided lines.

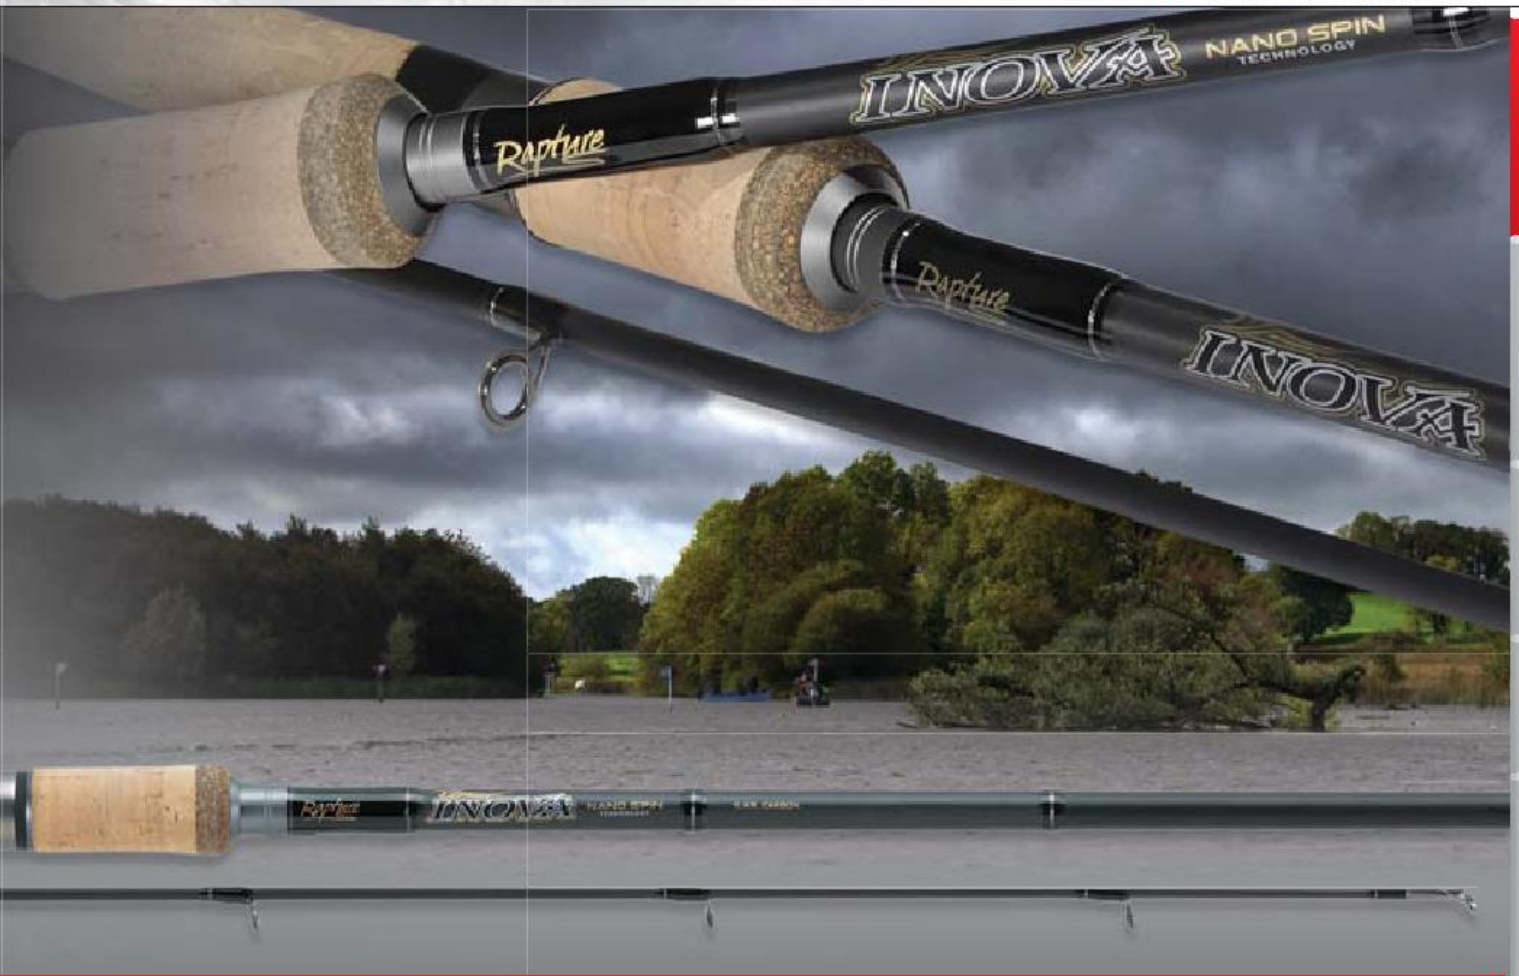

## WindBlow Active

The 2 sections Windblow Active rods display fast action. They are built in super high modulus CX-1 carbon and are equipped with Y frame SiC guides and genuine Fuji reel seat. The handle is covered with AAA top quality natural cork. They are able to cast up to 2 oz lures with precision and they can manage them easily. Definitely versatile, a must have when needed to cast heavy lures and fight big fish.

VOLMOON

Rapture

## VOLMOON

CX-1  CARBON

Extra Fast and Fast models. The design of Volmoon required a really long time because it was our intention, and we believe to have succeeded, to build a series of rod that could be used fishing from the shore as well as from belly. We are really happy because we managed to reduce the distance between the butt cap and the reel seat, maintaining a balanced action. In this way you can easily use the

rod from the belly, while the handle also suits the cast from shore. You can use in a number of situations, from trout fishing in river to black bass of course. In the end we cannot define it an allround rod, cause it is not, but a specific rod for high demanding anglers in demanding environments, whatever the fish you want to catch. Equipped with genuine Fuji guides and reel seat.

# SLASHER

SIC HD GUIDES CX-1 CARBON

Slasher, as the name itself says, a rod specially designed for long casting. The progressive and powerful action increases casting distance and if you compare Slasher to other similar rods, there is no doubt about its long casting skills. During line retrieve and in the final moment of a fight it will give you that extra power you need to win the battle, changing its action from progressive to tip. You will love the accuracy and the strength this rod delivers during tough fights! The Slasher is made of super high modulus CX-1 carbon finished with differentiated stratifications by element, in order to obtain that difficult alchemy that is a fast tip action rod still able to

easily cast at great distance. Sic guides, salt water resistant, are carefully arranged on the blank to minimize friction during casting. Blank is finished with a beautiful highly detailed high-density EVA and Rubber Cork handle with anodized aluminium inserts.

# GUARDIAN THE "BLACK HUNTER"

SIC HD GUIDES CX-1 CARBON

This is a large family of rods that aims for a broad audience, offering a large number of actions and lengths, suitable for use both in freshwater and sea. The Guardians are carbon rods made in two pieces with spigot joint and carefully finished in every detail. Equipped with braided friendly K style frame Sic guides that prevent line tangling. EVA split handle.

## Forward

Wide spinning rods family dedicated to medium-heavy fishing. Carbon blank with semi parabolic action and excellent power reserve. The 2 pieces are joint put over style, just to enhance resistance and reliability over time. The series consists of 8 models, with actions ranging from M to H. The SiC guides are K style frame, particularly convenient because they are able to keep the line away from blank and definitely avoid any tangling accident. EVA handle.

## NEW MANTIK

The new Mantik family is composed of 9 models, all of them are extremely easy to use and offering great performance. They can be used in a variety of different techniques, having models ranging from 7 to 10 feet length. The rods are equipped with natural cork handles and SiC guides for braided lines use. We like to highlight the great quality of these rods despite their extremely reasonable price, really affordable to everybody.

## NEW GRYPHON

Allround rod series made from carbon. The progressive action is able to cast a mile away whatever lure, even the smaller and the lighter. The SiC guides, whose frame is salt water protected, are braided friendly. We put extra care designing the perfect handle: it is a full natural cork with rubber butt cap to protect the handle itself from scratches. The Gryphon rods are reliable and strong enough to be also used in salt water conditions.

CX NANO CARBON SS SUPER SLIM BLANK Fuji

Series of rods of the highest level which are characterized by a completely custom design, carefully cared in every detail and able to meet all Japan style lovers. CX1 Carbon blank, highly reactive for rapid action L and UL. Original Fuji SiC KLH, KT and KB rings arranged according to the K-R Concept dictates of the same Japanese company, which drastically reduces the possibility that the line will tangle guide frames. Original Fuji SKSS reel seat made of nylon and graphite, extremely lightweight and allowing the best contact with the blank and perfect ergonomics. The end of butt section is finished with an oversized EVA knob to balance the rod in the best way. Just amazing, you will love this rod.

**NEW INVADER**

If you are looking for a modern design, super slim blank and very sensitive rod for your light spinning sessions, then you find the right one with the Invader. The fast action if this blanks can cast at great distance small metal lures and jigs, getting to high precision standards. The blank, despite the light weight, is powerful enough to fight a big fish and to force it out of covers. The Sic guides are perfect for thin diameters mono and braided. We opted for long legs frame to give these rods the potential to cast a bit more. The minimal reel seat is refined with woven carbon to increase the sensitivity. Just remember that ultra light rods don't mean ultra small fish! The Invader is ready for epic battles.

**CHIBI LURES**

**NEW**

**ちび**

**CHIBI LURES**

When the whole range of standard lures have played around, just producing a nice display of colours and nothing else, it's time to draw from our vest the small box of Chibi Lures! Their size is quite limited, but the results can really be unlimited... provided we fish with the correct rod, ultralight in action and very sensitive in touch, exactly like the Rapture models shown here.

Find out more on page 112

## NEW DELSOL

Light spinning rods designed to be slim and fast, so able to easily cast smaller lures at great distance. The Delsol is very easy to use and gives you a perfect control of your lure in every situation. The K frame SiC guides gives you the opportunity to safely use thinner monos and braided lines. The split handle is made of EVA.

## NEW FIREWIND

The Fire Wind has been designed for casting small lures at great distance. The key point to get this result is the fast action of the blanks, allowing to transmit a great amount of kinetic energy from the rod to the lure in a short time and space. Consequently, these rods are also perfect to face narrow streams or limited space waters. The long legs K frame SiC guides will reduce the friction with the line and greatly increase the casting distance while reducing the risk of line tangling. The EVA and cork handle is super comfortable and it is balancing the whole blank.

**NEW Stylish**

**SIC HD CX0**  
GUIDES CARBON MICRO-PITCH

Brand new blank designed for ultra light and street fishing. It is made of super light and powerful CX-1 high modulus carbon and it can face tough fights with bigger fish without any problem, even in heavy cover situations. The tubular tip allows a great control of the lure and it is the perfect choice fishing with metal jigs, spinners and small spoons. We recommend to use this rod in combination with thin braided lines, that can be used thanks to the SiC guides we used to equip the blank.

# URBAN FIGHTER

SIC HD GUIDES CX-1 MICRO-PITCH

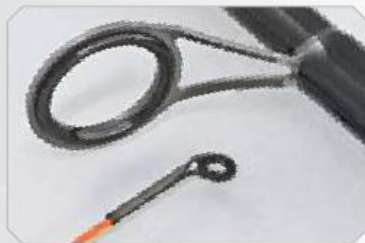

Two rods series designed for light and ultra light fishing that match perfectly the modern Street Fishign approach. Each model is equipped with a specific tip, carefully designed for different kinds of lures and fish. The 7'3" model features a sensitive solid carbon tip, very good for micro jigs and small silicon lures, for perch and trout fishing. The longer model, 7'9", fits a different sort of solid carbon tip, stiffer but less fast, very good for metallic lures such as spinners and spoons. It is very good for trout and chub in small rivers. Blanks are made of the new Super High Modulus CX-1 Micro Pitched Carbon and are equipped with SiC guides and cork with EVA inserts handles.

# NEW ARTIGLIO PERCH FEEL

SIC HD GUIDES CX-1 CARBON

Series of two specialist rods, displaying fast reaction and well made in every details, but equally efficient when they get on the water and into action. Designed by the European Rapture Team to face perch, zander and trout fishing with light and ultralight silicone lures and jigs, are built with High Modulus CX1 carbon, which is worldwide known to be able to transmit the vibrations like a guitar string! So the user's wrist receives a great quantity of information from the swimming lure, as it feels the contacts with submerged features and also, more happily, those with some fish mouth! The action is super sensitive, thanks to the job done by the solid carbon tip, which is inserted from top, glued and finely wrapped. The joint between two sections is spigot type, the best in term of lightness, strength and curve precision. With their properties of heat dispersion, SiC guides encourage the use of braided lines. The handle is a classic combination of natural cork and graphite screw reel seat for lightness and durability.

# ULTRA LIGHT GAME LURES

ROCK & STREET FISHING

NEW

**ULG**  
ULTRA LIGHT GAME

Thousands of animal species having small and tiny size live in waters of the whole planet, being an important food supply for all fish. But below the surface also ULG lures are active as well, because, talking about creatures, even Rapture Team breed some very good ones! Therefore, you can benefit from them: before swimming away, predators will think about twice!

Find out more on page 124

## STORM RIDER

SICHD CX-1 GUIDES CARBON

This rod has been designed especially for use with soft baits, both in fresh and salt water. Built from CX-1 carbon combined with technologically advanced fibre. The sensitive solid carbon tip provides a progressive parabolic action that is just right for both casting and fish playing. Outstandingly reliable and manageable, fits stainless steel S-SIC guides, latest concept screw reel seat and AAA grade cork handle.

## JIG FIGHTER

SICHD S.H.R. GUIDES CARBON

An excellent, versatile rod series for lightweight jigs, surface lures, minnow baits, grubs and small spinners. Extremely sensitive, fitted with natural cork handle and "V" framed guides. The high sensitivity of the solid tip makes this series an ideal choice for trout and perch fishing and generally for all the techniques that require the use of jigs up to 21g.

## pixma

SIC HD GUIDES CX-1 CARBON

The Pixma is a telescopic rod with feature a perfect action that can be compared to a one piece rod. Made with CX-1 carbon, they are fitted with "Y" type titanium guides, and an ergonomic 3 section EVA handle "sensi touch". This rod will surprise with its lightness, its compact size when closed and extraordinarily slim diameter of the blank which is unbelievably slim for a 5 section telescopic rod. A very important detail is the innovative system of "limit switch" of the sections so that when the rod is being closed, accidental breakage or damage to the guides is prevented.

CODE	MODEL	LENGTH	C.LENGTH	SECTION	ACTION	LURE WT	LINE TEST	N° GUIDES	GUIDES
125-54-260	86MHT	8'6 - 2.58 m	70cm	5	MH	4-28 g	6-18 lb	10	SIC

## Sentinel

SIC HD GUIDES CX-1 CARBON

Hybrid model of spinning rod. It is actually a telescopic rod which fits onto a separate handle. It is therefore a solution that maintains the quality of both solutions: the practicality and the compactness of a telescopic and the power reserve and the stiffness of a two pieces rod. SIC guides allow to use of braided lines, even very small in diameter, while the cork handle gives exceptional comfort.

## CRAGGER

SIC HD GUIDES S.H.R. CARBON

This is the perfect travel rod for anglers who fly into remote locations or who just don't have the storage space for long rods, but still need the power to land big fish. These rods feature a fast and progressive action combined with a good balance. Ergonomic natural cork handle and "Y" type titanium guides complete the equipment of this series of rods which are extremely practical and versatile.

# Rapture SALTWATER SEABASS & INSHORE GAME

One of the most exciting branches of saltwater spinning, dominated by the Sea Bass fashion but also warmed up by the screaming runs of Bluefish and Leerfish, gets special attentions from Rapture Team. The real experiences lived on Italian coasts have been put on the table to create technical rods, whose casting power ranges from the heavy Rocket Jigs to the ultralight Power Minnows fitted on jig heads.

## INSIDIA Seabass specialist

A true high grade, elegant and fine rod for the sea bass. A special project dedicated to the smartest of salt water predators. Two super light and easy to use models that are able to cast every lure, even the smallest, at great distance, over the big waves where the schools of minnows try

to find shelter. The extremely balanced and slim blank is made in two equal sections, jointed by a woven carbon spigot. The Insidia Sea Bass is made of CX-1 Micro Pitch Carbon, a more reliable and reactive fiber than ordinary High Modulus. Genuine Fuji guides and reel seat.

## BRIGADE The "Shore Stick"

Very well designed and superbly finished rods dedicated to shore fishing in salt water. The shorter models, 2,10 and 2,40, display Fast and Medium Fast action and so they are especially recommended for sea bass fishing in rocky environment, river estuaries and sea ports. The 2,70 model has a Medium action and a casting power of 50 grams, so it is perfect for long casts with top water baits, such as popper, WTD or long jerks fishing for the bluefish. The high grade EVA handle grants a perfect grip in every condition and salt water resistant frame SiC guides are exactly what you need for these techniques, since you very likely will use braided lines.

Rapture is proud to offer a wide family of shore fishing rods, specially developed for salt water fishing. So, here is the Up Tide series, Super High Modulus Carbon CX-1 blanks, light weight and resistant, HD-SiC guides, braided friendly and corrosion free, with accurate wrappings and top quality EVA handles. The Up Tide series is the solution for many, if not all, of your needs. In this series you can find different models, each of them tuned for you specific salt water need. Choose yours!

## Up tide Shore Cast

SIC HD CX-1 GUIDES CARBON

Specific rods for shore fishing with great casting skills and excellent blank power. The very sensitive tip allows the use of lures in a wide range of weights. This is the classical sea bass and blue fish rod, to be used in challenging conditions, such as rough sea or high cliff.

CODE	MODEL	LENGTH	C.LENGTH	SECTIONS	ACTION	LURE WT	LINE TEST	N° GUIDES	GUIDES

# Steyr

Salt water spinning rods made of CX-1 High Modulus Carbon, a very light but still robust and reactive material. The series is composed of 4 models of different length, sharing the same action and casting power. In this way we want to offer to salt water anglers the possibility to always choose the best option for their fishing style. Until a few years ago, specialized salt water rods were 3 meters or more long, but nowadays, using the right materials, we can get the same actions and power

with shortest and more handy rods. Shorter rods are faster and more accurate, both during casting and fighting. Salt water resistant frame SIC guides.

**HORIZON Progressive**

Horizon Progressive can cast longer and more accurately, even in windy conditions, thanks to the fast action of the blank and to the small sized guides. The CX-1 Carbon blank is resistant and reliable, allowing safe retrieves of big fish. It is equipped with genuine Fuji IPS reel seat and low frame salt water proof guides. The whole series is so suitable for salt water fishing, from low cliffs or river's mouths. Horizon rods perfectly matches with long jerks.

**STEYR** Rocker

**SIC HD** S.H.R. GUIDES CARBON

Two rods series designed for light and ultra light fishing, in fresh and salt water.

Each model is equipped with a specific tip, choosing the right one for your fishing style is essential for success. The 7'3" is super sensitive and it is perfect for all those techniques where you fish in close contact with the bottom, including drop shot and split shot. So it is recommended for perch in fresh water and for Light Rock Fishing in salt water. The 7'9" is as fast as the previous model, but with a higher casting power, the perfect choice if you need to use spinners, spoons and jigs in your technique. It is recommended for specialist trout fishing and, more in general, all the times you need to use small metallic lures and still maintain great sensitivity. Blanks are made of High Modulus Radial Carbon and equipped with SiC guides and high density EVA split handle.

**NEW Vivid**

**SS SUPER SLIM BLANK** **SIC HD GUIDES** **CX-1 CARBON**

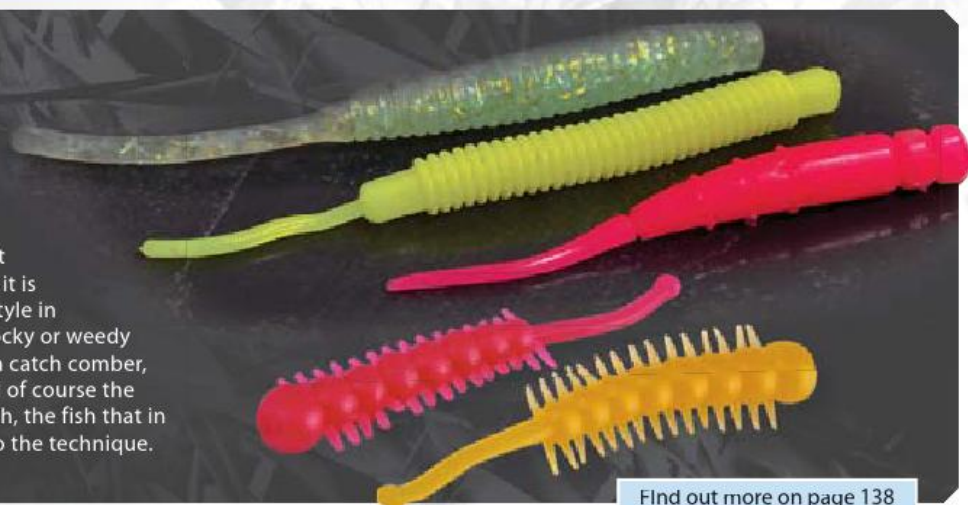

Brand new blank designed for ultra light and light rock fishing. The stiff blank, together with a solid carbon tip, are a perfect combination for "feeling" the lures you are using. We specially recommend the Vivid when fishing with small jig heads and soft baits, because you can really have a clear perception of the bottom design and the possibility to transmit great action to the lure. For salt water light rock fishing we suggest to use the micro jig head in combination with the soft Mebaru Worms from Rapture for maximum efficacy. Sic guides.

**MEBARU WORMS**

The Light Rock Fishing is a technique that can be practiced anywhere there is salt water, even in the absence of rocks. It was born in Japan but it is becoming a real Life Style in Southern Europe. In rocky or weedy environments, you can catch comber, wrasse, sea bream and of course the Mebaru, or scorpionfish, the fish that in Japan gave its name to the technique.

Find out more on page 138

**SNIPER** Blue Fin

More and more people are involved in bluefin tuna spinning but, unfortunately, too many rods on the market just don't fit that use. The Sniper Blue Fin has been specifically designed for breathtaking fighting with bluefin tuna and are perfect to be used with small metallic jig that are cast to a longer distance. Too many times we see tuna spinning rods that are not good enough to cast small lures, breaking the arms of the angler. The Sniper is a fanta-

stic rod, strong enough to break the resistance of a big tuna and still having a super casting action that allows to cast your lure a miles ahead every other angler's lure. And if you are an expert of this technique, you know how important is! The rods are equipped with genuine Fuji K guides, the best option for casting and for not stressing your line. Blanks are made of CX-1 Thick Wall Carbon, a super reliable and tough material that will never let you down.

**NEW** **GULFSTREAM** YELLOWTAIL

The Gulfstream rods have been specifically designed for boat fishing of schooling tuna, amberjack and all the pelagic predators of medium big size that you can find close to the sea surface, using poppers, and in deeper layers using metal jigs. The blanks have been designed for no effort casting, even if they are really stiff, able to be used in harsh fights against very strong and, sometimes, also very big preys. The strong tip is sensitive enough to allow you a perfect manage of smaller jigs that you can feel during the retrieve. This sensitivity can help you to give the right action and rhythm to your lures. The 2 stronger models have been equipped with a nylon gimbal to offer you the opportunity to use a fighting belt. All the model are built with a 1+1 sections concept, feature an high density EVA handle and Sea-guide SiC guides, the best choice for salt water braided lines.

OCEAN VIB

CX NANO CARBON 

The "Vibrations of 'Ocean': no name is more suitable for this wonderful series of rods in which power, reliability, lightness and components are top. Developed according to the classical Japanese style criteria, which recommends short, thin, responsive and progressive action rods, specifications that you can find in all models. These characteristics greatly help the jerking action with bulky and heavy short jigs, allowing you to keep in direct contact with the lure in any fishing conditions, even when fast drifting. The result is less effort during fishing action and longer and more productive sessions. These rods are made in two sections with the tip fitting into the handle "put in" style and are made of the CX-Nano Carbon; that's why they are so thin, light but still durable, robust and able to counteract long and powerful runs of big fish. Equipped with double leg genuine Fuji Alconite guides, braided friendly,

OCEAN VIB POPPING

Rapture is always ready to follow new fishing trends, offering a series of heavy spinning rods devoted not only to tropical heavy popping, as it can be easily got by printing of the Giant Trevally on the blank, but suitable for Mediterranean boat fishing too, destined to schooling Bluefin Tuna. There are three 8' rods in the range, starting from the "light" model, with medium-progressive action able to cast lures up to 110 grams, so ideal for pencil poppers and tapered stick baits. Then we have the intermediate model, 170 grams casting power more suitable for larger poppers and wtd stick baits, and finally most powerful one, the Extra Heavy action, for lures up to 220 grams, which is specifically designed for "Big Cup Head" poppers that require a rod that is not only able to cast

them but also to retrieve them. In addition, we have two 9' models with power 170 and 220 grams, designed to cast large poppers up and over the distance of 100 meters from your boat. And we all know how important it is to stay at a safe distance from feeding frenzy tunas! Powerful but relatively easy to cast with, all models are able to manage perfectly the lure during retrieve, even at long distance. The CX-Nano Carbon blank is able to react promptly to the large predator bites, even with a reel drag set to 10 kilos. The structure is 1+1, with Duplon and EVA handle for better grip, Fuji Reel seat and Fuji Alconite guides, fixed by underwrapping. An aluminium gimbal has been added too, for extra tough fights, especially in tropical seas.

CX NANO CARBON Fuji

# SNATCH

The Snatch series consists of five models independently and accurately designed for the use in specific boat fishing techniques. For each project we involved numerous field testers in order to get the best blank for each specific technique, employing the best materials and using them wisely. All the blanks are made of High Modulus CX-1 Carbon in order to obtain lightness but also power, both the characteristics necessary for a pleasant and prolonged use over time. The handles have been made of high density EVA for maximum comfort, which in

some cases has been shaped in an innovative way in order to guarantee the best ergonomics possible. All guides are SiC Sea Guide, the ideal choice for the use of braided lines, as those are exactly the ones that will be more used in combination with these rods. Guides, where necessary, have been fixed with under wrappings to preserve the blank when heavily loaded. In this way, the guide's foot rests on an extra wrapping instead on carbon, thus increasing the global reliability. A winning project for the most advanced techniques of boat fishing.

## SNATCH CASTING & JIGGING

SICHD GUIDES CX NANO CARBON

Ideal for fishing feeding pelagic predators, using metal jigs or specific long jerks, so casting the lure, but that can also be used in techniques involving vertical action. It is therefore a particularly versatile rod, featuring light weight and unrivalled stopping power. It is recommended for use with braids class between 20 and 30 pounds. The first guide is reversed to minimize the friction and to avoid any risk of line tangles when casting.

# SNATCH INCHIKU

SS SUPER SLIM BLANK P.F.A. TIP ACTION **SICHD** GUIDES **CX NANO** CARBON

Series devoted to Inchiku fishing and light jigging; Inchiku is a Japanese technique that has recently revolutionized many beliefs of European anglers. These rods are extremely light with parabolic-progressive action, very sensitive and are able to manage the lure with great precision. The blank retains exceptional power's reserve even at maximum curve, guaranteeing the best performance even in really challenging situations.

# SNATCH LT-J

**SICHD** GUIDES **CX-1** CARBON

LT-J stands for Light Jigging, and this rod, with an incredibly thin and light blank, was specifically created for this use, as well as for the use of Kabura and Inchiku lures. Sensitivity is extraordinary, allowing to move the lure with perfection and to identify every bite with absolute precision.

# SNATCH TENYA-MADAI

SS SUPER SLIM BLANK P.F.A.TIP ACTION SICHD GUIDES CX-1 CARBON

Snatch series also include these two models, respectively of 7' and 7'6", for Tenya and Madai fishing Styles, exciting techniques involving the use of a lead connected with two rigs of different length for the use of natural baits, such as shrimp, octopus etc. An highly catching Japanese technique which has never failed to positively amaze all people that tried it. The tip is made from solid fiberglass, equipped with micro guides, and allows not only a perfect management of the bait but also a sensitivity unlike any other.

## TOSHIMA KABURA

Tested in Sardinia, the Toshima Kabura gave to our field testers great emotions. You can imagine that they were able to catch a 25 kilos Swordfish with it! We don't think that every fishing session will be so lucky, but in any case you will be likely catching a lot of snappers, sea breams, groupers, John Dory etc. Toshima are fast, responsive and sensitive, so perfect for fishing in medium depth, always detecting bites. These rods are equipped with many low frame SiC Sea Guide HD guides of small diameter with double wrappings. First three guides are double legged, while the others are single legged, to have smaller weight on the blank, keeping the action perfect. Ergonomic EVA handle.

## TOSHIMA INCHIKU XT

We chose this 2,30 m length because during our testing it was clear that this size was perfect to help to perform the simple and harmonious actions that are typical of the In-chiku fishing approach. We all know that this style of fishing can give unexpected catches sometimes, that's why we have used a full DCG Carbon blank which makes this rod totally reliable and extremely fast, specially when you need to set the hooks quickly. Two section

## TOSHIMA LIGHT JIGGING

The Toshima Light Jigging have born for fishing with small jigs, Inchi-ku, Kabura and Tai Jigs, to fish for sparidae (Sea Bream). To properly use these types of lures, the rod must be light weight and flexible, but also having a powerful butt section. Toshima Light Jig owns all these specs, together with saltwater proof components, such as SiC Sea Guide guides, suitable for use of thinnest braided lines, high density

# TAKUMI

SS SUPER SLIM BLANK

SIC HD GUIDES

CX NANO CARBON

Designed for those who love slim and light rods with a perfect action and, above all, a great power. The action of blank is always progressive, being more parabolic in lighter models and fast in the heavier ones, and it is obtained using CX-Nano Carbon which reveals excellent characteristics of resistance and elasticity even on thin and light blanks. The equipment includes under wrapped SiC HD guides to dissipate the heat generated by the friction of braided. Guides are single leg for the two lighter models and double leg for harder ones. A choice that respects the prerogatives of lightweight and easy to use rods, sensitive and responsive even with small jigs and to meet the new trends that recommend a reduction of all the equipment to achieve better results with less effort. These rods are 2 sections with tip that fits in the handle, where the joint is reinforced by an aluminum ring. The handle is split type with fore grip that houses the reinforced reel seat and rear grip with rounded fighting butt, to allow fish fighting without belt.

# SQUALL

Do not be fooled by the price of this rod! Even if Squall has been designed for Jigging beginners, you will find that these rods have all what it is needed for this technique: light weight and sensitivity for jerking the jigs at best without effort, parabolic action to increase fun and power the toughest catches. There are three models

for use with baitcasting reels, featuring trigger reel seat. They are equipped with salt water proof SiC guides, big sized reel seat, ergonomic neoprene handle, providing extra comfort and grip even during long fights, plus nylon gimbal. Bright cosmetic, where each colour recalls a specific action.

# KYUSHU SP VJ

A wide and complete range of Vertical Jigging rods, born to satisfy the lovers of this technique. Value for money project. The two sections blank has been made of Super High Modulus Carbon, and it is slim, responsive and really powerful, to combat with extra large and strong fish. All the components are of excellent quality: tough screw reel seat, double leg stainless steel frame SiC guides, braided friendly, ergonomically shaped EVA handle and aluminium gimbal completed with a rubber cover, to fish without fighting belt too. In evidence also the accurate wrappings and under wrappings of guides and the superb cosmetic. Six models to fully meet all the needs of jig fishing.

## Loomis & Franklin

A brand new series of fly rods produced by Loomis & Franklin, synonymous of quality and reliability over the years, and developed under the strict specifications of SFT. The range delivers great performance and excellent value for money, and all the blanks are built with high grade graphite layers and are able to cast with unbelievable precision. The range is made up of 9 rods to cover all the needs, from the small creek and short presentations to a powerful Switch rod. Carefully hand assembled using quality components to ensure the maximum comfort and long lasting, all the rods are supplied in a handy cordura tube to protect during.

## Kjos FLY ROD

These 4 section rods have the most modern action, capable of providing the necessary speed required by the most demanding anglers. In addition to the fast action an excellent progression is maintained, to help even the most inexperienced novice angler. The finish is of the highest quality and includes CFSG guides, to keep the blank light and reactive. Finished with a natural cork handle and fitted with hard aluminium reel seat for maximum reliability.

NEW

## HYDROPSYCHE ST FLY ROD

Even though we were fully satisfied with Hydropsyche rod series, we never stopped working to improve them, so now we proudly introduce the new Hydropsyche ST after long term tests, run to obtain an high quality series with reasonable prices. The blanks have been created by multiple layers of high tech graphite, bound together with nano-resins to offer extreme lightness and flexibility. The result is a nice series of very light and strong rods, well balanced and able to meet the requirements of the most demanding fly angler. The rod's bodies are extremely thin, reliable and durable, thanks to the latest generation materials. Developed in seven models to satisfy the needs of all segments of fly fishing, from nymph to dry fly. The models 9' #2, 9' #6 and 9'6" #4 feature a 1 foot extension to bring their length to 10' and 10'6" keeping the same performances. Built in four sections for ease of transport, these rods have all joints made from CNC machined graphite for easy and simple assembling. The blanks are painted in glossy black and fit very light single leg guides, top grade natural cork, reel seat based on briarwood and made with anodized aluminium components. Hydropsyche ST rods are supplied with cloth bag and stiff cordura tube.

## HYDROPSYCHE ELITE FLY REEL

The Hydropsyche Elite fly reels have been developed in conjunction with Sandro Soldarini, and tooled from certified aerospace grade aluminum. As a result these reels are ultralightweight and made to withstand elements, delivering a reliable reel that will last for long. Available in just two sizes, but well designed and able to cover all the needs and packed in a classy-modern look with a black and gun smoke combination. The spool has been totally reinvented using a new profile to ensure the line is always disposed properly and in large coils, thus to reduce wear and ensuring the maximum comfort. In the end a smooth and sensitive drag fitted with oversized washers is the right complement.

# Phantom FLY ROD

**FISH AGE**

Phantom fly rods have been developed in conjunction with Fish Age, and represent the state of the art in the fly fishing rods manufacturing. To build the Phantom series have been used the latest developed nanotechnology resins and high grade graphite layers all combined in a new taper design. As a result, Phantom is extremely lightweight, highly sensitive and above all recovers quickly and casts with unbelievable precision, loading as well at 15 as they do at 60 feet. All the rods are carefully hand assembled using quality components to ensure the maximum comfort and long lasting. Phantom are also supplied in a handy cordura tube to protect during transportation and with a lifetime warranty against manufacturing defects.

121-67-278	9'0"	4	8

### CROSS SYSTEM

The line lay is very tidy with Cross Winder, providing good casting distance and reducing the possibility of tangles. In fact, the "X" spooling compacts the line and allows a better distribution of the coils, enabling to fulfill the spool up to the upper lip. This system is compatible with the use of both monofilaments and braided lines.

### POWER BAIL

In several models, we introduced an aluminum tubular bail that has a larger diameter than traditional ones. Although thicker, these new bails are lighter, stronger and more durable than traditional, solid ones. Thanks to the special shaped connection, it sweetly drives the line to the roller, even when the line itself has no tension at all.

### ROLLER ANTITWIST SYSTEM

The conventional line rollers, at every turn of the handle, force the line to twist on itself, causing annoying tangles. The Anti-Twist Line Roller dramatically reduces the line twist problem and reduces the wearing of your line.

### SBS

#### Super Balance System

This new technology is obtained just using the latest computers 3D softwares, which allow the designing and later the construction of perfectly balanced rotors without the addition of external weights.

### AVS

#### ANTI VIBRO SYSTEM

We gave our designers the challenge to minimize or even cancel the vibrations emitted by reels during the recovery phase. Thanks to the new 3D software, they have been able to design well balanced rotors (Super Balance System) but for top range reels we wanted something more. We focused on the stabilization of the gears and the subsequent cancellation of the plays that swing the spool. The result is excellent, the pinion holds the spool firmly on its axis and this does not oscillate even when drag is in traction. We are particularly pleased with the results ... You just have to try.

### ONE WAY CLUTCH

#### ANTIRITORNO INFINITO

Antireverse system in use in most reels. Thanks to a lever usually located above or below reel body, you can plug or unplug the operation of the one-way roller bearing that locks the rotor. When the antireverse is inserted it's always in direct bearing on the mechanics (fluidity) and can just turn the handle onwards just by winding lines; when it is stationary, it can also turn the handle backwards and release the line.

### S.O.S. SYSTEM

With this revolutionary system, the rotor turns at a very high speed while the spool makes its turn up and down at a slower speed. This action delivers perfect parallel winding, thereby avoiding the line tension from normal spooling movements and therefore making longer casting easily possible.

SX1

SX-1 outstands for its innovative design, but just fishing with it you'll understand the real performance of this reel. Entirely designed in Japan with the latest 3D software, it's packed full of the latest technology, all enclosed in a X-Tra Tough body extremely lightweight but strong at the same time to eliminate any vibration. The LLG gears are fitted on 7 S.S Long Life Japanese ball bearings, combined with 1 Roller Bearing running the one way clutch. The V-Shaped rotor is assisted by the IRSS system to prevent accidental bail closure, whilst the the PowerBail, lighter and stronger than conventional bail arms, helps the overall balance. SX-1 is supplied with two spools, both introducing the new Hybrid concept, engineered in a blend of aluminium and woven carbon to reduce weights without compromise the strength. The spools are supplied in two different versions: the X-Light one is a conventional aluminium-core spool, extremely light and designed to be used with monofilaments, while the Braided Concept Spool features a special core designed to be used in conjunction with braided lines. As on the spools, the same Hybrid Concept has been applied designing the handle, thus to reduce again weight and get the extreme performance. The drag assembly is completely sealed from water any other debris and it works on oversized washers with the addition of a ball bearing to increase the smoothness. A concentrate of cutting edge technology and performance.

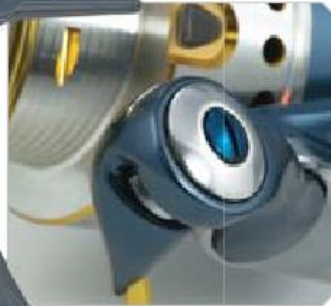

TECHNICAL FEATURES

- 7 SS Long Life Ball Bearing
- 1 Stainless Steel Roller Bearing
- Infinite Anti Reverse «one Way» System
- X-Tra Tough Body
- AVS Rotary Flat Oscillation System
- V-Shaped Rotor

# XENOS XOS

All gears are in stainless steel, while the central shaft controls the Slow Oscillation System drive which regulates line winding. The roller bearing on the central shaft ensures exceptional fluidity.

Other components include infinite anti-reverse, single-piece handle in aluminium with soft touch knob, anti-twist line roller, oversized aluminium hollow bail and aluminium body. The size 3000 is perfect for medium-light lures, whilst the 6000 is particularly suited for vertical jigging and heavy duty spinning.

# DEIMOS

Deimos offers an attractive design and important technical solutions. The high quality components and the main gear give total smoothness to these reels. Featuring 5 ball bearing and 1 roller bearing to run the one-way clutch, it guarantees a great fluidity and good retrieve power. The SBS technology avoids any vibration and improve the smoothness on the retrieve; AS line roller is very kind to the line and provides the anti twist system, while the Powerbail ensures that the line fits the roller perfectly all the way. The spool is made by aluminium and the graphite spare spool is supplied as a standard, whilst the drag results powerful and progressive, perfect to fish both with monofilaments or braided lines.

**NEW THARK HS**

Low profile casting reel very light and balanced, thanks to the swept handle that keeps the barycentre closer to the rod's axis. Very easy to use and able to cast smaller lures thanks to the very accurate magnetic brake, which can be adjusted according to the personal casting experience. The aluminium spool has been perforated to keep it as light as possible. The 6 ball bearings serving the rotation are made from stainless steel, so the reel can also be used in salt water. The 6,2:1 ratio is the perfect compromise between speed and cranking power.

**TECHNICAL FEATURES**

- Hi-tech graphite body
- Perforated aluminium spool
- Low profile for an improved handling
- Magnetic brake system
- Drag System with oversized carbon disks
- Swept handle with soft rubber knobs
- TiN coated line guide
- Stainless steel Long Life ball bearings

CODE	MODEL	WEIGHT	GEAR RATIO	SP. CAPACITY Ø	BALL BEARING
031-85-500	1000	200 g	6.2:1 (90 cm)	Ø 0.30-200 m	6+1

**Assassin BC**

**TECHNICAL FEATURES**

- Aluminium Die-Cast Body
- 7+1 S.S Long Life Ball Bearings
- High Precision Gears with 6.2:1 Gear Ratio
- Precision Japanese B.B
- Oversized Carbon Drag Washer
- Titanium Nitride-Coated, aluminium oxide line guide
- Fighting Aluminium Handle with Soft Ergonomic Knobs
- Machine Cut 2 tones Aluminium Spool

This reel is the perfect tool for those seeking an easy to use reel having the possibility to use it in a wide range of situations. Designed for short and medium distances, this reel is extremely versatile, thanks to the easy adjusting brake which allows to use a wide range of different lures weight. Its compact size, good line capacity and excellent drag will ensure a perfect control during combat. Assassin BC is definitely a superb fishing machine.

CODE	MODEL	WEIGHT	GEAR RATIO	SP. CAPACITY Ø	BALL BEARING

## DYNA TEX FIRE ICE

Dyna Tex Fire Ice is the result of many investments and efforts from Rapture. The quality we have achieved in this braided line is simply incredible: diameter - strength ratio is at the top, if compared with other translucent clear braided lines, and same applies to the abrasion resistance. With this super line is possible to cast at incredible distance, cause of the smooth surface, and thanks to the zero stretch you can detect the most shy bites and easily set the hook even when fishing very far from the shore. Colour is white translucent, and it's available in 100 m spools from diameter 0,10 to 0,30. We recommend "Palomar" knot for swivel and "Mahin" knot for connection with other lines.

TECHNICAL FEATURES

# DYNA TEX SPIN X4

In conjunction with Dyna-Tex Fiber, world leader in synthetic yarn industry, Rapture has developed a unique braided line to meet the demands of modern anglers. Dyna-Tex Spin X4 is produced under high tension with a cutting edge technology, allowing to obtain a more compact fibers that packs better on any reels reducing any chance of wind knots. Dyna-Tex Spin 4X offers an incredible strain to diameter ratio and the highest abrasion resistance combined with a maximum sensitivity, allowing longer and more accurate casts. The slick surface increases dramatically the smoothness, reducing the friction against the guides and any fish loss. Thanks to its ultra-fine diameter, Dyna-Tex Spin X4 is suitable for casting, spinning and vertical fishing as it cuts through the water with ease allowing the angler to remain in contact with the bait.

TECHNICAL FEATURES
Near 0% Stretch
More Compact
Thinner Diameters
Round Profile
Smoother Surface
No Reel Memory
Highest Abrasion Resistant
Superior Knot Strength
Longlasting Performances

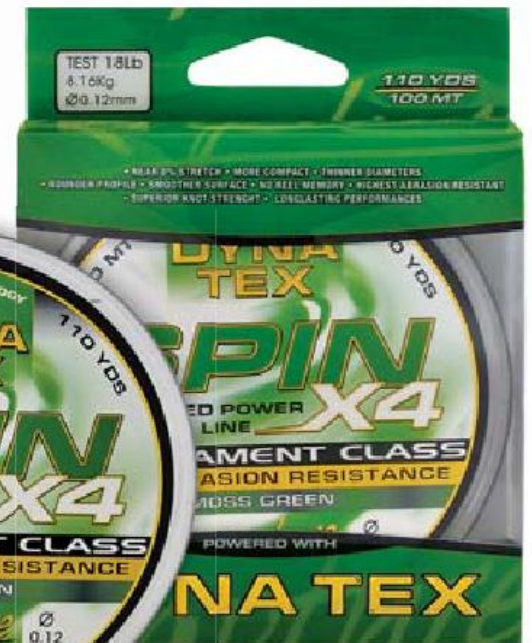

The Spin X4 is a 4 strands polyethylene braided line, built with a very tight and complex structure that gives the product an extraordinary compactness and a consequent exceptional roundness in diameter. The evolution of braided Dyna Tex, specifically the X4, is even more effective in terms of flexibility and handling, easily found by simply touching the line with your hands. These characteristics of flexibility and roundness are critical to a braid that was

created specifically for casting. Our Pro Team Rapture choose two colours: a classical Low Viz Moss Green, ideal for most situations, and an equally classical Hi Viz, Neon Yellow, especially useful in low light conditions or in those fishing techniques where it is absolutely essential to have a clear and constant understanding about the position of the bait. The diameter / breaking strain ratio is top class, due to the use of high quality PE fibers.

### FLUO SPIN

Advanced predator fishing line, made from 100% Fluorocarbon, developed specially to face all those situations when extremely shy fish are targeted. Due to refraction index very close to the water's one, it offers unmatched performance in extra clear and transparent waters. It cannot be detected by fish and so cannot alarm them. Perfect for spooky species such as trout and perch. The wide range of diameters can fit the needs of many different fishing styles though. Thanks to the incredible abrasion resistance, can also be used to make high resistance leaders.

### SPIN PIKE

This greenish-brown monofilament is designed specifically for pike fishing and other big freshwater continental predators. It is exceptionally strong and has the perfect combination of low stretch and high softness, making every lure easier to cast. Unlike other cheap spinning lines, the low stretch feature allows the angler to have a much more direct control of the lure and easily strike on to the fish attack. Spooled under parallel winding technology to improve line lay and limit tangle's risk, it is packed on 150 m spools.

## SPIN CAST

Technical monofilament created for spinning. The molecular structure, combined with the outer silicon coating, reduces the mechanical memory of the line while maintaining an excellent handling and castability. It is therefore ideal for long casting and intensive lure fishing. Fully waterproof, thanks to the special coating that insulates the structure of the line from the environment. It also maintains all its characteristics unchanged after prolonged use, even at very low temperatures. The colour, light grey-green transparent, maintains a very low degree of refraction in the water.

## SPIN TROUT

Especially designed for trout fishing with lures, this monofilament features an optimal ratio between stretching and strength. High abrasion resistance and very low visibility in water. Thanks to a wide range of diameters available, it can be used for many different techniques, starting from trout fishing in small creeks with thinner diameters, up to the record catch in the biggest European rivers using the largest diameters.

## SPIN HI-VIZ

New high visibility spinning monofilament, specially designed for all those fishing techniques where sensitivity needs to be combined with the absolute visual control of the line. For this reason, we have worked hard to obtain a high visibility, no memory line and with reduced stretch ratio. Excellent abrasion resistance, it's perfect to be used in areas holding dangerous obstacles such as snags or rocks.

## SPIN ZANDER CRISTALL

We spent many hours on research and development for this new monofilament. This new product match perfectly all the most important features required by the modern zander specialist angler. The particular colour of this innovative monofilament is the best you can get for good visibility to the angler outside the water and at the same time reduced visibility inside the water to obtain an optimal presentation of the bait. Thanks to no memory construction and low stretch, it's possible to easily detect the lightest bites.

## SPIN ZANDER

Spin Zander is designed and dedicated to this exciting fishing technique. It is a very low stretch line and it is very suitable for detecting even the lightest bites and rapidly set the hook. The absence of memory and superior abrasion resistance are other very important features. The colour is a dichroic green olive, offering natural camouflage within the aquatic vegetation. Parallel winding in 150 m, the spools are individually packed.

## VERTICAL JIGGING

## DYNA TEX

An advanced braided line which has had a tremendous success amongst fans of Rapture brand and of vertical jigging. Its technical specifications have been programmed to also allow the use for trolling fishing, where it is extremely important to know exactly how deep you are fishing. With Dyna-Tex Vertical this is possible as it is coloured differently every 10 meters. Each of these coloured sections (6 different colours) are repeated along the whole length of the spool. Protected by an abrasion resistant coating, this is probably the most persistent and resistant saltwater braided line on the market. We suggest to use the "Mahin" knot to connect Dyna-Tex to other lines, while we recommend to use the "Palomar" knot to connect to swivels or hooks.

## VERTICAL JIG MONO

Designed for all Vertical Jigging lovers, this mono is produced from a mix of Japanese co-polymers which provides extreme abrasion resistance and reduced stretch. With Vertical Jig Mono it is always possible to know how deep you are fishing thanks to different colour every 10 meters, these coloured sections are repeated in six different colour for the all 300 meters length. The great knot strength, the lack of memory and anti-UV treatment, make this line a perfect choice also for spinning.

# PRO SERIES LIMITED EDITION

**WOBBLING ACTION**

Wobbling lure, with strong tail action. Wobbling will excite predators producing extra vibrations and flashes.

**WIGGLING ACTION**

Crazy side to side action, great for targeting finicky predators of any species.

**DART ACTION**

Darting lures must be jerked, adding movement with rod tip. The lure will therefore dart in several directions just like a wounded fish.

**S-CONCEPT ACTION**

These lures swim creating a sort of S into the water. In this way it is possible to scout a larger area

**WEIGHT MOVING**

Several weights are housed inside the body lure, in one or more inner rooms allowing them to move back and forth. During casting action they will move to the tail, increasing casting distance, while during retrieve will move to the head, increasing stability.

**FIXED WEIGHT**

The weights inside the body lure cannot move. In this situation the lure is much less noisy and very useful in over fished venues.

**BLACKNICKEL & PERMA STEEL TREBLE HOOKS**

**RATTLE SOUND**

Inner weights produce high frequency vibrations.

**BASS SOUND**

Inner weights produce low frequency vibrations.

**EXTRA STRONG FORGED SPLIT RINGS**

**ROLLING**

Rolling lure, the body is rolling on its own axis. Extra flashes and tight swim.

**FULL WIRE / THROUGH WIRE DESIGN**

Full Wire (Through Wire) construction simply means you have a wire connection from the tow point to the hook hang points. It's the strongest method for making lures.

**BEETLE**

The Beetle is the imitation of a terrestrial, that is a bug that can occasionally fall into water and become trout food. It often happens that exactly this kind of food, alien to the underwater world, is triggering the killer instinct of trout, maybe due to the high number of vibrations produced by the numerous legs that shake in the attempt to get back to solid ground. Some of the colour assortment are natural colours, some other are only partially natural. We choose this way because it happens that you need to dumbfound the trout with something special instead to give it a plain 100% true replica of an insect. The lip of the beetle will be useful both if you want to retrieve it steady or if you want it to swim more erratically.

**28 mm** **S**  
 Depth: 0-0.3 m  
 Hooks: #12 Black Nickel  
 180-16-5.. **2.0 g**

**GRASSHOPPER**

Cricket is one of the more natural and appreciated food for every fresh water fish, especially for wild trout, that seems go crazy for this insect in spring-time and summer. The Grasshopper is a faithful replica of a live cricket, imitating the countless colorations it can assume and it can be used in creeks and small rivers to catch really big trout. You must apply a much varied retrieve, simulating a cricket panicking for its fall into water. We added, anyway, a lip to this lure, that can help you to change style of retrieve in favour of a more traditional steady one. Even in this case the Grasshopper will still have its own distinctive and original tract.

**37 mm** **S**  
 Depth: 0-0.3 m  
 Hooks: #12 Black Nickel  
 180-16-6.. **2.0 g**

**HOT BUZZ**

This small and sinking crankbait features an unrivalled erratic action, perfect when predator fish is not so much active. The wide range of colours and their shape, which perfectly imitate natural prey fish, make it a perfect lure through the whole fishing season.

**25 mm** **S**  
 Depth: 0-0.5 m  
 Hooks: #10 Black Nickel

### TROUT FRY

**36 mm** **S**  
 Depth: Variable  
 Hooks: #16 Black Nickel  
 180-16-7.. **2.0 g**

**42 mm** **S**  
 Depth: Variable  
 Hooks: #16 Black Nickel  
 180-16-8.. **3.0 g**

**48 mm** **S**  
 Depth: Variable  
 Hooks: #14 Black Nickel  
 180-16-9.. **4.0 g**

Series of small lures dedicated to fishing in rivers and creeks. Sized 3,6, 4,2 and 4,6 cm, they are meant to be used to fish predators in every aquatic environment they can patrol for shelter, even in very shallow ones. The Trout Fry balance is excellent, and you can easily verify this by twitching it several times in a row, working with the tip of your rod. The weight of these lures can seem tiny, but it has actually been designed to allow long casts and display a perfect balance, even in waters affected by strong turbulence. It is a super lure for trout, perch and chub. The cosmetic ranges from super natural ones to the most colourful versions, which are oriented to lake trout fishing.

### HELLION

Classic shaped sinking minnow, particularly dedicated to trout, perch and chub both for lakes or slow moving rivers and creeks. Excellent castability compared to its weight. Amazing tight wiggling action.

**50 mm** **S**  
 Depth: 0-0.8 m  
 Hooks: #10 Black Nickel  
 180-11-7.. **3.0 g**

**GOMBEI**

Small slender floating minnow, which is tremendously effective with trout, perch and chub. Light weight but still easy to cast and suitable for a big number of retrieving styles. The Gombei presents a small baitfish profile that can trigger strikes from fish not actively feeding.

**60 mm** **F**  
 Depth: 0-0.5 m  
 Hooks: #10 Black Nickel  
 180-10-3.. **3.0g**

**LASER MINNOW**

Small jerkbait destined to both fresh and salt water fishing, where it can also be used for in-shore trolling. In river and lakes, is a definitely great solution for trout fishing as well as for all predators in general.

**65 mm** **S**  
 Depth: 0-0.5 m  
 Hooks: #8 Black Nickel  
 180-13-0.. **4.0g**

**SWEeper**

Small jerkbait built with extra-loud rattle chambers to bring fish in over long distances. The a wounded minnow action that is effective all year long. Cast it and reel it straight in, using a stop-and-go retrieve.

**50 mm** **S**  
 Depth: 0-0.5 m  
 Hooks: #10 Black Nickel  
 180-13-1.. **3.0g**

## RYOKO CRANK

Small sinking rounded crank for shallow still water fishing. Amazingly effective with trout, chub, perch and black bass. Best performing with slow retrieve, stop and go and some jerking. In this way predators are attracted by what they think to be a wounded fry. The relatively small weight allows a very realistic sinking action.

**45 mm** **S**  
 Depth: 0-0.8 m  
 Hooks: #10 Black Nickel  
 180-10-1.. **4.0g**

## TINY CRANK

This small and floating crankbait features an unrivalled erratic action, perfect when predator fish aren't that active. The wide range of colours and their shape which perfectly imitate natural prey fish make it a perfect lure through the whole fishing season.

**40 mm** **F**  
 Depth: 0-0.6 m  
 Hooks: #10 Black Nickel  
 180-03-5.. **4.5 g**

## SLIM CRANK 1.8

All-round floating crankbait, perfect for light to medium spinning. Diving up to 1,8 meters. Perfect for marginal fishing in lakes and for creeks and rivers. It is just deadly if stopped and left floating until the surface. Successful lure for most of the freshwater species like black bass, asp, trout and perch.

**45 mm** **F**  
 Depth: 0-1.8 m  
 Hooks: #10 Black Nickel  
 180-03-4.. **4.5 g**

**BB CRANK 05**

The BB CRANK 05, like any other lure in the BB series, is equipped with rattling device, 3D Live Eyes, genuine High Quality treble hooks and is finished with innovative colour patterns painted in a highly resistant varnish. It can actually swim up to 0,5 meters deep. Use it to stimulate very lethargic fish in the surface layers, with low speed retrieve. The small size will reduce the splashing sound when cast over long distances, dramatically limiting any fish scaring effect.

**45 mm** **F**  
 Depth: 0-0.5 m  
 Hooks: #10 Black Nickel  
 180-00-7... **7.0 g**

**BB CRANK 05 DR**

Evolution of the existing BB crank 05, 2012 World Champion lure. It dives deeper up to -2 meters, so 4 times deeper than previous lure. According to your need and to the fish mood it can be retrieved very fast, medium speed or really slow, in all these situation the BB Crank will appeal the predators with a wobbling movement. The super compact body makes this lures fly more distant than other cranks and it enters the water more silently, that is very important in areas where fish is subjected to intense fishing pressure.

**45 mm** **F**  
 Depth: 0-2 m  
 Hooks: #10 Black Nickel  
 180-15-2... **8.0 g**

## BB CRANK 1

The BB CRANK 1 is a very versatile crankbait that can dive up to one meter deep. As soon as you start to retrieve, it will immediately sink. It can be used over weedbeds and grass or submerged obstacles, alternating the linear retrieve with regular short breaks and some jerking. During the stops, the BB Crank 1 will tend to float and it will be very likely in this moment that the predators will attack your lure! The range of colors is suitable for all freshwater predators.

**60 mm** **F**  
 Depth: 0-1 m  
 Hooks: #8 Black Nickel  
 180-00-0.. **11.0 g**

## BB CRANK 1.5

**50 mm** **F**  
 Depth: 0-1.5 m  
 Hooks: #6 Black Nickel  
 180-00-4.. **11.0 g**

CRANK 1,5 is a very versatile crankbait that can one meter deep. As soon as you start to retrieve, immediately sink. It can be used over weedbeds grass or submerged obstacles, alternating the linear retrieve with regular short breaks and some jerking. During the stops, the BB Crank 1,5 will tend to float and it will be very likely in this moment that the predators will attack your lure! The range of colors is suitable for all freshwater predators.

## BBJ CRANK 2

The BBJ CRANK 2 is an effective allround jointed crankbait, fitted with a big blade that allows the bait to dive very quickly up to 2 metres deep. This lure will start to dive as soon as you start to retrieve. Like all jointed lures, the BBJ series has a very sinuous and realistic swimming action, more than standard one-piece crank.

**60 mm** **F**  
 Depth: 0-2.0 m  
 Hooks: #6 Black Nickel  
 180-00-2.. **13.0 g**

## UGLY CRANK

**50 mm** **F**  
 Depth: 0-1.2 m  
 Hooks: #8 & 10 Black Nickel  
 180-11-8.. **10.5 g**

Small floating rounded and funny crank, very effective in the upper levels. We advise to retrieve it with great fantasy, changing very often the speed of retrieve and movement of the rod tip. Many species are attracted by this erratic moving lure: trout, asp, black bass, chub etc. Internal rattling system produces lot of vibrations, making it suitable as well for low visibility or muddy water.

**SENSE 60**

The Sense 60 is one of the most versatile lures you can put in your box. It can swim in a very natural and attractive way, whatever the retrieving speed, keeping its quote close to the surface. The shape is not slim and this will cause a big amount of water movement and consequentially an high amount of vibrations spreading all around. The natural colours will also trigger the most experienced predator. It is a very good lure for zander, the asp and the largemouth bass, but it will drive crazy perch and chub as well. In some cases it can be used with success even in salt water, especially inside the ports where the sea bass is lurking between the moored boats.

**60 mm** **F**  
 Depth: 0-0.5 m  
 Hooks: #8 Black Nickel  
 180-15-6.. **6.5 g**

**HAMSTER**

**55 mm** **S**  
 Depth: 0-0.8 m  
 Hooks: #8 Black Nickel  
 180-11-4.. **10.5 g**

New eccentric, sinking lure whose shape recalls a mouse. Frenzy swimming action with the possibility to diversify the kind of retrieve. Despite the small size it can attract and actually catch big unexpected preys in strong pressure fishing hot spots.

**SPEED CRANK**

**65 mm** **F**  
 Depth: 0-0.8 m  
 Hooks: #8 Black Nickel  
 180-15-5.. **14.0 g**

As the name clearly says, the Speed Crank is a lure that can and must be retrieved at high speed, if possible even more fast if you are fishing in shallow waters. It can reach the maximum diving depth of 80 cm and it is a deadly weapon against asp, chub and of course largemouth bass. The compact body and high specific weight, 14 grams, make this lure a versatile crank for smaller rivers and ponds too.

# Rapture PRO SERIES LURES CRANK BAIT

## GEKKO

The Gekko series crank baits are 45 mm long and run up to 0,6 m deep. Perfect choice for cranking nymphae pad edges in deeper water or the shallow side of rock edges and drop-offs. The size and depth range of Gekko lures make it a very versatile crank bait for many situations. A "must have" in any crank bait selection.

**45 mm** **F**  
 Depth: 0-0.6 m  
 Hooks: #10 Black Nickel  
 180-10-2.. **5.0 g**

## GEKKONE

Bigger version of the Gekko, a lure widely appreciated by bassmen through the whole Europe. Gekkone provides strike-triggering action for fishing in shallow water. The erratic wandering action entice predators such as black bass, pike and even chub.

**60 mm** **F**  
 Depth: 0-1 m  
 Hooks: #6 Black Nickel  
 180-13-6.. **11.0 g**

## FLAT SHACKER

**70 mm** **F**  
 Depth: 0-1 m  
 Hooks: #6 Black Nickel  
 180-15-4.. **15.5 g**

A proven winner crank that features a peculiar swimming action, thanks to the flat sides, creating high frequency vibrations. The special shape of the lip makes this lure to deflect the submerged algae from its path and makes it rapidly sink up to 1 meter below surface. When you stop retrieving, the Flat Shacker slowly raise to surface, triggering irresistibly the predators hanging along submerged obstacles.

FARGO M3

Medium sized crank that thanks to its bulky shape is able to move a great amount of water, creating a big number of vibrations calling predators from longer distance. The big lip is responsible for the intense wobbling of this lure and for the super fast diving action, up to 3 meters below the surface. The colour assortment is very interesting, showing a good alternative between natural and hi viz colours.

**70 mm** **F**  
 Depth: 0-3 m  
 Hooks: #4 Black Nickel  
 180-15-3... **19.5 g**

## CRANKY BLEAK MAX

**50 mm** **SS**  
Depth: 0-1.5 m  
Hooks: #10 Black Nickel  
180-05-6.. **3.5 g**

**60 mm** **SS**  
Depth: 0-2.5 m  
Hooks: #8 Black Nickel  
180-05-7.. **6.0 g**

**75 mm** **F**  
Depth: 0.5-3 m  
Hooks: #6 Black Nickel  
180-01-6.. **11.0 g**

The Cranky Bleak Max is a highly sophisticated crankbait Japanese style, imitating to perfection the fish that predators usually chase. It can dive up to 2,50 meters deep. Deadly if retrieved close to the bottom alternating steady retrieve to short stops, when the Cranky Bleak will tend to rise up to surface. Most of the attacks will occur while this lure is ascending.

## DEEP WARDEN CRANK

Floating crank with big lip well spaced from the body. This solution allows the water to pass between the lip and body, lifting up the lure tail, increasing sinking rate and producing air bubbles. Slow retrieve action is also affected positively from this spaced lip solution. The lure rapidly achieves a diving depth of 3 meters and the lip avoids to entangle weeds or rocks. Very nice glass finishing with striking appealing colours.

**60 mm** **F**  
Depth: 0-3 m  
Hooks: #8 Black Nickel  
180-11-5.. **16.0 g**

## BBJ SHAD 2

The BBJ SHAD 2 and BBJ SHAD 2L are extremely good performing jointed crankbaits equipped with a large lip that will make them dive up to 2 meters deep. Compared with traditional crankbaits they have a slender body. Like all jointed lures, the BBJ series has a very sinuous and realistic swimming action. It gives you the best when you make it hit the bottom, then you let it raise a bit and swim again.

**62 mm** **F**  
Depth: 0-2 m  
Hooks: #6 Black Nickel  
180-02-4.. **10.5 g**

UNDER RATTLE SP6

Sinking lipless crank bait with a very efficient rattling system inside. The compact size of the body, together with the perfect positioning of the linking spot on the back, give it a superb stability while sinking. Very good lure for vertical retrieve for perch or black bass. If used in a river, the stream will make it shake with frenzy. It is the perfect lure to seek fish in cluttered water, between sunk dead trees and weeds.

**60 mm** **S**  
 Depth: Max 3 m  
 Hooks: #6 Black Nickel  
 180-11-1.. **9.0 g**

UNDER RATTLE

The Under Rattle is a rattling lipless crankbait. The compact body of 7 cm weights 14 g and is sinking, allowing to sound deeper water levels. It can be worked jigging vertically or it can be hold in the current to produce an attracting wagging movement. This lure produces a large number of low frequency vibrations. It's the perfect bait when searching for predators lurking close to rocks or submerged structures (bridge structures, plants, etc.).

**70 mm** **S**  
 Depth: Max 5 m  
 Hooks: #6 Black Nickel  
 180-00-9.. **14.0 g**

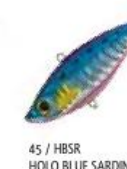

SPARKLE MAX DEEP

Sparkle Max Deep is a deeper diver crank with a fast sinking action, deadly effective to searching for predators lurking close to rocks or submerged structures (bridge structures, plants, etc.), when used in a river, the stream will make it shake with frenzy. The compact size of the body together with the perfect positioning of the linking spot on the back give a great tight wiggling action and a superb stability while sinking. This lure produces a large number of low frequency vibrations and it's deadly effective for vertical jigging for perch or black bass.

**75 mm** **S**  
 Depth: Max 5 m  
 Hooks: #4 Black Nickel  
 180-12-0.. **17.5 g**

## OSCAR

This floating jerkbait is designed for long casts and has an erratic action that drives fish crazy. It can be used both in fresh water for trout, and in salt water for sea bass.

**75 mm** **S**  
 Depth: 0-0.8 m  
 Hooks: #06 Black Nickel  
 180-13-2.. **5.6 g**

## GLASSY BLEAK

**70 mm** **SP**  
 Depth: 0.3-1.0 m  
 Hooks: #06 Black Nickel  
 180-00-8.. **7.7 g**

GLASSY BLEAK is a new concept of semi-transparent bait. Its shiny finishing and brilliant colours makes this suspending minnow extremely appealing. It is an allround lure good in every season of the year in a variety of situations and for all predators. This lure should not miss in your tackle box.

## CRANKY BLEAK

The CRANKY BLEAK is a highly sophisticated Japanese style crankbait, imitating to perfection the fish that predators usually chase. It dives up to 2 meters deep and can be alternatively retrieved and stopped to obtain the best results. During the stop this floating lure will tend to raise up to the surface stimulating the attack.

**58 mm** **F**  
 Depth: 0-2 m  
 Hooks: #08 Black Nickel  
 180-02-7.. **5.6 g**

## SL CRANK

**70 mm** **F**  
 Depth: 0-1.0 m  
 Hooks: #08 Black Nickel  
 180-03-8.. **4.8 g**

**70 mm** **S**  
 Depth: 0-1.5 m  
 Hooks: #08 Black Nickel  
 180-03-9.. **6.0 g**

Extremely versatile crankbait for light spinning: the floating version can dive up to 1 meter deep while the sinking one can reach 1,5 meters. The ratio between weight and length has been accurately chosen to get the best casting performance. Perfect for bass, trouts, asps, chubs and perches.

## BLEAK

BLEAK is a floating stick bait that can dive up to 1 meter deep. The colour assortment together with a realistic action makes this minnow form lure useful in a great number of situations. It can be used to target a large number of predators both in shallow water. Very good casting performance.

**78 mm** **F**  
 Depth: 0-1.0 m  
 Hooks: #06 Black Nickel  
 180-02-3.. **7.0 g**

TROUTER

As you can guess from the name the Troutler is an excellent lure for trout fishing, both in lakes and rivers, where it keeps a perfect swim even in very strong stream of water. Its typical movement can be appreciated especially with steady retrieves at moderate speed. In this situation the Troutler can trigger strikes from the shyest trout. The inner weights disposition gives always a perfect swim and a controlled dead leaf sinking action.

**85 mm** **S**  
 Depth: Variable  
 Hooks: #06 Black Nickel  
 180-16-4... **18.0 g**

SUPER DEXTER

Heavy lure for fresh water fishing that must retrieved steady with occasional jerks and pauses that will make vary its swimming depth. It is a versatile lure thanks to its weight, 32 grams, and length, 11cm, and it can be attacked by a large number of predators, from pike to trout and zander. The liveries has been protected by a double layer of transparent coating for extra protection against friction with gravel and rocks.

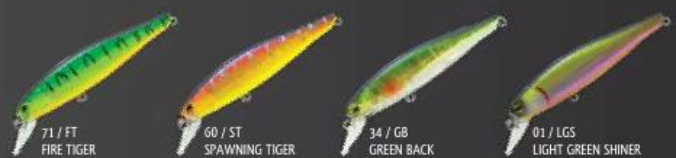

**110 mm** **S**  
 Depth: Variable  
 Hooks: #04 Black Nickel  
 180-16-2... **32.0 g**

DAYU MINNOW

Sinking all-round lure that can be used in a variety of ways and situation. Very effective when retrieved at different speeds. The rattle system with big steel balls attracts predators from long distance.

**80 mm** **S**  
 Depth: 0.2-1.2 m  
 Hooks: #06 Black Nickel  
 180-10-7... **9.0 g**

## SHADDY

SHADDY is a sinking minnow with internal rattling system producing high frequency vibrations. The special L blade allows this bait to reach and keep the desired depth. The Shaddy action is very good at low speed too and still producing a large quantity of vibrations. It is possible to get the maximum result from this lure retrieving it close to rocks and logs. The L shaped lip gives a high stability during jerking action.

**88 mm** **S**  
 Depth: 0.5-2.5 m  
 Hooks: #04 Black Nickel  
 180-02-6.. **16.5 g**

### CRYSTAL COLORS

## SLIM SHADDY

Shad built for fishing in shallow water, terribly effective on trout and other freshwater predators. The careful choice of colors has been addressed by many field tests. To get the most out of this lure, we recommend a straight retrieve with few long jerks.

**70 mm** **F**  
 Depth: 1.2 - 1.8 m  
 Hooks: #06 Black Nickel  
 180-13-4.. **7.0g**

## FAT BASTARD

Heavier and so easier to cast than other shads in the market. During retrieve it shows a very pronounced wobbling while the inner spheres produce a lot of vibrations. Thanks to the wide bill it is able to reach a depth of more than 3 meters.

**70 mm** **F**  
 Depth: 1.5 - 3.3 m  
 Hooks: #06 Black Nickel  
 180-13-5.. **8.8g**

JERKY

The Jerky is a floating bait that can dive up to 1 meter deep. Its name comes from the small blade that allows the JERKY to be easily "jerked" by making small taps on the rod tip. Due to its small size and to the perfect balance it can be used in a number of conditions. Very effective when slowly retrieved.

**80 mm** **F**  
 Depth: 0-1.0 m  
 Hooks: #06 Black Nickel  
 180-02-2.. **10.0 g**

JERKY SLIM

The JERKY SLIM is a floating bait that can dive up to 1 meter deep. Its shape is in some way slimmer than the JERKY. Like every other bait in the JERKY series it is easy to jerk with. Due to its small size and perfect balance it can be used in many situations. Deadly during slow retrieves.

**80 mm** **F**  
 Depth: 0-1.0 m  
 Hooks: #06 Black Nickel  
 180-01-5.. **10.0 g**

JERKY MAX

The JERKY MAX is a floating bait that can reach 1.8m in depth. Its shape is slightly more tapered than the JERKY. Like all the JERKY series it is easily "jerked" by making small taps on the rod tip. Due to its small size and perfect balance it can be used in all conditions. Is perfect to catch all predators, especially when slowly retrieved.

**100 mm** **F**  
 Depth: 0-1.0 m  
 Hooks: #06 Black Nickel  
 180-01-9.. **16.0 g**

## PREY MINNOW

The ideal lure to be used over weedbeds growing close to the surface or in shallow waters. Retrieve it steady and fast alternating some stops to excite the predators and stimulate them to bite.

**90 mm** **F**  
 Depth: 0-1.2 m  
 Hooks: #06 Black Nickel  
 180-05-8... **8.0 g**

## CASTER

CASTER is a floating bait that dive up to 1,2 meters deep. name is self explicatory: this lure is made to fly at longer distances. Actually the shape and the rodynamics of this lure will overcast any other ating bait. A really allround bait that can be chased virtually every predator.

**105 mm** **F**  
 Depth: 0-1.2 m  
 Hooks: #04 Black Nickel  
 180-01-7... **16.0 g**

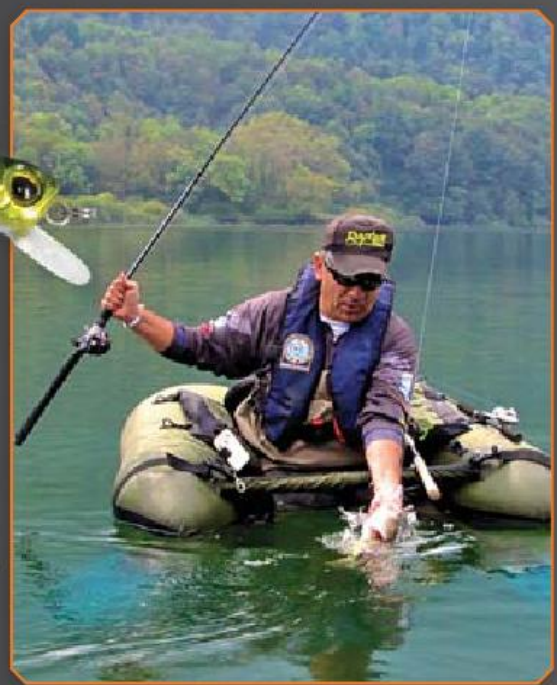

## ANCHOVY

Perfect imitation of a sardine to be used in all fishing situations: spinning or trolling. These minnow delivers great results with all predators that usually attack in shallow water. We took care of every detail: anti-corrosion quality treble hooks and finished with multilayer coatings resistant to salt and toothy predators.

**100 mm** **F**  
 Depth: 0-1.0 m  
 Hooks: #04 Black Nickel  
 180-01-0... **11.0 g**

180-08-8.. **26.0 g**

## MYSTIC SWIMMER

Jointed and lipless sinking swim-bait. It can really swims as soon as it enters water, even if let sinking on its own. A slow steady retrieve accented by rod tip movements will take it alive, while a soft rattling will excite predators curiosity. Observe it carefully during retrieve and you too will think you are staring at a live fish!

**95 mm** **S**  
 Depth: 0-1.0 m  
 Hooks: #06 Black Nickel  
 180-14-8.. **10.5 g**

## DESTROIER

Three jointed, highly detailed lure. Its movement is realistic even at very low speed and also from the very first turn of your reel. So effective that quite often is attacked even by big predators that usually will ignore such a small bait. High quality paints that will stand the fight with the most terrific teeth without scratching.

**95 mm** **F**  
 Depth: 0-2.5 m  
 Hooks: #04 Black Nickel  
 180-01-8.. **17.0 g**

## PUNISHER

Long floating jointed lure very easy to cast. Equipped with big rattles it can be clearly identified by hunting predators. Good for both high speed and slow retrieve and thanks to the perfect design it can be used in fast flowing rivers with no problem. The Punisher punished many fishes during test sessions!

**120 mm** **F**  
 Depth: 0-2.0 m  
 Hooks: #06 Black Nickel  
 180-06-8.. **15.0 g**

**PIKE SWIPE**

Floating jointed lure with special shake lip that allows him to dive up to 3 meters deep. Easy to cast, and very stable during the retrieve. Even if specially designed for pike fishing, during tests it often attracted big lurking black bass.

**160 mm** **F**  
 Depth: 0-3.0 m  
 Hooks: #02 Black Nickel  
 180-06-7.. **32.0 g**

**DOOZER**

One-piece floating minnow designed primarily for trolling fishing both for saltwater and freshwater predators. The particular shaped lip and the weight position allow the lure to reach easily the desired depth, producing an excellent and deadly effective swimming action. Big inner rattles produce loud sound and vibration that attract predators from great distances or in low visibility or muddy water conditions.

**150 mm** **F**  
 Depth: 0.5 - 3.0 m  
 Hooks: #2/0 Permanent Steel  
 180-12-2.. **39.5 g**

**HELLRAISER**

Hellraiser is a big floating minnow great for trolling fishing primary for pike fishing or saltwater fishing. It reaches easily the desired depth, whilst the big inner rattles produce loud sound and vibration that attract predators even in low visibility or muddy water conditions.

**180 mm** **F**  
 Depth: 0.5 - 3.5 m  
 Hooks: #4/0 Permanent Steel  
 180-12-1.. **62.5 g**

**PRO SERIES**  
LIMITED EDITION

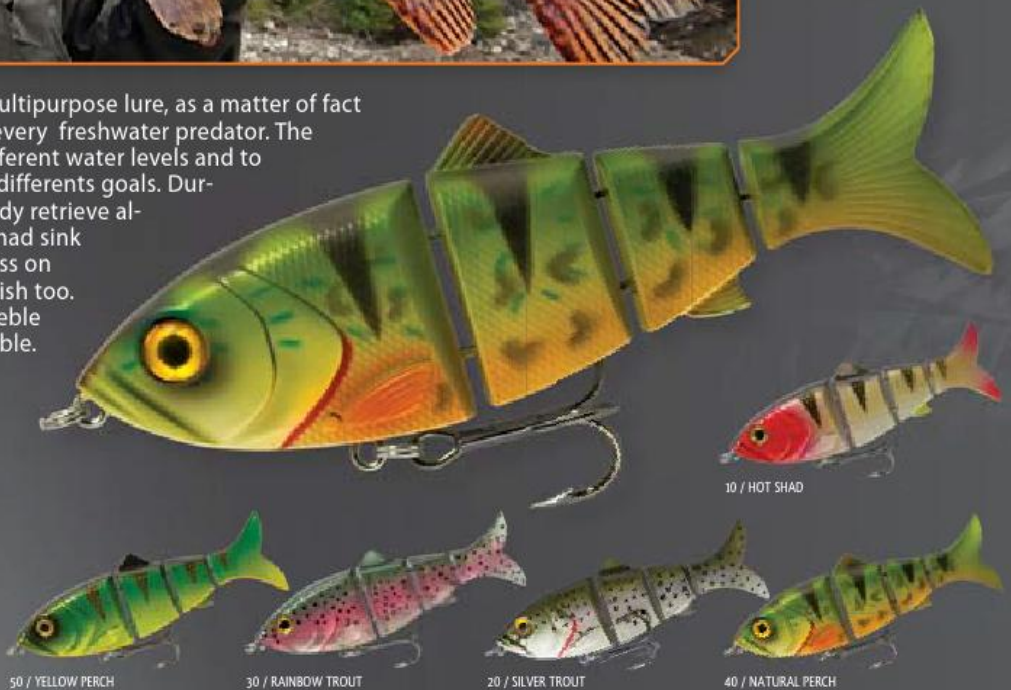

**SILENT SHAD**

**115 mm** **SS**

**115 mm** **S**  
Depth: 0.5-2.0 m  
Hooks: #04 Black Nickel  
180-41-2.. **24.0 g**

Our new SILENT SHAD is definitely a multipurpose lure, as a matter of fact sizes and weight makes it suitable for every freshwater predator. The slow sinking action allows to fish at different water levels and to retrieve at different speeds to achieve different goals. During our test we used this lure with steady retrieve alternating few breaks to let the Silent Shad sink for few seconds with really good success on black bass, pike, big trout, asp and catfish too. Top quality components and quality treble hooks makes this swimbait totally reliable.

# SWIMBAIT

## SILENT SWIM

Pro Series Swimbait is an innovative swimbait available in 12, 15 and 20cm size. All sizes come with two different actions: floating and lipless sinking. Pro Series Swimbait displays a sinuous movement and an amazing realistic finish resulting as a sure winner bait even in clear water and spooky fish. The FT version (floating), being heavy and bulky, is more suitable for use with casting rods and reels. A slow top water retrieve during Summertime will produce great success.

## STRIKE BLASTER

Walking-the-dog is an incredibly effective way to draw explosive strikes from big fish. The Strike Blaster is a skitter bait combining a side to side motion together with the loud sound of internal rattles.

**70 mm** **F**  
 Depth: Top Water  
 Hooks: #06 Black Nickel  
 180-13-8.. **9.0 g**

## BLASTER

Surface lure with peculiar big reversed lip designed to produce big splashes into water with a special action in between a WTD, a crawler and a popper! In the end a wake lure that produces a lot of noise and vibrations that cannot simply be ignored by predators. Best in test for black bass and asp.

**72 mm** **F**  
 Depth: Top Water  
 Hooks: #06 Black Nickel  
 180-11-6.. **8.0 g**

## PREY GLIDER

Pencil lure, just deadly when the water starts to warm up in late Springtime and during all Summertime. The "walking the dog" action of this lure is perfect to fish around snags or just closer to weedy areas. Good lure for black bass, perch and asp. Very effective in salt water too.

GHOST

One-piece lipless minnow with a great castability compared to its weight. Great crystal colors, excellent side to side action, imitating frays feeding on the surface. Big inner rattles produce loud sound and vibration that attract predators in low visibility or muddy water. Perfect for the WTD retrieve techniques.

## SLICER

Lipless stick bait with a floating buoyancy and a great lifelike swimming action. Retrieved regularly in the midwater or with a WTD technique in the shallow water is deadly effective, mimicking the frays that feeds on the surface. Great castability.

**95 mm** **F**  
 Depth: Top Water  
 Hooks: #06 Black Nickel  
 180-10-4.. **8.5g**

## HARUKO GLIDER

Sinking lipless minnow with high specific weight. Thanks to its shape it can be casted very far where, especially in lakes, lake trout and chubs are not used to see a lure. If you are fishing rainbow trouts in fisheries the Haruko Glider will be one of the very few lures that can actually reach the schools of trout far from the shoreline, allowing repeating catches. It is deadly even if you don't retrieve, just let it sink and its wobbling action while diving to the bottom will attract the stalking trout.

**65 mm** **S**  
 Depth: Max 4.0 m  
 Hooks: #04 Black Nickel  
 180-11-9.. **12.5g**

## THOKI

Sinking lipless lure with excellent aerodynamics performances. Japanese styled lure designed for fishing in the upper water levels both in fresh and salt water. It is heavy in relation to its length and thanks to this it can be casted to very long distance while the perfect stability allows speedy retrieve with lot of speed variations and zig zag direction changes. Very effective, even while falling down to the bottom, with wary or lazy fish. Deadly for black bass, asp, chub and lake trout.

**80 mm** **S**  
 Depth: Max 4.0 m  
 Hooks: #06 Permanent Steel

 Hooks: #06 Permanent Steel  
 180-09-6.. **22.0g**

**BOWED MINNOW**

Innovative bait whose shape is different from the vast majority of existing lures on the market nowadays. It can be retrieved in many different ways and its movement will be always irregular and wild. If retrieved slowly with small jerks it will simulate a small fish feeding on surface, chasing on newborn insects. If retrieved in a fast way it will swim in a crazy way with frequent side lateral sprints and sudden accelerations towards the bottom, imitating at perfection a blessed minnow or a dying fish trying to search for some shelter. It is for sure not a trivial bait and it will represent something new for the biggest predators that usually have already seen all the baits you already have. It is the right lure for every condition, in fresh and salt water thanks to its versatility and its unique ability to adapt itself to whatever retrieving style.

**DEXTER**

Don't be fooled by the innocent look of this lure! It is actually one of the most deadly lures you can use fishing in lakes. It can be retrieved at different speeds: when retrieved slowly it will attractively swim close to the bottom. If you stop retrieving the Dexter will sink even more creating a peculiar movement that will trigger trout to bite it with great hungry. When retrieved faster and with your tip raised, it can swim much closer to the surface and the in intermediate zone. Even in this case occasional pause will make it fall and excite the trout to attack it. Its measures, 28 grams and 7.5 cm will grant you to cast it right the trouts are, no matter how far.

## UNDER SILENT

**65 mm** **S**  
 Depth: Variable  
 Hooks: #06 Black Nickel  
 180-02-9.. **11.0 g**

THE UNDER SILENT is a perfectly realistic Vibe Lure. The compact body and weight of 11g make it possible to quickly reach the desired fishing depth. It can work vertically jigging or, when held in a current its tail will begin to waggle attractively. This bait issues a large number of low-frequency vibrations. Ideal bait when searching for fish and when fish are lying close to obstacles or submerged structures (pillars, bridges, plants, etc.).

## UNDER SILENT MAX

**75 mm** **S**  
 Depth: Variable  
 Hooks: #06 Black Nickel  
 180-02-8.. **19.0 g**

THE UNDER SILENT MAX is a perfectly realistic dumb Lipless VIB Bait (vibration lure). The compact body and weight of 19g make it possible to quickly reach the desired fishing depth. It can work vertically jigging or when held in a current its tail will begin to waggle attractively. This bait issues a large number of low-frequency vibrations. Ideal bait when searching for fish and when fish are lying close to obstacles or submerged structures (pillars, bridges, plants, etc.).

## DEEP SHAKE

**70 mm** **S**  
 Depth: Variable  
 Hooks: #06 Permanent Steel  
 180-11-2.. **13.0 g**

Lipless to be used in salt water or in other deep waters for deep action. Two different linking point are present on the back of the lure, allowing different set ups. The central link allows a vertical retrieve for freshwater jigging for zander and perch; the foremost link allows an horizontal retrieve from the shore or from the boat during predators attacks to schools of baitfish. Thanks to its aerodynamics shape and weight in relation to length (70 mm and 13 g) it can be casted very far.

## DEEP RIDER

One more brand new lure from Rapture range. Ratio between length (90 mm) and weight (42 g) allows the Deep Rider to be fired like a bullet and to dive very deeply. It is so effective that even fresh water use gave brilliant results. Easy to use.

**90 mm** **S**  
 Depth: Variable  
 Hooks: #04 Permanent Steel  
 180-05-0.. **42.0 g**

SARDY

**75 mm** **F**

**95 mm** **F**  
 Depth: 0-2.0 m  
 Hooks: #08 Permanent Steel  
 180-02-1.. **9.5 g**

Series of extremely versatile lures characterized by realistic swimming actions and carefully designed finishes. Field tests have shown excellent structural resistance even in the presence of large aggressive predators. Because of their ease of use and their attractiveness this minnow series can be used in many various conditions.

BLACK JACK DR

Deep diver jerk bait that can be used in a number of situations everywhere, so both in fresh and salt water. The slow sinking action in combination with a wide bill allows this lure to reach 3.5 meters in depth and therefore also entices predators near their burrows.

**110 mm** **S**  
 Depth: 2.0 - 3.5 m  
 Hooks: #04 Black Nickel  
 180-13-9.. **13.0 g**

DEEP HOUND

Oversized lip lure than can dive down to 6 meters trolling or 4 meters casting and retrieving. Its heavier weight and excellent balance make for longer casts. A must have for your tackle box!

**120 mm** **S**  
 Depth: 2.4 - 5.7 m  
 Hooks: #06 Black Nickel  
 180-14-0.. **15.8 g**

**NEW WINDCODE**

WOBBLING  
 DART ACTION  
 ROLLING  
 FIXED WEIGHT

The Wind Code is a sinking lipless wobbler that can be used in a great variety of conditions, in salt and fresh water. For salt water fishing we can assure you it is a bass killer, while in fresh water you will find it is great for trout and asp. We suggest a medium fast retrieve alternating short jerks and linear retrieve. Don't forget a stop&go retrieve with pauses of a couple of seconds to excite the predators.

**60 mm**   
 Depth: 0-0.5 m  
 Hooks: #12 Black Nickel  
 180-17-7.. **7.0 g**

**NEW FUJIN**

S-CONCEPT ACTION  
 DART ACTION  
 ROLLING  
 FIXED WEIGHT

Fujin is a small lipless bait of just 65mm. It has been designed to be casted at the longer distance possible. We know that this the best in the world in its class for casting and allows you to scout a bigger amount of water. You should choose for this lure in windy days. We suggest a slow retrieve with frequent light jerks with the top of your rods.

**65 mm**   
 Depth: Variable  
 Hooks: #12 Black Nickel  
 180-17-5.. **7.0 g**

LUBINA

The LUBINA minnow series has been specifically designed to catch all marine predators with a spinning technique. The result is a bait that is very resistant to impact and to the worst weather and sea conditions. Thanks to its aerodynamic shape it can be casted to enormous distances even in unfavourable strong wind conditions (as it is frequent during fishing session on the sea shore). Despite the name it is not just for sea bass but it is also deadly for bluefish and garrick.

**100 mm** **S**

38 / HRH HOLO RED HEAD

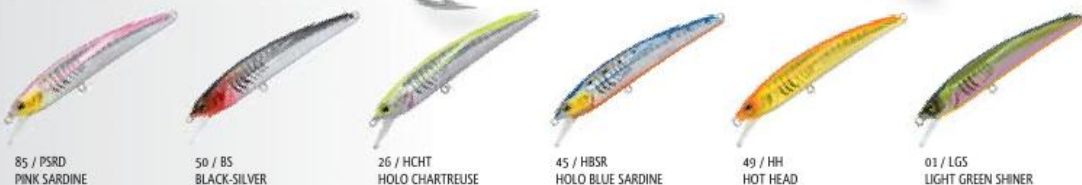

We can define the Assassin as one of the most classical shake lures for salt water spinning to sea bass. It is medium sizes, 13.5 cm while the shape remembers the shape of the more common forage fish in Europe and Africa: the mullet. It is sufficient a medium speed steady retrieve to catch the attention of the big sea bass living in estuaries, reefs and ports. The floating action makes this lure perfect for shallow waters. Due to its heavy weight, 21.5 grams, it can be casted very far with great accuracy. This is a great feature cause allows you to cast hardly reachable hot spots along steep cliffs.

**135 mm** **F**  
Depth: 0.2-1.0 m  
Hooks: #06 Permanent Steel  
180-16-1.. **21.5 g**

SPARK MINNOW

Slender sinking minnow with 2 peculiar grooves along the sides that increase hydrodynamics during fast retrieve action. Despite the small size it can achieve long distances when casted. Internal rattling system provides plenty of vibrations making this lure a perfect lure for low visibility conditions.

Hooks: #06 Permanent Steel  
180-10-9.. **7.0 g**

### SMILE

When you are not sure about what to use, just make a Smile! This lure is probably one of the most versatile in the market, and simply changing the rod angle while retrieving you can have a popper lure or a minnow. Heavy duty painting and totally saltwater components and treble hooks.

**120 mm** **F**  
 Depth: 0-0.2 m  
 Hooks: #04 Permanent Steel  
 180-06-2.. **16.0 g**

**120 mm** **S**  
 Depth: 0.2-1.0 m  
 Hooks: #04 Permanent Steel  
 180-06-3.. **18.0 g**

### CHUCK

Popper or minnow? The answer is Chuck! This brand new floating lures can be used any time you need to target predatory fish near the surface. Thanks to its aerodynamics is possible to make long cast even in strong wind conditions. You can retrieve as a minnow or it may work like a popper. Ideal for sea bass, bluefish has given good results also with pike, catfish and bass in fresh water.

**100 mm** **F**  
 Depth: 0-0.8 m  
 Hooks: #06 Permanent Steel  
 180-05-9.. **10.0 g**

**125 mm** **F**  
 Depth: 0-0.8 m  
 Hooks: #04 Permanent Steel  
 180-06-0.. **16.0 g**

MOMOKO

Similar to Chuck, also Momoko is infallible in all situations where predators are active in the surface or in shallow waters. The aerodynamic shape and weight of 16.5g make possible to reach long casting distance and to have extreme accuracy. Ideal for sea bass, bluefish, while in fresh water is effective with pike, catfish and bass.

**120 mm** **SP**  
 Depth: 0.2-0.8 m  
 Hooks: #06 Permanent Steel  
 180-05-3.. **16.5 g**

MOMOKO XL

Larger and heavier version of Momoko but with a floating buoyancy. This lure is absolutely deadly in situations of shallow water or when predators carry their hunts close the surface. A straight retrieve alternated with sudden jerks will trigger the strikes of bigger bluefish and sea bass.

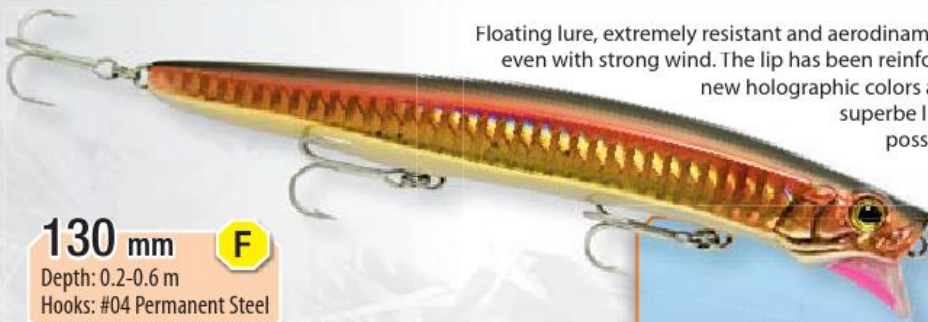

**150 mm** **F**  
 Depth: 0.2-1.2 m  
 Hooks: #02 Permanent Steel  
 180-14-4.. **24.0 g**

WAVE DANCER

Floating lure, extremely resistant and aerodynamic, which make possible to cast at incredible distance, even with strong wind. The lip has been reinforced and provide this lure with an incredible action, new holographic colors and saltwater proof treble hooks make this product a superbe lure. Thanks to the heavy duty components and lip is possible to use this lure in shallow or rocky areas. Perfect for sea bass, bluefish and barracuda.

**130 mm** **F**  
 Depth: 0.2-0.6 m  
 Hooks: #04 Permanent Steel  
 180-04-9.. **21.0 g**

### NEW SUPERTIDE LD

It doesn't happen frequently to find a lure that includes a so aerodynamic shape, a perfect swim and a superior castability. You can bet you can cast your Super Tide LD (Long Distance) a mile away. A medium-fast retrieve produces a sinuous swimming action able to draw sea bass attention from a long distance. If you jerk it every now and then you will see it scatter wildly like a wounded fish. Usually the strong attack happens in this moment. Bluefish and barracuda are other species that will find the Super Tide LD a nice food, especially if you will add more heavy jerks during the retrieve.

**175 mm** **F**  
 Depth: 0-1.0 m  
 Hooks: #04 Permanent Steel  
 180-15-8.. **26.0 g**

### NEW TIDE SL

Longer version of the original Super Tide. Ideal to be used with slow and steady retrieve, with stops every 5-6m. The large size and the shape of the body facilitate casting significantly when it is necessary to reach distant spots. They have given good results on bass and bluefish in saltwater, good also for pike and catfish in freshwater.

**130 mm** **SS**  
 Depth: 0.8-2.5 m  
 Hooks: #04 Permanent Steel  
 180-07-7.. **23.0 g**

**TIDE EVO**

New version of our glorious Tide. Extremely versatile, it is perfect to be used every time you need to fish closer to the surface with an erratic movement lure. The colour assortment is the best selection available for saltwater fishing. All components and treble hooks are heavy duty and salt water proof.

**125 mm** **F**  
 Depth: 0-1.0 m  
 Hooks: #06 Permanent Steel  
 180-04-8.. **14.0 g**

180-04-7.. **32.0 g**

Our new Magneto is a stunning salt water baitfish imitation. Thanks to the special weight system inside the body it is possible to cast incredible distances, even if the total weight of this lure is not that heavy. Simply deadly for sea bass, barracuda and bluefish. Every component is saltwater proof as well as treble hooks.

### SAORI

Floating Japanese styled long jerk equipped with 3 Perma Steel treble hooks designed to target every salt water predator. Thanks to its aerodynamics shape and weight in relation to length (145 mm and 28 g) it can be casted very far even if wind is blowing against you. Suitable for fast retrieve, jerking action, slow retrieve and stop and go action. Suitable for trolling also. Very effective with sea bass, bluefish and garrick.

Long Jerk bait that can be used in many situations. The profile of the body and of the lip allow a very wide swimming action, exploring a vast quantity of water. It can be retrieved either linearly or with pauses and restarts or it can be jerked. In fresh water, pike will definitely be the more interested in this lure, while at sea it will be barracuda stubbornly chasing him.

Salt water long jerk with peculiar shake sides according to a design that allows this lure to keep a natural and attractive swim even at very low speed retrieve. This specific quality makes the Bruiser SS the perfect lures for barracuda in shallow waters: the slow sinking action in fact allows this bait to properly swim in only 40 cm depth raising your tip. All the colours has been chosen to be attractive in whatever light conditions and water colour. Choose anyway the colour of your Bruiser SS according to the conditions to succeed where other lures, less specific, have already failed.

This is the close relative of Bruiser SS but it is lipless. This lipless version is different also for the big weight: 42 g in 17 cm length. It is the perfect lure to cast in the more interesting and far hot spots that are normally too far for common long jerks. The peculiar shape of the sides is able to reflect the light in every condition and at any angle. Since it is lipless it is up to the angler to make it alive and moving in a proper way. It is deadly for the big bluefish chasing just under the surface where a stop and go retrieve with occasional heavy jerks will drive them crazy. The length of the lure will give guarantee you that the line will not be cut by their sharp teeth and that you should not use any wire, increasing your catch rate.

 Hooks: #04 Permanent Steel  
 180-17-6.. **21.5 g**

The Delta Code is 125mm sinking lipless with an aerodynamic shape that can be casted like a bullet and has a really wide range of uses. Beside the great casting performance it can be used to scout different water level due to its weight and the sinking action. We suggest a fast or medium-fast retrieve with well settled jerks to alter its direction. It can be used also in strong stream and with rough sea. You can easily cast him against a frontal wind with no problem. It is the perfect lure to fish from cliffs and beaches, even shallow ones. A deadly lure for bluefish, seabass and cuda.

 Hooks: ST-56 #06 Permanent Steel  
 180-17-2.. **30.0 g**

Small lipless slim lure that weight 30 grams in only 9 cm length, making it a true bullet to shoot at great distance. The peculiar belly shape makes it shale and vibrate while sinking. The sinking action is quite slow, allowing predators to attack it. It is a super lure to be casted in the middle of bait balls created by mass attacks of pelagic predators such as schooling tuna, dolphin fish etc. The Acciuga is equipped with top quality 3X treble hooks able to face the strongest fights. Split rings are properly dimensioned. The chromed colour patterns are the best for daylight fishing cause they reflect the light very well. Super realistic scaled design.

## ROCKET JIG

The Rocket Jig is a lure with strong vocation for the long casting and can be fished both from the boat and from the shore. The special shape makes it suitable for very fast retrieve with frequent jerks to make it alive. The sudden jerks trigger the natural inclination to attack inherent in large predators. Moreover, thanks to a clever use of the rod tip, this lure can be done fished at different depths.

### KOSUKE

18 / TGS TENNESSE GREEN SHAD    31 / SWS SILVER WILLOW SHINER    32 / RBF RIVER BLUEFISH    33 / AGU ORIGINAL AGUGLIA    34 / ACC ORIGINAL ACCIUGA    48 / BLK BLACK

Medium sized popper lure with a peculiar aerodynamic shape that allows longer casts. The specific positioning of the inner weights makes this lure to act as WTD, with the right style of retrieve, and as true popper. If retrieved at top speed it will act like a sort of skipping lure. It superfluous to tell you that such a number of options have the result to create a deadly weapon for the bluefish, a fish that is always attracted by noisy and splashing lures. The Kosuke group everything in one single lure and it is the best way to fish for the bluefish. The trebles are super pointy, featuring a special cut point, and grants you never loose their hold, even in the mouth of this crazy, jumping and often self releasing fish.

YANKEE POP

Top water lures, and poppers most of the others, are specially designed to be more visible and noisy as possible. That's why the Yankee Pop has a very broad and strongly concave mouth and big eyes. This bait can really create a great chaos effect on the surface, attracting predators, even at long distances.

**105 mm** **F**  
 Depth: Top Water  
 Hooks: #02 Permanent Steel

CORSARO & MEGA JET

High-tech lure much appreciated from popper specialists. Poppers available in 2 versions: 140 mm (40 g) and 155 mm (52 g) equipped with 2 salt water treble hooks and strong stainless steel split rings connected to an extra strong stainless steel wire frame built inside lure body to allow maximum performance and resistance even to nasty and toothy predators.

Colour finishing is highly detailed and very effective for garrick, dolphin, bluefish and all the predators that usually attack lures retrieved in the upper levels. They can be used for fresh water fishing as well for pikes and wels catfish when hunting close to the surface. Equipped with genuine Power Point hooks.

**NEW SEA RUNNER**

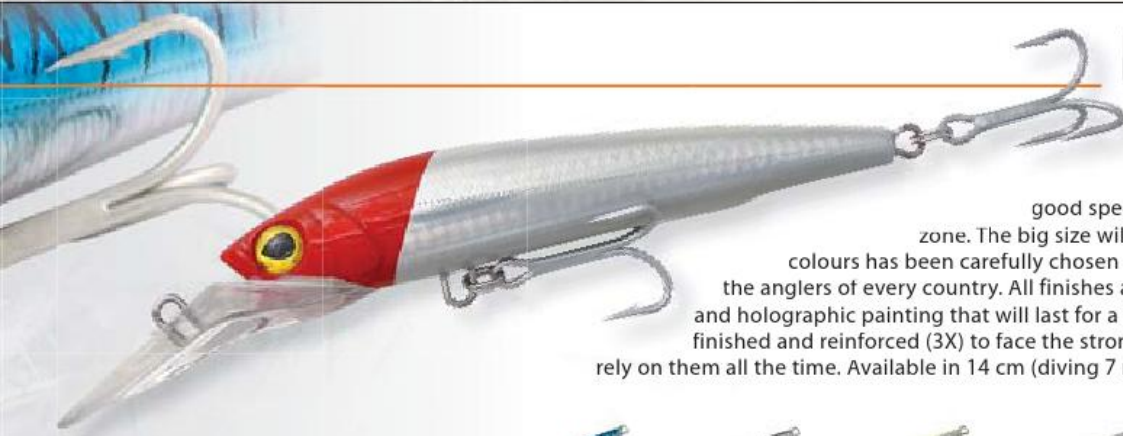

Special trolling lures that dive very quickly and maintain a regular depth. They can be trolled up to 5 knots. They are equipped with anti-corrosion genuine Power Point treble hooks, rattling system and innovative multi-layer coatings. This series works from 4,5 to 9 meters in depth depending on length and weight of the model and they are suitable to chase those predators that hang suspended on the bottom or close to obstructions or reefs. We recommend washing them with fresh water after use to keep the colours always striking.

**NEW EGI HUNTER**

Egi Hunter are designed for squid and cuttlefish trolling, but they can be employed as well in Egi Fishing from the shore or rigged in a conventional Paternoster style for vertical boat fishing. Egi Hunter lures are both floating, but they feature two different swimming actions: a shallow runner with a less pronounced lip and a deep runner able to reach great deepness in a while. In both versions the lip is livening up its action and gives the opportunity to make the lure diving to the desired depth. Equipped with high quality super sharp squid hooks.

Killer Magnum is a superb lure for Mediterranean and exotic offshore trolling. It allows to troll at good speed down deeper in the hottest strike zone. The big size will select good sized predators. All the colours has been carefully chosen between the more popular amongst the anglers of every country. All finishes are top class, including 3D glass eyes and holographic painting that will last for a very long time. All the trebles are tin finished and reinforced (3X) to face the strongest fights with bigger fish: you can rely on them all the time. Available in 14 cm (diving 7 meters) and 18 cm (diving 9 meters).

# Rapture PRO SERIES LURES CHIBI LURES

Generally, the Japanese word "Chibi" identifies a small sized animal. The perfect word to name a new category of miniature lures, ultralight in weight and compact in shape, but extremely effective, whose diffusion is booming worldwide. Everything started in Japan, and was due to a deep study about fish behaviour. In summer, when a lot of food is available, predators can quickly feed up, but never refuse a small quarry; during colder months, they catch minnows because they can do it without spending so much energy. In addition to that, a small lure always catches something, specially when larger ones have failed. The Rapture range draws the attention for the extreme precision of details, for perfect swimming action and for quality of hooks and trebles. Holographic paints, matt finish colours and 3D eyes are extremely attractive, not only for predators but also for us: who could resist adding a box of Chibi lures to his already full tackle box?

**CHIBI LURES** ちび

## NEW CRANK

This small floating crank of just 28 mm and 1,8 grams weight looks like a little gem. It is made from an extremely hard polymeric plastic material and is carefully painted with high visibility colours. It seems a collector's items, but it's tremendously effective once in action. It is equipped with a size 8 chemically sharpened Powerpoint barbless single hook and thus can be used in reservoirs too. Black Nickel finish grants long term point penetration, as it protects the hook from abrasions. This is the perfect lure to tempt predators like bass and zander in the shallower waters of lake's margins, but also used for rainbow trout fishing in commercial fisheries and brown trout in wild, clear streams. All components, such as the snap and split ring, have been selected with quality and durability in mind.

**28 mm**

**S**

01 / PEARL

02 / SARDINE

03 / GREEN MINNOW

04 / AYU

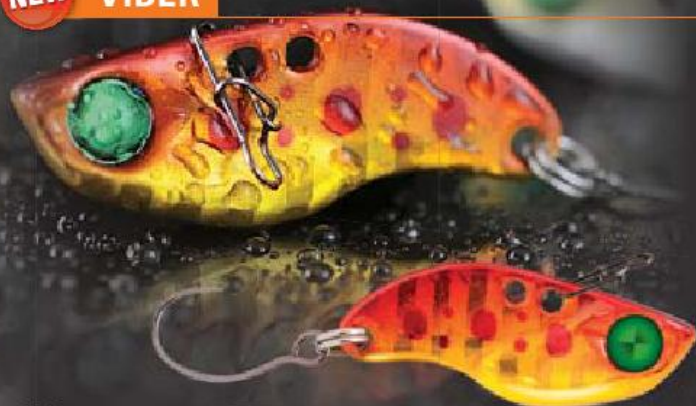

05 / PEARL CHART

06 / SILVER ORANGE BELLY

Only 3,5 grams and 50 millimeters, together with an oversized lip, are a powerful combination that gives this tiny wobbler a special action, impossible to get with standard proportioned lures. The body's slim profile replicates the shape of a starving, sick small fish that predators will look as easy to grab. Colours offer a mix of natural and fancy, making this lure a very good choice for every venue, from commercial lakes to wild streams. Great success even in salt water for ultra light and light rock fishing. It is equipped with snap and two #10 chemically sharpened Powerpoint treble hooks, finished in Black Nickel to hit sand, rocks, woods and features without missing their original sharpness.

**NEW VIBER**

The Viber is an atypical lure and cannot fit the standard classification, being not exactly a vibration lure, nor a minnow and not even a spoon. We can define it a moving colour element that can surprise the predators when used close to the bottom. The body is a flat slice of lead that has been painted in bright colours and given two 3D eyes. This lure can be used choosing between two configurations, just moving the snap from one to the other of the two holes located on its back. Just 2.8 grams heavy and 22 millimetres long, it is of course a sinking lure. It is equipped with a single Powerpoint barbless hook #8, chemically sharpened and protected against abrasion by a fantastic Black Nickel finish. We recommend to use the Viber for perch fishing in Springtime and Autumn, especially in deeper waters, where it can trigger the big ones to attack.

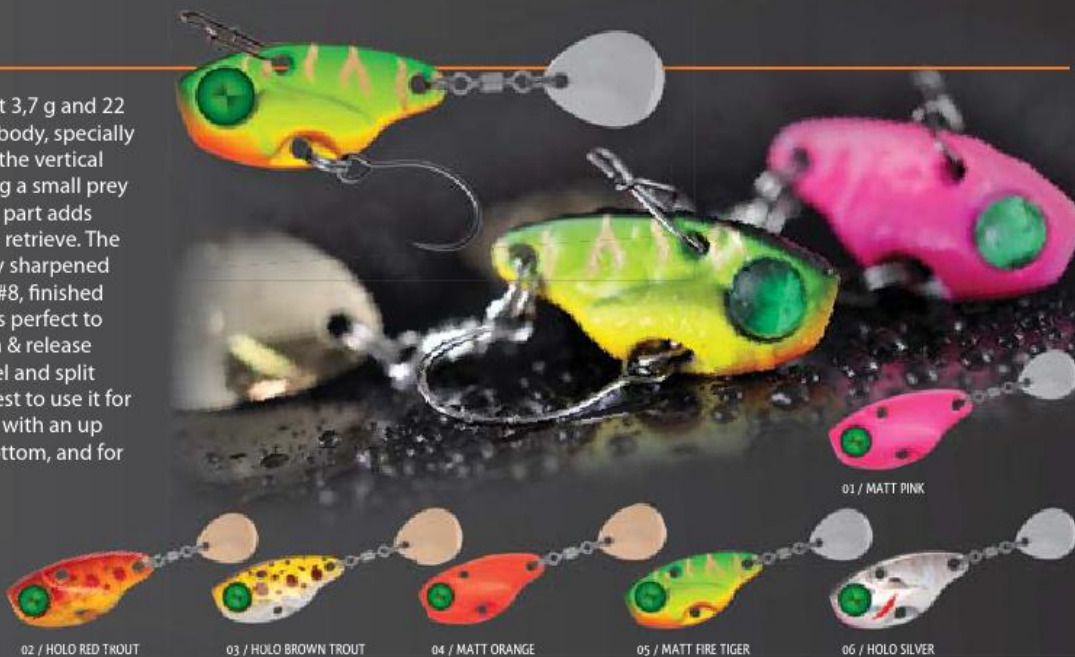

**22 mm**  
Depth: Variable  
Hooks: #8 Black Nickel Barbless  
180-20-1.. **2.8 g**

**NEW VIBE SPIN**

Metallic sinking lure weighing just 3,7 g and 22 mm long. It is made with a metal body, specially shaped with a thick belly to keep the vertical swimming position and simulating a small prey fish. A "colorado" blade in the rear part adds extra attractive flashes during the retrieve. The lure is equipped with a chemically sharpened Powerpoint barbless single hook #8, finished in Black Nickel for durability, so it's perfect to be used in reservoirs, where catch & release is a must. High quality snap, swivel and split rings complete the lure. We suggest to use it for perch in small and medium lakes, with an up and down retrieve close to the bottom, and for trout fishing in quiet streams.

**22 mm**  
Depth: Variable  
Hooks: #8 Black Nickel Barbless  
180-20-0.. **3.7 g**

**NEW SPINNERBAIT**

Despite most of the anglers already know and use standard lightweight spinnerbaits, let's say half an ounce and heavier, for sure many of them never saw this kind of lure downsized in a so short version to be really considered an ultra light lure. The Chibi Spinnerbait is a small lure of only 3/16 oz, so just more than 5 grams in weight, but designed to trigger the predatory instinct of a big fish. The secret lays in its peculiar and natural action, thanks to the low weight, in its appealing colour combinations and in the action developed by the small spoon, which turns and flashes with the swivel assistance, according to the lightest movement on the tip of you rod. A big perch simply cannot resist to such stimulation, and quickly attacks it!

**20 mm**  
Depth: Variable  
Hooks: #12 Black Nickel  
180-20-5.. **5.4 g**

## NEW SPIN JIG

The Spin Jig is a sinking lure built with a lead body representing a prey fish, dressed with holographic colours and with a "Willow" spoon imitating a flashing tail. It is equipped with chemically sharpened Powerpoint trebles, finished in Black Nickel for long life sharpness, proportioned to size and weight of each model. The Spin Jig is very effective when used in lakes, fishing for zander and perch. We suggest an "up and down" retrieve. We also recommend you to use in the deeper parts of small rivers and streams to stimulate the bigger wild trout to attack.

**21 mm** **S**  
 Depth: Variable  
 Hooks: #16 Treble-Black Nickel  
 180-20-2... **3.0 g**

**27 mm** **S**

**35 mm** **S**  
 Depth: Variable  
 Hooks: #12 Treble-Black Nickel  
 180-20-4... **8.0 g**

## NEW CHIBI ASP SPIN 'N' JIG

This lure has been specifically designed for asp fishing and have been built with great accuracy. The fulcrum of this bait is the heavy lead body which allows super long casting. Its shape is also perfect to be retrieved very fast, and easily keeps a vertical position. In case of use from the boat, this lure keeps the depth very well, thanks to the low centre of gravity and to the dorsal position of the line connection's eye. The tail willow spoon is adding attractive vibrations and flashes that will stimulate the attack from predators, as it spins quite well, due to high speed BB swivel's assistance.

**40 mm** **S**

 180-21-01... **21.0 g**

**NEW** CHIBI CAST JIG

01 / SH SHIRASU

04 / IP IWASHI PINK

The small metal jigs are a new weapon in your armoury and they are a very effective way for light fishing in salt water and fresh water. The Rapture Cast Jig is better used in salt water fishing in medium or deep waters and it can swim at different depths, just operating on the retrieve speed or changing the angle of the rod tip. Scad, small leerfish and saddled bream will be the fish that will most likely attack the casting jig. In fresh water this lure can be used to fish the perch in the deeper waters where they will school together during winter time. The Power Point treble hook, fitted on tail through a split ring, is protected against saltwater corrosion by TiN finish.

**38 mm**

02 / RG RED & GOLD

06 / IWR IWASHI RED HEAD

**NEW** CHIBI GUN JIG

Small but heavy metal jig with a very distinctive swimming action. It can be useful to reach the predators when they swim too far for standard lures. The big realistic 3D eye is an additional triggering feature of this long casting lure. We suggest to use the Gun Jig for fishing bonito, skipjack and other small to medium sized fish from the tuna family but it can be employed as well in fresh water, retrieving it very fast for big asp. Thanks to TiN plating, the treble hook resist to saltwater corrosion and their points keep sharpness for longer time, if compared to standard ones.

**44 mm**

05 / SR SARDINE

Windex spinners and spoons have been carefully designed and tested to be always extremely effective. They can be easily cast at long distance, even in the smaller weights, and get working immediately, as soon as touching the water's surface. The colours have been chosen among the most appreciated in Italy and Europe and are protected by a transparent film. Careful attention has been paid to the choice of trebles, always proportionate and of the highest quality, so you don't lose any of the fish that you have tricked. The wide range of shapes and colors allows you to fish in almost any type of fresh and salt water.

## WINDEX

### WIND RIDER

Special thick spoon for long distance fishing, perfect for every use in fresh and salt water. Three different weights available, from 3,5 to 14 grams. Smaller size is very good for chub, while intermediate are deadly when fishing rainbow trout in fisheries or asp in rivers. Bigger size is the salt water lure by election. Six different colours to face every request. Equipped with genuine black nickel VMC treble hook and individually packed in blister.

CODE	WEIGHT	HOOK SIZE
188-09-10_	3.5 g	08
188-09-20_	7.0 g	06
188-09-30_	14.0 g	04

### WIND RIDER DRESSED

Historically one of the easiest and deadly lures for salt water fishing, either from the shore or boat. Just cast it as far as possible, then retrieve it very quickly or alternate the rhythm to create an erratic movement: Wind Rider will call predators from great distances, due to the high turbulence and attractive flickering. This SW Edition of the Wind Rider is available in three weights, 21, 28 and 35 grams and three typically saltwater colours. Equipped with VMC trebles.

188-09-60_	28.0 g	02
188-09-70_	35.0 g	02

### T.SPOON

T Spoon series features an amazing range of highly attractive colours. The special holographic coating allows high visibility even in low light conditions or when the water is quite muddy. The blade profile is just perfect for medium-slow retrieve, which is so effective in stillwaters. We recommend several stops to let the spoon drop to the bottom where it will be very likely attacked. Fitted with original VMC treble hooks.

**NEW** BLADE CAST

Long casting spoon designed to reach great distances, thanks to the streamlined profile and to the body's thickness. During the retrieve, the special bow in the blade produce a neat roll, which sends sharp flashes in the underwater environment and also helps to maintain the deep route. It's offered in two sizes of 4 and 6 grams, both in two main finish: gold and silver, each of those in five colours, for a total of twenty options. Extremely efficient also in sea spinning or inshore trolling, it features weight and Rapture signature engraved in the right side of the upper face.

## NEW MASU TR

In Japanese language Masu means trout. And actually we created this ultra light spoon specifically for trout fishing in lakes. The sinuous action, together with the vivid colours, are the strong point of this effective spoon. The lure is armed with single hook, and this helps to practice catch & release; some colours are matt finished, according to the most recent trend which has raised worldwide.

## NEW BLITZ

Small vivid spoon designed for trout fishing in the lakes. The lively action that you can get with a normal steady retrieve can be even improved if you add some small rod tip jerk. It is available in six very bright colours in 3,5 and 5 grams weight. In order to get the very best from these spoons, we recommend the use of Ultralight class rods, which offer casting accuracy and sensitive feeling during the retrieve.

Wide family of spoons for fishing in ponds and lakes that will not miss to attract your attention and of course that of predators, thanks to their striking colours. Such a combination of frenzy action and bright colours will for sure stimulate the attack of the most lazy predator. All colours have been chosen to create strong contrast with the surrounding environment. The Smarty is available in 2 sizes: 3 and 5 grams. The smaller version is highly performing in the upper layers, especially in late Springtime and early Autumn. The 5 grams is the best choice to head off the trout schooling far from the bank.

**RAINBOW TROUT**

CODE	WEIGHT	HOOK SIZE
188-05-00_	2.0 g	12
188-05-01_	3.0 g	12
188-05-02_	4.0 g	12

This spoon features a very aerodynamics shape which allows long and accurate cast and a circular, 3D coloured insert to improve attraction and visibility. As a matter of fact, the blood red colour and the diamond cut of such "eye" are the elements which made this lure so unique and efficient if compared to all the others. It can be used in lakes or creeks targeting trout, chub, asp and perch.

**SILVER TROUT**

This spoon has been designed with a very slightly curved body to reach great casting distances and also go down at high depths, as the body is able to quickly "cut" the water. Thanks to this feature, you can also retrieve it at very high speed. Excellent for fishing in lakes and rivers targeting trout, asp, chub and perch.

CODE	WEIGHT	HOOK SIZE
188-05-03_	4.0 g	10
188-05-04_	6.0 g	10

**BROWN TROUT**

When we designed this spoon, we reduced the thickness and enlarged the surface of the blade to make it suitable for sweet retrieve and shallow waters. We recommend a steady and slow retrieve with occasional stops to let it sink down to the bottom. Absolutely deadly for most of fresh water predators like trout, chub, perch and zander.

CODE	WEIGHT	HOOK SIZE
188-05-05_	3.0 g	10

**LAKE TROUT**

Windex Lake Trout spoons successfully serve the angler who's fishing for a range of game fish in stillwaters. In fact, you can use it for a number of fresh water predators, and not only for trout. This versatile spoon casts easily and can be retrieved at almost any speed. Bright and natural colours last for a long time, because the blade has been double coated with a transparent protection varnish.

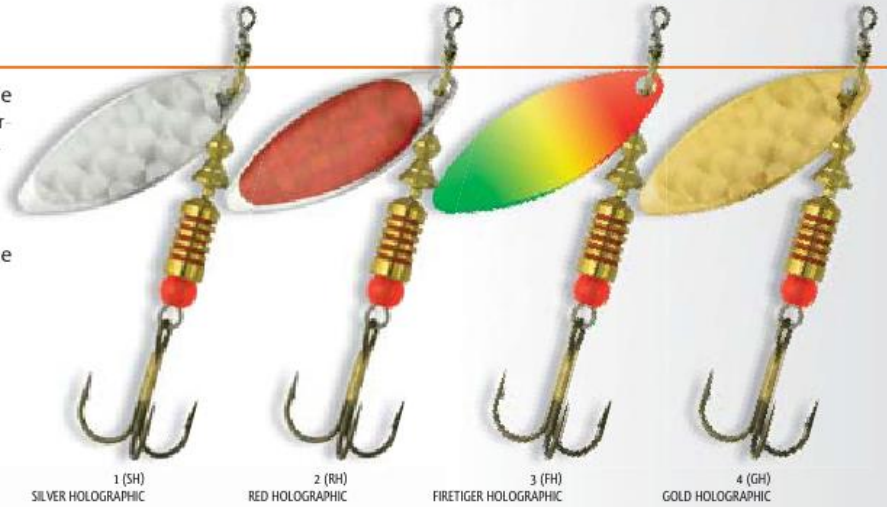

CODE	WEIGHT	HOOK SIZE
188-05-30_	8.0 g	10

## SPINNER AGL

The willow leaf blade used for our Spinner AGL is the best solution to fish in the deeper lakes or river. Perfect to explore the deeper areas of medium flow rivers, this spinner is performing at its best if retrieved slowly and steadily. Depending on size, this lure is deadly for trout, perch, asp and black bass, with some chances on pike and catfish. Fitted with genuine VMC treble hooks.

CODE	WEIGHT	HOOK SIZE
188-05-15_	3.0 g	08
188-05-16_	6.0 g	08
188-05-17_	8.0 g	04
188-05-18_	12.0 g	02
188-05-19_	14.0 g	01

## SPINNER MRT

We are proud to present the unique Rapture spinner with blade mounted straight on main shaft: this feature allows to use the spinner even in very fast flowing rivers and creeks. Available in 3 sizes: 5, 6,5 and 8 grams and 3 holographic colours. So simple, so deadly for all the freshwater predators, from trout and perch to chub and asp, which are driven literally mad by the intense vibrations emitted during retrieve.

CODE	WEIGHT	HOOK SIZE
188-05-27_	5.0 g	08
188-05-28_	6.5 g	06
188-05-29_	8.0 g	04

## SPINNER VB

Our Spinner VB features a special profile blade which allows its application with very fast retrieve or in fast flowing rivers. The two parts body provides continuous and loud vibrations, enhancing strikes: a very important feature when fish is not that much active and in low visibility waters. Fitted with genuine VMC treble hooks for long term efficiency.

CODE	WEIGHT	HOOK SIZE
188-05-10_	3.0 g	08
188-05-11_	4.5 g	06
188-05-12_	6.5 g	04
188-05-13_	10.0 g	02

## SPINNER AGF

This spinner gives its best with trout and other predators in streams and mountain rivers, to trigger the fish even in crystal clear waters or when the sun light is very bright. The coloured dots are perceived as small, slow moving particles, exciting the fish to the attack.

CODE	WEIGHT	HOOK SIZE
188-05-40_	3.0 g	08
188-05-41_	5.0 g	06
188-05-42_	6.5 g	04

**SPINNER AG**

The oval shape of the AG Spinner blade is the most proper to fish in lakes or slow flowing rivers. The wide range of blade's colours enhances visual stimulation and trigger strikes in any situation. The compact body allows to cast accurately very far, and fits genuine VMC treble hooks.

**SPINNER AG**

CODE	WEIGHT	HOOK SIZE
188-05-06_	3.0 g	08
188-05-07_	5.0 g	06
188-05-08_	6.5 g	04

188-05-40_	3.0 g	08
188-05-41_	5.0 g	06
188-05-42_	6.5 g	04

Fluo colours are recommended with overcast sky, deep or coloured waters.

**SPINNER AG /TW**

The striking colour pattern, made by black spots and red tracery, represents an effective alternative to the more classic designs and it is able to trigger the predator instinct. The body shape allows a nervous and scattering action, replicating the movement of a suffering prey.

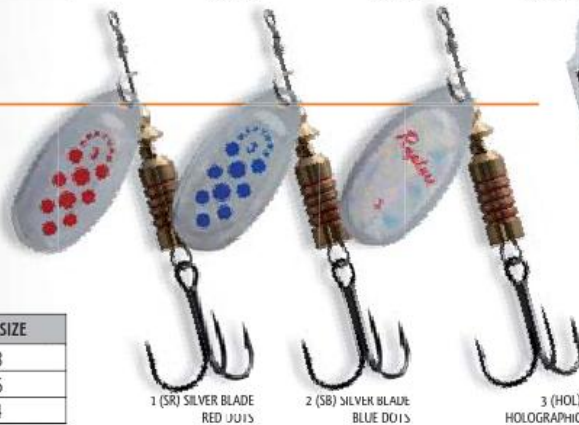

CODE	WEIGHT	HOOK SIZE
188-05-46_	3.0 g	08
188-05-47_	5.0 g	06
188-05-48_	6.5 g	04

**SPINNER CMT**

Spinner with oval shaped blade showing a peculiar, nervous and irregular spin. It is more sensible to the changes of current intensity and direction. It performs at its best when used in medium-low current rivers and in lakes.

CODE	WEIGHT	HOOK SIZE
188-05-49_	3.0 g	08
188-05-50_	4.5 g	06
188-05-51_	6.5 g	04

TW and CMT spinners feature a smart device which enables to replace the standard treble hook with a new one, or with a single hook, without employing any tool. We recommend to try Rapture 10096 Trout hooks.

Wire Baits are multiple lures, built on a metal wire which is "V" shaped to hold a jig on lower arm, and a blade on the upper one. The jig provides enough weight to cast at distance and to keep the swimming depth (maybe hitting the bottom for further noise), with a skirt destined to attract the fish attention and hidden the single hook. The blade develops vibrations and flashing which inform the fish about the invasion in its environment. The predator can stop such disturb,

but, to do so, he has only the mouth... so he gives the start to the battle!. The main target of these lures is the black bass, even though pike and zander aren't so rare, while the Umbrella Rig can also be employed in sea fishing to simulate a small group of tiny fish, getting tight to feel safe from tuna and other predators. We recommend to use rods with stiff action and casting weight between 10 and 20 grams, as these lures are subject to heavy pressure from water.

# WINDEX

## SNIPER BLADE

The Pro Anglers know very well that flash is every bit as important as vibration for producing a reaction strike from the predators. Not many spinnerbaits on the market today produce as much flash as the Rapture Sniper Blade. Available in two versions, with single willow blade (1/2 oz) and double willow (1/2 and 3/4 oz), with five colours each. Extra quality silicone skirt and chemically sharpened Japanese single hook. Ball bearing swivel.

**NEW SNIPER BUZZER**

The Sniper Buzzer features two counter-rotating blades, which, in addition to creating a commotion in the water, also provide extra lift. The extra lift allows for a slower retrieve and thus helps the angler keep the bait in the strike zone for longer time. The Sniper Buzzer also features a tantalizing silicone skirt, combined with a color-coordinated, chip-resistant head for an authentic presentation. Equipped with a premium, super-sharp Power-point single hook as well for maximum penetration and hold, Sniper Buzzer is up to the task of handling monster pike and generally improving your catch ratio.

**UMBRELLA RIG**

The Umbrella Rig is the most realistic imitation of a school of small fish, formed by a head from which depart five steel arms that end with swivels and snap locks where you can attach your soft swimbaits, worms, grubs, jigs heads and small spinnerbaits. It can be used with a steady retrieve, eventually varying speed and direction by rod and reel work, to perfectly imitate the running fish fry which stay tight to feel safe from predators. Ideal when used in combination with jig head and Rapture power shad.

# ULG

## ULTRA LIGHT GAME

The new Rapture ULG lure series, where ULG stands for Ultra Light Game, has been specifically designed for the needs of the many finesse techniques passionate anglers. This ultra light approach has always been very popular in fresh water and now it is becoming as much as important in salt water too. Basically, there is the pleasure to meet big fish with potentially downsized tackle, but there is also the certainty to avoid blanks, because no predator would ever refuse a very small lure.

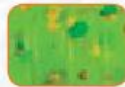

## SPEED TAIL

**NEW**

The Speed Tail is a medium sized lure with a sinuous body and able to deliver a wide variety of vibrations. The ribbed body can actually create high frequency vibrations into the water, while the tail is creating low frequency ones. Deadly with small and medium sized predators. We suggest to use the lighter colours for salt water fishing, even for sea bass, where not only the younger specimen will be easily attracted.

**ALIEN CRAW**  
JAPAN TECHNOLOGY

**NEW**

Small creature that vaguely reminds a shrimp, equipped with many appendixes of different shape and texture, to maximize the number and quantity of vibrations. It is a true allround alternative lure that can be brought to life with the movement of the tip of your rod. Despite the small size, it is able to attract the attention of good sized predators. We strongly suggest you to use it in those venues where the fishing activity is very high and the fish is more spooky.

CODE	LENGTH	PCS/BAG
187-21-00_	0,9 inch (2,5 cm)	12

**ALIEN STICK**  
JAPAN TECHNOLOGY

**NEW**

Small sized worm bait with a peculiar construction. The head of the Alien Stick is thicker and compact to allow a better rigging without risking to break it. The central part of the body is ribbed and much slimmer, designed to develop a much sinuous action and create many vibrations. The body is ending with a slimmer triggering tail that every predator will look with hunger. It is actually able to stimulate whatever predator, from trout to perch, including largemouth and sea bass.

CODE	LENGTH	PCS/BAG
187-21-02_	2,5 inch (6,5 cm)	12

**SHAKER**  
JAPAN TECHNOLOGY

**NEW**

Small sized shad whose peculiarity is the flat back and belly, so really different from any other bait. A flatter body gives a totally different action and will result a completely new bait to the fish that is normally used to see a wide variety of baits all around. So it is the perfect solution for those lakes and rivers where the fishing stress is very high. The body is ending with a smaller part and two thin tails that increase the triggering action.

CODE	LENGTH	PCS/BAG
187-21-04_	2,7 in ch (7,0 cm)	12

Rapture **PROTEAM**  
TESTED & APPROVED

**PREMIUM SELECTION CUSTOM SOFT BAITS  
THE ULTIMATE DESIGN FOR SPECIALISTS**

Rapture's Soft Lures are made of superior quality material, soft but still durable. These powerful scented lures are packed in a preserving oil that will maintain their outstanding performance. Every and each Soft Lure has its own design which is specific and effective, tested and improved by our Pro Team for long time before launching it in the market. We are committed to achieve details perfection and absolute quality to get the best performance. Try them and you won't regret!

**ACTIVE FORMULA**

The particular compound helps the scent and salt to spread, increasing the attractive power.

**SUPER SCENTED & SALT-IN**

All lures are scented and salted in the compound to keep for longer time their attractive power.

**Super Flick Flick STICK** SUPER NATURAL MOTION

The Flick Stick is a special worm for finesse presentation, a new design that gives a peculiar movement when sinking to the bottom. Built-in curves result in more fish-enticing action than other plastic worms. Deadly if used with a wacky jig head.

CODE	LENGTH	PCS/BAG
188-00-05_	4.5 inch (11.5 cm)	10

Color options: (1) PUMPKIN, (2) WATERMELON, (3) MOTOR OIL, (4) SMOKE, (5) BLACK&RED, (6) COLA

**RATTLE SNAKE** SUPER NATURAL MOTION

The Rattle Snake is a lure specifically created for finesse fishing. This worm comes from an innovative design that makes it fall in an extremely natural way and the two small appendages that produce different vibrations. The very high percentage of salt makes this bait extremely soft. Suggested techniques: jig head, split shot, shot down, wacky and texas rig.

CODE	LENGTH	PCS/BAG
188-00-00_	4.7 inch (12.0 cm)	10

Color options: (1) PUMPKIN, (2) WATERMELON, (3) MOTOR OIL, (4) SMOKE, (5) BLACK&RED, (6) COLA

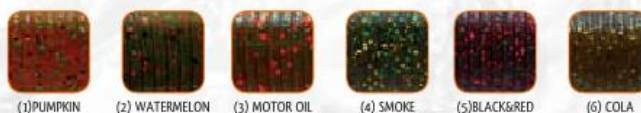

**Intruder** SUPER NATURAL MOTION **CURLY TAIL**

This is a relatively short finesse worm with small body ribs and a tail grub. This design is great because it has a compact body to enter thicker covers, but still able to produce many vibrations. Suggested techniques: texas rig, split shot, jig head, trailer on jig.

CODE	LENGTH	PCS/BAG
188-00-30_	4 inch (10 cm)	10
188-00-35_	4.7 inch (12 cm)	10

**Ribbed** SUPER NATURAL MOTION **CURLY TAIL**

The Ribbed Curly Tail is a worm with a ribbed body, giving the bait a unique sinuosity, and has a very long curly tail that increases attacks during retrieve action, thus making the lure irresistible. Suggested techniques: texas rig, split shot, jig head, trailer on jig.

CODE	LENGTH	PCS/BAG
188-00-15_	4 inch (10 cm)	10

**Worm** SUPER NATURAL MOTION **CURLY TAIL**

The Curly Tail is a classic worm with curly tail and slender body. During retrieve, the tail produces highly appealing vibrations and the slim body provides excellent penetration into covers. The worm has been heavily added of salt, ensuring greater retention of the bait in predator's mouth. Suggested techniques: texas rig, split shot, jig head.

**WACKY WORM**  
SUPER NATURAL MOTION

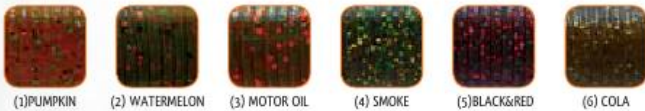

The Wacky Worm is a straight and thick bait, whose aerodynamic shape and heavy weight make it very versatile and good for any situation you can find on the water. Thanks to its weight it can be casted, skipped, flipped and pitched without any difficulty. Suggested techniques: texas rig, split shot, carolina rig, trailer on jigs and jig head.

CODE	LENGTH	PCS/BAG
188-00-20_	5 inch (12.5 cm)	10

**Paddle tail NIGHTCRAWLER**  
SUPER NATURAL MOTION

The Nightcrawler is a very versatile wormbait, with all the features needed to fool the more suspicious predators, tail design produces a natural action to make it more realistic. Suggested techniques: texas rig, split shot, drop shot, wacky, carolina rig, jig trailer.

CODE	LENGTH	PCS/BAG
188-00-45_	6 inch (15 cm)	10

**Mouse TAIL JERK**  
SUPER NATURAL MOTION

Mouse Tail Jerk is an innovative bait, its particular shape mimics forage fish and its thin tail produces irresistible vibrations during retrieve. Suggested techniques: drop shot, split shot, texas rig, trailer on microjig.

CODE	LENGTH	PCS/BAG
188-00-60_	3.7 inch (9.5 cm)	10

**Wacky ALIVE STICK**  
SUPER NATURAL MOTION

The Wacky alive stick has been designed from the ground up to be the ultimate wacky rig worm. The worm is made with a special silicon formula loaded with one of the heaviest salt concentration in the industry! Wacky rig the Wacky alive stick through the middle for best results. Cast the Wacky alive stick near a dock, stump, or at the edge of a weed bed and let it sink naturally. Give it a gentle twitch or two as it sinks to flex the lure in the middle for enticing action. With its bulbous ends and exclusive 'center-flex' design, the Wacky alive stick maximizes the typical wacky worm 'U' action. If the lure reaches bottom unmolested, let it sit for a few moments before twitching it back to life.

CODE	LENGTH	PCS/BAG
188-00-22_	5.5 inch (14 cm)	8

**STICK SHAPE**  
SUPER NATURAL MOTION

**NEW**

Salted and scented soft bait with triangle shaped ribbed body ending in a thin tail, featuring of a thicker final part. This shape allows the tail to shake very easily and delivering a very appealing action. We suggest to use it with drop shot rigs in clear water conditions.

**2 Special Tones**  
INJECTED COLOUR

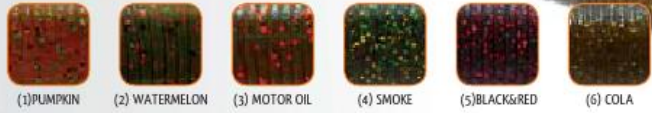

CODE	LENGTH	PCS/BAG
188-02-24_	3.8 inch (9.5 cm)	12

**FAB GRUB** SUPER NATURAL MOTION

The Fab Grub is a soft bait for different uses, designed with a very large tail that emits many enticing vibrations during retrieve. The compact and extremely soft body allows predators to keep the bait in their mouth for a long time. It can be used in pitching, flipping, and as carolina trailer. Suggested techniques: texas rig, Carolina rig, trailer on jigs, spinnerbaits and chatterbait.

CODE	LENGTH	PCS/BAG
188-00-70_	3.4 inch (8.5 cm)	10

**ZIGGY GRUB** SUPER NATURAL MOTION

The Ziggy Grub is actually a bait in between a grub and a worm. The ribs along the body give it a bulkier appearance and displace a significant amount of water, creating a lot of vibrations. The ribs also give the Ziggy Grub a feel and a texture that bass love, causing them to hold on longer for better hooksets. The soft, thin, flexible curly tail provides additional action on the fall. Suggested techniques: texas rig, dropshot and flipping.

### **MEDUSA**

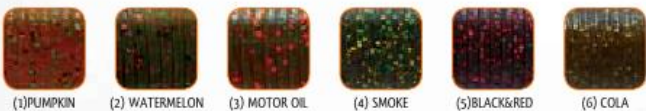

The Medusa is a lure with a straight and compact body, with a top skirt that increases its attracting power and gives a design that allows longer casts and fish in snaggy areas. Perfect for pitching and flipping. Suggested techniques: jig head, Texas rig.

CODE	LENGTH	PCS/BAG
188-00-55_	4 inch (10 cm)	5

### **SNEAKY CRAW**

The Sneaky Craw is a realistic imitation of shrimp, equipped with two flat and thick claws, moving frantically in fall and making this lure easy to spot. Ideal for fishing in pitching and flipping inside thick cover. Suggested techniques: texas rig, jig head, trailer jig.

CODE	LENGTH	PCS/BAG
188-00-40_	4.5 inch (11.5 cm)	10

### **CRAZY LIZARD**

The Crazy Lizard offers a great frantical yet realistic swim, which makes this lure easy to spot. Great for fishing in pitching and flipping, or even on open waters. Suggested techniques: texas rig, jig head, trailer jig.

CODE	LENGTH	PCS/BAG
188-00-25_	4.7 inch (12 cm)	10

### **Flat RIBBED SLUG**

A long-time favourite among US professional anglers, the Flat Ribbed Slug has a tantalizing action that makes it ideal for a wide range of applications. Whether it's used on a Carolina-rig, drop shot, or shaky head, the action of the Flat Ribbed Slug, whose body is salt and scent impregnated, is great for getting sluggish bass to bite. The Flat Ribbed Slug also works well as a follow up bait when bass are hesitant to commit to a primary lure. Even when the bite is tough, the Flat Ribbed Slug has that little something extra that bass just can't resist.

CODE	LENGTH	PCS/BAG
188-00-02_	4.3 inch (11 cm)	8

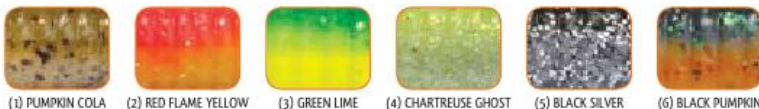

SUPER NATURAL MOTION **Fun TAIL GRUB**

Specifically formulated to appeal to predator's sense of taste and smell, the Fun Tail Grubs are perfect for a variety of rigging applications, including jigs and spinner-bait trailers. The Fun Tail Grub's tapered body offers extra holding power and a fast swimming tail. Once a fish bites into Fun Tail Grubs, the scent and inner salt, impregnated into the bait, causes fish to hang on longer for more positive hooksets. Though designed specifically for fishing bass, these little critters will catch all species of fish.

SUPER NATURAL MOTION **MINNOW GRUB**

The Minnow Grub is an excellent bait for zander and large-mouth bass, but can also be a good lure for sea bass fishing. The compact body allows an aerodynamic position during the cast while the dorsal fin stabilizes it during recovery. The large tail is equipped with a unique profile that greatly enhances the attractiveness. The specially shaped tail edge, in fact, generates many high frequency vibrations that increase the efficacy of the low frequency vibrations of the main part of the tail.

### SUPER NATURAL MOTION RIB SLIM SHADY

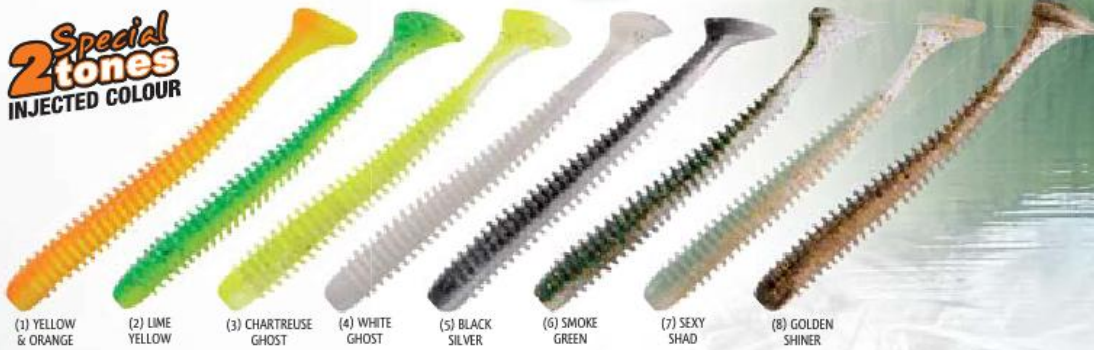

NEW

The Rib Slim Shady is a slimmer version of the existing Swing Shad and, thank to its slender body, the tail will already shake with any lightest movement of your rod tip. It can be used with Texas or Carolina Rigs and, thanks to its flexibility, it offers great performance also when used drop shot style. It is so versatile that can even be rigged on a jig head and used in salt water for sea bass fishing.

The Swing Shad offers anglers an extremely versatile bait that can be utilized with a number of techniques and in almost any situation.

The Swing Shad has thick body, deadly on jigs, spinnerbaits, Texas-rigs, and Carolina Rigs. No matter how it's fished, the reinforced paddle tail of the Swing Shad creates a peculiar swinging action that fish find irresistible. The Swing Shad is also made with a special dual-injection moulding process, which combines two different salted plastics and gives it a well balanced action at any speed. Impregnated with fish scent as well, the Swing Shad is sure to become a familiar site in stowaways everywhere.

**SUPER NATURAL MOTION POWER SHAD**

**NEW**

The Power Shad is a soft lure of proven efficacy, developed by the Rapture Team, Power Shad has become increasingly popular among anglers thanks to its ability to entice baits in all conditions and from almost all freshwater and salt-water predators. Imitated by many but never equalled, Power Shad is available in a large selection, with 6 sizes to choose: 2", 3", 3.4", 4", 5.1" and 6.9". Extremely wide the colours array with well 17 colours among the various sizes. Very interesting the two new high visibility colours and the "saltwater special" selection. The segmented body and thin paddle tail allow to be fished in multiple presentations; in particular recommended techniques are split shot, shot down, texas rig, jig head, swimjig hooks, chatter baits and umbrella rig. A must have choice for fresh and salt water.

Texas Rig on Magna Super Lock & Bullet Head

**2 Special Tones**  
INJECTED COLOUR

An appetizing candy for any bass, the Rapture Mad Worm swims through the water with a fluttering action that gets bass crazy. The special silicon density and thick bone tail design generate a provocative wiggling motion. The Mad Worm also features a ribbed body and a uniquely designed hook point guard that allows for a completely weedless presentation. A space in the ribbing along the body was engineered to allow the hook point to penetrate cleanly on both sides and rest inside the rib. Dipped in a tasty salt brine, the Mad Worm works best with a steady retrieve, and can be used as a jig trailer, Texas-rigged, or Carolina-rigged. If you're looking for an outstanding soft plastic bait with a super action, the Rapture Mad Worm is the one for you.

Designed, tested and refined by Rapture Team, this exclusive new range of soft lures offers an amazing efficiency, destined for sure to boost your catch rate. All these lures are unique to Rapture, and for this reason they are signed one by one with 3D logo. The silicone employed in the production has been scented and salted during the process. This means that flavour and taste will keep the same for ever. Also the colour range is unprecedented, with two tone combinations, enriched by glitters.

**EXCLUSIVE SERIES** **TOTAL WORM** SUPER NATURAL MOTION

**2 Special Tones** INJECTED COLOUR

**NEW**

The Total Worm is part of the Exclusive range of Tournament Worms and has been designed and field tested by the Rapture Team to match the needs of European anglers. It is a classic bait, a bait can never miss from any angler tackle box. It can be used in huge variety of techniques and it will always catch fish! Fish it Wacky, fish it Texas, use it as a trailer or on a jig head. Fresh water or salt water doesn't matter, this bait will catch fish!

# MEBARU Rapture WORM

The Light Rock Fishing is a technique that can be practiced anywhere there is salt water, even in the absence of rocks. It was born in Japan but it is becoming a real Life Style in Southern Europe. In rocky or weedy environments, you can catch comber, wrasse, sea bream and of course the Mebaru, or scorpiofish, the fish that in Japan gave its name to the technique. On mainly sandy environments you can more likely catch gilt-head bream, striped sea-bream in addition to ... the Aji, or horse mackerel, the other fish that has given its name to a branch of the LRF. And in ports or near them it will be the

sea bass to bite on your lure. The fishing techniques takes place not only on the bottom, between the crevices of the rocks, but also in midwater or even close to the surface. This technique is successful for its intrinsic ability to capture virtually any fish. And the size is not always that small ...

**Glowing COLORS**

All colors are glowing in the dark and therefore more visible even in low light conditions.

## AJI WORM

Worm lure for midwater fast retrieve, very soft and sinuous action. Special for horse mackerel.

CODE	LENGTH	PCS/BAG
187-41-00_	5 cm	12

## MENUKE

Imitation of a small prey fish that can trigger the predatory instincts of any fish, even the most peaceful.

CODE	LENGTH	PCS/BAG
187-41-10_	3 cm	12
187-41-11_	5 cm	12

## KASAGO

Very versatile bait that must be used on the bottom or midwater. The thin and very mobile tail generates a large number of appealing vibrations.

CODE	LENGTH	PCS/BAG
187-41-20_	5 cm	12

## KASAGO SHAD

Imitation of a small fry to be retrieved steadily. The compact body and short length must not fool you cause the Kasago Shad is able to attract good sized predators too. The "ball" tail is producing heavy vibrations and moving even at minimum speed.

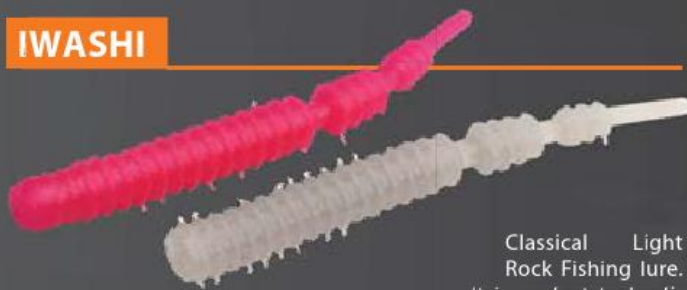

CODE	LENGTH	PCS/BAG
187-41-21_	5 cm	12

For the correct use of ultralight soft lures like Mebaru Worms, the rod must have a solid carbon tip. Beyond the obvious advantage of sensitivity about lure's action, such tip receives and forwards to the user's hand all signals coming from the lure hitting the rocks and bottom, enabling to make a mental picture about the underwater environment. The use of braided lines, even in superfine diameters, is encouraged by guide's quality, as their rings are made from SiC. All these specifications are common to Rapture Steyr Rocker and Vivid SS series, specifically developed for Light Rock Fishing.

**IWASHI**

Classical Light Rock Fishing lure. It is perfect to be fished close to the bottom, with small twitch and numerous

pauses, when usually it will be bitten with confidence. Iwashu is not inspired by any natural bait, but it can remind a small shrimp when you twitch it on the bottom.

CODE	LENGTH	PCS/BAG
187-41-40_	4.5 cm	12

**SHIRASU**

Small imitation of a shrimp that can literally drive crazy fish that see it skipping around the rocks of the bottom.

CODE	LENGTH	PCS/BAG
187-41-30_	3.7 cm	12

**NEREIS**

Small lure for Light Rock Fishing with a great potential. The compact body allows you to perfect rig it and the many small legs will produce countless vibrations. The super thin and ultra mobile tail is highly efficient and reminds a small worm trying to find shelter inside the sea bottom. During the field tests it has been proved to be outstanding, saving the day in some desperate situations.

CODE	LENGTH	PCS/BAG
187-41-50_	5 cm	12

### DANCER FROG

Frog imitation with hollow collapsible rubber body. So realistic and so effective for surface fishing, it casts very well and, once in water, it moves very naturally. Silicone skirts imitate the legs without creating snagging problems, so you can use the frog between weeds. The chemically sharpened double hooks are so strong to allow to literally "extract" fish from heavy covers. The body has an internal rattling system to increase to the max the attracting power, specially when it lands on thick covers or hits reed's walls. Nevertheless, the rattling system is removable to increase lure's buoyancy and visibility above water. Available in five colours, each one in three different sizes: 45 mm x 7 g, 55 mm x 14 g and 65 mm x 16 g.

The door to remove internal rattle is located on belly side.

CODE	SIZE	WEIGHT	COLOUR

**POWER MINNOW SERIES**

POWER MINNOW FORK TAIL

POWER MINNOW HUMMER TAIL

POWER MINNOW CURLY TAIL

The inner part of the body features an holographic core that gives a true 3D effect as you never saw before. The holo core is tubular and so predators can detect it from whatever position. The normal holographic inner foils used on cheaper baits cannot allow this.

The big 3D eye is not a new feature on a soft bait. The Rapture innovation has been the eye positioning: between the main soft plastic body and an outer soft transparent skin. In this way the bait can be used again and again without risking to lose its eyes.

Designed to perfection, the Power Minnow is one of the most realistic baitfish imitations on the market. Featuring three different tailed models in two sizes: a tapered split tail model, a tantalizing spiral tail and a kicking thumper tail. Featuring also an holographic core, and amazingly correct detailing, all of these elements are incorporated into a soft yet durable body construction that enables the Power Minnow to come to life with the slightest movement. Available in 5 incredible colours, the Power Minnow is also available in both 3-inch and 4.5-inch sizes.

(1) PERCH (2) NATURAL SHAD (3) BROWNIE (4) CLOWN CHARTREUSE (5) OCEAN SHINER

# SWIMMY

## SWIMMY

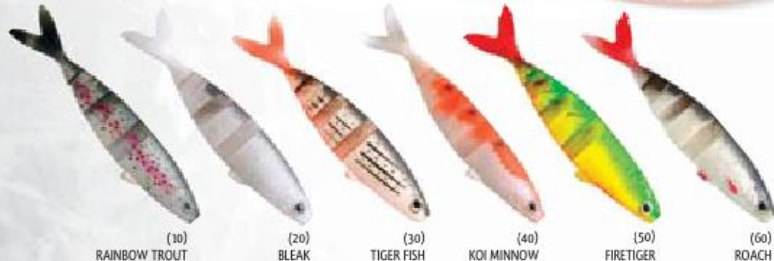

The Swimmy is a soft swimbait made of soft rubber with a specific shape to make its swimming incredibly realistic. The Swimmy shows all its enticing characteristics during the retrieve, even with a linear and slow retrieve, it can achieve the realistic look of a forage fish. Available in 3 sizes: 90, 120, 150. Suggested Techniques: texas rig, carolina rig, jig head, down shot.

CODE	SIZE	PCS/BAG
187-14-0__	9 cm	4
187-13-0__	12 cm	3
187-12-0__	15 cm	2

## SWIMMY RIGGED

The Swimmy Rigged is a revolutionary lure combining all the benefits of soft bait with the simplicity of use typical of a hard bait. The soft silicone body is scented and equipped with a ventral genuine VMC treble hook. Housed inside the body there is a polycarbonate skeleton that supports the lip. Really interesting, in addition to the jointed body, is the tail placed in a horizontal position to increase movement on the fall.

(10) RAINBOW TROUT (20) BLEAK (30) TIGER FISH (40) KOI MINNOW (50) FIRETIGER (60) ROACH

## DANCER PERCH

Perch and roach are natural preys for many fresh water predators such as pike, zander, black bass and catfish. Rapture has introduced some perfect imitations with a sinking action, created from the softest materials and with a perfect swimming action. In 2012 Rapture designed a 5 sections soft bait of just 12cm (34g) to complete the existing Dancer family and that can be easily used even with common spinning rods and reels. The colours and details have been carefully selected to give you great success with the big predators.

187-03-202	20 cm	120 g	Roach	5/0	1

**NATURAL EFFECT** *System* **LIVE TAIL ACTION**

## DANCER PIKE

This brand new soft lure has been designed for the big predators which live in our freshwaters as Pike, Catfish and Zander. The particular design of the body combined with the softest materials guarantee a perfect movement and the right sinking rate. The colours and details have been carefully selected to achieve maximum performance, while the tests developed with our collaborators have given impressive results.

**NATURAL EFFECT** *System* **LIVE TAIL ACTION**

## CREATURE SHALLOW DIVER

Famous eel imitation now available in 2 smaller sizes (15 and 20 cm) and thus lighter (20 and 30g) that can be easily used with common medium spinning rods and reels. 6 very nice colours able to attract many predators in fresh water mainly but also in salt water. Stability and swimming action are really good and lifelike. Predators attack this lure when retrieved steady or when jumping it from the bottom to the surface.

## DANCER CREATURE

Great silicon lures specifically for Pike, Catfish and Zander fishing. The Dancer Creature is an imitation of a distressed eel, and is made from soft silicon rubber with a special elongated and spiral shaped tail. Using this lure with a slow and regular retrieve develops an incredibly natural movement.

## NEW BASS JIG

The Bass Jig is specifically designed for fishing in heavy cover and is fitted with a this high efficient weed guard. It is anyway possible to partially or totally remove the weed guard when you need to fish in open water or light cover. It is equipped with an articulated skirt made of three kinds of material (thin, medium and thick) and with two longer appendices coloured in contrast colour. Definitely a competition skirt jig.

CODE	WEIGHT	HOOK SIZE	PCS/BAG

188-12-51_	3/8 oz (10 g)	3/0	1
188-12-52_	1/2 oz (14 g)	4/0	1

## NEW SPEEDY JIG

The Speedy Jig is a flipping jig with an appealing lead fitted with two 3Dglass eyes that add a realistic touch to the bait. The fine-cut skirt deliver pulsing that will not fail to attract hungry predators from all around. Equipped with Powerpoint carbon hooks, chemically sharpened.

CODE	WEIGHT	HOOK SIZE	PCS/BAG
188-26-0_	7 g	1/0	2

## NEW QUICK JIG

Movement, colour, vibrations and sound waves caused by the contact with the bottom. An appealing mix of messages which can be sent to the bass or pike with a skilful use of rod and reel. It's the unique job done by Quick Jig with its 10 gram's head and with the skirt made from elastic monofilaments. But the real advantage created by Rapture Team is the interchangeability of the hook, a size 4/0 Super Lock linked through a split ring. A big plus which widens the chances of success, because it enables the application of different hooks or their simple replacement when the point sharpness is down.

CODE	WEIGHT	HOOK SIZE	PCS/BAG
188-26-0_	10 g	2/0	1

## TUNGSTEN FINESSE RUB JIG

When a finesse technique is a must, the TG Finesse Rub Jig is the perfect choice. Featuring a compact, tungsten compound head with a 90° angled line tie and weedguard, the TG Finesse Rub Jig also comes equipped with a precision-cut silicone skirt with longer material on the underside, while the top end flares with a natural lifelike motion.

## POWER ROUND JIGHEADS

**POWER POINT** LURE  
CHEMICALLY SHARPENED CONE POINT RETAINING SYSTEM

Our Round-head lead jigs are great for use with all soft plastic lures and they can give you superior results if used with Rapture Tournament or Live Action Lures. Hooks shank are provided of lead barb that will hold the soft bait into position without break it.

The standard 90° eye is perfect for vertical jigging and many other applications. Use them as they are or custom paint them with the colours you think will give you an advantage. The weight of the Power Jig Heads is marked in the lead so it will last forever.

200-54-020	02	10

### CARBON COATED LEADERS

Brand new wire leader with exceptional features. The core is composed of a weave of high quality steel wire, to which are added carbon wire using a particular and completely new building technique. The addition of carbon fibers allows a greater tensile strength if compared to common wires of same diameter and greatly improve the smoothness of hooklength. The final result is a more natural presentation of the bait that can dramatically increase your catch rate. The swimming action of lures and of dead baits (mort manié) will not be affected in a negative way.

CODE	COLOUR	STRENGTH	LENGTH

### CARBON COATED LEADERS

#### LOOP/ROLLING SWIVEL WITH SNAP

Carbon Coated Leader designed to build rigs and leaders. At one end has a loop while at the other end it has a rolling snap swivel. To preserve the unique qualities of this leader no tube have been used. We tied the leader using the same lightweight wire material to obtain a professional and durable effect.

# READY TO USE WIRE LEADERS

Wire Leader assembled in various combinations for the fishing rigs constructions.

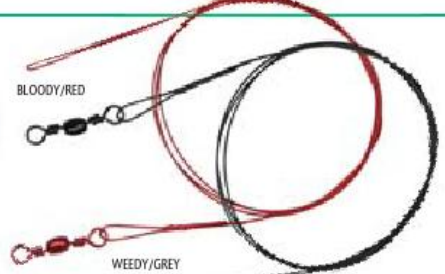

## WIRE LEADER

Nylon coated high resistance steel wire. Ideal for large predators fishing. We developed a new series of two virtually invisible in water colours: the Bloody (Red) and Weedy (Black). BLOODY WIRE is red, the first color vanishing underwater and also simulating a trace of blood. Perfect colour choice for both fresh and salt water. WEEDY WIRE is black and it is used in all those waters where there is rich vegetation. The package includes steel tubes.

CODE	COLOUR	STRENGTH	LENGTH
188-75-015	Bloody/Red	15 lbs	10 m

188-95-008	8.0mm	65	10

**SPLIT RING PLIER**

Stainless steel plier equipped with rubber handles to always grant a perfect grip. This plier is indispensable to open the split rings for substitution of trebles.

CODE	DESCRIPTION
101-46-050	Split Ring Plier

**MULTI PLIER**

Stainless steel multipurpose plier equipped with rubber handles to always grant a perfect grip. They can be used both in salt and fresh water.

CODE	DESCRIPTION
101-46-040	Multi Plier

**CUTTING PLIER**

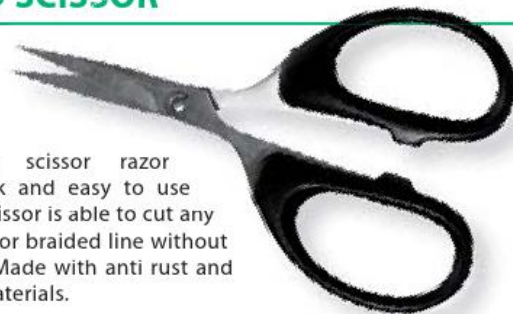

High quality plier that features a side cutter able to cut wire traces and trebles, necessary to cut the point of the hook or treble to remove it reducing to minimal the risks for the fish. Quick and easy to use Rapture Cutting Plier is fitted with rubber handle to provide a comfortable and secure grip and a special finish to prevent from rusting.

CODE	DESCRIPTION
101-46-010	Cutting Plier

**BRAIDED SCISSOR**

High quality scissor razor sharpened. Quick and easy to use the Rapture Scissor is able to cut any monofilament or braided line without any problem. Made with anti rust and long lasting materials.

CODE	DESCRIPTION
101-46-030	Braided Scissor

**SEA MASTER PLIER**

Stainless steel pliers, perfect for the toughest jobs in fresh or salt water. The handle is equipped with ergonomic and non-slip soft plate. Can be used to close crimps of various diameters and also to cut the tougher traces or lines. Comes with black cordura carry case which can be fitted to the belt.

CODE	DESCRIPTION
101-46-300	Sea Master Plier

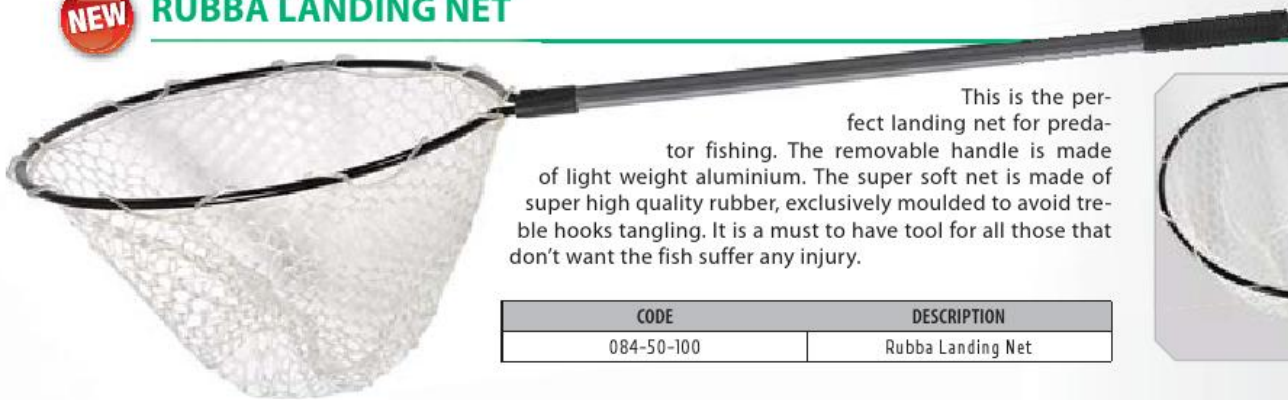

**SEA RIDER PLIER**

Stainless steel pliers, perfect for the toughest jobs in fresh or salt water. Particularly compact, are essential in unhooking operations of large predators, the handle feature a non-slip grip which is particularly comfortable. The high-strength material used for the jaws can easily cut the tougher wires or lines.

CODE	DESCRIPTION
101-46-350	Sea Rider Plier

**NEW** RUBBA LANDING NET

This is the perfect landing net for predator fishing. The removable handle is made of light weight aluminium. The super soft net is made of super high quality rubber, exclusively moulded to avoid treble hooks tangling. It is a must to have tool for all those that don't want the fish suffer any injury.

CODE	DESCRIPTION
084-50-100	Rubba Landing Net

**MAXEL FISH GRIP**

Superb anodized aluminium lip grip that groups characteristics of lightness and strength. Ergonomic high quality EVA handle, with built in 25lbs hand scale and easy to use.

CODE	DESCRIPTION
101-47-000	Maxel Fish Grip

**PRO FISH GRIP**

Stainless steel rugged lip grip for salt water use. Super reliable in every weather condition.

CODE	DESCRIPTION
101-46-450	Pro Fish Grip/30 lbs SS

**FISH GRIP**

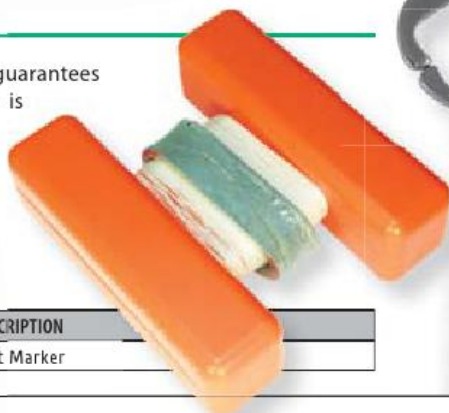

Essential tool for catch and release. It will hold your prey without harming it. Lightweight but sturdy and reliable.

CODE	DESCRIPTION
101-46-400	Fish Grip/25 lbs

**SPOT MARKER**

The clever H shape design guarantees the marker will stay where it is put and always floats directly above the lead. A whopping 25m of line is attached to the lead strip and the high visibility orange plastic make it easy to spot at distance.

CODE	DESCRIPTION
101-46-200	Spot Marker

## POWER POINT ASSIST HOOK

High carbon percentage assist hooks, lightweight and strong, with chemically sharpened points and tied with an high abrasion resistant braided line. The forged split rings allow an easy application to the jigs. Whilst all the components have been tailored to the hook's strength, thus to offer the best performances. Suited to big fish such as dentex, Jacks and snappers.

# Asami

## ASAMI CASTING JIG

The aerodynamic shape reduces air friction during launch while maintaining a stable flight, making this lure capable of reaching extreme distances.

Asami Jigs also have excellent action in water and can be retrieved steady or slowly jugged. Ideal for fishing from the shore, from piers or rocks, as well as for fishing offshore close the surface or jigging. Seabass, jacks, trevallies and barracudas are between the species that love this lures. All jigs come with original VMC hooks connected by a forged split ring for maximum strength.

## JIG ROLL

A practical organizer to carry and store lead fish lures of all sizes. Like all items Rapture luggage these too are constructed with highly resistant and washable materials.

CODE	DESCRIPTION	SIZE
048-53-350	Jig Roll Organizer	52x27 cm

## ASAMI MADAI JIG

Special jig developed by Japanese pros. The shiny color effect of this metal jig, in combination with the erratic movement of the soft plastic octopus, make it irresistible to many species, which until few years ago, was possible to catch if not using live bait. It combines the powerful action of the jig with the winding movement of the octopus which is a recognized food for many predators. The species you can target using this lure are virtually countless: when you feel the strike you never know what is down there on the opposite side of the line.

# Asami

## ASAMI INCHIKU

Series of INCHIKU lures available from 70g to 100g. Inchiku fishing is a more effective evolution of vertical jigging. The most surprising effect of this new technique imported from Japan is its versatility: as a matter of fact this technique, unlike vertical jigging, can be practiced also from the shore. What you have to do is to let the bait sink to the bottom and start working it with a steady jerk action, depending on the situation you can use short or longer jerks action but always with the same rhythm.

**NEW** DOUBLE RUCKSACK

This new backpack made of 1200 denier Cordura features a new solution that make it ideal for long fishing session and for travelling. The lower part can be detached to reduce the weight and the size of the backpack and can be used as a waist bag. The lower bag comes with

three modular box (27cmx18cm) which may contain lures and all the accessories you need. The backpack is very roomy, with two independent compartments, external pockets, bottle holder and a padded back for total comfort.

CODE	DESCRIPTION	SIZE
048-61-180	Guidemaster Pro Double Rucksack	35x55x22 cm

**NEW** RUCKSACK

Big capacity rucksack. We designed it with a lot of care for accurate internal room division. The main pocket is accessible from both front and rear through 2 double rugged zippers, this solution allows a faster research of your stuff and better storing for bulky material. Three other external pockets add even more space for your stuff.

CODE	DESCRIPTION	SIZE
048-61-190	Guidemaster Pro Rucksack	33x46x23 cm

**NEW** BOX BACKPACK

Small sized back pack, which is surprisingly able to contain many, many things. The lower room holds four plastic lure boxes (27x18x4 cm), while the upper one is designed to store reels, gloves and many other accessories. On the front there are two pockets for the documents, polarized sunglasses, pliers and maybe a small box for little things. The back side and shoulder straps are well padded. Both sides have the usual net pocket.

CODE	DESCRIPTION	SIZE
048-61-170	Guidemaster Pro Box Backpack	30x20x40 cm

**NEW GEARBOX**

CODE	DESCRIPTION	SIZE
048-61-130	Guidemaster Pro Gearbox	30x30x30 cm
048-61-140	Guidemaster Pro Gearbox XL	38x35x32 cm

Compact bag made of tear resistant and washable 1200 denier Cordura. Equipped with 2 large side pockets and external plier holders. It can contain a large number of lures and everything you need for a long fishing trip. The bottom of the bag is waterproof to keep away the content from mud or water. Including 4 modular boxes (27x18 cm). The XL is designed to accommodate even more gear and bigger lures, it includes 4 modular boxes (38x18cm).

**NEW HIGH TECK LURES BAG**

Stylish bag that can house all types of lures and equipment. The main pocket hosts five modular boxes (27x18cm) for lures, while the front pocket is equipped with a smaller box (18x13cm). Hard and waterproof base, two external pockets on the front and one on the top, padded shoulder strap. The perfect choice for the people who loves to have all the tackle well organized in the same bag.

CODE	DESCRIPTION	SIZE
048-61-150	Guidemaster Pro High Teck Lures Bag	33x30x27 cm

**NEW DOUBLE TECK LURES BAG**

This new bag features many new solutions, perfect for people that loves to carry a big quantity of lures. Equipped with six modular boxes (27x18cm). The cover is removable and can be used as secondary bag to store spare spools, reels and many other products thanks to the adjustable inner dividers. Three outside pockets, waterproof base and padded shoulder strap.

CODE	DESCRIPTION	SIZE
048-61-200	Guidemaster Pro Double Teck Lures Bag	38x24x27 cm

**NEW ZIP GEARBAG**

Simple but extremely effective, this multi-purpose bag is destined to carry extra clothing, waders, reels and lure boxes, to be stored into the main compartment and quickly secured by a single zipper. The front, zippered room, can contain the rain suit, while the two smaller, rectangular pockets enable to store further accessory boxes. Twin carry handles, joined by Velcro strap, plus the padded shoulder's strap which is useful for long walks.

CODE	DESCRIPTION	SIZE
048-61-160	Guidemaster Pro Zip Gearbag	22x42x44 cm

**OPEN TECK LURES BAG XL**

Multi purpose compact bag for lures and accessories transport. Three large modular boxes (35.5x22cm) in the main unit and a smaller box (27x18cm) in the front pocket. Made using 1500 denier cordura, rigid shock and waterproof base.

CODE	DESCRIPTION	SIZE
048-61-100	Open Teck Lures Bag XL	37x23x20 cm

**OPEN TECK LURES BAG L**

**EXPEDITION LURE BAG**

Practical lure bag supplied with 4 tackle boxes.

CODE	DESCRIPTION	SIZE
048-61-090	Expedition Lure Bag	28x8x19 cm

## TRAVEL BAG

Extremely light but resistant travel bag, ideal to take with you during yours fishing (but not only) trips abroad. Wide range of pockets for a more logical division of content and extendable handle and wheels to transform this bag in a super handy trolley. The rigid bottom part allows to store fragile stuff and even travel rods, typically made in several sections.

CODE	DESCRIPTION	SIZE
048-60-190	Guidemaster Travel Bag	85x38x44 cm

## FLAT PACK

Small sized shoulder bag with large central pocket divided into 3 sections where it is possible to store several small modular boxes containing different tackles and lure, and equipped with double zipper and front mesh pocket with 3 spool pegs. Despite its small size it can host a great number of fishing tackles and allows the angler to always have them at hand without hindering movement.

CODE	DESCRIPTION
048-60-160	Guidemaster Flat Pack

## FLAT PLUS

Handy bag that can be worn over the shoulder or waist or in both ways. Despite its compact size provides enough space to contain a large amount of fishing tackles. 2 side pockets, one main pocket divided into 5 sections that really has space enough for a large quantity of fishing tackles, and equipped with front pocket and mesh.

CODE	DESCRIPTION
048-60-150	Guidemaster Flat Plus

## PRO SERIES SOFTSHELL JACKET

TECHNICAL SPECIFICATIONS
Fabric: 100% 3 layers Soft-Shell
Water Resistant
Breathable
Windproof
Adjustable cuffs

The Pro Team Jacket is a three layered soft shell jacket. The outer fabric is windproof and water resistant, the middle layer offers an high breathability whilst the inner polar fleece guarantees the maximum

comfort and thermal insulation keeping you warm and dry. Soft shell is extremely hard wearing and fantastically flexible fitting to your body without constricting.

CODE	DESCRIPTION	SIZE
044-20-100	Pro Series Soft Shell Jacket	M
044-20-200	Pro Series Soft Shell Jacket	L
044-20-300	Pro Series Soft Shell Jacket	XL
044-20-400	Pro Series Soft Shell Jacket	XXL

## NEW AQUA-T LIFE VEST

This jacket is a floating vest that will keep you on top if you fall into the water. Nevertheless, it cannot be considered a life jacket, but only a buoyancy aid. It is built with rugged nylon and stuffed by a super buoyant foam core. Several pockets have been added for your fishing convenience and two bands of reflective material have been placed close to the shoulders, very useful for night fishing. Suitable for people up to 85 kilos weight, it's perfect for boat fishing, belly boat fishing and in all the situations where you are in the middle of the water, with your waders or fishing from a sea cliff.

CODE	DESCRIPTION	SIZE
041-81-000	Aqua-T Vest Jacket	One Size

## PATAGON FISHING VEST

Fishing jacket entirely made with an extremely lightweight mesh fabric. On the shoulder a neoprene insert helps the comfort and distributes the weight. Inside the pockets you can store all the needed material and they're made with a special waterproof fabric to keep your tackle dry.

CODE	DESCRIPTION	SIZE
041-40-300	Patagon Fishing Vest	XL
041-40-400	Patagon Fishing Vest	XXL

## PRO SERIES POLAR FLEECE

**NEW** T-SHIRT RAPTURE STYLE

The Pro Team Hooded Fleece is made from a soft, breathable and wind-resistant non-pilling polar fleece. The hood can be adjusted through a drawstring. This fleece is ideal to wear under waterproofs for extra warmth or as a top layer in its own right.

TECHNICAL SPECIFICATIONS	
Fabric: 100% polar fleece 200g	Large frontal pocket
Wind resistant	Elasticated cuffs

CODE	DESCRIPTION	SIZE
044-25-100	Pro Team Polar Fleece	M
044-25-200	Pro Team Polar Fleece	L

CODE	DESCRIPTION	SIZE
044-00-100	T-Shirt Rapture Style	M
044-00-200	T-Shirt Rapture Style	L
044-00-300	T-Shirt Rapture Style	XL
044-00-400	T-Shirt Rapture Style	XXL

To see beyond all physical barriers has always been one of the major dreams for the human species, which the scientific discoveries of the last century have widely brought to reality. Also the investigation of underwater's world is no more a problem, since we have the echo sounders, but those instruments are destined to fit on to the boats. Today such material limit has been deleted, thanks to portable Fish Finder's development, which don't require any anchorage nor power cable

supply, so that they can be used on board of the smallest boat, on a dinghy, on kayak, on belly boat or simply... in a pocket of your fishing vest when you fish from the bank! Fish Finder is surely an easy name, but it doesn't tell the whole truth, because finding fish is just a portion of the activities which can be done with it, while also the detection of submerged features, obstacles, aquatic vegetation and bottom profile are equally as important to catch them.

## NEW LUCKY FISH FINDER IOS/ANDROID - WIRELESS

Special model which is located on top of the Fish Finder range, as it takes advantage from Wireless technology to send the information directly to your smartphone, which therefore replaces the usual receiver apparatus. The instrument is just made of a floating sounder, which works thanks to a rechargeable 3,7V incorporated battery, whose autonomy is about 5 hours; it gets power through a cable, supplied with the product, which can be connected to any USB port. The maximum range to get wireless data is around 50 metres, while the water's depth goes from a minimum of 40 centimetres to a maximum of 45 metres, with intervals of 10 centimetres. Compared to the other two models, this Fish Finder also gives the water's temperature (°C or °F), so that the user can easily evaluate his fishing chances.

CODE	DESCRIPTION
100-05-300	IOS/Android Wireless

## NEW LUCKY FISH FINDER - WIRELESS

The absence of cables identifies this Fish Finder, which provides the same information of Cable model, without any physical connection between the sounder and the receiver. Thanks to the Wireless technology, all data arrive directly to the display through radio waves, with a maximum operating distance of 30 metres. The Fish Finder is made of a floating sounder and a receiver, which features an antenna. In order to avoid that current or wind could push the sounder away from the fishing area, it should be linked by a strong line. The sounder's vertical range goes from the minimum of 70 centimeters up to the maximum of 40 metres. The receiver works with 4 alkaline batteries type AAA of 1,5V (not supplied), while the sounder is supplied with 1 pc. CR2032 Lithium 3V battery. The box contains a lanyard to safely hang the instrument.

CODE	DESCRIPTION
100-05-200	Fish Finder - Wireless

## NEW LUCKY FISH FINDER - CABLE

Within the range of Fish Finders, this is the basic model. The instrument is made of a sounder and a float destined to keep it on water's edge. A 7 metres long cable connects it to the receiver, whose sizes are quite handy and which is supplied with a lanyard to hang it. On the LED display it's possible to read a number of information about the below aquatic environment, which is scanned by the sonar to find the depth (from a minimum of 70 centimetres to a maximum of 100 metres), the nature and the hardness of the bottom, the existence and density of vegetation, plus, of course, the presence of fish and their swimming depth. The Fish Finder works with 4 AAA alkaline 1,5V batteries (not supplied), and is designed to operate both in fresh and salt waters, where it's highly recommended to rinse it in tap water after each fishing session.

CODE	DESCRIPTION
100-05-100	Fish Finder - Cable

## AQUAPOWERS TROLLING MOTOR

Range of high quality and reliable electric motors. Very comfortable thanks to the tilting head with extensible tiller and extremely stout thanks to stainless steel stem plate and strong aluminium bracket. Very practical thanks to the minimum pack volume when removed for storage. Available in 3 thrusts for best fitting to all bodies of water normally faced by different fishing methods for which can be used. They come with a spare propeller and have a two-year warranty against manufacturing defects.

CODE	THRUST	VOLTAGE	REC. AH	MAX CURR.	SPEEDS	WEIGHT KG
100-02-000	34 lbs	12V	100AH	32	5F / 2R	9.50
100-02-010	44 lbs	12V	120AH	42	5F / 2R	12.00
100-02-020	54 lbs	12V	120AH	50	5F / 2R	12.25

### TECHNICAL SPECIFICATIONS

Durable and strong Aluminum bracket	Weedless 3-blade propeller
Stainless steel shaft	Spare propeller
Corrosion resistant	Input DC 12V
Adjustable shaft height	Packable to small size
Integrated battery meter	2 years warranty
Tilting Head with Extendable Tiller	
5 forward/2 reverse speeds
